

# SOUTH KENT COAST CCG

## **Analysis of Deprived Areas**

In the most deprived decile for Kent

## January 2016

KCC Public Health is taking a new approach to reducing health inequalities in the county, by producing focussed analysis of LSOAs in the most deprived decile. Multivariate segmentation techniques have been used to identify different 'types' of deprivation in Kent. This report shows our analysis of the most deprived areas in the South Kent Coast CCG Area. For more information on the rationale of this approach and our methods, please see the full report.

Dr Wikum Jayatunga: Public Health Registrar (<u>wikum.jayatunga@kent.gov.uk</u>) Rachel Kennard: Senior Intelligence Analyst (<u>rachel.kennard@kent.gov.uk</u>) Natasha Hobbs: Public Health Information Officer (<u>natasha.hobbs@kent.gov.uk</u>) Correspondence to: Rachel Kennard

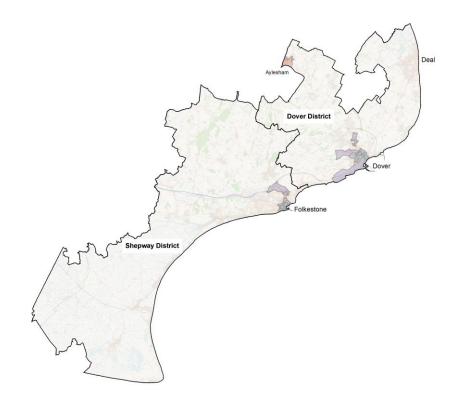

## Background

South Kent Coast CCG covers the areas of Shepway and Dover, which include the main towns of Folkestone and Dover respectively. Deprivation statistics are higher than the Kent average and the England average, with generally worse health outcomes. The towns have an important location on the South Coast of England, with major transport routes between mainland Europe and London. 19 LSOAs feature in the most deprived decile for deprivation in Kent, 8 in Shepway (around Folkestone) and 11 in Dover (around Dover town). There is another pocket of deprivation in the village of Aylesham.

### POPULATION DISTRIBUTION

• High numbers of young adults and young children

### **KEY FOCUS AREAS:**

Education and employment opportunities for young

people

### MAIN ISSUES

### Characteristics

- Young adults in private rented accommodation
- Particularly high levels of shared dwellings and overcrowding
- Particularly poor living environment with high crime rates
- Low incomes
- High levels of out-of-work benefit claimants
- Poor scores for education
- Particularly high levels of movement/ transiency

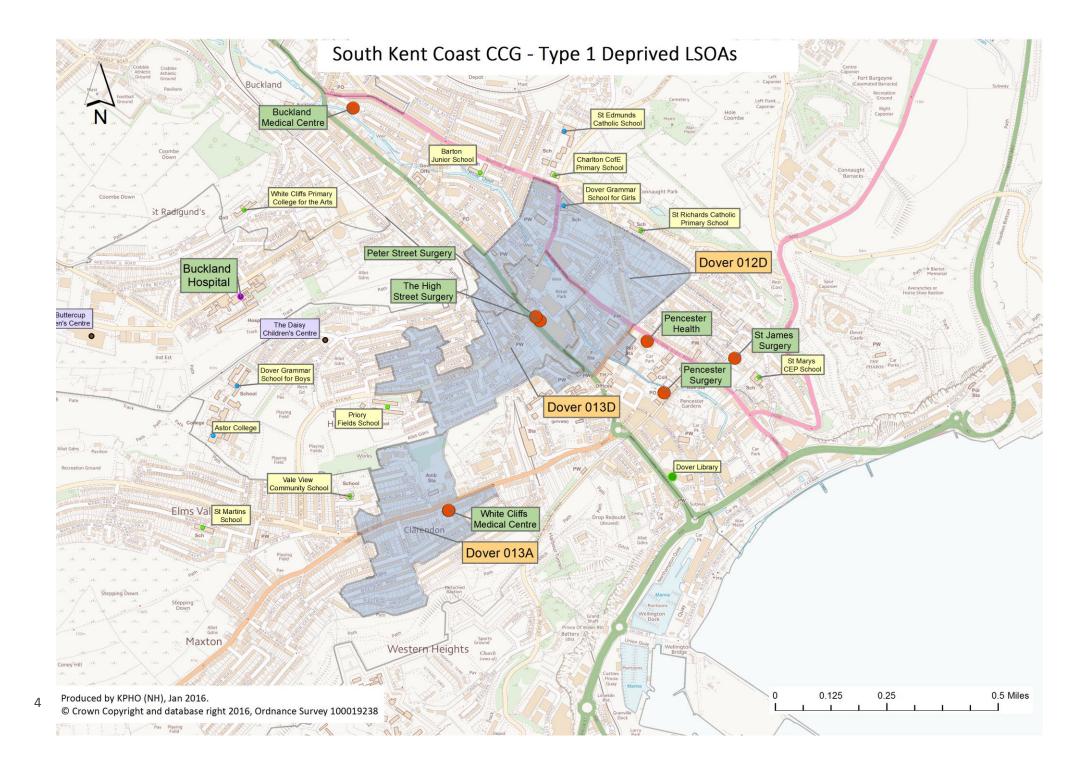

### Health Risks/Behaviours

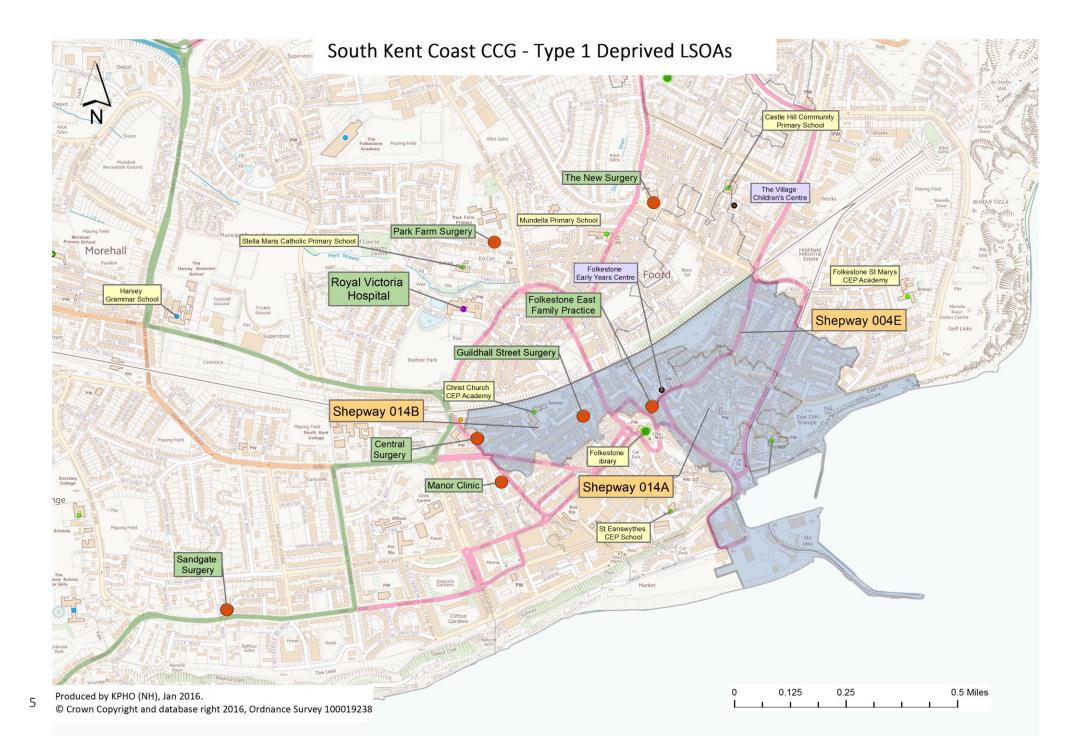

- High smoking prevalence
- Low levels of wellbeing

### **Health Outcomes**

- High premature mortality rates
- Alcohol-related premature mortality and from 'external causes' particularly high

Prepared by KPHO (RK), Jan 2016

### **POPULATION DISTRIBUTION**

• Low population size makes comment on the population pyramid difficult

### **KEY FOCUS AREAS:**

### **Education and qualifications**

### MAIN ISSUES

**Deprived rural households** 

\*Please note that this analysis is based on a <u>single LSOA</u>, meaning wide confidence intervals for some measures.

### Characteristics

- Low educational attainment and lack of qualifications
- Fewer out-of-work benefit claimants than other deprived groups
- Car ownership is higher than for other deprivation types
- Better living environment and lower crime rates than many other deprived areas
- Low levels of movement/transiency

### Health Risks/Behaviours

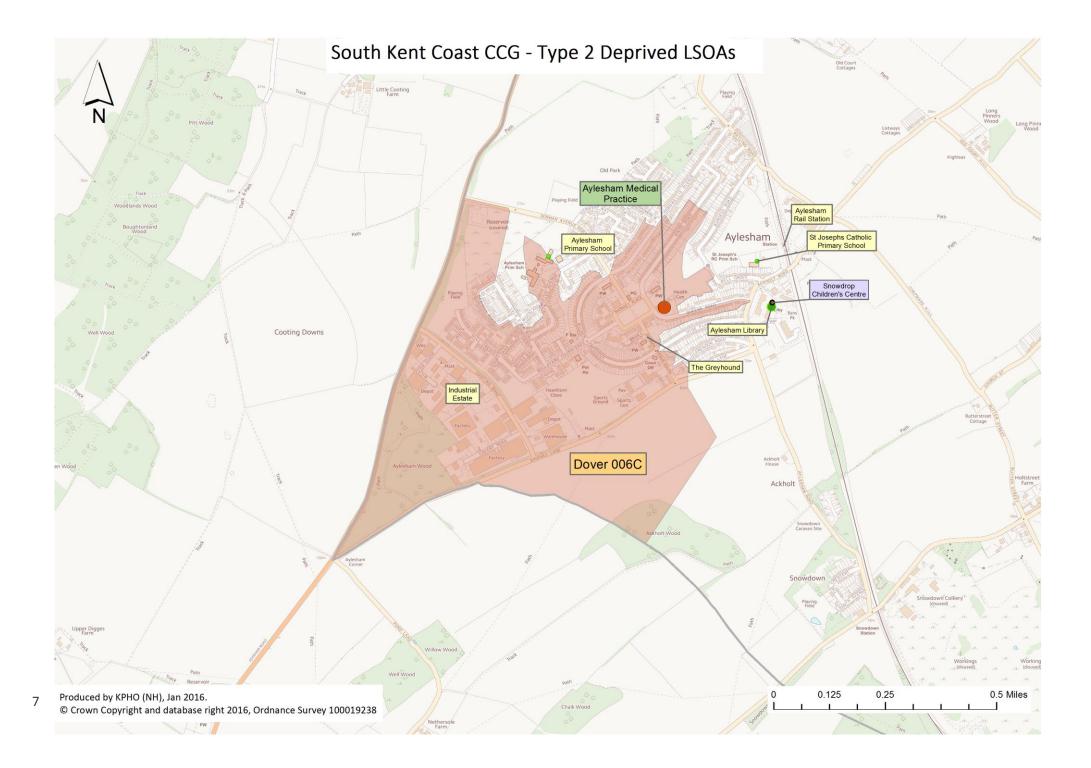

- Fairly high smoking prevalence
- Low levels of wellbeing

#### **Health Outcomes**

6

- Particularly high rates of disability ('activities limited a lot')
- High premature mortality

Prepared by KPHO (RK), Jan 2016

## **GP** Practices

### **GP** Practices Serving Deprived LSOAs: Recorded Disease Prevalence

For the GP practices that serve LSOAs in the most deprived decile, we have analysed the recorded disease prevalence from QOF data (Quality Outcomes Framework). Note that the data shows recorded disease prevalence, and does not account for undiagnosed disease in the community.

• High recorded prevalence of epilepsy and Chronic Kidney Disease in many of these practices.

GP Practice		Asthma	Atrial Fibrillation	Cancer	Coronary Heart Disease	Chronic Kidney Disease	COPD	Diabetes	Heart Failure	Hyper- tension	Stroke & TIA	Mental health	Dementia	Epilepsy	Depression	Learning Disabilities
