

KENT PHARMACEUTICAL **NEEDS ASSESSMENT**

Contents

Executive Summary	7
1 Introduction	9
1.1 Purpose of a pharmaceutical needs assessment.....	9
1.2 Health and Wellbeing Board duties in respect of the Pharmaceutical Needs Assessment	9
1.3 Pharmaceutical services	10
1.3.1 Pharmaceutical Services Provided by Pharmacy Contractors	10
1.3.2 Pharmaceutical Services Provided by Dispensing Appliance Contractors.....	13
1.3.3 Pharmaceutical Services Provided by Doctors	14
1.3.4 Local Pharmaceutical Services.....	14
1.4 Locally Commissioned Services	14
1.5 Other NHS services	15
1.6 How the Assessment was Undertaken	16
1.6.1 Pharmaceutical Needs Assessment Project Advisory Group (PNA Steering Group)	16
1.6.2 Pharmaceutical Needs Assessment Localities	16
1.6.3 Patient and public engagement.....	16
1.6.4 Contractor engagement	21
1.6.5 Other Sources of Information.....	25
1.6.6 Consultation – section to be completed following public consultation period	26
2 Overview of Kent.....	26
2.1 Introduction - Kent Overview	26
2.2 Population	29
2.3 Ethnicity	33
2.4 Household language	36
2.5 Religion	37
2.6 Index of Multiple Deprivation.....	38
2.7 Births and Deaths	41
2.8 Life Expectancy	43
2.9 People with Disabilities	44
2.10 Households	46
2.11 Car Ownership	47

2.12 Economic Activity	47
2.13 Sexual Orientation	49
2.14 Carers.....	50
2.15 Traveller and Gypsy Communities.....	51
2.16 Prisoners and Offenders	51
2.17 Homeless and Rough Sleepers	53

3 General health needs of Kent 54

3.1 Kent Joint Strategic Needs Assessment.....	54
3.1.1 Cancer	55
3.1.2 Cardiovascular Disease ⁽¹¹⁾	56
3.1.3 Diabetes.....	56
3.1.4 Mental Health.....	57
3.1.5 Respiratory Disease	58
3.1.6 Sexual Health	58
3.1.7 Alcohol ⁽³⁴⁾	59
3.1.8 Obesity.....	60
3.1.9 Smoking ⁽³⁷⁾	61
3.2 Kent and Medway's Sustainability and Transformation Plan.....	61

4 Identified patient groups – particular health issues 63

4.1 Age	64
4.2 Disability	65
4.3 Pregnancy and maternity	65
4.4 Race	65
4.5 Gender	66
4.6 Sexual orientation.....	67
4.7 Gender re-assignment.....	67
4.8 University Students.....	67
4.9 Prisoners and Offenders	68
4.10 Homeless and rough sleepers	69
4.11 Traveller and gypsy communities.....	69
4.12 Refugees and asylum seekers.....	70
4.13 Military veterans.....	70

4.14 Visitors to Sporting and Leisure Facilities in the County	71
4.15 Construction workers	72

5 Provision of pharmaceutical services 72

5.1 Necessary services: Current provision within the Health and Wellbeing Board's Area	72
5.1.1 Access to Premises	74
5.1.2 Access to Essential Services and Dispensing Appliance Contractor Equivalent Services	77
5.1.3 Access to Community Pharmacy Consultation Service	78
5.1.4 Access to the New Medicine Service	79
5.1.6 Access to the National Influenza Adult Vaccination Service	79
5.1.7 Dispensing Service Provided by Some GP Practices	81
5.1.8 Access to Pharmaceutical Services on Public and Bank Holidays	81
5.2 Necessary Services: Current Provision Outside the Health and Wellbeing Board's Area	81
5.2.1 Access to Essential Services and Dispensing Appliance Contractor Equivalent Services	81
5.2.2 Access to Community Pharmacy Consultation Service, New Medicine Service, and flu vaccination ...	81
5.2.3 Dispensing Service Provided by Some GP Practices	82
5.3 Other Relevant Services	82
5.3.1 Other relevant services within the Health and Wellbeing Board's Area	82
5.3.2 Other Relevant Services Provided Outside the Health and Wellbeing Board's Area	87
5.4 Choice with regard to obtaining pharmaceutical services	87

6 Other NHS services 88

6.1 Hospital pharmacies	88
6.2 Personal administration of items by GPs	89
6.3 GP out of hours service	89
6.4 Locally commissioned services – Kent County Council	91
6.5 Urgent care centres	92
6.6 Prisons and Secure Training Centre	94
6.7 Palliative Care Service	94
6.8 Substance Misuse Service	94

7 Health Needs that can be Met by Pharmaceutical Services 95

7.1 Need for drugs and appliances	95
7.2 Alcohol and Drug Use	95

7.3 Cancer	96
7.4 Long-term conditions	96
7.5 Obesity	97
7.6 Sexual health	97
7.7 Teenage pregnancy	97
7.8 Smoking	98
7.9 Dementia	98
7.10 Healthy living	98
8 Ashford Borough Council Locality Services	99
9 Canterbury City Council Locality	124
10 Dartford Borough Council Locality	152
11 Dover Borough Council Locality	174
12 Folkestone and Hythe Locality	200
13 Gravesham Council Locality	226
14 Maidstone Borough Council Locality	252
15 Sevenoaks Locality	279
16 Swale Council Locality	304
17 Thanet Council Locality	328
18 Tonbridge and Malling Borough Council Locality	351
19 Tunbridge Wells Council Locality	374
20 Conclusions for the purpose of schedule 1 to The NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended	397
20.1 Current Provision – Necessary Services	398

20.2 Necessary Services – Gaps in Provision	398
20.2.1 Access to Essential Services	398
20.2.2 Access to advanced services	399
20.2.3 Future provision of necessary services	400
20.3 Other Relevant Services: Current Provision	400
20.4 Improvements and Better Access – Gaps in Provision	401
20.4.1 Current and Future Access to Essential Services – Present and Future Circumstances	401
20.4.2 Current and Future Access to Advanced Services	401
20.4.3 Current and Future Access to Enhanced Services	402
20.4.4 Future Access to Advanced and Enhanced Services	402
21 Appendix A – policy context and background papers	404
22 Appendix B – Essential Services	408
References	483

Executive Summary

Since 1 April 2013, every Health and Wellbeing board in England has had a statutory responsibility to publish and keep up to date a statement of the needs for pharmaceutical services for the population in its area, referred to as a 'pharmaceutical needs assessment'. Kent Health and Wellbeing board published its first pharmaceutical needs assessment in 2015, revised 2018 and has now published the second revised version in 2022.

Note: Due to the Covid pandemic the government delayed the requirement to review PNAs published in 2018 until 1 October 2022.

The pharmaceutical needs assessment will be used by NHS England when considering whether to grant applications to join the pharmaceutical list for the area of Kent Health and Wellbeing Board under The National Health Service (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended. It may be used to inform commissioners such as the Clinical Commissioning Group (CCG)/integrated Care Board (ICB) and the County Council's public health team, of the current provision of pharmaceutical services and where locally commissioned services could help meet local health priorities.

Chapter 1 sets out the regulatory framework for the provision of pharmaceutical services which, for the purpose of this document, include those services commissioned by NHS England from pharmacies and dispensing appliance contractors and the dispensing service provided by some GP practices to eligible patients. It also contains the views of residents in the county on their use of pharmacies and information provided by contractors which could not be nationally sourced.

Following an overview of the demographic characteristics of the residents of Kent in chapter 2, chapter 3 focusses on their health needs as identified from the following sources:

- The Kent Joint Strategic Needs Assessment
- Cancer in Kent: Equity Review June 2015
- Sexual Health June 2017
- Kent Sexual Health Needs Assessment September 2018
- Alcohol Needs Assessment December 2021
- National Child Measurement Analytical Report For 2019/20 academic year July 2021
- Tobacco Dependence Needs Assessment January 2019

In order to ensure that those sharing a protected characteristic and other patient groups are able to access pharmaceutical services chapter 4 identifies the specific groups that are present in Kent and their likely health needs.

Chapter 5 focusses on the provision of pharmaceutical services in Kent and those providers who are located outside of the county but who provide services to residents of the county. Services which affect the need for pharmaceutical services either by increasing or reducing demand are identified in

chapter 6. Such services include the hospital pharmacies, the GP out of hours service and the public health services commissioned from pharmacies by Kent County Council via providers.

Having considered the general health needs of the population, chapter 7 focusses on those that can be met by pharmacies and dispensing appliance contractors.

The Health and Wellbeing Board has divided Kent into twelve localities for the purpose of this document, based upon the boundaries of the district, city and borough councils. This is consistent with the Joint Strategic Needs Assessment (JSNA) and allows data to be easily collated. Each locality has a dedicated chapter which looks at the needs of the population, considers the current provision of pharmaceutical services to residents and identifies whether current pharmaceutical service provision meets the needs of those residents. Each chapter also consider whether there are any gaps in service delivery that may arise during the lifetime of the pharmaceutical needs assessment.

There are 271 pharmacies and 2 dispensing appliance contractors in the county all providing the full range of essential services. In 2020/21 84% (82.2% from current pharmacies) of all prescriptions written were dispensed by the pharmacies and dispensing appliance contractors in the county ⁽¹⁾. 84.9% (83% from current pharmacies) of prescriptions written by GP practices were dispensed by the pharmacies and dispensing appliance contractors in the county ⁽¹⁾. Some provide advanced and enhanced services as commissioned by NHS England, and some provide services commissioned by Kent County Council via KCC commissioned providers. In addition, 48 (according to 26/08/21 list from NHSE&I, 4 of which are closed according to ODS Portal) GP practices dispense to eligible patients and in 2020/21 dispensed 8.6% of all prescriptions ⁽¹⁾.

As well as accessing services from pharmacies and dispensing appliance contractors in the county, residents also choose to access contractors in other parts of England. In 2020/21 5.3% of prescriptions were dispensed outside of the county ⁽¹⁾. Whilst many were dispensed by contractors just over the border some were dispensed much further afield and reflect the fact that some residents prefer to use a distance selling premises (also known as an internet pharmacy), a specific dispensing appliance contractor or a specialist provider, with some prescriptions being dispensed whilst the person is on holiday or near to their place of work.

Access to pharmaceutical services for the residents of Kent is good and the main conclusion of this pharmaceutical needs assessment is that there are currently no gaps in the provision of pharmaceutical services.

The pharmaceutical needs assessment also looks at changes which are anticipated within the lifetime of the document. These include the predicted population growth and changes in GP opening hours. Given the current population demographics, housing projections and the distribution of service providers across the county, the document concludes that the current provision will be sufficient to meet the future needs of the residents during the three-year lifetime of this pharmaceutical needs assessment, with the exception of specific areas in two localities: Folkestone & Hythe and Ashford Localities.

The Health and Wellbeing Board has not identified any gaps in respect of securing improvements, or better access, to enhanced services in specified future circumstances in any of the twelve localities.

Based on the information available at the time of developing this pharmaceutical needs assessment the Health and Wellbeing Board has identified gaps in respect of securing improvements, or better access, to advanced services in specified future circumstances in specific areas of three localities; Folkestone and Hythe, Ashford and Maidstone.

1 Introduction

1.1 Purpose of a pharmaceutical needs assessment

The purpose of the pharmaceutical needs assessment is to assess and set out how the provision of pharmaceutical services can meet the health needs of the population of the Kent Health and Wellbeing Board's area for a period of up to three years, linking closely to the Joint Strategic Needs Assessment. Whilst the Joint Strategic Needs Assessment (JSNA) focusses on the general health needs of the population of Kent, the pharmaceutical needs assessment looks at how those health needs can be met by pharmaceutical services commissioned by NHS England.

If a person (a pharmacy or a dispensing appliance contractor) wants to provide pharmaceutical services, they are required to apply to NHS England to be included in the pharmaceutical list for the Health and Wellbeing Board's area in which they wish to have premises. In general, their application must offer to meet a need that is set out in the Health and Wellbeing Board's pharmaceutical needs assessment, or to secure improvements or better access similarly identified in the pharmaceutical needs assessment. There are however some exceptions to this e.g., applications offering benefits that were not foreseen when the pharmaceutical needs assessment was published ('unforeseen benefits applications').

As well as identifying if there is a need for additional premises, the pharmaceutical needs assessment will also identify whether there is a need for an additional service or services, or whether improvements or better access to existing services are required. Identified needs, improvements or better access could either be current or will arise within the three-year lifetime of the pharmaceutical needs assessment.

Whilst the pharmaceutical needs assessment is primarily a document for NHS England to use to make commissioning decisions, it may also be used by local authorities and the Clinical Commissioning Group/integrated care board. A robust pharmaceutical needs assessment will ensure those who commission services from pharmacies and dispensing appliance contractors target services to areas of health need and reduce the risk of overprovision in areas of less need.

1.2 Health and Wellbeing Board duties in respect of the Pharmaceutical Needs Assessment

Further information on the Health and Wellbeing Board's specific duties in relation to pharmaceutical needs assessments and the policy background to pharmaceutical needs assessments can be found in

appendix A, however following publication of the revised pharmaceutical needs assessment in 2022 the Health and Wellbeing Board must, in summary:

- Publish revised statements (subsequent pharmaceutical needs assessments), on a three yearly basis, which comply with the regulatory requirements.
- Publish a subsequent pharmaceutical needs assessment sooner when it identifies changes to the need for pharmaceutical services which are of a significant extent, unless to do so would be a disproportionate response to those changes; and
- Produce supplementary statements which explain changes to the availability of pharmaceutical services in certain circumstances.

Note: Due to the Covid pandemic the government delayed the requirement to review PNAs published in 2018 until 1 October 2022.

1.3 Pharmaceutical services

The services that a pharmaceutical needs assessment must include are defined within both the National Health Service Act 2006 and the NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended.

Pharmaceutical services may be provided by:

- A pharmacy contractor who is included in the pharmaceutical list for the area of the Health and Wellbeing Board.
- A pharmacy contractor who is included in the Local Pharmaceutical Services list for the area of the Health and Wellbeing Board.
- A dispensing appliance contractor who is included in the pharmaceutical list held for the area of the Health and Wellbeing Board; and

A doctor or GP practice that is included in a dispensing doctor list held for the area of the Health and Wellbeing Board.

NHS England is responsible for preparing, maintaining, and publishing these lists. In Kent there are 271 pharmacies, 2 dispensing appliance contractors and 48 (according to 26/08/21 list from NHSE&I, 4 of which are closed according to ODS Portal) dispensing practices.

Contractors may operate as either a sole trader, partnership, or a body corporate. The Medicines Act 1968 governs who can be a pharmacy contractor, but there is no restriction on who can operate as a dispensing appliance contractor.

1.3.1 Pharmaceutical Services Provided by Pharmacy Contractors

Unlike for GPs, dentists and optometrists, NHS England does not hold contracts with the majority of pharmacy contractors. Instead, they provide services under a contractual framework, sometimes referred to as the community pharmacy contractual framework, details of which (the terms of service) are set out in schedule 4 of the NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations

2013, as amended, and also in the Pharmaceutical Services (Advanced and Enhanced Services) (England) Directions 2013

Pharmacy contractors provide three types of service that fall within the definition of pharmaceutical services and the community pharmacy contractual framework. They are:

- **Essential services** – all pharmacies must provide these services listed below as part of the NHS Community Pharmacy Contractual Framework (the ‘pharmacy contract’).
 - Dispensing of prescriptions for medicines and appliances (both electronic and non-electronic), including urgent supply of a drug or appliance without a prescription
 - Dispensing of repeatable prescriptions
 - Discharge Medicines Service
 - Clinical Governance
 - Public Health (Promotion of healthy lifestyles)
 - Signposting
 - Support for self-care
 - Disposal of unwanted drugs
- **Advanced services** – pharmacies may choose whether to provide these services or not. If they choose to provide one or more of the advanced services, they must meet certain They must be fully compliant with the essential services and clinical governance requirements.
 - Appliance Use Review
 - Community Pharmacy Consultation Service (CPCS)
 - C19 Lateral flow device distribution service
 - Flu vaccination
 - Hepatitis C testing Service
 - Hypertension Case Finding Service
 - New Medicines Service (NMS)
 - Pandemic Delivery Service
 - Stoma Appliance Customisation Service
 - Stop Smoking Advanced Service (referral from hospital)

Note: The medicines use review and prescription intervention services (more commonly referred to as the Medicines Use Review service) is no longer an advanced service.

- **Enhanced services** – Service specifications for this type of service are developed by NHS England and then commissioned to meet specific health needs.

NHS England has no Local Pharmaceutical Services contracts within the Kent Health and Wellbeing Board’s area, and NHS England does not have plans to commission such contracts within the lifetime of this pharmaceutical needs assessment.

Further information on the essential, advanced, and enhanced services requirements can be found in appendices B, C and D respectively.

Underpinning the provision of all of these services is the requirement on each pharmacy contractor to have an identifiable clinical governance lead and apply clinical governance principles to the delivery of services. The clinical governance system is set out within the NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended, and includes:

- Patient and public involvement
- Clinical audit
- Risk management
- Clinical effectiveness programmes
- Staffing and staff management
- Education, training and continuing professional and personal development
- Use of information to support clinical governance and health care delivery

Pharmacies are required to open for 40 hours per week, and these are referred to as core opening hours, but many choose to open for longer and these additional hours are referred to as supplementary opening hours. Between April 2005 and August 2012, some contractors successfully applied to open new premises on the basis of being open for 100 core opening hours per week (referred to as 100-hour pharmacies), which means that they are required to be open for 100 core hours per week, 52 weeks of the year (with the exception of weeks which contain a bank or public holiday, or Easter Sunday). It continues to be a condition that these 100-hour pharmacies remain open for 100 core hours per week, and they may open for longer hours. Since August 2012 some pharmacy contractors may have successfully applied to open a pharmacy with a different number of core opening hours in order to meet a need, improvements or better access identified in a pharmaceutical needs assessment.

The proposed opening hours for each pharmacy are set out in the initial application, and if the application is granted and the pharmacy subsequently opens then these form the pharmacy's contracted opening hours. The contractor can subsequently apply to change their core opening hours and NHS England will assess the application against the needs of the population of the Health and Wellbeing Board area as set out in the pharmaceutical needs assessment to determine whether to agree to the change in core opening hours or not. If a pharmacy contractor wishes to change their supplementary opening hours, they simply notify NHS England of the change, giving at least three months' notice.

Whilst most pharmacies provide services on a face-to-face basis e.g., people attend the pharmacy to ask for a prescription to be dispensed, or to receive health advice, there is one type of pharmacy that is restricted from providing services in this way. They are referred to in the NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended, as distance selling premises (sometimes referred to as mail order or internet pharmacies).

Distance selling premises are required to provide essential services and participate in the clinical governance system in the same way as other pharmacies; however, they must provide these services remotely. For example, a patient asks for their prescription to be sent to a distance selling premises via the Electronic Prescription Service and the contractor dispenses the item and then delivers it to the patient's preferred address. Distance selling premises therefore interact with their customers via the telephone, email, or a website. Such pharmacies are required to provide services to people who request them wherever they may live in England and delivery dispensed items is free of charge.

1.3.2 Pharmaceutical Services Provided by Dispensing Appliance Contractors

As with pharmacy contractors, NHS England does not hold contracts with dispensing appliance contractors. Their terms of service are set out in schedule 5 of the NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended and in the Pharmaceutical Services (Advanced and Enhanced Services) (England) Directions 2013.

Dispensing appliance contractors provide the following services for appliances (not drugs) for example catheters and colostomy bags, which fall within the definition of pharmaceutical services:

- Dispensing of prescriptions (both electronic and non-electronic), including urgent supply without a prescription
- Dispensing of repeatable prescriptions
- Home delivery service for some items
- Supply of appropriate supplementary items (e.g., disposable wipes and disposal bags)
- Provision of expert clinical advice regarding the appliances, and
- Signposting

They may also choose to provide advanced services. If they do choose to provide them then they must meet certain requirements and must be fully compliant with their terms of service and the clinical governance requirements. The two advanced services that they may provide are:

- Stoma appliance customisation
- Appliance use review

As with pharmacies, dispensing appliance contractors are required to participate in a system of clinical governance. This system is set out within the NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended and includes:

- A patient and public involvement programme
- A clinical audit programme
- A risk management programme
- A clinical effectiveness programme
- A staffing and staff programme, and
- An information governance programme.

Further information on the requirements for these services can be found in appendix E.

Dispensing appliance contractors are required to open at least 30 hours per week, and these are referred to as core opening hours. They may choose to open for longer and these additional hours are referred to as supplementary opening hours.

The proposed opening hours for each dispensing appliance contractor are set out in the initial application, and if the application is granted and the dispensing appliance contractor subsequently opens then these form the dispensing appliance contractor's contracted opening hours. The contractor can subsequently apply to change their core opening hours. NHS England will assess the application against the needs of the population of the Health and Wellbeing Board area as set out in the pharmaceutical needs assessment to determine whether to agree to the change in core opening hours or not. If a dispensing appliance contractor wishes to change their supplementary opening hours, they simply notify NHS England of the change, giving at least three months' notice.

1.3.3 Pharmaceutical Services Provided by Doctors

The NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended allow doctors to dispense to eligible patients in certain circumstances. The regulations are complicated on this matter but in summary:

- Patients must live in a 'controlled locality' (an area which has been determined by NHS England or a preceding organisation as rural in character), more than 1.6km (measured in a straight line) from a pharmacy (excluding distance selling premises), and
- Their practice must have premises approval and consent to dispense to that area.

There are some exceptions to this, for example patients who have satisfied NHS England that they would have serious difficulty in accessing a pharmacy by reason of distance or inadequacy of means of communication.

1.3.4 Local Pharmaceutical Services

Local Pharmaceutical Services contracts allow NHS England to commission services, from a pharmacy, which are tailored to specific local requirements. Local Pharmaceutical Services complement the national contractual arrangements described above but is an important local commissioning tool in its own right. Local Pharmaceutical Services provide flexibility to include within a contract a broader or narrower range of services (including services not traditionally associated with pharmacies) than is possible under the national contractual arrangements. For the purposes of the pharmaceutical needs assessment the definition of pharmaceutical services includes Local Pharmaceutical Services. There are, however, no Local Pharmaceutical Services contracts within the Kent Health and Wellbeing Board's area and NHS England does not have plans to commission such contracts within the lifetime of this pharmaceutical needs assessment.

1.4 Locally Commissioned Services

Community pharmacy services can be contracted via a number of different routes and by different commissioners, including local authorities, clinical commissioning groups (CCGs) to meet the needs of their local population. Kent County Council, Kent and Medway Clinical Commissioning Group may also

commission services from pharmacies and dispensing appliance contractors, however these services fall outside the definition of pharmaceutical services. For the purposes of this document, they are referred to as locally commissioned services and include the following services which are commissioned by Kent County Council and the Clinical Commissioning Group.

In the Kent Health and Wellbeing area the following services are commissioned by Kent County Council via its contracted providers of services and Kent and Medway CCG.

- Smoking Free Advisor provider
- Smoking Cessation referral Service
- Supply of Varenicline (Champix)
- Supply of Nicotine Replacement Therapy
- Weight Loss Advisor
- One You Kent Pharmacy
- Health living Pharmacy
- What the Bump
- Sexual and Health Improvement Service
- Chlamydia Screening and treatment
- Emergency hormonal contraception
- Condom Distribution (LC)
- Needle Exchange
- Supervised Consumption
- Antiviral supply (out of season)
- Online Non-Prescription Ordering system (ONPOS) West Kent
- Palliative Care Service
- Medicines administration record (MARs) and monitored dose system (MDS) service
- Common Ailments service
- Anticoagulation Services

Locally commissioned services are included within this assessment where they affect the need for pharmaceutical services, or where the further provision of these services would secure improvements or better access to pharmaceutical services.

1.5 Other NHS services

Other services which are commissioned or provided by NHS England, Kent County Council, Kent and Medway Clinical Commissioning Group, East Kent Hospitals Foundation Trust, Medway Foundation Hospital NHS Trust, Dartford and Gravesham NHS Trust, and Maidstone and Tunbridge Wells NHS Trust, Kent, Medway NHS and Social Care Partnership Trust and Kent Community Health Foundation Trust which affect the need for pharmaceutical services are also included within the pharmaceutical needs assessment.

1.6 How the Assessment was Undertaken

1.6.1 Pharmaceutical Needs Assessment Project Advisory Group (PNA Steering Group)

The Health and Wellbeing Board has overall responsibility for the publication of the pharmaceutical needs assessment, and the director of public health is the Health and Wellbeing Board member who is accountable for its development. The Health and Wellbeing Board has established a pharmaceutical needs assessment steering group whose purpose is to ensure that the Health and Wellbeing Board develops a robust pharmaceutical needs assessment that complies with the NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended, and meets the needs of the local population. The membership of the steering group ensured all the main stakeholders were represented and can be found in appendix F.

1.6.2 Pharmaceutical Needs Assessment Localities

The localities that have been used for the pharmaceutical needs assessment match the boundaries of the district, city, and borough councils of Kent, namely:

- Ashford Borough Council
- Canterbury City Council
- Dartford District Council
- Dover District Council
- Folkestone and Hythe District Council
- Gravesham District Council
- Maidstone Borough Council
- Sevenoaks District Council
- Swale Borough Council
- Thanet District Council
- Tonbridge and Malling Borough Council
- Tunbridge Well Borough Council

This approach is consistent with the Joint Strategic Needs Assessment. It should be noted that the areas covered by each of the localities within this document do not match the localities of the same name used by Kent and Medway Clinical Commissioning Group. Dispensing practices may therefore appear in different localities in this document to those that they appear in on Kent and Medway Clinical Commissioning Group's website. On balance though it was felt more appropriate to use the district and borough council as localities because health needs data is collected at super output area and collated up to district and borough council level, and council boundaries are more fixed than GP practice groupings.

1.6.3 Patient and public engagement

To gain the views of patients and the public on pharmaceutical services, a questionnaire was developed and made available on the Council's consultation webpage from 4 November 2021 to 19 December 2021. As well as promoting it on the Council's website, the questionnaire was publicised

with Kent County Council consultation register members and the Kent residents' panel. A copy, which shows the questions asked, can be found in Appendix G. The full results can be found in Appendix H.

A total of 350 people completed the questionnaire of which 159 or 45.4% were female and 172 or 49.14% male (19 people preferred not to give their gender or skipped this question). The figure below shows the age breakdown of respondents.

Figure 1. Which of these age groups applies to you?

Dispensing services were obtained by respondents as follows:

- 304 people – Pharmacy
- 34 people – Dispensing doctors' practice
- 52 people – Distance selling pharmacy

When we asked do you use a pharmacy for the most common responses were as follows:

- To collect a prescription for myself-271 people
- To buy over the counter medicines-175
- To collect a prescription for someone else- 147 people
- Healthcare advice (e.g. medication, your condition/illness, healthy living advice etc.)-91
- Health care services (e.g. stop smoking or emergency contraception, blood pressure checks etc.)-31

The figure below shows how frequently responders visited a pharmacy. As may be expected most people visited monthly which reflect prescription length.

Figure 2. How often do you visit a pharmacy?

The most convenient time for people to visit a pharmacy was reported as being in the morning before 12 noon and the afternoon up to 5pm. Early evening between 5pm and 7pm is also a convenient time to visit a pharmacy.

Figure 3. What time is the most convenient for you to visit a pharmacy?

When asked which day of the week was most convenient to visit a pharmacy there was little difference Monday to Friday and only a slight decrease for Saturday.

When asked what they had done if there had been a time recently when they weren't able to use their normal pharmacy, the responses were as follows:

- 164 people waited for it to open
- 114 people went to another pharmacy

When asked what they would do if their regular pharmacy did not have what they require, the responses were as follows:

- 155 people wait for item to be ordered
- 131 people find another pharmacy

50% respondents used always used the same pharmacy and a further 33% used the same pharmacy most of the time.

Figure 4. What is the most important reason when deciding which pharmacy to visit?

The questionnaire then asked about travel.

Figure 5. How do you usually travel to a pharmacy?

Figure 6. How long does your journey to a pharmacy usually take?

An equal number of respondents walked and used a car to visit a pharmacy, very few used a bus or bicycle. The journey times for 54% of respondents was less than 10 minutes and for 32% it was between 11 and 30 minutes.

Comments Received

Three comments were received by email. Two related to the design of the questionnaire and a third is shown below.

“Your consultation on pharmacies was not sufficient to realise efficiencies and improvements. Just for example in the small village of Lyminge we have at least 3 pharmacists, one commercial pharmacy and 2 attached to Doctors practises. What a huge WASTE OF MY TAXES PAID AND significant NHS WASTAGE. Do something about that and that would be an improvement.”

Provision for doctors to provide pharmaceutical services in certain circumstances has been made in various NHS Acts and Regulations ever since. These circumstances are in summary:

- A patient has serious difficulty in obtaining any necessary drugs or appliances from an NHS pharmacist by reason of distance or inadequacy of means of communication
- A patient is resident in an area which is rural in character, at a distance of more than one mile (1.6 km) from pharmacy premises (excluding any distance selling premises).

The Regulations have been amended and expanded over time with significant amendments being made in 1983, 1992 and 2005. Doctors may therefore have been approved to provide pharmaceutical services under one of several sets of Regulations. Those doctors who were providing services prior to 1 April 1983 have what has become known as “historic rights” to provide drugs or appliances.

The two practices in Lyminge providing dispensing of medicines and appliances will be providing dispensing services to patients living more than one mile (1.6km) from the pharmacy. They do not provide any other pharmaceutical service other than dispensing.

Responses to the questionnaire were received from people living across the county as can be seen in the table, below, with the highest number of responses coming from those living in the Canterbury, and Maidstone locality.

Figure 7. The number of patient and public respondents in each locality

1.6.4 Contractor engagement

Online questionnaires for pharmacies, dispensing appliance contractors and dispensing general practices were undertaken, and the approach was taken to only ask contractors for information that could not be sourced elsewhere.

A copy of the questionnaires can be found in Appendix I – Contractor and Appendix J – Dispensing general practice practices.

The questionnaire was open for the following dates:

- Community pharmacies 18 October 2021 -31 January 2022
- Appliance contractors 13 December 2021- 27 January 2022
- GP Dispensing Practices 17 December 2021 – 27 January 2022

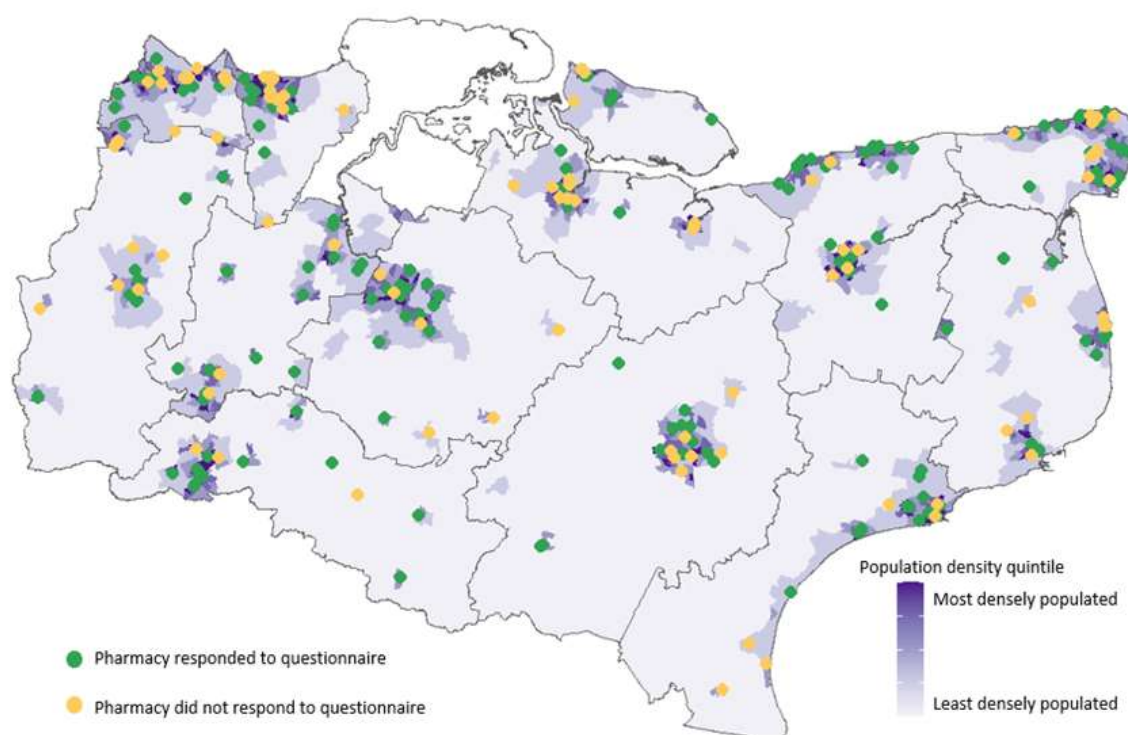

Table 1 shows the number of responders and the percentage response rate.

Table 1. Summary of survey responses

	Number of responses	Total numbers of contractors	Response rate (%)
Pharmacies	187	271	69
Appliance contractors	0	2	0
Dispensing GP practice	8	48	16.7

Map 1 shows that pharmacies that responded to the questionnaire are spread across Kent and there is no geographical pattern to questionnaire response. When split by district, Tonbridge and Malling had the best response rate.

Map 1. Pharmacy locations and response status to contractor survey

Source: NHSE&I, KCC; Prepared by KPHO (JS), Apr '22

The Health and Wellbeing Board is grateful for the support of the Kent Local Pharmaceutical Committee and Dispensing Doctors Association in encouraging contractors to complete the questionnaire.

For the purposes of this document the pharmacy opening hours relied upon are those provided by NHS England as these are the contractual hours that are included in the pharmaceutical list for the area of the Kent Health and Wellbeing Board.

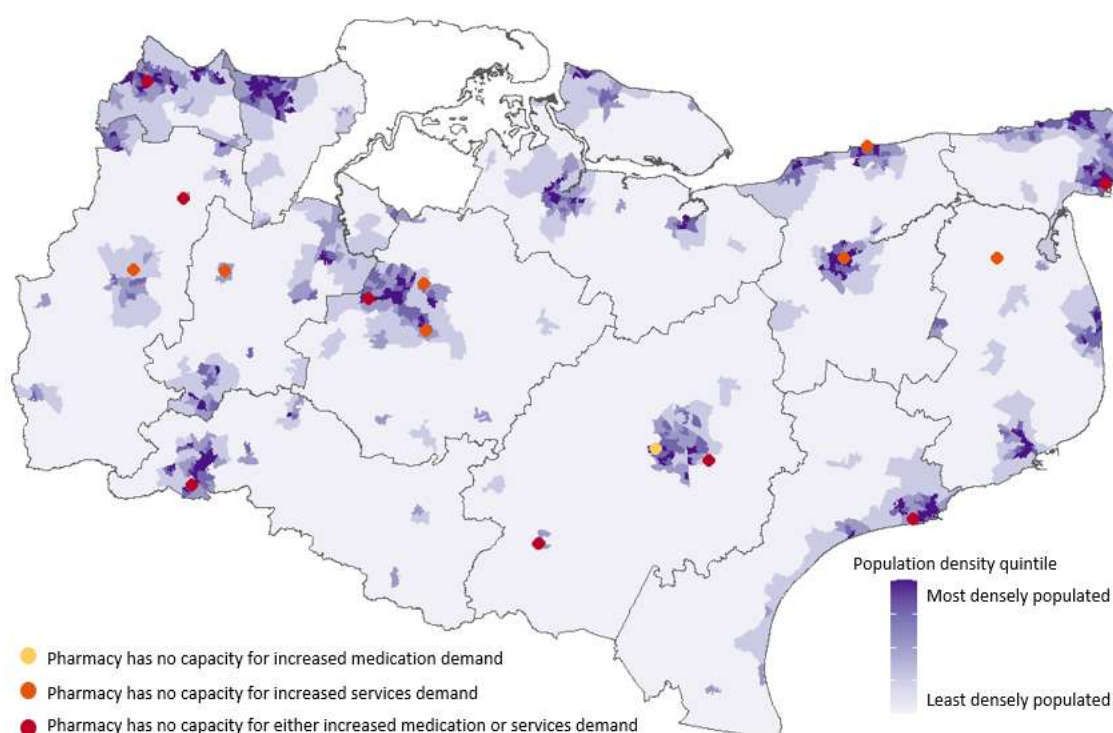

There are currently a number of housing and other developments taking place across Kent with more planned and pharmacies and dispensing appliance contractors were asked about their ability to meet the needs of those moving into the new houses. The responses can be seen in Table 2.

Table 2. Summary of responses to questions regarding capacity

	Yes	No
Does your pharmacy have the capacity to meet an increase in demand for dispensing of medication?	178	9
Does your pharmacy have the capacity to meet an increase in demand for the services currently provided?	172	15

Map 2 shows that the towns of Maidstone and Ashford have more than one pharmacy indicating no capacity for an increased demand in dispensing of medication and/or services.

Map 2. Pharmacy locations and responses to questions regarding capacity for increased demand

Source: NHSE&I, KCC; Prepared by KPHO (JS), Apr '22

Contractors were asked about the provision of 49 different services. The possible responses were willing to provide if commissioned, currently providing privately, currently providing under contract with CCG, currently providing under contract with Local Authority, not able or willing to provide and willing to provide privately. A summary of the number of pharmacies responding in each category for the 49 different services can be seen in Table 3. This suggests that for any one service, most pharmacies would be willing to provide if commissioned if they are not already providing.

Table 3. Number of pharmacies in each response category for the 49 different services included in the questionnaire

Possible response	Average number of pharmacies	Highest number of pharmacies	Lowest number of pharmacies
Willing to provide if commissioned	88	146	0
Currently providing privately	15	133	0
Currently providing under contract with CCG	10	142	0
Currently providing under contract with Local Authority	12	93	0
Not able or willing to provide	32	62	0
Willing to provide privately	4	11	0

As can be seen in Table 4, 29 pharmacies answered, 'yes' to the question 'is there a particular need for a locally commissioned service in your area?'. The services suggested by the pharmacies are as follows: mental health, diabetes, ear syringing, emergency hormonal contraception, minor ailment scheme, CPCS GP referral, stop smoking, sexual health, travel vaccinations, covid-19 vaccination, vascular risk assessment, paid for delivery service, home delivery services, atrial fibrillation screening, alcohol recovery, blood pressure screening, cholesterol screening, not dispensed scheme. The Minor ailments scheme was mentioned in eight of the 29 responses, the most frequently mentioned of all services.

Table 3. Summary of responses regarding need for a locally commissioned service

	Yes	No
Is there a particular need for a locally commissioned service in your area?	29	151

An online questionnaire for dispensing practices was sent to dispensing practices via the Dispensing Doctors association. It was open between the 17 December 2021 and 27 January 2022. A copy of the questionnaire can be found in Appendix J.

The results are summarised below. Of the 48 dispensing practices Kent 8 responded, a response rate of 16.7%. The Health and Wellbeing Board is grateful for the support of the Dispensing doctor Association in encouraging contractors to complete the questionnaire.

Seven of the eight respondents confirmed that prescriptions for appliances are dispensed by the practice. Six of the practices dispensed all types of appliances and one practice stated that they dispensed all appliances with the exclusion of stoma and incontinence appliances.

One practice offered a delivery service to all patients and four practices offer a delivery service to certain patient groups:

- The vulnerable, who do not have their own transport and no other means of obtaining acute prescriptions
- House bound, extremely vulnerable, elderly, in practice if requested we will deliver.
- Those that have difficulty getting to the surgery

Three practices do not offer a delivery service.

English is the predominant language spoken although Mandarin, Hindi, Croatian, Bulgarian and Urdu is spoken at one practice every day.

The practices were also asked about whether they are able to meet the needs of those moving into the new houses in respect of their dispensing service only.

The responses were as follows:

- Don't have sufficient premises and staffing capacity at present but could make adjustments to manage the increase in demand – three practices
- Don't have sufficient premises and staffing capacity and would have difficulty in managing an increase in demand – five practices

All eight practices altered the way that they delivered their dispensing services during the Covid pandemic. Two practices increased the delivery service to patients and all complied with PPE and screening guidance.

An online questionnaire for appliance contractors was sent to the two Kent based and one Medway based appliance contractors directly. It was open between the 13 December 2021 and 27 January 2022. No responses were received from the appliance contractors. They were each email twice and telephoned three times to ensure the questionnaire had been sent to the correct person and as reminder to complete.

1.6.5 Other Sources of Information

Information was gathered from NHS England, Kent and Medway Clinical Commissioning Group, Kent County Council regarding:

- Services provided to residents of the Health and Wellbeing Board's area, whether provided from within or outside of the Health and Wellbeing Board's area
- Changes to current service provision
- Future commissioning intentions

- Known housing developments within the lifetime of the pharmaceutical needs assessment, and
- Any other developments which may affect the need for pharmaceutical services

The JSNA and the 2019 director of public health report for Kent and Kent's Joint Health and Wellbeing Strategy provided background information on the health needs of the population.

1.6.6 Consultation – **section to be completed following public consultation period**

The responses to the patient and public engagement and contractor questionnaires informed the draft pharmaceutical needs assessment.

The statutory 60-day consultation on the draft pharmaceutical needs assessment commenced on 21st June 2022 and ran until 21st August 2022. The statutory consultees were written to regarding the consultation, provided with a link to the Council's website where the draft pharmaceutical needs assessment was published and invited to respond online.

A report of the consultation including any changes to the pharmaceutical needs assessment can be found at Appendix K.

2 Overview of Kent

2.1 Introduction - Kent Overview

Kent is one of the home counties of England and lies in southeast extremity of England. Kent borders greater London to the north-west, Thurrock Unitary Authority and Medway Unitary Authority and the Thames Estuary to the north, the North Sea to the northeast and Straits of Dover to the east and the English Channel to the southeast, East Sussex to the southwest, Surrey to the west.

The administrative county of Kent is comprised of 12 areas: the districts of Dover, Sevenoaks, Folkestone and Hythe and Thanet, the boroughs of Ashford, Dartford, Gravesham, Maidstone, Swale, Tonbridge and Malling, and Tunbridge Wells and the city of Canterbury.

Map 3 shows the local government administrative boundaries of Kent and the surrounding area.

Map 3. Kent County Council area and surrounding authority areas

Kent is the fifth most populous county in England and the most populous of the home counties.

The north-central town of Maidstone is the county town. The city of Canterbury is dominated by Canterbury Cathedral, which is the head of the Anglican Church of the world.

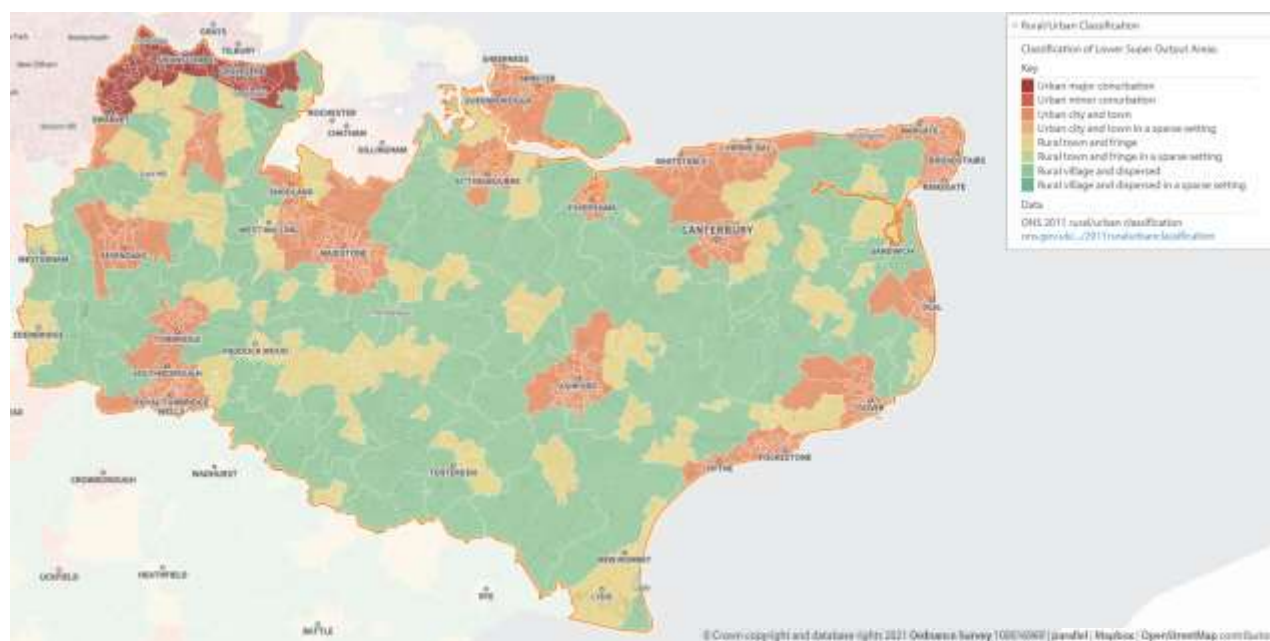

Kent's economy has been influenced by its geography. A line of chalk hills (the North Downs) which runs from west to east forms a spine of the county. To the north of The Downs the shores of the Thames Estuary are low lying marshy land and to the south are areas of sand and clay which is a wooded area known as The Weald. To the east are the low-lying areas of the Isle of Sheppey and Thanet. The white cliffs of Dover is famous start rising at the edge of Thanet and then further south there are the extensive Romney Marches. In the southeast of the county is the shingle promontory of Dungeness with its two nuclear power stations (currently being decommissioned).

Kent's infrastructure is well served by road for east to west travel but has a poor infrastructure for north to south travel (A roads and mainly of B roads). The M20 motorway goes from Dover in the east joins the M25 in the west and the M2 conveys traffic from Faversham to Rochester. The county has a good train network and benefits from the high-speed link with London. Both the presence of the Euro star train link and the cross-channel ferries sailing from the port of Dover means that Kent has excellent links with Europe.

Kent has a diverse economy: Agriculture, haulage, logistics and tourism are major industries. Kent is known as the garden of England as it grows fruit and to a much lesser extent now hops. In the

northwest, industries include extraction of aggregates building material, printing, and scientific research. Much of Kent is in the London commuter belt.

Map 4. Kent lower super output areas by urban/rural classification

Kent has a land area of 1,368 square miles and approximately just over 350 miles of coastline.

It is known as 'the garden of England' as a minimum of 75% of the land in each of the 12 districts is undeveloped. This can be seen in Map 4 which shows Kent's lower super output areas (LSOAs) classified on a rural-urban scale.

According to the 2011 Census, Kent has 605,638 households. The majority (64.7%) of these are one family households. The average household size in Kent is 2.37 people which is comparable to that of the South East (2.38 people) and the national figure of 2.36 people ⁽²⁾.

Since the Census, approximately 39,400 new dwellings have been built in Kent. This is an average number of 5,544 each year up to 2018/19. As a result, we estimate that Kent is now home to approximately 676,900 dwellings in 2019.

Data from the Land Registry states that the average house price in Kent during 2020 was £365,689. This is higher than the national average of £323,868 but lower than the average for the South East which is £411,466.

Kent has remained within the same national decile for 2019 Index of Multiple Deprivation (IMD2019) as for IMD2015 for 4 of the 5 summary measures. Kent is ranked within the least deprived 50% of upper-tier local authorities in England for 4 out of 5 summary measures of the IMD2019. There are some areas within Kent that do fall within the 20% most deprived in England.

2.2 Population⁽³⁾

Office for National Statistics (ONS) mid-2020 population estimates put Kent's population at 1,589,100 people (all ages), up from 1,581,600 in mid-2019 (an increase of 0.47%) and 1,568,700 in mid-2018 (an increase of 1.3%).

It is estimated that the county has had above national average population growth in recent decades, though this varies across the county. Table 5 below shows that in the last 10 years (2010 to 2020), the population of Kent has grown by an estimated 9.4% versus a 7.4% England average. In the last 20 years (2000-2020), the population of Kent has increased by 20% compared to a 14.9% England average.

Table 5. Estimated population growth within the last 20 years⁽³⁾

	Previous Year Change		5 Year Change		10 Year Change		20 Year Change	
	(2019-2020)		(2015-2020)		(2010-2020)		(2000-2020)	
	Number	%	Number	%	Number	%	Number	%
Kent	7,500	0.5	66,000	4.3	137,200	9.4	264,400	20.0
Ashford	1,000	0.8	7,000	5.6	14,000	12.0	29,600	29.2
Canterbury	1,400	0.8	7,100	4.4	18,100	12.2	31,900	23.6
Dartford	1,400	1.3	10,500	10.2	17,700	18.4	28,500	33.4
Dover	400	0.3	5,100	4.5	7,400	6.7	14,000	13.4
Folkestone & Hythe	300	0.3	3,500	3.2	6,400	5.9	16,900	17.5
Gravesham	0	0.0	1,200	1.1	5,800	5.8	11,700	12.3
Maidstone	1,300	0.8	9,100	5.6	19,400	12.6	34,500	24.9
Sevenoaks	600	0.5	3,200	2.7	6,900	6.0	11,800	10.8
Swale	900	0.6	8,600	6.0	16,000	11.9	29,400	24.2
Thanet	-500	-0.3	1,600	1.2	8,000	6.0	15,000	11.9
Tonbridge & Malling	400	0.3	6,800	5.4	12,500	10.4	25,700	24.0
Tunbridge Wells	200	0.2	2,300	2.0	4,900	4.3	15,300	14.7
South East region	37,100	0.4	267,900	3.0	639,500	7.5	1,226,700	15.4
England	263,200	0.5	1,763,800	3.2	3,907,700	7.4	7,316,800	14.9

There are 4.5 people per hectare in Kent, making Kent less densely populated than the South-East regional average (4.8) but slightly higher than the national average (4.3). Dartford is Kent's most densely populated local authority district with 15.7 people per hectare and Ashford is the least densely populated district (2.3 persons per hectare).

Of the 12 local authority districts within the Kent County Council area, Maidstone Borough is the most populated with 173,100 people. Gravesham Borough is the least populated with 106,900 people.

Most recently, the highest rates of population growth in the county have been in Dartford (also high for the country) and, as such, the borough is projected to experience the greatest percentage increase

in the county over the next 10 years. KCC's housing-led population forecast projects that the population of Dartford will increase by 23.4% to 138,900 by 2029.

By 2029, KCC's housing-led population forecast projects that the population of Kent will have grown by approximately 11.5% to 1,762,900 people; faster than the projected 5% increase for England as a whole.

Figure 8 shows the projected percentage change in population between 2019 and 2025. Net migration accounts for 96% of the population increase in Kent over the next 10 years. 5 districts are projected to have a negative natural change in the population by 2029 but an overall population increase due to net migration. Of all Kent districts, Dartford is projected to see the highest percentage increase in net migration and natural change. Folkestone and Hythe is projected to have the smallest increase in population over the next 10 years due to a projected negative 3.6% natural change.

Figure 8. Projected percentage change in population between 2019 and 2025 by district and Kent as a whole

It is important to note that the population forecasts for Kent presented here are based on KCC's Housing Led Forecasts. These forecasts differ from ONS projections for England which do not take future house building programs into account. KCC's Housing Led Forecasts are driven by proposed housing developments but also consider mortality and fertility rates, and internal and international migration. Figure 9 shows the forecast change in the number of dwellings for each district and Kent as a whole between 2019 and 2025. This shows that Dartford is projected to have the biggest

percentage increase in the number of dwellings (15.9%) and the neighbouring borough of Gravesham the smallest increase (5.8%).

Figure 9. Projected change in number of dwellings between 2019 and 2025 (percentage and total number) by district.

There are slightly more female residents than male residents in Kent. 50.9% (809,300 people) of residents are female and 49.1% (779,800) male. This pattern is seen in all of Kent's local authority districts. However, the male to female ratio changes with age. Overall, there tends to be more males than there are females up to the age of 29 years. Beyond this age, there are more females than males, although the exact age at which there become more females than males does vary between each local authority district.

The mean age of the population in Kent is 41.4 years. This is a year older than the national mean age which is 40.3 years. The mean age of a Kent female is 42.3 and a Kent male is 40.4. Kent has a slightly smaller proportion of 0–4-year-olds than the national average, but on the whole Kent has a younger age profile than the national average, with a greater proportion of young people aged 5-19 years than England. Kent has a smaller proportion of younger people of working age compared to England, particularly in the age group 20-44 years. Kent has an older age profile than the national average with greater proportions of people aged 45+ years than England.

Mean age is higher in the East Kent coastal area with the mean age of residents in Dover, Folkestone & Hythe and Thanet all at or above 43 years. Sevenoaks and Tunbridge Wells also have a higher mean

age than the Kent average. Mean age is youngest in Dartford (North Kent) at 37.4 years. Folkestone & Hythe has the oldest mean age for females at 45.6 years and the oldest mean age for males at 43.6 years. Dartford has the youngest mean age for both females at 38.1 years and males at 36.8 years.

Figure 10. Kent population pyramids 2020 and forecast 2025 ^{(4) (5)}

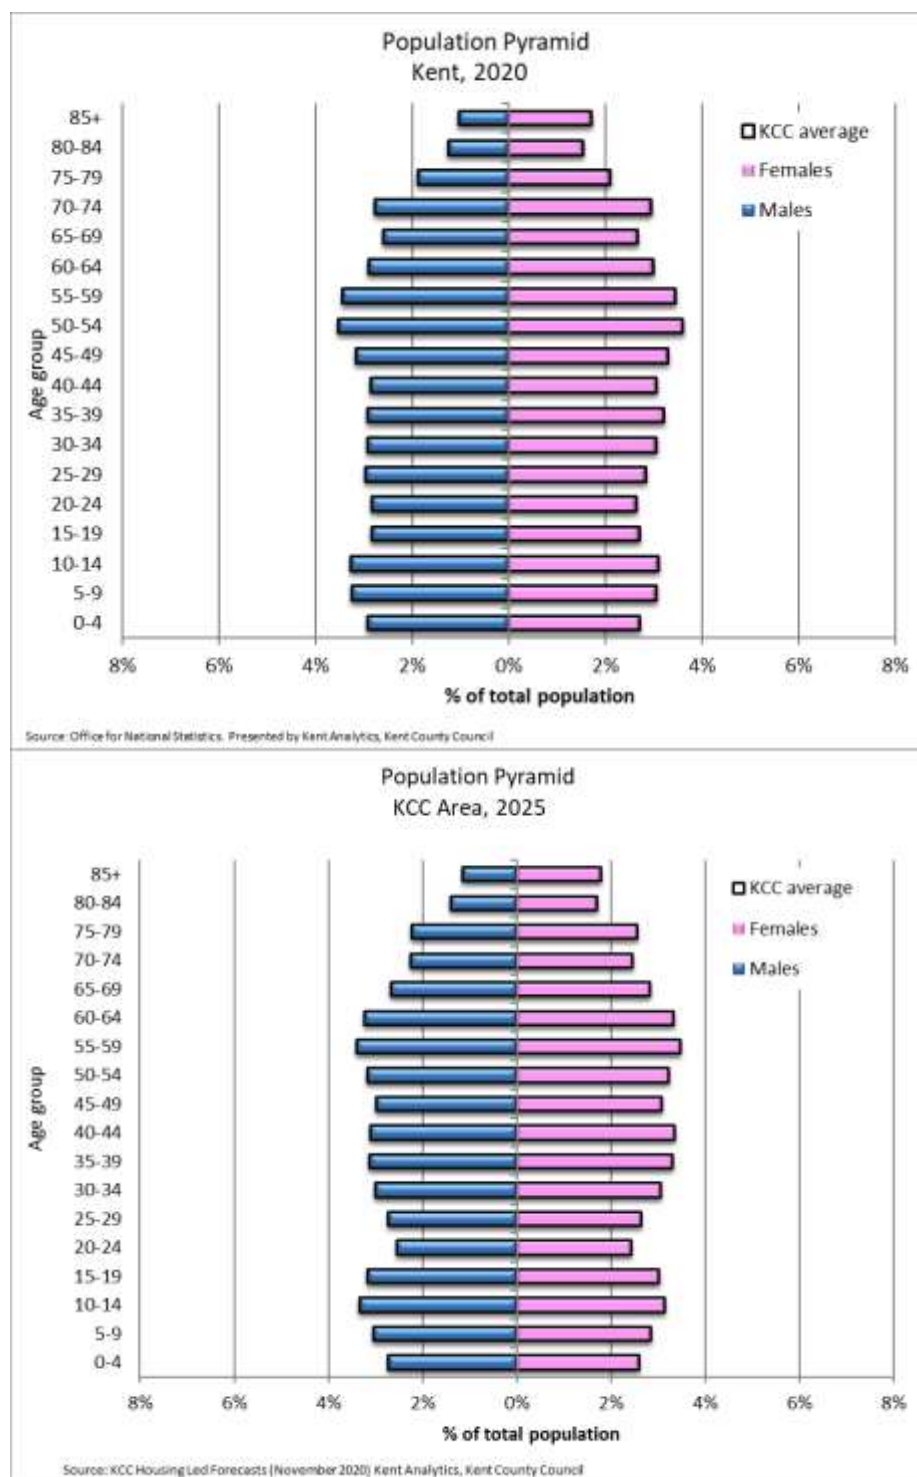

Figure 10 shows that by 10-year age group, the largest increases in population between 2020 and 2025 are in the 10-19 (15% increase), 35-44 (16.8% increase) and 60-69 (17.1%) age groups. The largest decreases are in the 0-9 (0.7% decrease), 20-29 (2.6% decrease) and 45-54 (4.7% decrease) age groups.

2.3 Ethnicity ⁽⁶⁾

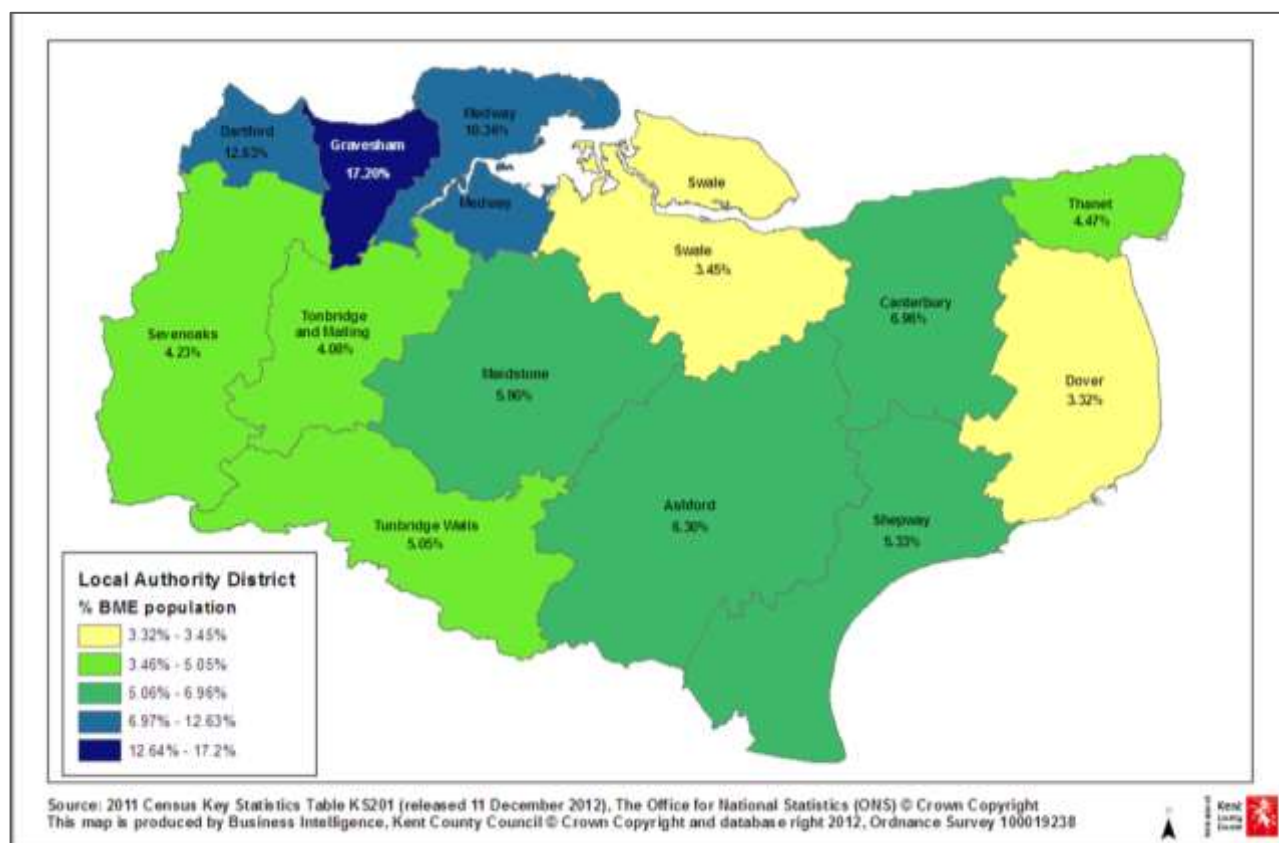

The 2011 Census shows that the White ethnic group is the largest group both within Kent and nationally. 93.7% of the total population of Kent are from the White ethnic group. This is a higher proportion than the national figure of 85.4% and the South-East figure of 90.7%. The remaining Kent residents belong to four other broad ethnic groups which are grouped together as the Black Minority Ethnic (BME) group. This equates to 6.3% of the total population. This is a lower proportion than the national figure of 14.6% and the South-East regional figure of 9.3%. Map 5 shows the percentage of the population in each district classified as BME; Gravesham has the highest BME population with 17.2%, Dover has the lowest with 3.32%.

The Asian/Asian British group is the 2nd largest ethnic group after the White ethnic group in Kent. 3.3% of Kent residents are from this ethnic group. The 3rd largest ethnic group is the mixed/multiple ethnic group, which accounts for 1.5% of Kent's total population. The Black/African/Caribbean/Black British group accounts for 1.1% of the total Kent population.

Out of the 12 local authority districts within Kent, Canterbury has the lowest number of residents from the mixed/multiple ethnic group equating to 1.7% of the total population of Canterbury. Dartford has the highest proportion of residents from the Mixed/Multiple ethnic group with 2.2%. Dartford also has the highest proportion of residents from the Black/African/Caribbean/Black British ethnic group with 3.7% of the total population of Dartford.

Gravesham has the highest proportion of residents from both the Asian/Asian British ethnic group (10.4%) and the Other ethnic group (1.9%).

Map 5. Black Minority Ethnic (BME) population as a % of the total resident population: Kent local authority districts and Medway Unitary Authority ⁽⁶⁾

Kent's White population increased by 10.2% between 1991 and 2011. This is lower than the South-East regional rate of 11.2% and considerably higher than the national rate of 2.6%. Gravesham is the only area to see a fall in White population between 2001 and 2011. Figure 11 shows that proportion of resident white population in Kent has decreased each census year from 98.1% in 1991 to 93.7% in 2011. This is a smaller decrease than that seen in the south-east region where proportion of resident white population decreased from 97% in 1991 to 90.7% in 2011.

Kent's BME population has increased by 275.4% between 1991 and 2011. This is equal to an extra 67,959 people and is higher than regional figure of 268.9% and the national rate of 165.6%. The percentage increases are large because the BME population was very small in 1991. Gravesham is the only local authority district to see a lower rate of growth in BME population than for Kent as a whole. This is due to Gravesham having a higher than average BME population in 1991. Figure 12 shows that proportion of resident BME population more than doubled in Kent between 2001 and 2011 from 3.1% to 6.3%. This is a slightly bigger increase than that seen in the south-east region where the proportion of resident BME population increased from 4.9% in 2001 to 9.3% in 2011.

Figure 11. 1991-2001-2011 Census change in proportion of resident white population ⁽⁶⁾

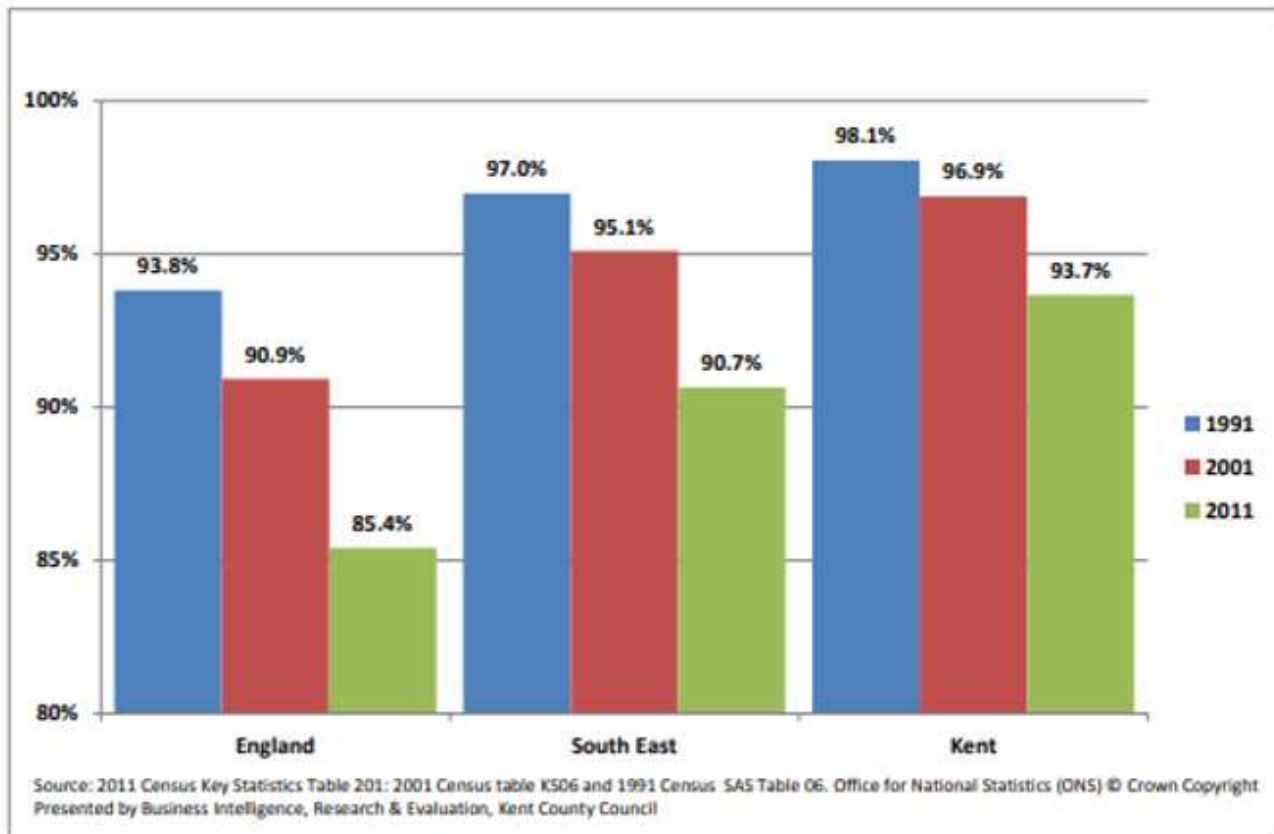

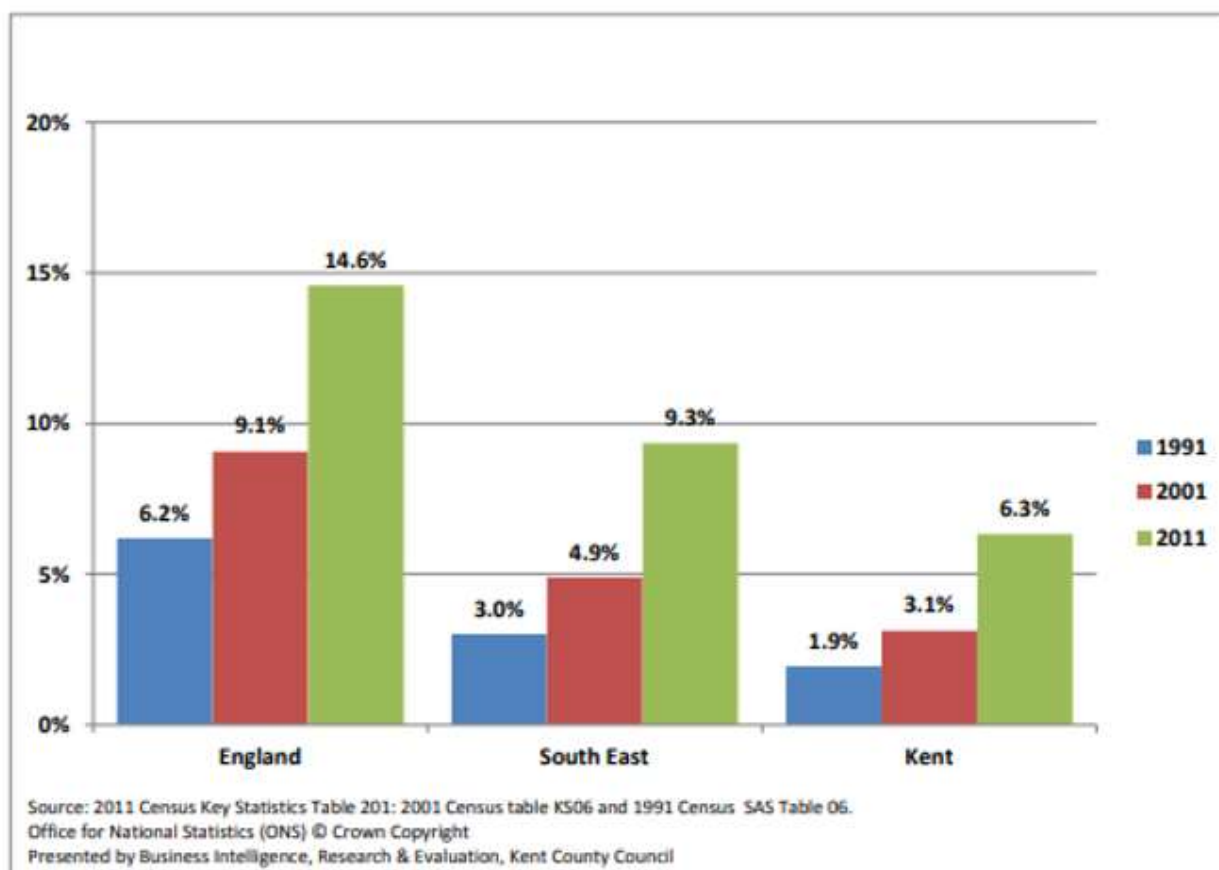

Figure 12. 1991-2001-2011 Census change in proportion of resident Black and Minority Ethnic (BME) population ⁽⁶⁾

2.4 Household language ⁽⁶⁾

At the time of the 2011 Census, in 94.8% of all households in Kent, all people aged 16 had English as their main language. This proportion is higher than the national figure of 90.9% and the South-East regional figure of 93.2%. Of the 5.1% of Kent households in which not all occupants had English as their main language, 2.5% of households had no residents whose main language was English.

Within the 12 Kent local authorities, Swale had the highest proportion of households (97%) where all occupants had English as their main language. Gravesham had the highest proportion of households (5%) where no occupants who had English as their main language.

English was the main language of 95.5% of Kent residents (aged three years and older). The next most commonly spoken languages, accounting for 2.7% of residents, were:

- Polish - 0.69%
- Nepalese - 0.46%
- Panjabi - 0.27%
- Slovak - 0.22%

- French - 0.22%
- Lithuanian - 0.15%
- All other Chinese - 0.14%
- Russian - 0.12%
- German - 0.12%
- Bengali (with Sylheti and Chatgaya) - 0.12%
- Turkish - 0.12%
- Spanish - 0.10%

Gravesham had the highest proportion of residents with a main language other than English. 3.1% of Gravesham residents had Panjabi as their first language. Gravesham accounted for 81% of all Kent residents with Panjabi as their main language.

Maidstone, Ashford and Shepway accounted for 77% of all Kent residents with Nepalese as their first language.

2.5 Religion ⁽⁶⁾

In 2011 Christianity was the largest religion in Kent. A total of 915,200 Kent residents said that they were Christians. This was equivalent to 62.5% of the total population which is a higher proportion than the national figure (59.4%) and the regional figure (59.7%). Table 6 shows the proportion of residents in religious groups. The 2nd most popular religion in Kent was Muslim with 13,932 people which equated to 1% of the total population. However, the 2nd highest proportion of the population claimed to have no religion. This was equal to 26.8% or 391,591 Kent residents.

Table 6. 2011 Census proportion of residents in religious groups ⁽⁶⁾

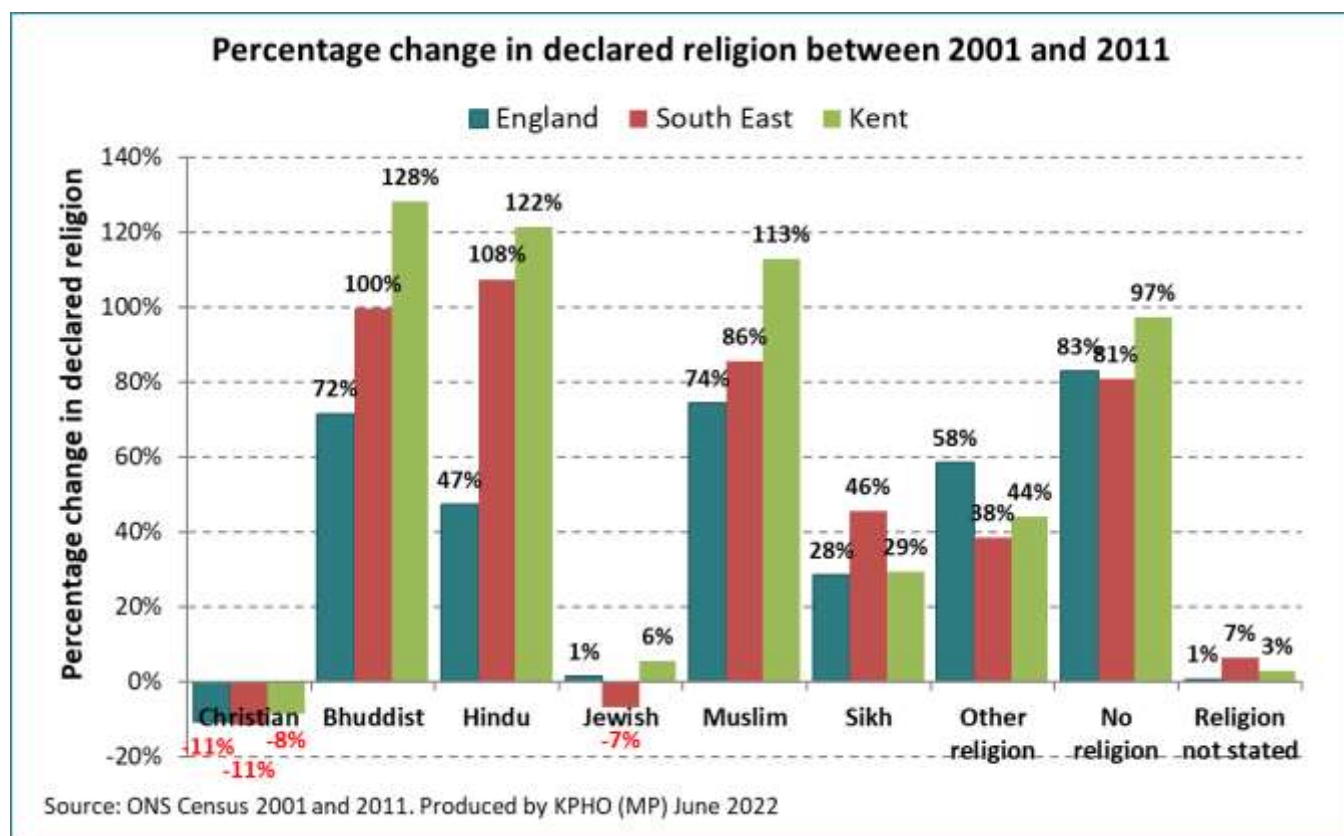

Religion	Kent	England
Christian	62.5%	59.4%
Buddhist	0.5%	0.5%
Hindu	0.7%	1.5%
Jewish	0.1%	0.5%
Muslim	1.0%	5.0%
Sikh	0.7%	0.8%
All other religions	0.4%	0.4%
No religion	26.8%	24.7%
Religion not stated	7.3%	7.2%

Within the local authority districts in Kent, Sevenoaks had the highest proportion of Christian residents. 65.4% of people stated that their religion was Christianity.

Gravesham had the highest proportion of Muslims with 1.9% of the population. However, the Sikh religion accounted for the 2nd largest proportion of Gravesham residents with 7.6%.

Figure 13 shows the changes in declared religion between 2001 and 2011. There was a decline in the number of people who identify themselves as being Christian, the 2001 Census shows that 75.1% of Kent residents said that they were Christians. This is a fall of 8.4% in the Christian population between 2001 and 2011. In Kent the Buddhist, Hindu and Muslim religions have seen the greatest increases in real and percentage terms. These have all seen an increase of more than 100%. The reason for such a large percentage increase is that the initial numbers in Kent were very low in 2001.

Figure 13. Change in religion between 2001 and 2011 ⁽⁶⁾

Within the local authority districts in Kent, Ashford had the smallest decrease of Christian residents between the censuses whilst Thanet had the largest decrease.

Maidstone had the highest increase in population who say that they have no religion. This group saw a 108.3% increase compared to 2001.

2.6 Index of Multiple Deprivation ⁽⁷⁾

The Indices of Deprivation 2019 (IoD2019) is produced by the Ministry of Housing, Communities and Local Government (MHCLG) and provides a set of relative measures of deprivation for neighbourhoods or small areas called Lower-layer Super Output Areas (LSOAs) across England.

The IoD2019 is based on 39 separate indicators, organised across seven distinct domains and 4 sub-domains of deprivation. These are combined and weighted to calculate the overall Index of Multiple Deprivation 2019 (IMD2019). The IMD2019 is the most widely used of these indices.

The IoD2019 provides a measure of deprivation experienced by people living in each neighbourhood or LSOA. There are 32,844 LSOAs in England with an average of 1,500 residents in each. LSOAs are a standard way of dividing up the country. All LSOAs in England are ranked according to their level of deprivation relative to that of other areas. A rank of 1 being the most deprived and a rank of 32,844 being the least deprived.

It is common to describe how relatively deprived a small area is by saying whether it falls among the most deprived 10 per cent, 20 per cent or 30 per cent of small areas in England (although there is no definitive cut-off at which an area is described as 'deprived').

The pattern of deprivation across large areas can be complex. In some areas, deprivation is concentrated in pockets of LSOAs, rather than evenly spread throughout. In some other areas the opposite picture is seen, with deprivation spread relatively evenly throughout the area, and with no highly deprived areas. Table 7 shows Kent local authorities ranked by population weighted average of the combined ranks for the LSOAs in a local authority. Thanet continues to rank as the most deprived local authority in Kent. Tunbridge Wells continues to rank as the least deprived local authority in Kent. Kent as a whole is ranked 95 out of 151 English upper tier local authorities, 1 being the most deprived.

Table 7. Kent local authorities by national rank of IMD2019 and IMD2015 ⁽⁷⁾

	IMD – Rank of average rank (National)		
	2019	2015	Change
Thanet	34	35	-1
Swale	69	87	-18
Folkestone & Hythe	84	101	-17
Dover	107	113	-6
Gravesham	119	120	-1
Dartford	145	167	-22
Ashford	152	171	-19
Canterbury	185	182	3
Maidstone	188	203	-15
Tonbridge & Malling	236	269	-33
Sevenoaks	253	264	-11
Tunbridge Wells	273	271	2

Source: English Indices of Deprivation 2019, MHCLG, Table presented by Strategic Commissioning – Analytics, Kent County Council. A rank of 1 is the most deprived. National rank is out of 317 local authorities

A negative change between 2015 and 2019 shows a rise in the rank therefore an increase in level of deprivation in relation to all other local authorities

Map 6 illustrates the pattern of deprivation across Kent and Medway at LSOA level. The darker areas are the most deprived areas and lighter ones are the least deprived areas. The map shows there is an east west divide with the east of the county having higher levels of deprivation than the west. The highest levels of deprivation can be seen in both coastal regions and urban areas.

Map 6. Indices of Deprivation 2019 (IoD2019): Overall IMD2019 National rank of Lower Super Output Areas in Kent and Medway⁽⁷⁾

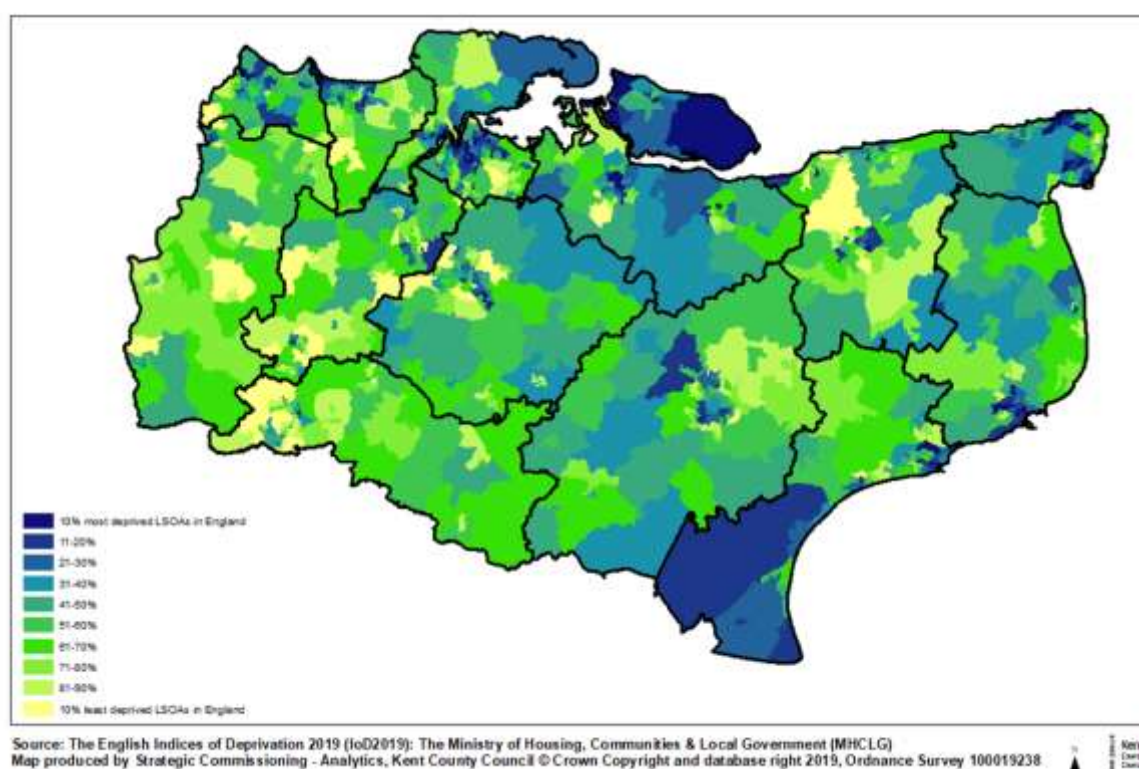

Table 8 shows that 51 of the 902 LSOAs in Kent are within the top 10% most deprived areas in England, according to IMD2019. Of the 41 Kent LSOAs that remained in the 10% most deprived LSOAs for the IMD2015 and the IMD2019 the majority are in Thanet and Swale.

Thanet has the highest number of LSOAs to remain within the 10% most deprived decile in the IMD2015 and the IMD2019 with 16. This accounts for 19% of all LSOAs in Thanet. Swale has the second highest number of LSOAs to remain within the 10% most deprived LSOAs for the IMD2015 and the IMD2019 with 14. This accounts for 16% of all LSOAs in Swale.

Ashford and Canterbury are the only local authorities to have LSOAs within the 10% most deprived decile of the IMD2019 when they had none in the IMD2015. Sevenoaks, Tonbridge & Malling and Tunbridge Wells have no LSOAs within the 10% most deprived deciles of either the IMD2015 or the IMD2019.

Table 8. LSOAs within the top 10% most deprived areas in England for IMD2015 and IMD2019 ⁽⁷⁾

Authority	Total LSOAs in each Local Authority	LSOAs within 10% most deprived decile: IMD2015		LSOAs within 10% most deprived decile: IMD2019		LSOAs within 10% most deprived decile for both 2015 and 2019

Table presented by Strategic Commissioning – Analytics, Kent County Council

2.7 Births and Deaths ⁽⁸⁾

During the year 2020 there were 15,940 births and 17,233 deaths in Kent. This resulted in a net loss of 1,293 people due to natural change.

Maidstone saw the largest number of live births in 2020 with a total of 1,815. However, Dartford had the highest general fertility rate (GFR) for women aged 15-44 years with 69.6 per 1,000. The GFR was higher in Kent than in England & Wales as a whole. Canterbury had the lowest GFR, where there were 33.8 births per 1,000 women aged 15 to 44 years. See Figure 14 for details.

Canterbury has a very large student population that contributes largely to the population aged 15 to 44. These students are not likely to be having children and therefore the population is artificially high compared to the number of live births.

Figure 14. 2020 GFR: Live births per 1,000 women aged 15-44 ⁽⁸⁾

Source: Birth Summary Tables :Office for National Statistics (ONS), © Crown Copyright: Data presented by Kent Analytics, Kent County Council

Thanet had the greatest number of deaths with a total of 2,044, and the highest number of deaths per 1,000 population (crude death rate) at 14.4.

Kent had a lower age-standardised mortality rate (ASMR) than England and Wales. However, four of the local authority districts in Kent had a higher ASMR than that seen nationally. See Figure 15 for details.

Figure 15. 2020 age-standardised mortality rate (Persons per 100,000 population) ⁽⁸⁾

Source: Death Summary Tables :Office for National Statistics (ONS), © Crown Copyright: Data presented by Kent Analytics, Kent County Council

In 2013 there were 16,955 live births in Kent. Between 2014 and 2017 the number of live births had begun to rise but had fallen each year since. The number of births during 2020 was the lowest since 2006. In contrast, the number of deaths in Kent between 2013 and 2020 began to rise. 2020 saw the highest number of deaths for seven years with 17,233. As a result, the population growth due to natural change fell to its lowest in seven years, see Figure 16.

Figure 16. Births, deaths and natural change: 2001 to 2020 ⁽⁸⁾

Source: Office for National Statistics (ONS) © Crown Copyright. Chart presented by Kent Analytics, Kent County Council

Dartford experienced the greatest positive natural change in population (meaning there were more births than deaths) with a net gain of 696 people. Canterbury, Dover, Folkestone & Hythe, Sevenoaks, Swale, Thanet, and Tunbridge Wells had a negative natural change in 2020 (meaning there were more deaths than births).

2.8 Life Expectancy ⁽⁹⁾

Males born in Kent between 2018/20 have a life expectancy of 79.6 years, whilst for females it is 83.3 years. The England average is 79.4 years for males and 83.1 years for females. Life expectancy at birth for both males and females in Kent has increased by +0.6 years over the past ten years. Despite the increase in male life expectancy being greater than or equal to the increase in female life expectancy over the past ten years, females can still expect to live longer than males.

Table 9 shows life expectancy at birth for Kent's local authority districts. Maidstone has the highest male life expectancy at birth at 82.1 years. Tunbridge Wells has the highest female life expectancy at birth at 84.5 years. Both figures are higher than the national, regional, and county figures. Thanet has the lowest life expectancy at birth for both males and females. Life expectancy for males at birth here is 77.6 years and for females at birth is 82.1 years.

Dartford, Folkestone & Hythe, Sevenoaks, Swale and Thanet all have a lower male life expectancy at birth than England as a whole. Dartford, Sevenoaks, Swale and Thanet all have a lower female life expectancy at birth than England as a whole. Swale and Thanet are the lowest ranked for life expectancy and for deprivation, highlighting the link between health and deprivation.

The highest difference between male and female life expectancy is in Thanet where females born between 2018/20 can expect to live +4.6 years longer than males born at the same time. Maidstone has the lowest difference between the sexes with females born between 2018/20 having a life expectancy that is +2.1 years longer than males born at the same time.

Table 9. Life expectancy at birth (years): Kent local authority districts ⁽⁹⁾

Authority	2018-2020				
	Males		Females		Difference between male and female life expectancy (years)
	Life expectancy (years)	Rank	Life expectancy (years)	Rank	
Maidstone	82.1	19	84.2	94	2.1
Tunbridge Wells	81.3	51	84.5	73	3.2
Tonbridge & Malling	80.4	103	84.4	78	4.0

Table ranked on male life expectancy out of 307 English local authorities

2.9 People with Disabilities ^{(10) (11)}

There is no single measure of disability. The 2011 Census shows that 257,038 residents in Kent (17.6%) have a health problem or disability which limits their day-to-day activities.

Kent's JSNA states that the prevalence of physical disability was higher in Kent at 4.3 per 1000, than in England at 3.2 per 1000. The prevalence of severe learning difficulty in children in Kent at 1.2 per 1000, and of profound and multiple learning difficulties in Kent at 0.5 per 1000 was similar to levels seen nationally.

As of 2014-15, Kent has 6,405 persons identified with learning disabilities in the Quality and Outcomes Framework (QOF). This is equal to a prevalence of 0.42%, slightly below that of England's average of 0.44%. Within Kent, the highest prevalence of learning disabilities can be identified within the former South Kent Coast CCG area at 0.66%.

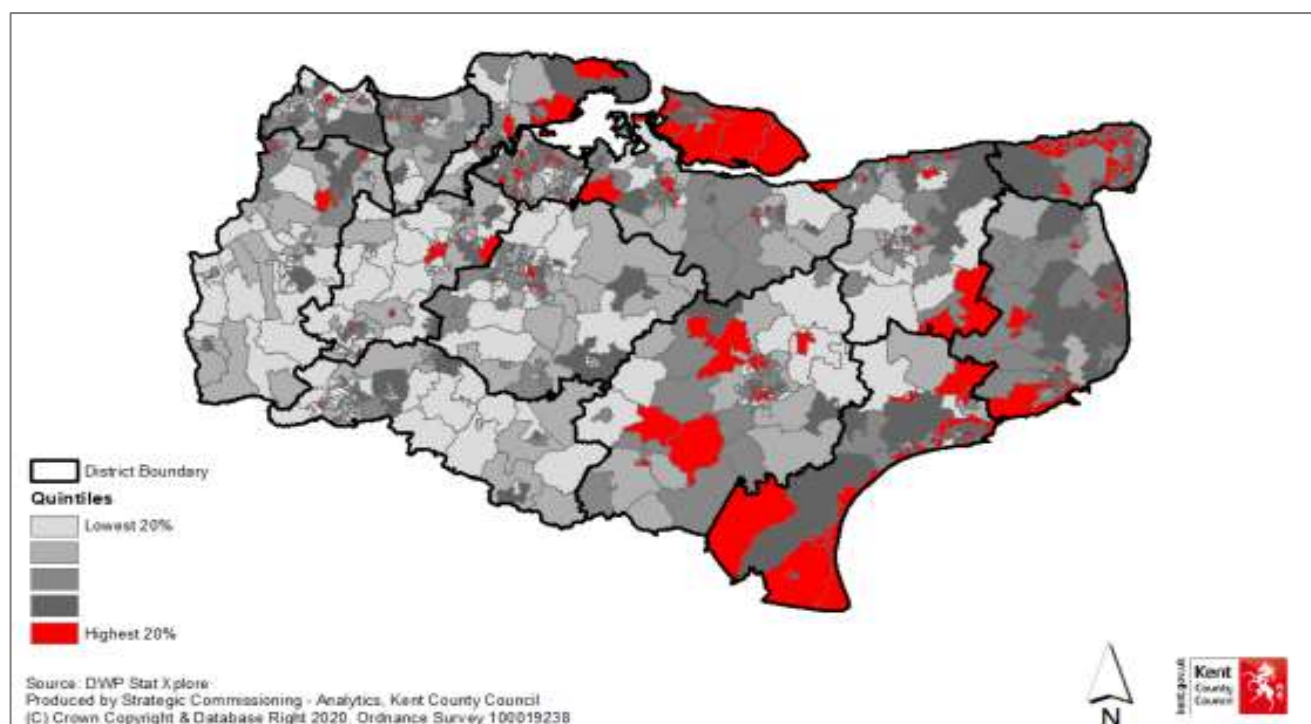

There is expected to be a steady but consistent increase in the number of people with a learning disability across all districts between 2014 and 2030, with approximately 5,216 persons with moderate or severe learning disability within the districts of Kent in 2030. It is predicted that the number of people aged 18–64 years to have a learning disability will rise from 21,522 in 2015 to 22,722 in 2030.

8.1% of people in Kent were claiming a disability benefit at February 2020, this equates to 128,186 claimants. Kent's disability benefit claimant rate is just below the national average (8.2%) and is above

the regional average of 6.8%. The number of claimants in Kent has increased by 2.1% since the previous year.

The geographical distribution of disability benefits claimants can be seen in Map 7. Thanet district has the highest number of disability benefits claimants with 16,222 people claiming either Disability Living Allowance (DLA), Personal Independence Payment (PIP) or Attendance Allowance (AA), equivalent to 11.4% of the population of the district. Tunbridge Wells has the lowest number of claimants in the county with 6,887 claimants (5.8% of its resident population). This is the lowest proportion of disability benefit claimants in the county. Thanet was the only local authority to see claimants fall since the previous year (21 fewer claimants, a reduction of 0.1%).

Map 7. Proportion of people in Kent & Medway LSOAs claiming disability benefits (AA, DLA or PIP) February 2020 ⁽¹⁰⁾

Females are more likely to be claiming a disability benefit than males. A higher proportion of females claim a disability benefit in all of the Kent local authority district areas. This pattern is also reflected regionally and nationally.

By far, those aged 65 and above are more likely to claim a disability benefit than those aged under 65. This may be due in part not only to the increase of disability due to health conditions related to aging but also to lower levels of income once people are no longer working and finding themselves unable to meet the additional cost relating to a disability. In Kent 17.5% of people aged 65 and over claim a disability benefit, 5.4% of those aged 16 to 64 and 5.3% of those aged under 16. Kent has a higher proportion of people aged under 16 claiming a disability benefit than is seen nationally but a lower proportion aged 16 and above.

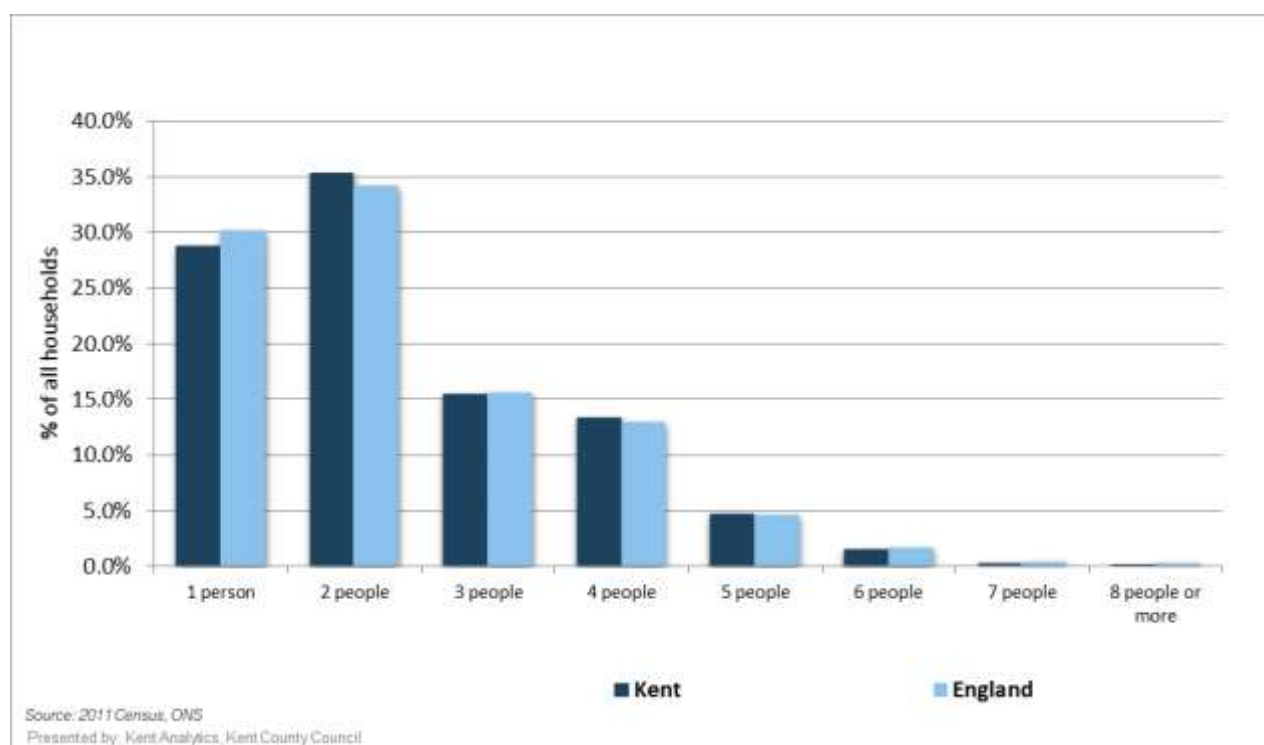

2.10 Households ⁽¹²⁾

MHCLG present estimates of the number of dwellings in England and in each local authority district. The estimates are as of 31 March each year. The statistics use the Census 2011 as a baseline and apply annual net changes to stock as measured by the related housing supply, net additional dwellings statistics. These data give an estimate of total stock of dwellings and dwelling tenure. The estimates show that as of the 31st of March 2020 there were a total 685,640 dwellings in Kent. This is a rise of 1.0% on the previous year when there were 678,858 dwellings. Results also show that in the five years since 2015 the dwelling stock in Kent has risen 5.5%. Nationally, the increase was 4.7% over the same period.

At 31st of March 2020 it is estimated that in Kent there were 594,927 private sector dwellings (accounting for 86.8% Kent's total dwelling stock) and 90,113 social housing dwellings (13.1% of total stock). Gravesham has the highest proportion of social dwelling stock in Kent with 17.2% of the stock within the district being owned by the local authority or Private Registered Providers. Maidstone district has the highest number of social dwelling stock (9,584 dwellings) the majority of which is Private Registered Provider stock.

Figure 17 shows the proportions of various household sizes in Kent at the time of the 2011 Census. Approximately 63% of all households in Kent are 1 or 2 person households. Tonbridge and Malling had the lowest percentage of 1 person households with 24%, Thanet had the highest with 35%. Dover had the lowest percentage of 5 person households with 3.8%, Gravesham had the highest with 5.8%.

Figure 17. Percentage of households in each category of household size, 2011: Kent and England ⁽¹²⁾

2.11 Car Ownership⁽¹³⁾

According to the 2011 Census data:

- 20% of the households in Kent did not have a car or van
- 43% have one car or van
- 28% have two cars or vans
- 7% have three cars or vans and
- 3% have four or more cars or vans

The pattern of car or van ownership across Kent's 12 districts can be seen in Figure 18. 30% of households in Thanet have no cars or vans, this is at least 5% more than all other districts. With 13%, Sevenoaks has the lowest percentage of households with no cars or vans.

Figure 18. Percentage of households in each category of car or van ownership, 2011: by district

2.12 Economic Activity^{(14) (15)}

In 2020/21, the Annual Population Survey estimates 77.9% of Kent's 16-64 year olds to be in employment. There is some variation across the districts, but Thanet is the only district where unemployment is significantly below the Kent average. 65.3% of Thanet's 16-64 year olds are estimated to be in employment.

Coronavirus has had an effect on the production of jobs estimates resulting in lower levels of precision in 2020 figures than in previous years. Employee jobs in Kent have fallen by 2.2% (-14,000 jobs) over the last year. This is lower than the South-East regional (-2.5%) but above the national average (-1.9%). The biggest number and percentage increase in jobs was in construction (+5,000 jobs, +11.9%). There were fewer jobs in eight industrial sectors in Kent. The biggest reduction was in the wholesale and retail trade sector (-9,000 jobs, -8.1%).

Figure 19 shows that Kent has a larger proportion of jobs in eight sectors than seen nationally. The biggest differences are in construction (Kent 7.7%, Great Britain 4.8%) and wholesale and retail trade (Kent 16.6%, Great Britain 14.8%).

Figure 19. Industrial structure: percentage of employees by industrial sector 2020, Kent and Great Britain ⁽¹⁵⁾

While claimant count unemployment rates remain higher than pre-pandemic levels, they have fallen consistently since March 2021. The claimant rate in Kent is currently 4.0%, below the Great Britain average rate of 4.4%.

Table 10 shows the number unemployed and the percentage rate by local authority. Thanet has the highest unemployment rate at 7.3%. Sevenoaks has the lowest unemployment rate at 2.5%.

Table 10. Unemployment by local authorities⁽¹⁴⁾

	Number	%	Number change since December 2021	% change since December 2021	Number change since January 2021	% change since January 2021
Ashford	3,035	3.9	-25	-0.8	-1,480	-32.8
Canterbury	3,550	3.4	+55	+1.6	-1,495	-29.6

Table ranked on male life expectancy out of 307 English local authorities

2.13 Sexual Orientation⁽¹⁶⁾

Currently there is no single source of data that provides a measure of sexual orientation for the whole population for all levels of geography. The 2011 Census included a 'civil partnership' category within the marital status question for the first time. However, this does not count all people who identify themselves as lesbian, gay or bisexual (LGB). Only those who have entered into a same-sex civil partnership are counted so these figures are likely to under-represent the LGB community.

The 2011 Census tells us that there were 2,388 Kent residents in a registered same-sex civil partnership. This figure accounts for 0.2% of the total population aged 16 and over. This proportion is equal to that seen both regionally and nationally.

There were 343 civil partnerships formed in Kent in 2006. Of these, 207 (60.3%) were male partnerships and 136 (39.7%) were female. There were 22 civil partnerships formed in Kent in 2015. Of these, 17 (77.3%) were male partnerships and 5 (22.7%) were female. From 29 March 2014 same sex marriage became legal so it is likely that couples who would have formed a same sex civil partnership may have opted to get married instead.

Tentative estimates from the Annual Population Surveys of 2013 to 2015, suggest that 1.9% of Kent's population are LGB. This is slightly higher than the South East (1.6%) and England (1.7%).

2.14 Carers⁽¹⁷⁾

A person is a provider of unpaid care if they look after or give help or support to family members, friends, neighbours, or others because of long-term physical or mental ill health or disability, or problems related to old age. This does not include any activities as part of paid employment. No distinction is made about whether any care that a person provides is within their own household or outside the household.

Table 11 shows that in 2011, 151,777 people in Kent (10.4% of Kent's population), provided unpaid care. This proportion is higher than the South-East regional average of 8.9% and the national average of 10.2%. Out of the Kent local authority districts, Thanet has the highest proportion of unpaid carers with 11.6% (15,502 people). Tunbridge Wells has the smallest proportion of unpaid carers with 9.2% (10,539 people).

The majority of unpaid carers in Kent provide care for less than 20 hours a week. A total of 97,464 people provide care for this amount of time which is 64.2% of all carers in Kent. This proportion is lower than the South-East regional average of 68.1% but slightly higher than the national average of 63.6%. Within the Kent local authority districts Thanet has the highest proportion of carers who are providing care for 50 or more hours per week. 4,387 unpaid carers in Thanet provide care for this amount of time. This is equal to 28.3% of all unpaid carers in Thanet.

Table 11. Provision of unpaid care in Kent districts, the South East and England in 2011⁽¹⁷⁾

	All People	People who provide no unpaid care		All people who provide unpaid care	
		Number	%	Number	%

Presented by Business Intelligence, Research & Evaluation, Kent County Council

2.15 Traveller and Gypsy Communities ⁽¹⁸⁾

The 2011 Census recorded data on those who identified themselves as Gypsies and Travellers for the first time. However, it is recognised that Gypsies and Travellers are often reluctant to disclose their ethnicity for fear of discrimination. This will result in an under-reporting in the total number of the population. The total number estimates that there are 57,680 Gypsies and Travellers in England and Wales (this does not include Roma), although other studies and reports estimate the number to be between 200,000 and 300,000 (Commission for racial equality 2006, Clark and Greenfields 2006). Around half of the population are estimated to live in housed accommodation (Clark and Greenfields 2006). The data on these communities, particularly Roma, is still a problem. In 2010 the Department of Health, through their Pacesetters Programme, estimated that there were about 300,000 Gypsies, Roma and Travellers living in the UK.

The 2011 census data show that Maidstone and Swale are the two local authorities in England ranked with the highest proportion of the Gypsy and Traveller population, with Ashford having the fifth highest. Although the proportion is relatively low at around 0.5%, the reality is that there is a higher proportion than this in the overall population.

Table 12 shows a very different age profile for the White: Gypsy or Irish Traveller ethnic group compared to other white ethnic groups.

Table 12. Percentage population by age category for white ethnic groups ⁽¹⁹⁾

	0-15	16-64	65+
	%	%	%
White: English / Welsh / Scottish / Northern Irish / British	18.8%	61.9%	19.3%
White: Irish	5.9%	63.0%	31.1%
White: Gypsy or Irish Traveller	36.5%	58.5%	5.0%
Other White	16.8%	76.3%	6.9%

2.16 Prisoners and Offenders ⁽²⁰⁾

It is important to acknowledge that the terms 'prisoner' and 'offender' cannot be interchanged. The term 'offender' refers to an individual who is convicted in a court of law as having committed a crime, violated a law or transgressed a code of conduct.

The Kent 'Offenders' JSNA Chapter Summary Update '2014/15' reports that Kent has six prisons and one Immigration Removal Centre, and the combined population is over 3,600 prisoners and detainees (see Table 13 and Table 14 below).

The Sheppey Cluster of three prisons contains HMP Elmley which is a busy local prison with a high turnover, and it is estimated that around 5,000 prisoners access healthcare services at HMP Elmley each year.

Table 13. Number offenders within Kent prisons by age band ⁽²⁰⁾

Age range	Elmley	Standford Hill	Swaleside
Under 20	51	0	0
20-25	286	64	184

25-29	832	19.3
30-39	1,119	26.0
40-49	801	18.6
50-59	387	9.0
60+	160	3.7
Total	4,304	100

2.17 Homeless and Rough Sleepers ⁽²¹⁾

During the financial year 2019/20, local authorities in Kent assessed a total of 8,093 households under the statutory homelessness duty. Of this total 3,904 (48.2%) were found to be threatened with homelessness within 56 days, and therefore owed a prevention duty, 47.3% (3,830) were assessed as being owed a relief duty. 2,015 households secured accommodation for 6 months or more during their prevention duty, and therefore had their homelessness prevented. 1,066 households were assessed as being unintentionally homeless and in priority need.

The average number of households living in temporary accommodation in Kent at the end of each quarter between April-June 2018 to January-March 2020 is 1,245.

Within Kent the highest number of initial assessments during 2019/20 was in Thanet with 1,355 which accounts for 16.7% of the total for Kent. Of these assessments, 52.3% were owed a prevention duty, 47.0% were owed a relief duty and 0.7% was found to be not homeless. The lowest number of initial assessments was in Tonbridge & Malling with 301 which accounts for 3.7% of the Kent total. Of these assessments 43.9% were owed a prevention duty, 54.5% were owed a relief duty and 1.7% was found to be not homeless. A breakdown by household composition of the households owed a prevention duty can be seen in Figure 20. Female single parent households with dependent children are the largest group with 1,282 being owed a prevention duty. The next two biggest groups are single adult males and single adult females with 871 and 769 respectively owed a prevention duty.

Figure 20. Households owed a prevention duty by household composition: Kent 2019-2020 ⁽²¹⁾

The autumn 2020 total number of rough sleepers counted and estimated in England is 2,688. This is down by 1,578 or 37% from the autumn 2019 total of 4,266. In Kent, the 2020 estimated total of rough sleepers is 101. This is down by 68 or 39.5% from the autumn 2019 total of 172. Figures across the county range from 24 in Canterbury to 2 in Maidstone. The rate of rough sleeping per 10,000 households at 1.5 for Kent is higher than the England rate of 1.1 per 10,000 households.

In Kent it is estimated that of those sleeping rough, 88% are males, 81% are UK nationals and 83% are over the age of 25. The autumn 2020 figures show that the proportion of male rough sleepers varies across the local authorities from 100% in Gravesham, Maidstone, Sevenoaks, and Swale to 66.7% in Tonbridge & Malling. Gravesham is the only area where most rough sleepers are EU, non-UK nationals (45.5%). The proportion of rough sleepers over the age of 25 varies across the local authorities from 100% in Dover, Folkestone & Hythe, Gravesham, and Maidstone to 50% in Tonbridge & Malling. Tonbridge & Malling has the highest proportion of rough sleepers who are aged 18 to 25.

3 General health needs of Kent

3.1 Kent Joint Strategic Needs Assessment

Kents Joint Strategic Needs Assessment (JSNA) is a process that looks at the current and future health, care and wellbeing needs of Kent residents to inform and guide the planning and commissioning of

health, wellbeing and social care services. The JSNA in Kent brings together information from many different sources and partners relating to the population of Kent.

The JSNA is intended to do the following:

- Investigate wider social factors that have an impact on health and wellbeing factors such as poverty, housing, and employment
- Look at the health of the population and what behaviours affect health and wellbeing such as smoking, diet and exercise
- Provide a common overview of health and care needs for the local community
- Identify health inequalities
- Provide evidence of effectiveness of health and care interventions
- Document current service provision
- Identify gaps in health and social services and unmet needs.

The JSNA takes information and data relating to the population, for example, population numbers, levels of smoking, life expectancy and causes of mortality, and captures, collates, analyses, and interprets this population-level data. The process can be driven by looking at data; stakeholder, key informant, patient and service user views; and comparisons between and within different areas.

Whilst health and social care commissioners are the main audience for the JSNA, it is intended to be used by a wide variety of people and groups to prepare bids and business cases, to ensure voluntary and community groups can meet their community's needs and represent their views, to assist in the future development of services and to access local health and wellbeing information, plans and commissioning recommendations.

The JSNA is a continuous process and is updated as additional information becomes available. This pharmaceutical needs assessment reflects the JSNA as published in August 2016 with additional information from a range of KCC Public Health reports.

3.1.1 Cancer ⁽²²⁾ ⁽²³⁾

Projection models estimate that between 60,000 and 80,000 people in Kent will be living with and beyond cancer by 2030.

Breast, lung, colorectal and prostate cancer together remain the four most common cancers in Kent and Medway and account for about 50% of all cancer diagnosed and deaths from cancer. Lung cancer remains the main cause of death from cancer.

There is evidence to suggest that incidence, mortality and years of life lost are all slightly lower in Kent than is the case for England as a whole. However, it is also the case that survival rates are slightly lower, and prevalence rates slightly higher.

The level of variation across the Kent districts is not particularly pronounced, though incidence rates for Dover and Thanet are significantly higher than several other districts.

Whilst both incidence and mortality rates are higher in the most deprived areas, the extent of the inequality is rather different. Inequalities in incidence are modest in comparison with inequalities in mortality, suggesting that survival prospects for those diagnosed with cancer are better in the least deprived areas.

Early diagnosis is key to good survival rates, with treatments both simpler and more effective when cancers are detected at an early stage. Around two-thirds of patients in Kent diagnosed with cancer survive for at least one-year. However, around 1 in 5 presents as an emergency, and it is estimated that only around half of cases across the County are detected at an early stage. There are differences evident across the County. The data extracted from the Cancer Commissioning Toolkit suggests that for Dartford & Gravesham NHS Trust, the emergency presentation rate is higher than elsewhere and that fewer patients are diagnosed while their cancer is still at an early stage.

3.1.2 Cardiovascular Disease ⁽¹¹⁾

Cardiovascular disease (CVD) is the main cause of death and premature death (under 75 years) and is more common in deprived communities. It is the most important contributor to the inequality gap in life expectancy in Kent and England.

Kent has a lower Quality and Outcomes framework (QOF) recorded prevalence for cardiovascular disease in comparison to England.

Stroke incidence escalates with increasing age, and Kent is facing an ageing population with a growing proportion of the population over 65 years of age. Recent 10-year stroke incidence modelling and forecasting, however, (using hospital episode data) found that the number of first strokes occurring in Kent is expected to remain at roughly current levels, despite the aging population. This is thought to be due to better risk management and primary care prevention. Stroke mortality rates have in general been decreasing in Kent. As more people are surviving stroke, the prevalence of stroke in Kent is increasing. Between 2006-07 and 2013-14, the prevalence of stroke increased by 1.34% across Kent and Medway compared to 0.94% for England.

Overall coronary heart disease (CHD) prevalence in Kent still appears to be increasing in line with national trends, largely due to higher reporting and case finding rates. In contrast to CHD prevalence, CHD mortality rates are reducing across Kent (as per the national trend), largely due to greater use of revascularisation therapy.

Deprivation is strongly linked to CHD. Districts with higher rates of deprivation, such as Thanet, have a higher CHD mortality rate, than more affluent areas of Kent, such as Tonbridge and Malling.

3.1.3 Diabetes ^{(11) (24)}

Diabetes reduces the life expectancy of people with type 1 by about 15 years and type 2 by about 10 years. In 2020/21 there were just over 90,000 people aged 17 years and over who had been

diagnosed with diabetes in Kent. This represents 6.9% of the registered population in this age group ⁽²⁵⁾. It is estimated that an additional 20% have diabetes and are not diagnosed.

It is estimated that 10% of all adults with diabetes in the UK have Type 1 diabetes which generally appears before 40 years of age. The estimated rate of diabetes in children under the age of 15 is 187.7 per 100,000. The estimated number of children with diabetes in the UK is 31,500, of which 95.1% are Type 1. Boys are more likely to have Type 1 diabetes than girls. There is a genetic link with Type 1 diabetes.

Social deprivation and ethnicity is very strongly linked to both the risk of diabetes and the complexity of the outcomes of having diabetes, the management of co-morbidities is challenging, particularly for those with fewer resources. Type 2 diabetes is strongly associated with ethnicity, social deprivation and age. Prevalence increases with age with the highest rates in people over 70 years.

There is considerable variation in recorded diabetes prevalence across Kent. Latest QOF data shows that The Marsh PCN in Folkestone and Hythe district has the highest diabetes prevalence at 10.3% and Canterbury South PCN in Canterbury district has the lowest at 3.9% ⁽²⁶⁾.

3.1.4 Mental Health ⁽²⁷⁾

Many factors affect a person's mental health, from biological to social factors. Some factors are fixed (age) and some factors can be influenced such as:

- family and socio-economic characteristics (marital status, number of children, employment)
- individual circumstances (life events, social supports, immigrant status, debt), household characteristics (accommodation type, housing tenure)
- geography (urban/rural, region)
- societal factors (crime, deprivation)

Groups with higher-than-expected common mental illness rates are:

- Prisoners
- Dual diagnosis (drug and alcohol)
- People with a learning disability
- Travellers
- Offenders and ex-offenders in the community
- Students
- Economic migrants
- People who experience domestic violence
- People with a disability
- Lesbian, gay, bisexual and transgender people

Applying national survey data, 12.5% of the total registered population of Kent (aged 18-64) will have a neurotic disorder. According to QOF data, Ashford district has the highest prevalence of depression in Kent at 16.1%. Gravesham has the lowest prevalence at 11.1%. All districts apart from Gravesham have a higher recorded prevalence of depression than the England recorded prevalence of 12.3% ⁽²⁸⁾.

Thanet has the highest estimated prevalence of common mental disorders at 18.2% and Sevenoaks has the lowest at 13.2% These are both significantly different to the England estimated prevalence of 16.9% ⁽²⁹⁾.

Rates of suicide and emergency hospital admissions for self-harm in Kent are higher than the England average. There is variation across the districts with Thanet highest for suicides and emergency admissions for self-harm. Swale has the lowest suicide rate in Kent, Gravesham has the lowest emergency admissions for self-harm rate in Kent ⁽³⁰⁾.

Data from the Kent Audit of Self-Harm reports that 37% of attendances at A&E were for people aged 16-25 and of these 72% were female.

3.1.5 Respiratory Disease ⁽³¹⁾

Respiratory diseases range from acute infections, such as pneumonia and bronchitis, to chronic conditions such as asthma and chronic obstructive pulmonary disease. Asthma may also be included within the term chronic obstructive pulmonary disease (COPD) if there is some degree of chronic airway obstruction. COPD not only affects the lungs but has extra pulmonary effects such as muscle wasting and weight loss, pulmonary hypertension, or pulmonale (enlargement of the right side of the heart), anxiety, and depression.

The most important cause of COPD is smoking, but past exposures to fumes, chemicals and dusts at work will have also contributed to causing many currently occurring cases. Socioeconomic status and genetic causes may also be risk factors. There are clear social class gradients in respiratory disease mortality, social class gradients are steeper for respiratory disease.

The Kent JSNA 2016 presented COPD prevalence rates for the since dissolved 7 Kent clinical commissioning groups (CCGs). Although these CCGs no longer exist, the rates do show the geographical variation in Kent. The CCGs that had the worst COPD rates in Kent are Thanet, South Kent Coast and Swale. Thanet had the worst rate in the South of England, with a rising trend in all these areas. All other CCGs in Kent had rates that were better than the South of England average. However, when the expected prevalence is modelled, Thanet CCG rates best represent what is thought to be the actual prevalence, whilst Dartford, Gravesham and Swanley CCG appeared to have a large number of patients who are undiagnosed.

Between 2011 and 2013 mortality rates for COPD were highest in Swale and Thanet CCGs and lowest in Ashford. In 2013 alone the picture is slightly different, rates are increasing except in Dartford Gravesham and Swanley and South Coast Kent. Overall Swale still had the highest rates, which seemed to be increasing but there was more variation between other CCGs. Ashford rates also rose.

3.1.6 Sexual Health ^{(32) (33)}

Poor sexual health creates a significant burden of disease through sexually transmitted infections, particularly repeat, diagnosed late or undiagnosed infections. Good access to emergency contraception and termination of pregnancy services can support women, but planned contraception makes for better sexual health.

Sexual health and wellbeing is affected by sexually transmitted infections (STIs). Everyone who is sexually active risks exposure to sexually transmitted infections. Some groups are at greater risk from exposure to infection, who may already have undetected viruses such as Hepatitis C, Hepatitis B or HIV.

The burden of STIs is unevenly distributed across the county, geographically and amongst populations and is constantly changing. The greatest burden of infection is seen amongst men who have sex with men (MSM) and amongst 20-24 year olds. The latter may be explained by the earlier introduction and acceptance of screening and testing for infections.

Acute STI rates are collated from data collected from 12 STI groups including HIV, chlamydia, warts, herpes, gonorrhoea and syphilis. In 2015, the rate of acute STI infections in Kent indicated that some districts bear a higher burden of acute infections compared to others, namely Thanet, Dartford, Maidstone and Canterbury. The districts with the highest rate of detected new sexually transmitted infections in 2017 were Canterbury and Thanet.

Chlamydia is the most common bacterial sexually transmitted infection, with sexually active young people at highest risk. As chlamydia often has no symptoms and can have serious and costly health consequences (eg pelvic inflammatory disease, ectopic pregnancy and tubal factor infertility) it is vital that it is picked up early and treated.

There is a wide variation in HIV prevalence rate across Kent districts. Dartford and Gravesham districts which have the highest rates. However, when looking at the rate of change in the prevalence of diagnosed HIV per 1,000 population aged 15-59 years this is found to be highest in the districts of Maidstone, Gravesham and Thanet. The increased use of protection against infection will help reduce transmission of HIV and effective partner notification will help reduce reinfection.

3.1.7 Alcohol ⁽³⁴⁾

It is estimated that a quarter of people drink at levels above those recommended. 70,000 adults in Kent are drinking at higher risk levels (double the recommended safe levels or above) and an estimated 15% of residents are binge drinkers.

There are an estimated 1% dependent drinkers in Kent. A further 1.6% (circa 20,000 in Kent) of the population is estimated to have mild dependency or are drinking at harmful levels and may also benefit from treatment or extended brief intervention from a professional or lifestyle services.

Self-reported weekly consumption has declined significantly in the younger age groups since 2011, however has slightly increased for those aged 45 or older and is highest amongst 45- to 65-year-olds.

There are 14,000 people (11.5 per 1,000, slightly lower than England at 13.5 per 1,000) estimated to need alcohol or alcohol and non-opiate treatment services in Kent. Around 2,300 people are in recovery services in Kent which meets only 15% of the estimated need. A co-occurring condition between alcohol and mental health is a barrier to care even though almost 50% of those seeking alcohol treatment have a mental health problem.

There were 564 deaths attributed to alcohol in Kent in 2019 and the areas of greatest deprivation in Kent are worse impacted. The average age of death of a person with alcohol related conditions is 54.3 years, in comparison with death from all causes of 77.6 years. Approximately 3% of all deaths are alcohol related; alcohol-specific deaths e.g., alcohol poisoning, alcoholic liver disease or acute pancreatitis account for about one third of these.

Tunbridge Wells has the highest level of alcohol sales from off licences in Kent and scores high (9th out of 12) for benefits claims for alcohol and yet has relatively low rates for alcohol related hospital admissions. However, Tunbridge Wells scores average (5th out of 12) in its rate per population in treatment services.

Dover has a similar modelled estimate of dependent drinkers to Tunbridge Wells and far lower rate of volume of alcohol sold in off licence and also fairly low rate of benefits claimed due to alcoholism. Yet it has the second highest rate of people in treatment in Kent. This might indicate that the relative affluence of Tunbridge Wells and the access to treatment services may be a protective factor for dependent drinkers.

Thanet has high estimated rates of alcohol dependency and the highest rate of benefits claimants for alcoholism in Kent, the highest proportion of people in treatment services, the highest hospital admission rates due to alcohol and similar levels of alcohol sales in off licence as Tunbridge Wells.

3.1.8 Obesity ⁽³⁵⁾

Across Kent it is estimated that 64.5% of those aged 18 and over were overweight or obese in 2019/20. Overweight & obesity is high across the majority of Kent districts; however, prevalence was higher than the Kent average in Dover and Thanet ⁽³⁶⁾.

Across Kent it is estimated that 23.5% of those aged 18 and over were obese in 2017/18. Prevalence was higher than the Kent average in Ashford and Dartford.

In Year R pupils across Kent in 2019/20, 14.8% and 10.4% were overweight and obese respectively. This was higher in comparison to England (13.1% and 9.9% respectively). Both obesity and severe obesity in Kent are on an increasing trend. In Year R, Folkestone and Hythe and Thanet both have the highest number of weight categories that demonstrate an increasing trend, in excess weight, obesity and severe obesity.

In Year 6 in Kent both obesity and severe obesity are lower than England. However, they are still at high levels. 20%, which equals 3,275 children are obese (compared to 21% in England). 4.2% (695) of Year 6 children in Kent are severely obese; this compares to England where the level is 4.6%. In Year 6, the only category increasing at a Kent level is severe obesity.

In Year 6, Gravesham is an area of concern, with all four weight categories being above Kent in 2019/20.

For obesity, the gap between the most and least deprived deciles is greater in Year 6 (6.1%) than in Year R (1.7%). For severe obesity, in Year R in 2019/20 there is a 1.7% inequality prevalence gap and in Year 6 in 2019/20 it is 5.1%. This means that the deprivation inequality of severe obesity worsens during primary school years.

3.1.9 Smoking ⁽³⁷⁾

Despite a steady decline in Kent smoking prevalence over the past decade, smoking remains the single most modifiable risk factor for cancer and the leading cause of preventable illness and premature death. In Kent, there were an estimated 7,381 deaths attributable to smoking in the period of 2014-16 and an estimated 12,444 smoking attributable hospital admissions in 2016/17.

Tobacco is a significant driver of health inequalities. Smoking accounts for approximately half of the difference in life expectancy seen between the richest and poorest groups in society. Lower socioeconomic groups are typically more dependent, smoke more each day and find it harder to successfully quit. Smoking in pregnancy further entrenches inequalities, with greater likelihood of complications in pregnancy and children of smokers exposed to greater levels of harmful second-hand smoke.

Despite an estimated reduction in smoking prevalence of 4.4% in Kent over the past five years, 16.3% of Kent residents continue to smoke and the gap in smoking behaviour between the richest and poorest appears to be widening. Those in routine and manual occupations are nearly 3.5 times more likely to smoke than their counterparts in other occupations, and smoking prevalence in this group now stands at 32.4% (the highest in the South-East).

Significant variation in prevalence exists between Kent's districts, with estimated prevalence in Thanet (23.7%) significantly greater than national estimated prevalence of 14.9%. Smoking at time of delivery rates in mothers also vary across Kent – combining CCG level data suggests rates are significantly higher in East Kent (17.9%) in comparison to West Kent (11.9%).

3.2 Kent and Medway's Sustainability and Transformation Plan

In 2019 the NHS published the Five Year Forward Plan which identified three clear challenges that the NHS needs to address:

- The health and wellbeing gap
- The care and quality gap, and
- The funding and efficiency gap

The Integrated Care Board, Clinical Commissioning Group (legacy), NHS Trusts, GP practices, local government and the voluntary sector across the health and care system across Kent and Medway are committed to deliver reduced health inequalities and improve the health and wellbeing of the population in the county of Kent and its neighbouring unitary authority of Medway. The local Sustainability and Transformation Plan (STP) Our Case for Change and the Kent and Medway Integrated Care System Development Plan 30 June 2021 reaffirms a commitment amongst all partners to provide an integrated service.

The key priorities that have been identified for Kent and Medway are:

- Preventing ill health
 - treat both physical and mental health issues at the same time and effectively
 - concentrate prevention activities on key areas – obesity and physical activity, reducing alcohol-related harm, preventing, and stopping smoking
 - deliver workplace health initiatives, aimed at improving the health of staff delivering services
- Local care better access to care and support in people's own community
- Hospital care. To optimise hospital care for specialist and emergency care when it is needed by individuals
- Mental Health care. To provide timely, effective, and local mental health care that is provided with physical care.

Historic decisions and developments have led to a system which is very reliant on patients being cared for in a hospital setting, fails to provide the appropriate type of care for a number of patients, is expensive and is becoming increasingly unsustainable.

The aim of the Sustainability and Transformation Plan and Integrated Care Development Plan is to provide a more person-centred model of care which focuses on individuals' health and wellbeing first and then supports their needs when required with fast access and appropriate intervention. People can expect to receive timely, appropriate, holistic care with physical and mental health needs assessed and addressed in a consistent and co-produced manner.

This will be delivered through a health and wellbeing programme to support people to maintain their health and social independence as long as is appropriate supported by an integrated prevention programme developed in conjunction with Public Health. Where, required the health and social care system will look to engage with the community, and the third and voluntary sector, in a way that simplifies access into services. It will provide a more holistic out of hospital support, deliver a high quality acute service when required supported by a system whereby people are able to move back to home care as soon as possible.

The Sustainability and Transformation Plan and Integrated Care Development Plan will address the challenges articulated in the GP Five Year Forward View and will invest in the suggested solutions and integrated new care models to enable local general practice and the wider primary care systems to be sustainable and able to take on the wider workload implications of the transformation model.

The Long-Term Plan therefore funds specific new evidence-based NHS prevention programmes, including to cut smoking; to reduce obesity, partly by doubling enrolment in the successful Type 2 NHS Diabetes Prevention Programme; to limit alcohol-related A&E admissions; and to lower air pollution.

The Plan goes further on the NHS Five Year Forward View's focus on cancer, mental health, diabetes, multimorbidity and healthy ageing including dementia. But it also extends its focus to children's health, cardiovascular and respiratory conditions, and learning disability and autism, amongst others

Kent and Medway publication 'ICS Our Vision' states:

- We will work together to make health and wellbeing better than any partner can do alone. By doing this, we will:
- Give children the best start in life and work to make sure they are not disadvantaged by where they live or their background and are free from fear or discrimination.
- Help the most vulnerable and disadvantaged in society to improve their physical and mental health; with a focus on the social determinants of health and preventing people becoming ill in the first place.
- Help people to manage their own health and wellbeing and be proactive partners in their care so they can live happy, independent and fulfilling lives; adding years to life and life to years.
- Support people with multiple health conditions to be part of a team with health and care professionals working compassionately to improve their health and wellbeing.
- Ensure that when people need hospital services, most are available from people's nearest hospital; whilst providing centres of excellence for specialist care where that improves quality, safety and sustainability.

Community Pharmacists have an opportunity to take an active part in achieving this vision for future health and social care in Kent.

4 Identified patient groups – particular health issues

The following patient groups have been identified as living within, or visiting, Kent:

- Those sharing one of more of the following Equality Act 2010 protected characteristics:
 - Age
 - Disability which is defined as a physical or mental impairment, that has a substantial and long-term adverse effect on the person's ability to carry out normal day-to-day activities
 - Pregnancy and maternity
 - Race which includes colour, nationality, ethnic or national origins
 - Religion (including a lack of religion) or belief (any religious or philosophical belief)
 - Sex
 - Sexual orientation
 - Gender re-assignment
 - Marriage and civil partnership
- University students
- Offenders

- Homeless and rough sleepers
- Traveller and gypsy communities
- Refugees and asylum seekers
- Military veterans
- Visitors to sporting and leisure facilities in the county e.g. Golf Open Sandwich
- Construction workers for major developments e.g. London Resort

Whilst some of these groups are referred to in other parts of the pharmaceutical needs assessment, this section focusses on their particular health issues.

4.1 Age

Health issues tend to be greater amongst the very young and the very old. Children and young people are particularly vulnerable to poor health as a result of inequality.

The excess winter death index shows trends in rates to be highest in older people, particularly those over the age of 85. Kent's 2017 Excess Winter Death report shows that Canterbury continues to have the highest excess winter death ratio, followed by Thanet and Tonbridge currently has the lowest ratio for the rolling period 2006-07 to 2013-16⁽³⁸⁾.

Kent's 2018 report on social isolation and loneliness⁽³⁹⁾ identifies around 29,500 Kent residents aged 65+ who live alone and are more likely than average to exhibit characteristics that might suggest social isolation; 9.6% of the 65+ population of Kent. Older people in Kent identified as being at risk of social isolation and loneliness are:

- Older than the overall 65+ population of Kent,
- More likely to be female,
- And much more likely to be living in a deprived neighbourhood.

Multimorbidity increases markedly with age, but it is also found in younger people, especially in socially deprived areas where the co-existence of physical and mental health problems is particularly common. Multimorbidity is associated with poor quality of life, disability, psychological problems and increased mortality. Multimorbidity is also associated with increased frequency of health service use including emergency hospital admission, adverse drug events, polypharmacy, duplicate testing and poor care co-ordination⁽⁴⁰⁾.

In Kent, in 2018, 28,787 children and young people have special educational needs, 12.4% of children and young people. This is a significant reduction since 2014 and is now below that of the England and South-East benchmark⁽⁴¹⁾.

Despite the limitations of estimates for mental health disorders in children and young people, the prevalence and incidence is increasing in Kent. This is driven by population increases in Kent and by increasing need which varies by mental health disorders⁽⁴²⁾.

4.2 Disability ⁽¹¹⁾ ⁽⁴³⁾

26,329 social care clients in Kent have a physical disability, 4,550 have a learning disability. Of the 12,522 adults aged between 18 and 65 years, 99.6% have a learning disability, a mental health issue or a physical disability.

Children living with disability, and their families, are a heterogeneous group of people with individual needs which may vary in complexity and may change over time. The prevalence of specific and moderate learning difficulty in children was lower in Kent than in England, while the prevalence of behavioural, emotional and social difficulty, and speech, language and communication difficulty was higher.

There are a range of difficulties which may be experienced by a child living with disability including issues with:

- Mobility
- Manual dexterity
- Physical co-ordination
- Communication
- Sensory impairment (e.g. hearing or visual impairment)
- Memory, concentration and learning
- Recognising physical danger
- Continence

4.3 Pregnancy and maternity ⁽⁴⁴⁾

Across Kent, the number of females aged between 15 and 44 in 2013 was 276,540 and is expected to be 285,419 by 2033, an increase of 3.2%. This increase varies across districts, with the biggest percentage increase expected in Dover and Dartford, at 13.6% and 28.6% between 2013 and 2033 respectively. This represents an additional 6,008 women of childbearing age in Dartford, and 2,533 in Dover. The number of women aged 15 to 44 is expected to decrease in Shepway, Swale, Sevenoaks and Tunbridge Wells between 2013 and 2033.

In 2015/16 Kent had a significantly higher percentage of mothers smoking at time of delivery (12.98%) than England (10.65%). This was particularly high in South Kent Coast (16.81%), Swale (20.52%) and Thanet (18.97%).

Data from Kent maternity services shows that between 48% and 55% of women are either overweight or obese at booking.

In addition, perinatal women are an at-risk group for mental illness.

4.4 Race

There are specific groups who have more of a predisposition to specific long-term conditions with a lower BMI than the general population ⁽¹¹⁾. These include:

- South Asian people are immigrants and descendants from Bangladesh, Bhutan, India, Indian Caribbean (immigrants of South Asian family origin), Maldives, Nepal, Pakistan and Sri Lanka.
- African Caribbean/black Caribbean people are immigrants and descendants from the Caribbean islands (people of black Caribbean family origin may also be described as African American).
- Black African people are immigrants and descendants from African nations. In some cases, they may also be described as sub-Saharan African or African American.
- “Other minority ethnic groups” includes people of Chinese, Middle Eastern and mixed family origin.

There is a higher prevalence of diagnosed non-insulin dependent diabetes among Asians and a raised rate among Black Caribbean’s. In addition, several studies report inadequate quality of health care for Asian, Black African and Black Caribbean diabetics and poor treatment compliance, which may therefore result in a higher than average number of hospital admissions ⁽²⁴⁾.

KCC’s analysis of the drivers of excess weight found that there were higher odds of excess weight in Black reception and year six pupils ⁽⁴⁵⁾.

4.5 Gender

Men tend to exhibit more health harming behaviours and experience higher rates of disease, contributing to a higher life expectancy for women. In 2020, the life expectancy at birth was 79 for men and 82.8 for women. The gender gap in life expectancy varies across the county. In Tunbridge Wells there is a gap of 2.6 years whereas in Thanet the gap is 5 years ⁽⁴⁶⁾.

Men are more likely to have cancer and die from it than women, although the gender gap in cancer incidence is reducing. Lung cancer remains the most common cause of death from cancer in Kent, with this being true for both men and women. However, both incidence and mortality for lung cancer are significantly higher for men than women ⁽²²⁾.

Women who are obese are estimated to be around 13 times more likely to develop type 2 diabetes and four times more likely to develop hypertension than women who are not obese. Men who are obese are estimated to be around five times more likely to develop type 2 diabetes and 2.5 times more likely to develop hypertension than men who are not obese ⁽⁴⁷⁾.

Unhealthy behaviours are more prevalent in men. Smoking rates in England remain higher in men (20.7%) than women (15.9%) ⁽⁴⁸⁾. Men are the greatest misusers of alcohol although women are rapidly catching up. For women, alcohol misuse unfortunately places greater risks because not only are their bodies lighter and smaller than men, but they risk harming their unborn child if they drink in pregnancy ⁽¹¹⁾.

Domestic abuse occurs across the whole of society, regardless of sex, race, ethnicity, religion, age, class, income or where they live. There may, however, be some increased risk in vulnerable groups

such as women who are transient, those who have low socioeconomic status, and those who have mental health problems. The majority of domestic abuse is committed by men against women ⁽¹¹⁾.

4.6 Sexual orientation

Lesbian, gay and bisexual people are at specific risk of self-harm and have higher than expected common mental illness rates ⁽²⁷⁾.

Men who have sex with men and individuals questioning their gender identity are at higher risk poor sexual health ⁽³²⁾.

Despite prevalence statistics indicating that substance misuse among the LGB community is nearly four times greater than the that of the overall population; treatment data shows that LGB individuals in Kent were less likely to be in structured treatment in 2012-13 (0.1%) than the Kent population overall (0.3%) based on the estimation that there are between 53,000 and 75,000 lesbian or gay adults in Kent ⁽⁴⁹⁾.

4.7 Gender re-assignment

Transgender people are likely to suffer from mental ill health as a reaction to the discomfort they feel. This is primarily driven by a sense of difference and not being accepted by society. Individuals' coping strategies may include use of drugs, alcohol, or tobacco, or high-risk sexual activity ⁽⁵⁰⁾. Many transgender people struggle with body image and as a result can be reluctant to engage in physical activity ⁽⁵¹⁾.

Alcohol, drugs and tobacco all carry additional risks for transgender people. Drugs and alcohol are processed by the liver as are cross-sex hormones. Heavy use of alcohol and/or drugs whilst taking hormones may increase the risk of liver toxicity and liver damage. Smoking can affect oestrogen levels, increasing the risk of osteoporosis and reducing the feminising effects of oestrogen medication. Transgender people are twice as likely as adults generally to drink in a way that's harmful, or potentially harmful, to their health ⁽⁵²⁾.

Alcohol, drugs and tobacco and the use of hormone therapy can all increase cardiovascular risk. Taken together, they can also increase the risk already posed by hormone therapy ⁽⁵²⁾.

4.8 University Students

Data from the University Medical Centre which provides primary care to students as well as staff and local residents can be used to identify reasons for those aged 18-21 to contact their GP in 2020/21. The most common reasons can be seen in Table 18. Columns 3 and 4 show that the majority of reasons for contacting the GP are more common in the 18-21 population at University Medical Centre than in the rest of the population.

Table 18. Number of events at University Medical Centre April 2020-March 2021

1	2	3	4
	No. of events	% of total events in 18-21s at UMC	% of total events outside of 18-21s - all Kent and Medway practices

Source: MedeAnalytics, 2022

4.9 Prisoners and Offenders ⁽²⁰⁾

The prison population has different health needs to the general public. They are likely to have poorer physical, mental and social health than the general public and suffer from conditions associated with offending, such as substance misuse.

Kent has six prisons and one Immigration Removal Centre, and the combined population is over 3,600 prisoners and detainees. The Sheppey Cluster of three prisons contains HMP Elmley which is a busy local prison with a high turnover, and it is estimated that around 5,000 prisoners access healthcare services at HMP Elmley each year.

National figures from the Prison Reform Trust (2009) indicate that:

- Prisoners are 14 to 23 times more likely to suffer from a psychotic disorder than the general population
- Men released from prison are eight times more likely to commit suicide than the general population - About 30% had 'severe alcohol problems'
- Around 80% of prisoners and 63% of offenders are smokers

Offenders self-report health problems more than the general population. Those living in probation approved premises have high levels of psychiatric morbidity, drug misuse and alcohol problems. Community managed offenders are no less likely to be registered with a GP than the general population.

4.10 Homeless and rough sleepers⁽⁵³⁾

People who experience homelessness for longer periods are more likely to have their health at risk. While poor health can be a contributory factor for homelessness contrastingly, fear of becoming homeless can result in poor health or exacerbate existing health conditions.

Homeless people have a much higher risk of death from a range of causes than the general population. Those experiencing the worst health out of the homeless population are those who are (and have recently been) rough sleepers. A greater proportion of people sleeping rough suffer from chronic physical illness, and mental illnesses compared to the general population. Many of them have co-occurring physical and mental health conditions, and drug and alcohol dependence.

The vast majority of rough sleepers in the services of local authorities in Kent reported to have substance misuse. Six local authorities reported that, more than 40% of rough sleepers have substance misuse. Five local authorities reported that, 20% of rough sleepers had alcohol misuse, while 30% were found to be drug users. Some of rough sleepers had a dual diagnosis (co-occurring conditions) of alcohol misuse and drug misuse.

4.11 Traveller and gypsy communities⁽¹⁸⁾

The Joint Parliamentary Human Rights Committee has described the Gypsy, Roma and Traveller community as the hardest to reach. The 2005 report states, 'evidence attests to the multiple discrimination faced by Gypsies and Travellers and their exceptional level of social exclusion. Poor levels of health even compared with other marginalised groups; high rates of infant mortality, and difficulties in accessing healthcare were cited in the evidence. Poor school attendance, low educational attainment and high levels of illiteracy were also particularly acute problems for Gypsy and Traveller children'.

Gypsies and Travellers are the most disadvantaged ethnic group in the UK experiencing significant inequalities in their health outcomes, particularly around life expectancy, infant mortality and maternal mortality.

4.12 Refugees and asylum seekers ⁽⁵⁴⁾

Refugees and asylum seekers can have complex health needs. These may be influenced by experiences prior to leaving their home country, during transit or after arrival in the UK.

The most common physical health problems affecting asylum seekers include:

- Communicable diseases
- Sexual health needs
- Chronic diseases such as diabetes or hypertension, which may not have been
- diagnosed in the country of origin
- Dental disorders
- Consequences of injury and torture

The number of asylum and resettlement applications in the UK has increased from 26,547 in 2017 to 48,540 in 2021 ⁽⁵⁵⁾.

The number of asylum seekers in receipt of support by Kent's lower tier local authorities has increased year on year from 71 in 2017 to 315 in 2021. Gravesham has the highest with 101 and Folkestone and Hythe is next with 87 ⁽⁵⁶⁾.

989 unaccompanied young people entered Kent from January 2015 – February 2016. The majority of this group are from Eritrea and Afghanistan and aged 16 and 17 years old. The physical and mental health needs of this group are likely to be complex given the experiences they may have had in their home countries and on their journey to the UK.

An analysis of a sample of Initial Health Assessments (IHA) revealed that the most common physical symptoms in unaccompanied young people were dermatology, including rashes, scars and fungal infection, anaemia and musculoskeletal complaints. It is important to emphasise that while physical complaints were common, the majority of these related to non-acute, readily treatable conditions. Additionally, a small but significant number of young people had symptoms of acute illness, such as respiratory infection.

In addition to the findings above there was an almost universal need for catch-up immunisation. The need to screen for latent tuberculosis was identified in approximately 70% of individuals, based on country of origin.

Psychological symptoms were reported in 41% of children. The most common psychological symptoms noted were of Post-Traumatic Stress Disorder (PTSD), anxiety, and depression.

4.13 Military veterans ⁽⁵⁷⁾

There are approximately four million veterans in England. No reliable evidence as to the long-term physical effect of military service exists.

Recent Ministry of Defence (MOD) reviews of ex-service personnel suggest the majority of personnel do make a successful transition to civilian life, although a small percentage struggle:

- A small minority of veterans do experience difficulties post-Service, these tend to manifest themselves on average 10 years after discharge.
- The adverse outcomes (common mental health problems, unemployment, social isolation, encounters with the criminal justice system) present at a rate less than that in the general population.

For the large cohort of elderly veterans, their significant physical health problems are likely to be age-related rather than due to their previous service. The usual cross-section of the chronic diseases of old age will be represented in this veteran population.

The proportion of veterans in the Kent population is in line with the national average. The county-wide estimate that 9.5% of the 16 and over population are veterans lies between the national averages of 9.1% and 10% estimated by the RBL and Woodhead et al studies respectively. The local authorities with the highest estimated veteran populations are Thanet, Dover, Folkestone and Hythe, Swale and Medway; these are all areas with strong serving military connections.

There is a smaller percentage of BME population in the armed forces than in the UK as a whole. However, Kent is home to the 1st Battalion Royal Gurkha Rifles, based at Shorncliffe, Folkestone, and nearly half of the soldiers from the Maidstone based 36 Engineers Regiment are Queen's Gurkha Engineers. Families can join serving Gurkhas in Kent and these communities are likely to make the area more attractive to Gurkha veterans choosing to make the UK their home following discharge.

The majority of individuals leave the armed forces in good health, and the challenge for them is to ensure that they link into the NHS system through a GP so that any future needs are met. There are a number of reported problems inherent in this system:

- Few veterans register with a GP until they are ill or need a prescription.
- When they do register, many do not see the relevance of or choose not to disclose, their veteran status.
- If veteran status is disclosed GPs do not always have a system for recording it on the veteran's NHS record.
- The lag between leaving service and registering means few veterans give GPs their FMed 133 which records their military medical history.
- GPs are not always aware that they can call down the veteran's medical record from DMS or how to do so.

4.14 Visitors to Sporting and Leisure Facilities in the County

It is not anticipated that the health needs of this patient group are likely to be very different to those of the general population of Kent. As they may only be in the county for a day or two, their health needs are likely to be:

- Treatment of an acute condition which requires the dispensing of a prescription

- The need for repeat medication
- Support for self-care, or
- Signposting to other health services such as a GP or dentist

4.15 Construction workers

The construction of the London Resort will require a large workforce; up to 5,000 construction workers are expected on-site in the peak year of Gate One construction (2023). Of these, however, up to half are expected to live too far from the site to commute daily and will seek temporary accommodation close to the site. There are three preliminary options for the London Resort strategy: rely on existing accommodation options; purchase or rent a decommissioned cruise ship (likely with 1,000 to 2,000 room capacity); and/or locate mobile homes (500 – 700 rooms) on-site. There is estimated to be up to 3,100 construction workers seeking temporary accommodation in the area in 2023⁽⁵⁸⁾.

The Health and Safety Executive reports that certain occupations within construction have shown an elevated rate of contact dermatitis. In 2018-2020, plasterers had a rate of 10.2 per 100,000 compared to an all-occupation rate of 2.14 per 100,000 workers⁽⁵⁹⁾.

Compared with other workers in the same major Standard Occupational Classification, i.e. workers with similar levels of qualifications, training, skills and experience, construction workers have been found to be at increased risk of⁽⁶⁰⁾:

- Skin neoplasia in roofers, painters and decorators and labourers in building and woodworking trades
- Contact dermatitis in metal workers and labourers
- Asthma in welders
- Musculoskeletal disorders in welders, road construction operatives and labourers

5 Provision of pharmaceutical services

5.1 Necessary services: Current provision within the Health and Wellbeing Board's Area

Necessary services are defined within the NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended as those services that are provided:

- Within the Health and Wellbeing Board's area and which are necessary to meet the need for pharmaceutical services in its area; and
- Outside the Health and Wellbeing Board's area but which nevertheless contribute towards meeting the need for pharmaceutical services within its area.
- For the purposes of this pharmaceutical needs assessment, the Health and Wellbeing Board has agreed that necessary services are:
 - Essential services provided at all premises included in the pharmaceutical lists
 - The advanced services of Community Pharmacy Consultation Service, New Medicine Service, and flu vaccination, and

- The dispensing service provided by some GP practices

There are 271 community pharmacies included in the pharmaceutical list for the area of the Health and Wellbeing Board as of 26th August 2021, operated by 90 different contractors. Of these 271 pharmacies, 31 provide services for 100 hours per week.

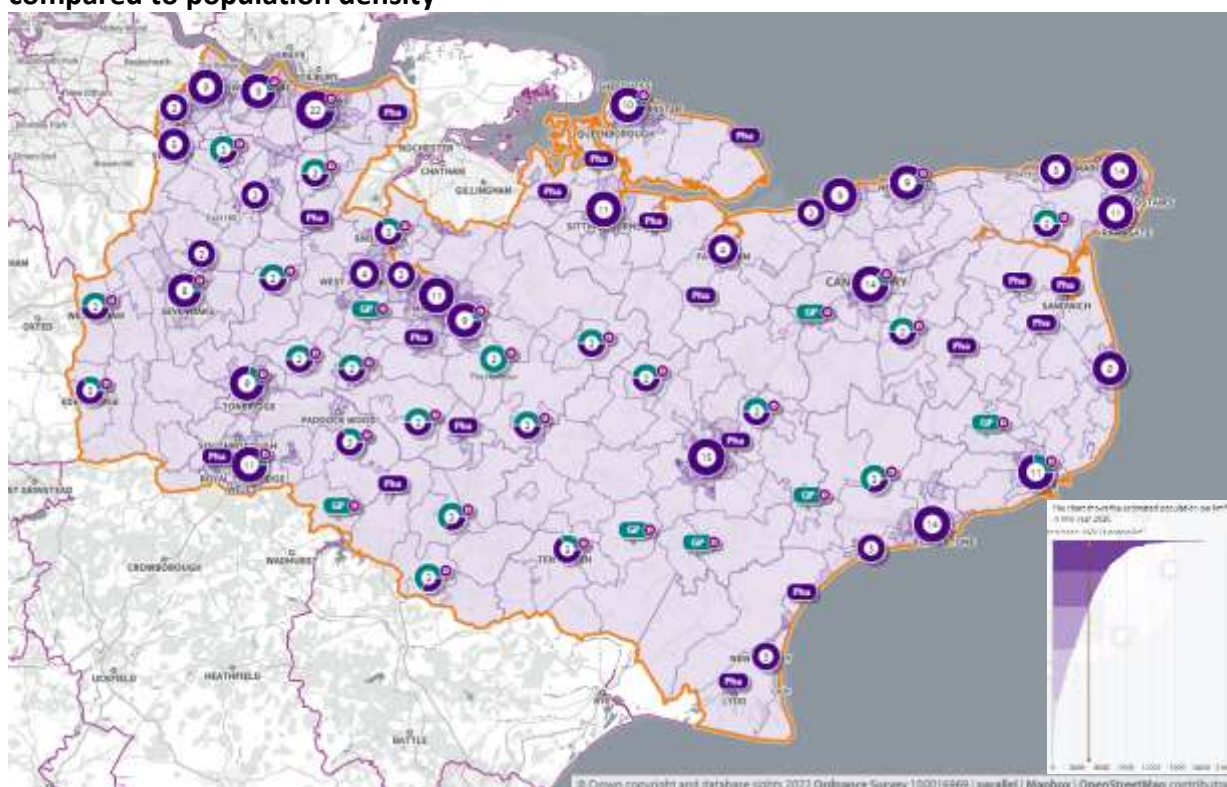

In addition to the 271 community pharmacies, there are three distance selling premises and two dispensing appliance contractors providing services within the Health and Wellbeing Board's area, all operated by different contractors.

Of the 223 GP practices in the Health and Wellbeing Board area, 48 dispense to eligible patients.

As of January 2022, the Kent GP practices dispensed to 136,448 of their registered patients (8% of the total list size for all 48 practices). The percentage of dispensing patients at practice level varied between 2 to 20% of registered patients ⁽¹⁾.

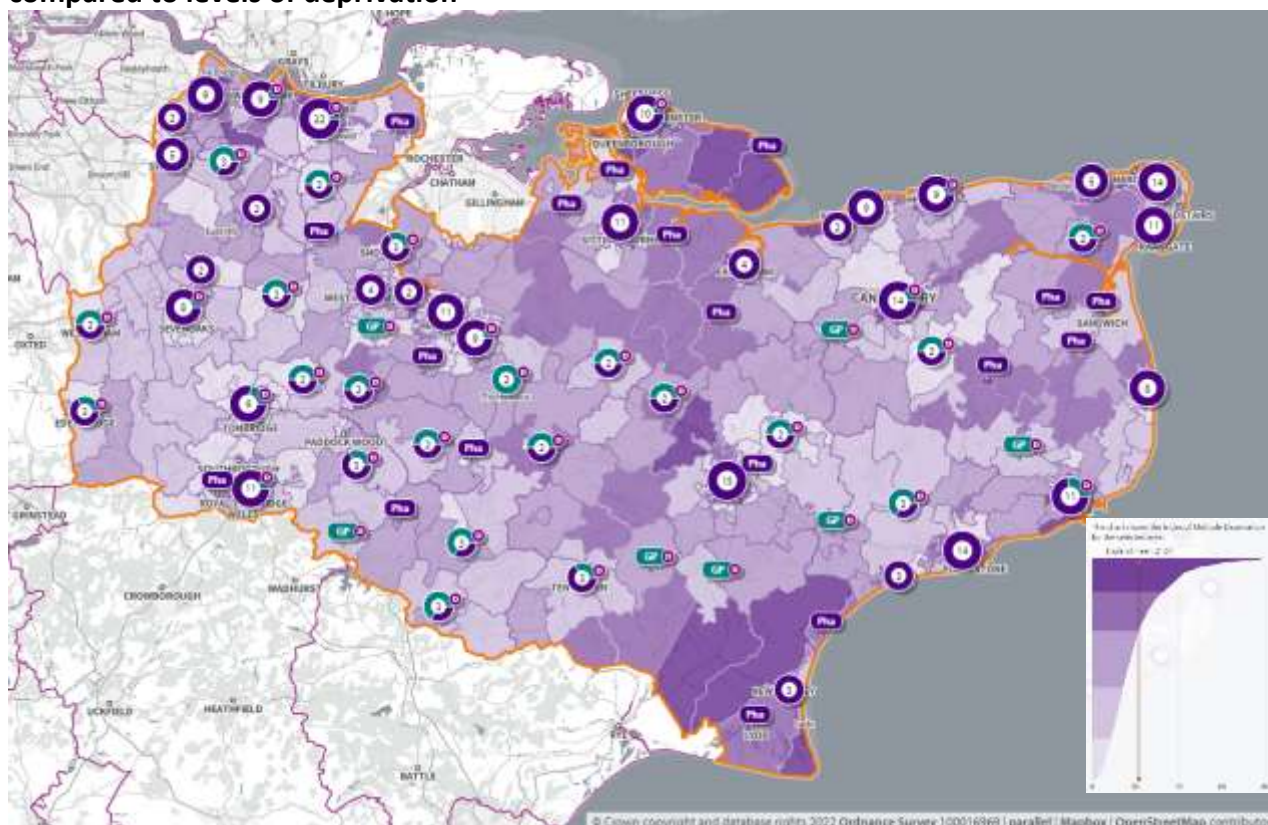

Map 8 shows the location of the pharmacy, dispensing appliance contractor and dispensing practice premises within the Health and Wellbeing Board's area. Due to the size of the county many of the premises are not shown individually, however more detailed maps can be found in the locality chapters. As can be seen, premises are generally located in areas of higher population density (those areas shaded in a darker colour).

Map 8. Location of pharmacies, dispensing appliance contractors and dispensing practice premises compared to population density

There is less correlation when looking at the location of pharmacies, dispensing appliance contractors and dispensing practice premises compared to levels of deprivation as can be seen in Map 9. In this map the darker the shading the greater the level of deprivation.

Map 9. Location of pharmacies, dispensing appliance contractors and dispensing practice premises compared to levels of deprivation

In 2020/21 84% of items prescribed by GP practices in Kent were dispensed by pharmacies and dispensing appliance contractors within the county and 10.7% were dispensed or personally administered by the GP practices ⁽¹⁾.

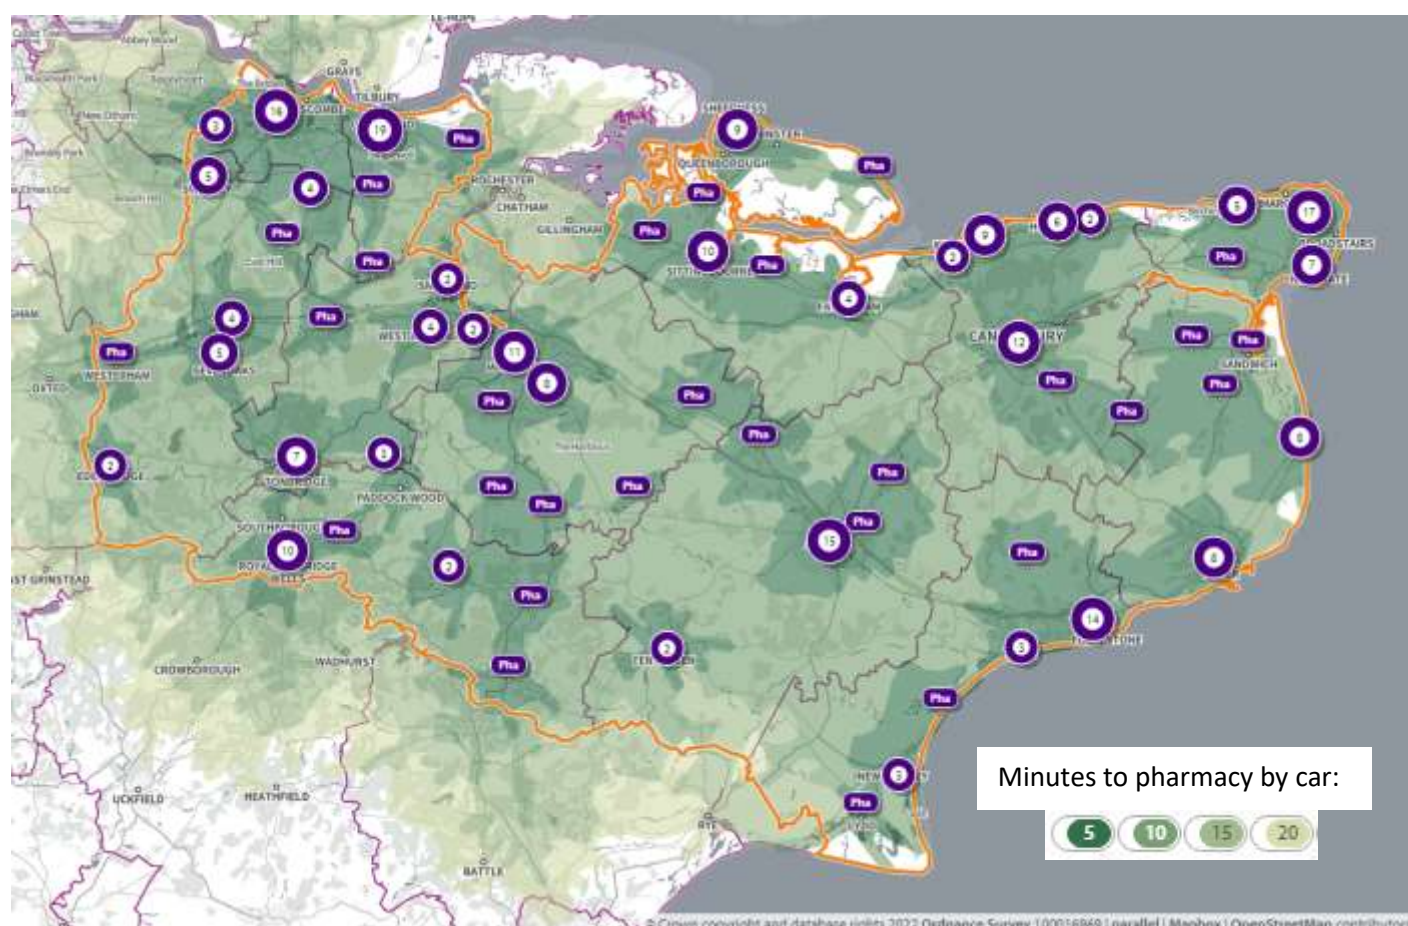

5.1.1 Access to Premises

Nationally, standards for access to a pharmacy are quoted as 99% of the population, even those living in the most deprived areas, can get to a pharmacy within 20 minutes by car and 96% by walking or using public transport. Although these figures are as of 31 March 2007 when there were 10,133 pharmacies in England they are still widely quoted and are unlikely to have worsened as the number of pharmacies had remained stable between 2015/16 and 2019/20 80. In line with the national access standards and taking into account the urban/rural split of the county, the Health and Wellbeing Board has chosen 20 minutes by car as a reasonable time for residents to take to access a pharmacy.

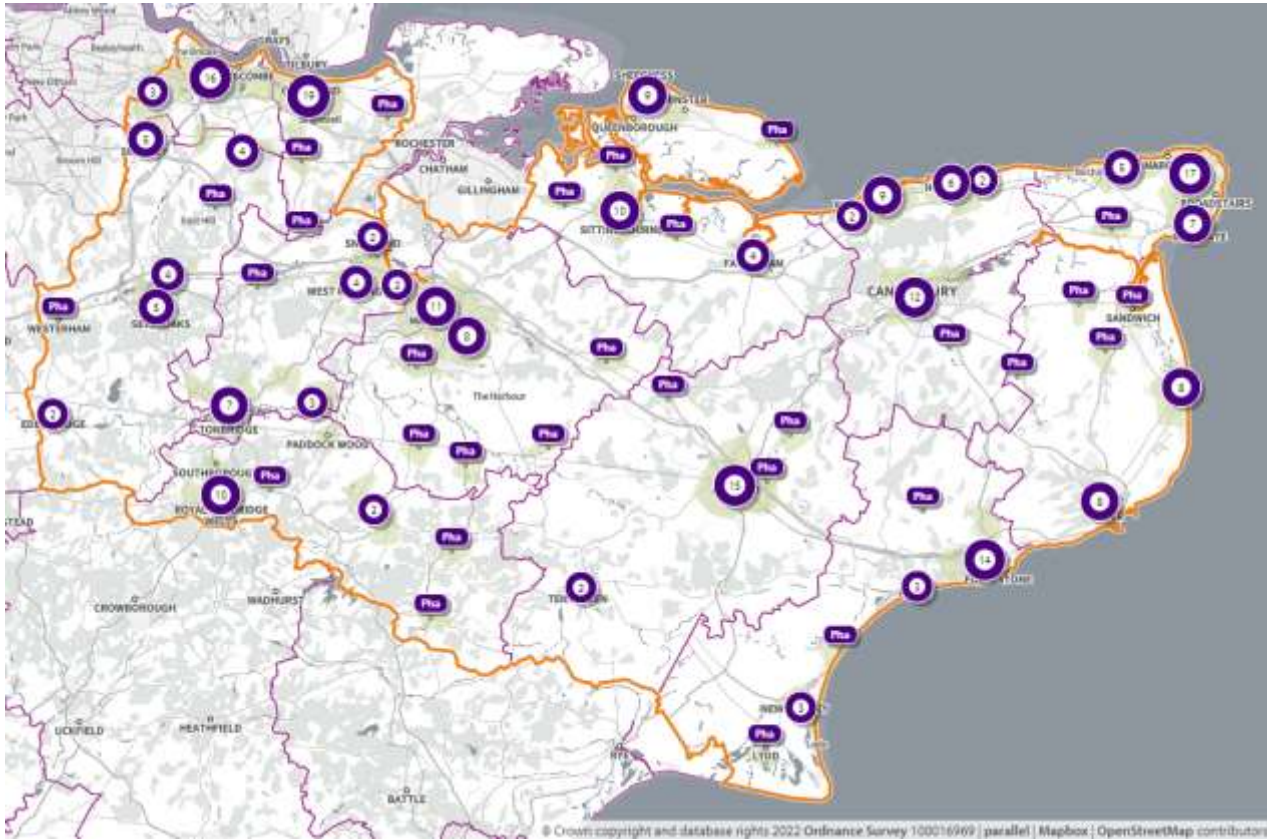

In order to assess whether residents are able to access a pharmacy in line with this travel standard, travel times were analysed using the Strategic Health Asset Planning and Evaluation (SHAPE) web

application. Maps 10, 11 and 12 show that the vast majority of residents are able to access a pharmacy within the county within a 20-minute drive, walk or public transport.

Map 10. Time taken to access a pharmacy by car

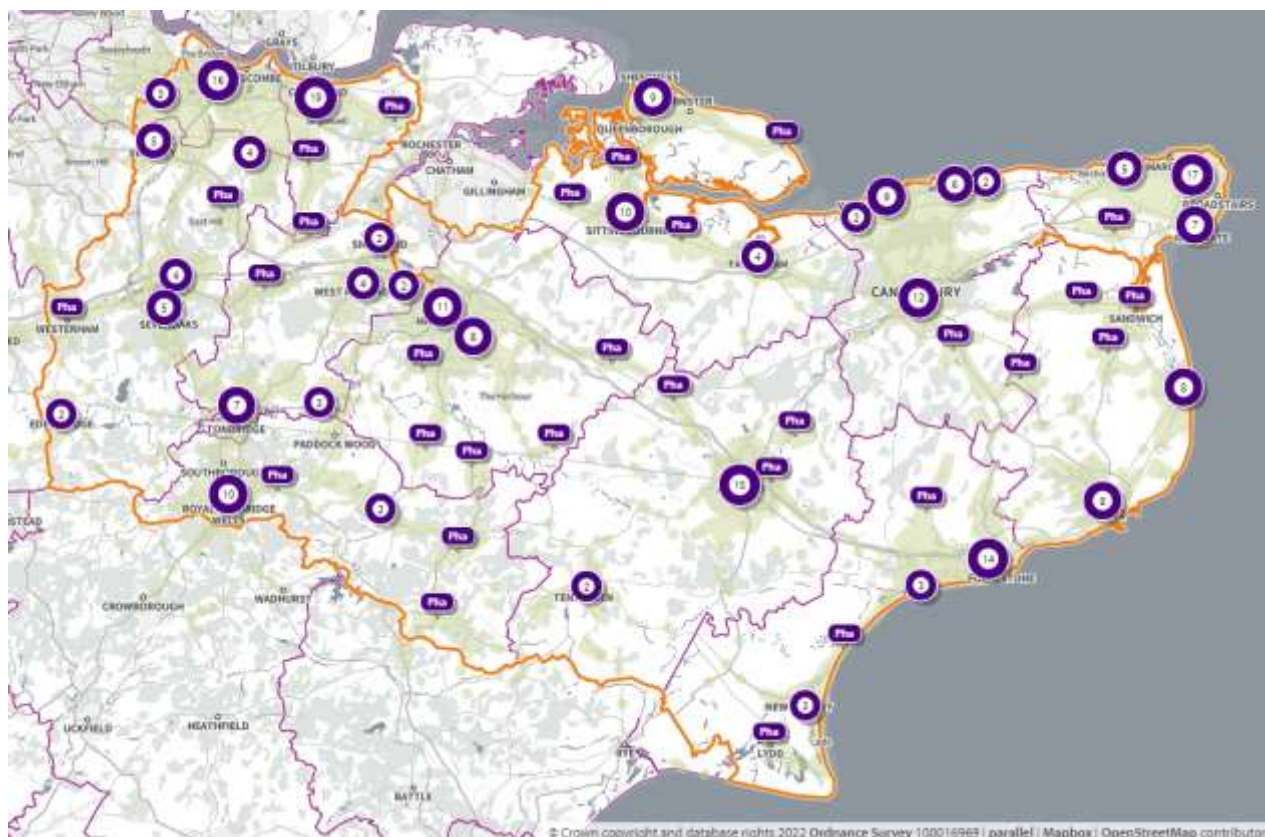

Map 11. Areas within a 20-minute walk of a community pharmacy

The green shaded areas in Map 11 show that 81% of the Kent population is within a 20-minute walk of a community pharmacy.

Map 12. Areas within 20-minutes by public transport of a community pharmacy

The green shade areas in Map 12 show that 94% of the Kent population is within 20 minutes by public transport of a community pharmacy

Responses to the public and patient questionnaire provide the following insights into accessing pharmacies:

- 50% respondents always used the same pharmacy and a further 33% used the same pharmacy most of the time
- The top three reasons for using a particular pharmacy are because it is close to home, close to the GP practice, the location is near to shops
- 45% of people drive to a pharmacy and 45% walk
- Access takes less than 10 minutes (62%) or 11 to 30 minutes (36%)
- The most convenient times to visit a pharmacy are 9.00am to 12.00pm (37%), then 12.00 to 3.00pm (34%) and 5.00 to 7.00pm (15%)

5.1.2 Access to Essential Services and Dispensing Appliance Contractor Equivalent Services

Whilst the majority of people will visit a pharmacy during the 9.00am to 5.00pm period, Monday to Friday, following a visit to their GP or another healthcare professional, there will be times when people will need or choose to access a pharmacy outside of those times. This may be to have a prescription dispensed after being seen by the out of hours GP service, or to collect dispensed items on their way to or from work or it may be to access one of the other services provided by a pharmacy

outside of a person's normal working day. The patient and public engagement survey for Kent showed that the period 9.00am to 7.00pm is the most convenient time for respondents to visit a pharmacy.

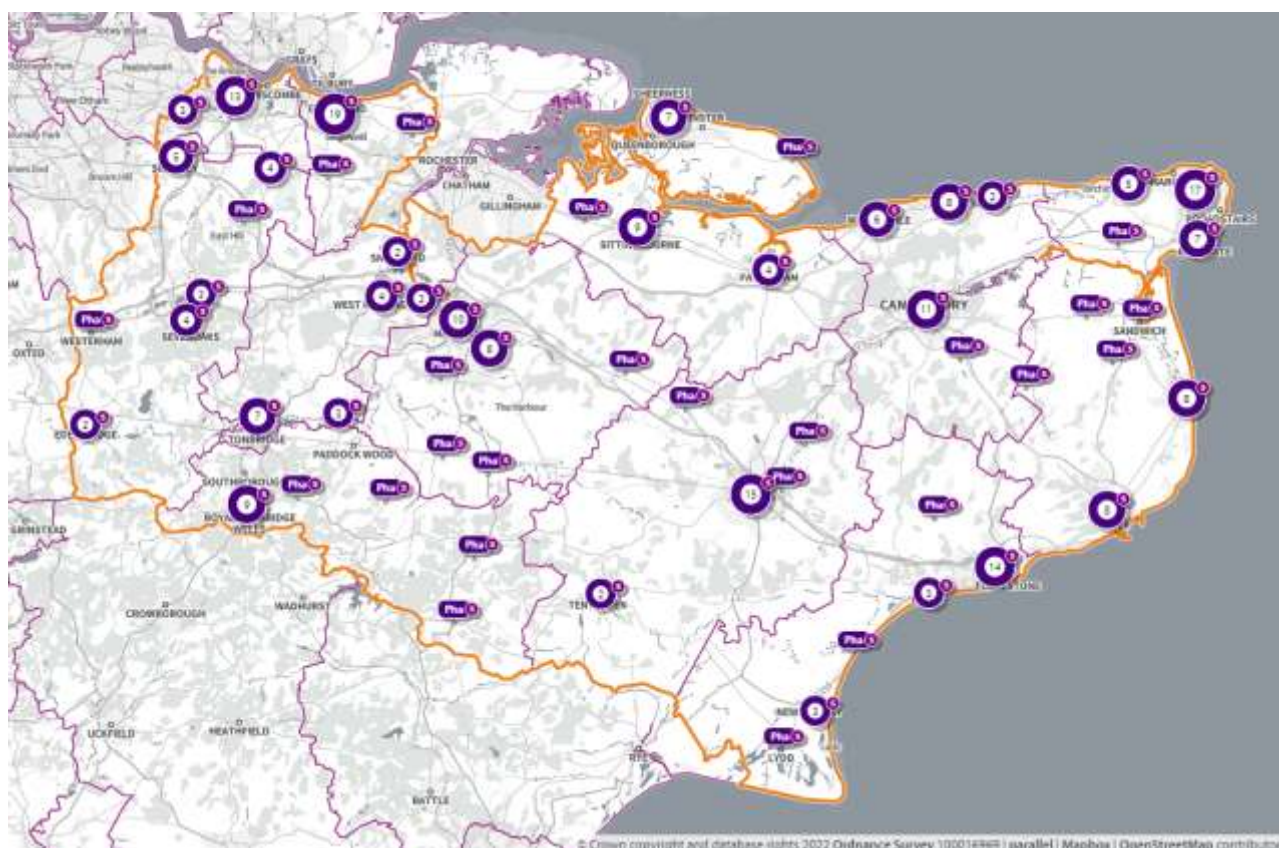

According to the SHAPE web application, 89 practices in Kent open outside of the core hours of 8.30am-6pm. 17 practices open on Saturdays and 2 on Sundays. Practices may choose whether or not to provide extended opening hours over and above their core opening hours which are 8.00am to 6.30pm Monday to Friday, excluding public and bank holidays.

As the extended hours access scheme is subject to national negotiations it is not yet known how these hours will change during the lifetime of the pharmaceutical needs assessment or whether it will continue to be commissioned by NHS England or the Clinical Commissioning Groups or Kent and Medway Integrated care System (ICS). If GP practice opening hours change then NHS England has the ability to direct existing pharmacies to open for longer hours where necessary.

5.1.3 Access to Community Pharmacy Consultation Service

In 2020/21 239 pharmacies provided this service, and a total of 5,633 full-service interventions were claimed over the year ⁽¹⁾. 4 of these pharmacies closed during 2020/21. Map 13 shows the location of the 254 of pharmacies that provide the service as of November 2021.

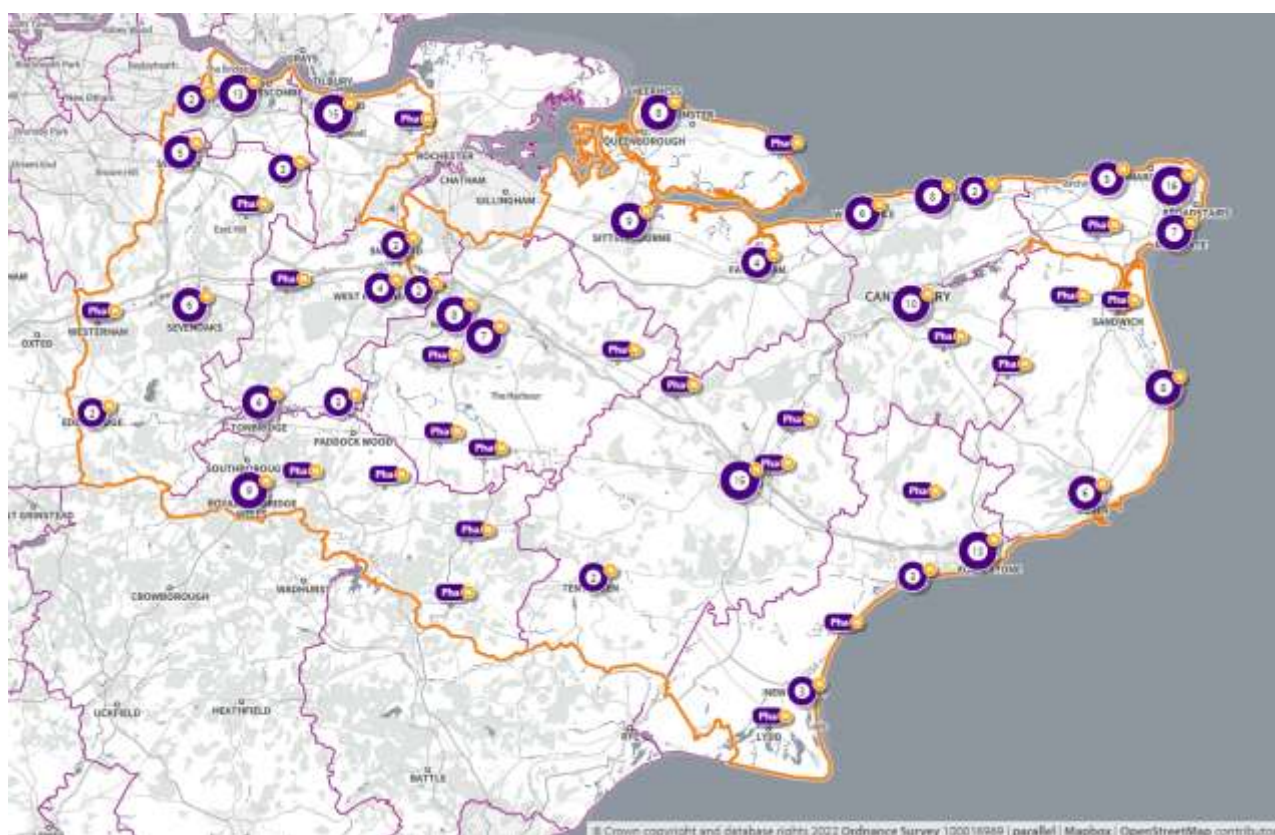

Map 13. Location of pharmacies that provided CPCS 2020/2021

5.1.4 Access to the New Medicine Service

In 2020/21 242 pharmacies provided this service, and a total of 21,610 full-service interventions were claimed over the year ⁽¹⁾. 5 of these pharmacies closed during 2020/21 and one no longer provides the service. Map 14 shows the location of the 236 pharmacies that provide the service as of November 2021. It should be noted that those pharmacies in the more rural parts of the county do not provide the service. This will partly be due to the fact that dispensing patients are not eligible to receive this service as their GP practice dispenses their prescriptions.

Map 14. Location of pharmacies that provided NMS 2020/2021

5.1.6 Access to the National Influenza Adult Vaccination Service

256 of the pharmacies provided a total of 81,027 flu vaccinations in September 2020-March 2021, the first year of the service ⁽¹⁾. There was a considerable range in the number of vaccinations given at pharmacy level from one pharmacy which gave one vaccination to another that gave 1,791 vaccines. Map 15 shows the location of the 255 pharmacies that provide the service as of November 2021.

Map 15. Location of pharmacies that provided the flu vaccine September 2020-March 2021

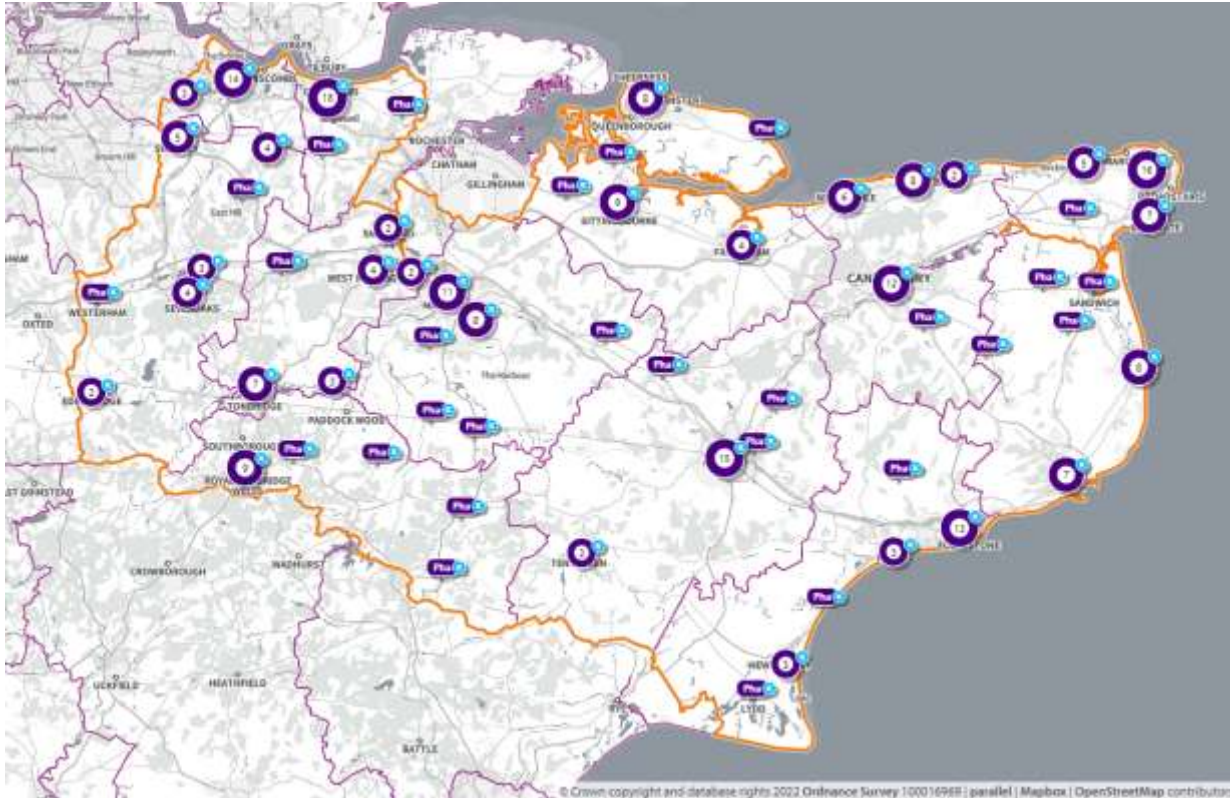

Figure 21 shows that the number of flu vaccinations delivered by each pharmacy in 2019/20 ranged from 1 to 1,791, the average was 317.

Figure 21. Number of flu vaccinations claimed in Kent in 2019/20 by pharmacy ⁽¹⁾

5.1.7 Dispensing Service Provided by Some GP Practices

Dispensing GP practices will provide the dispensing service during their core hours which are 8.00am to 6.30pm from Monday to Friday excluding public and bank holidays. The service may also be provided during any extended opening hours provided by the practices. As of January 2022, 136,448 people were registered as a dispensing patient with their practice ⁽¹⁾.

5.1.8 Access to Pharmaceutical Services on Public and Bank Holidays

NHS England has a duty to ensure that residents of the Health and Wellbeing Board's area are able to access pharmaceutical services every day. Pharmacies and dispensing appliance contractors are not required to open on public and bank holidays, or Easter Sunday, although some choose to do so. NHS England asks each contractor to confirm their intentions regarding these days and where necessary will direct a contractor or contractors to open all or part of these days to ensure adequate access.

5.2 Necessary Services: Current Provision Outside the Health and Wellbeing Board's Area

5.2.1 Access to Essential Services and Dispensing Appliance Contractor Equivalent Services

Patients have a choice of where they access pharmaceutical services; this may be close to their GP practice, their home, their place of work or where they go for shopping, recreational or other reasons. Consequently, not all the prescriptions written for residents of Kent are dispensed within the county although as noted in the previous section, the vast majority of items are. In 2020/21, 5.3% of items were dispensed outside of the Health and Wellbeing Board's area by a total of 6,086 different contractors ⁽¹⁾. The number of items dispensed by each contractor outside of the Health and Wellbeing Board's area varied from a low of 1 to a high of 509,621.

An analysis of these contractors shows that there were four main reasons for a prescription to be dispensed outside of the county:

- To dispensed by a dispensing appliance contractor (one dispensing appliance contractor dispensed 3.4% of all the items that were dispensed out of the Health and Wellbeing Board's area)
- Use of distance selling premises (one such pharmacy dispensed 33% of all the items that were dispensed out of the Health and Wellbeing Board's area)
- Use of a pharmacy that is just over the border of Kent for example
- Prescriptions dispensed whilst on holiday, at work or shopping

5.2.2 Access to Community Pharmacy Consultation Service, New Medicine Service, and flu vaccination

Information on the type of advanced services provided by pharmacies outside the Health and Wellbeing Board's area to residents of Kent is not available. When claiming for advanced services contractors merely claim for the total number provided for each service. The exception to this is the stoma appliance customisation service where payment is made based on the information contained on the prescription. However even with this service just the total number of relevant appliance items is noted for payment purposes. It can be assumed however that residents of the Health and Wellbeing Board's area will access these services from contractors outside of Kent.

5.2.3 Dispensing Service Provided by Some GP Practices

Some residents of the Health and Wellbeing Board's area will choose to register with a GP practice outside of the county and will access the dispensing service offered by their practice.

5.3 Other Relevant Services

'Other relevant services' are defined within the NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended as services that are provided in and/or outside the Health and Wellbeing Board's area which are not necessary to meet the need for pharmaceutical services but have secured improvements or better access to pharmaceutical services in its area.

For the purposes of this pharmaceutical needs assessment, the Health and Wellbeing Board has agreed that other relevant services are Appliance Use Reviews, stoma appliance customisation and enhanced services.

5.3.1 Other relevant services within the Health and Wellbeing Board's Area

5.3.1.1 Access to Appliance Use Reviews

One pharmacy and one dispensing appliance contractor provided a total of 1,115 Appliance Use Reviews (AURs) in 2020/21, of which 80% were provided at the home of the patient⁽¹⁾. Figure 22 shows the number of AURs carried out across all pharmacies each month of 2020/21. There were no AURs carried out in April 2020 to June 2020, 40 carried out in July and then at least 94 carried out each month until the end of the financial year.

98% of AURs were carried out by the dispensing appliance contractor. However, due to the fact that dispensing appliance contractors provide services across England not all of these will have been provided for Kent residents. Due to the way the data is collated and published it is not known how many of these were provided for Kent residents.

Figure 22. Number of Appliance Use Reviews claimed by dispensing appliance contractors and pharmacies Kent 2020/21

At the time of drafting this pharmaceutical needs assessment data for 9 months of 2021/22 was available. It shows that 2 dispensing appliance contractors provided a total of 764 Appliance Use Reviews between April and December 2021 of which 76% were provided at the home of the patient. 95% of appliance use reviews were carried out by one of the dispensing appliance contractors ⁽¹⁾. Figure 23 shows that the monthly pattern of claiming for these two contractors varies considerably from a low of 4 in June to a high of 222 in July.

Figure 23. Number of Appliance Use Reviews claimed by dispensing appliance contractors and pharmacies Kent in 2021/22

Based upon a comparison of the level of provision in 2020/21 with that so far in 2021/22 the Health and Wellbeing Board is satisfied that at county level there is sufficient capacity within existing contractors in relation to this service. However, this may not be the case at locality level and further analysis is undertaken within the locality chapters.

5.3.1.2 Access to Stoma Appliance Customisations

21 pharmacies and two of the dispensing appliance contractors customised 46,974 stoma appliances in 2020/21. One dispensing appliance contractor carried out 81.6% of all stoma appliances customisations in the Health and Wellbeing Board's area ⁽¹⁾. Figure 24 shows that the monthly pattern of claiming for stoma appliance customisations is relatively stable, ranging from 3,243 in February 2021 to 4,525 in November 2020. Map 16 shows the locations of these pharmacies.

Figure 24. Number of stoma appliance customisations claimed by pharmacies and dispensing appliance contractors in Kent 2020/21

Source: NHSBSA, prepared by KPHO (JS), Apr 22

Map 16. Location of pharmacies and dispensing appliance contractors providing the stoma appliance customisation service in Kent 2020/21

However due to the fact that dispensing appliance contractors provide services across England not all of these will have been provided for Kent residents. Due to the way the data is collated and published it is not known how many of these customisations were provided for Kent residents.

At the time of drafting this pharmaceutical needs assessment data for 2021/22 was available. It shows that two dispensing appliance contractors and 23 pharmacies customised 29,162 stoma appliances between April and December 2021 ⁽¹⁾. Figure 25 shows the pattern of claiming so far in 2021/22 for these contractors.

Figure 25. Number of stoma appliance customisations claimed by dispensing appliance contractors and pharmacies Kent in 2021/22

Based upon a comparison of the level of provision in 2020/21 with that so far in 2021/22 the Health and Wellbeing Board is satisfied that at county level there is sufficient capacity within existing contractors in relation to this service. However, this may not be the case at locality level and further analysis is undertaken within the locality chapters.

5.3.1.3 Access to Enhanced Services

There are no enhanced services commissioned in Kent and no plans to do so in the coming years.

5.3.2 Other Relevant Services Provided Outside the Health and Wellbeing Board's Area

Information on the Appliance Use Review and stoma appliance customisation services provided by pharmacies and dispensing appliance contractors outside the Health and Wellbeing Board's area to residents of Kent is not available due to the way contractors claim. It can be assumed however that residents of the Health and Wellbeing Board's area will access these two services from pharmacies and dispensing appliance contractors outside of Kent. It is also possible that residents will have accessed enhanced services from pharmacies outside of the Health and Wellbeing Board's area, but again this information is available.

5.4 Choice with regard to obtaining pharmaceutical services

As can be seen from sections 5.1 and 5.2, the residents of the Health and Wellbeing Board's area currently exercise their choice of where to access pharmaceutical services to a considerable degree. Within the Health and Wellbeing Board's area they have a choice of 271 pharmacies, operated by 90

different contractors, and two dispensing appliance contractors operated by different contractors. Outside of the Health and Wellbeing Board's area residents chose to access a further 6,086 contractors, although many are not used on a regular basis.

When asked what influences their choice of pharmacy the most common responses in the patient and public questionnaire were 'close to my home' and 'close to my doctor'. Please note that more than one option could be ticked.

6 Other NHS services

The following NHS services are deemed, by the Health and Wellbeing Board, to affect the need for pharmaceutical services within its area:

- Hospital pharmacies – reduce the demand for the dispensing essential service as prescriptions written in hospitals are dispensed by the hospital pharmacy service
- Personal administration of items by GPs – similar to hospital pharmacies this also reduces the demand for the dispensing essential service. Items are sourced and personally administered by GPs and other clinicians at the practice thus saving patients having to take a prescription to a pharmacy, for example for a vaccination, in order to then return with the vaccine to the practice so that it may be administered
- GP out of hours service – whether a patient is given a full or part course of treatment after being seen by the out of hours service will depend on the nature of their condition. This service will therefore affect the need for pharmaceutical services, in particular the essential service of dispensing
- Public health services commissioned by Kent County Council (drugs and alcohol services, needle exchange smoking cessation and sexual health) - all of these services remove the need for them to be commissioned as enhanced services by NHS England from pharmacies
- Walk-in centre and minor injury services of Kent service will generate prescriptions to be dispensed by pharmacies and potentially dispensing appliance contractors
- Prison pharmacies - reduce the demand for the dispensing essential service as prescriptions written in the Kent prisons are not dispensed by pharmacies or dispensing appliance contractors
- Substance misuse service – generates prescriptions which affect the need for the dispensing essential service
- End of life service - generates prescriptions which affect the need for the dispensing essential service
- Community nurses - generate prescriptions which affect the need for the dispensing essential service.

6.1 Hospital pharmacies

There are Four NHS Trust that provide service to the people of Kent, and each has inpatient hospitals, outpatient and community services:

- East Kent Hospital NHS Foundation Trust (Three large general hospital and two satellite hospital)
- Kent Community NHS Foundation Trust (12 Community Hospitals and Minor Injury units)
- Maidstone and Tunbridge Wells NHS Foundation (Three Hospitals)
- NHS Kent and Medway Partnership Trust

The inpatient hospitals pharmaceutical services are provided for by the trust's own pharmacies or specifically contracted pharmacies

Should services be moved out of the hospitals and into the primary care setting then it is likely that this would lead to more prescriptions needing to be dispensed by pharmacies in primary care. However, at the time of drafting there are no plans to do this.

Increasingly GPs are being asked to take on the prescribing of hospital-initiated medication. At this point in time, it is not possible to quantify the level of demand for pharmaceutical services that this may create.

6.2 Personal administration of items by GPs

Under their primary medical services contract with NHS England/the clinical commissioning group there will be occasion where a GP or other healthcare profession at the practice personally administers an item to a patient.

Generally, when a patient requires a medicine or appliance their GP will give them a prescription which is dispensed by their preferred pharmacy or dispensing appliance contractor. In some instances, however the GP or practice nurse will supply the item against a prescription and this is referred to as personal administration as the item that is supplied will then be administered to the patient by the GP or the nurse. This is different to the dispensing of prescriptions and only applies to certain specified items for example vaccines, anaesthetics, injections, intra-uterine contraceptive devices and sutures.

For these items the practice will produce a prescription however the patient is not required to take it to a pharmacy, have it dispensed and then return to the practice for it to be administered. Instead, the practice will retain the prescription and submit it for reimbursement to the NHS Business Services Authority at the end of the month.

It is not possible to quantify the number of items that were personally administered by GP practices in England as the published figures include items which have been personally administered or dispensed by dispensing practices.

6.3 GP out of hours service

The GP out of hours service for the county is based at two locations in the Health and Wellbeing Board area; however, only one location appears in the NHSBSA prescribing and dispensing data. There

are six prescription services operating from this one location. The number of items prescribed by the out of hours service can be seen in Table 19.

Table 19. Number of items prescribed by GP out of hours service 2020/21 ⁽¹⁾

Practice Name	Location	District	No. of items prescribed
Integrated Care 24 Limited	Kingston House	Ashford	14,202
West Kent CCG	Tonbridge Cottage Hospital	Tonbridge & Malling	-
lc24-DGS CCG	Kingston House	Ashford	11,329
lc24-Canterbury CCG	Kingston House	Ashford	6,154
lc24-Thanet CCG	Kingston House	Ashford	5,804
lc24-Ashford CCG	Kingston House	Ashford	10,626
lc24-Skg CCG	Kingston House	Ashford	7,566

The service is available Mondays to Fridays between 6.30pm and 8.00am, and 24 hours a day on weekends and public and bank holidays.

People contacting the out of hours service will initially be triaged by the national NHS 111 call line. They will ask a set of questions to decide if:

- The problem can wait until their surgery next opens
- The problem can be dealt with over the phone by a nurse or doctor
- The patient needs to attend one of the clinical bases, or
- The patient needs an emergency ambulance

If the patient's condition is not urgent, they may be referred to another service or asked to contact their surgery during normal opening hours. They may also be advised to visit a pharmacy.

The new Community Pharmacist Consultation Service (CPCS), that was launched on the 29 October 2019 as an Advanced service, plays a vital role in the provision of out of hours services.

CPCS takes referrals to community pharmacy from NHS 111 (and NHS 111 online for requests for urgent supply), Integrated Urgent Care Clinical Assessment Services and in some cases, patients referred via the 999 service.

Table 20 shows how many pharmacies were used for dispensing items prescribed by the out of hours service and the proportion that were dispensed within the HWB area. Table 21 shows the number of items prescribed by each out of hour's service in each district.

Table 20. Dispensing from out of hours prescription service ⁽¹⁾

Practice Name	Number of pharmacies used for dispense	Percentage of items dispensed in HWB area
Integrated Care 24 Limited	335	96%
West Kent CCG	-	-
Ic24-DGS CCG	250	88%
Ic24-Canterbury CCG	168	99%
Ic24-Thanet CCG	138	99%
Ic24-Ashford CCG	743	82%
Ic24-Skg CCG	152	99%

Table 21. Number of items prescribed by each out of hours service in each district ⁽¹⁾

6.4 Locally commissioned services – Kent County Council

Since 1 April 2013 Kent County Council has been responsible for the commissioning of public health services and this has impacted on the need for pharmaceutical services. Kent County Council commissions the following public health services from pharmacies:

- Smoking Free Advisor provider
- Smoking Cessation referral Service

- Supply of Varenicline (Champix)
- Supply of Nicotine Replacement Therapy
- Weight Loss Advisor
- One You Kent Pharmacy
- Health living Pharmacy
- What the Bump
- Sexual and Health Improvement Service
- Chlamydia Screening and treatment
- Emergency hormonal contraception
- Condom Distribution (LC)
- Needle Exchange
- Supervised Consumption of buprenorphine and methadone
- Naloxone distribution (pilot)

6.5 Urgent care centres

Table 22. Urgent care centres in Kent County Council area ⁽⁶¹⁾

Minor Injury Units and Urgent Treatment Centres	Opening times
Buckland Hospital, Dover	8am - 8pm
Estuary View Medical Centre, Whitstable	8am - 8pm
Faversham Medical Practice, Faversham	8am - 8pm
Gravesham Community Hospital	8am to 8pm
Kent and Canterbury Hospital	24 hours
Maidstone Hospital	8am - 8pm
QEQM Hospital, Margate	24 hours
Queen Victoria Memorial Hospital, Herne Bay	8am - 8pm
Royal Victoria Hospital, Folkestone	8am-8pm
Sevenoaks Hospital	8am - 8pm
Tunbridge Wells Hospital at Pembury	8am - 8pm
Victoria Memorial Hospital, Deal	8am - 8pm
William Harvey Hospital, Ashford	24 hours

The centres assess and treat conditions for patients who cannot wait for an appointment at their GP practice, and which require urgent and necessary attention, such as:

- Children with high temperatures
- Children and adults with breathing problems
- Bladder and other painful infections
- Abdominal pain
- Severe headaches

- Dizzy turns
- Mild and moderate injuries and burns
- Worrying rashes
- New unexplained symptom
- Worrying worsening of a long-term condition.
- Strains
- Sprains
- Wounds
- Minor burns
- Fractures (because of the X-ray facilities).

No appointment is needed but patients are seen in order of clinical priority, so may have to wait if their condition is not as serious as others.

All Kent's minor injury units (MIUs) and urgent treatment centres (UTCs) provide prepacks of medicines under patient group directions. However, there are situations when items are prescribed using FP10Hp prescription forms.

Available data from minor injury units and urgent care centres in Table 23 shows that 25,822 items were prescribed in 2020/21 of which 96% were dispensed by the community pharmacies in Kent and the remainder dispensed at 118 pharmacies outside Kent ⁽¹⁾.

Table 23. Number of items prescribed by MIUs and UTCs ⁽¹⁾

Urgent treatment centres	Number of Items
Folkestone and Deal Royal Victoria Hospital Victoria Memorial Hospital	304
East Kent Buckland Hospital Kent and Canterbury Hospital QEQM Hospital William Harvey Hospital	11,161
Estuary View Medical Centre, Whitstable	1,510
Faversham Medical Practice, Faversham	94
Gravesham Community Hospital	5,627
Queen Victoria Memorial Hospital, Herne Bay	2
Sheppey Community Hospital	7,124
Total	25,822

6.6 Prisons and Secure Training Centre

There are six prisons in the Kent Health and Wellbeing area. The physical and mental health services are provided by Oxleas NHS Foundation Trust. The trust has its own inhouse pharmaceutical services.

6.7 Palliative Care Service

Palliative care services are provided in Kent by:

- Kent Community Health NHS Foundation Trust
- McMillian Palliative Care Teams (based in East Kent Hospital and Maidstone Hospital)
- Marie Curie Teams
- Pilgrims Hospices ⁽³⁾
- Ellenor Lions Hospice
- Heart of Kent Hospice
- Hospice in the Weald

The Pilgrims Hospices, Ellenor Lions Hospice, Heart of Kent Hospice, Hospice in the Weald prescribe 2,886 items in 2020/21 that were dispensed by community pharmacies ⁽¹⁾. GPs and other health care professional from the organisations listed above also prescribed palliative care items that were dispensed by community pharmacies.

Kent and Medway CCG commission a local service from 34 pharmacies across Kent. These pharmacies are funded to stock an agreed amount of specified palliative care drugs. These medicines are dispensed against prescriptions written by community nurses, GPs and specialist palliative care services. Dispensing data obtained by Kent and Medway CCG shows that 1,801 items were dispensed in 2020/21. However, this is likely to be an underestimate as data was not available for all pharmacies.

6.8 Substance Misuse Service

Substance misuse services are commissioned from Forward Trust in the east of the county and from Care, Grow, Live (CGL) in the west. Dedicated staff are available for anyone requiring support around their recovery. The service offers support to the individual in sustaining recovery. Working with the individual, the recovery worker will offer information, advice and guidance, with links to the local community. Groups and activities are also available from the commissioned drug and alcohol services to assist service users in their recovery journey as well as links to mutual aid groups and longer-term recovery support options.

In 2020/21, 45,112 items were prescribed by the service and dispensed in the primary care setting by 307 contractors in and outside of Kent although 98% of items were dispensed by 201 contractors all based in Kent ⁽¹⁾.

7 Health Needs that can be Met by Pharmaceutical Services

In England there are an estimated 1.2 million health related issues visits to a pharmacy every day ⁽⁶²⁾ and these provide a valuable opportunity to support behaviour change through making every one of these contact's count. Making healthy choices such as stopping smoking, improving diet and nutrition, increasing physical activity, losing weight and reducing alcohol consumption could make a significant contribution to reducing the risk of disease, improving health outcomes for those with long-term conditions, reducing premature death and improving mental wellbeing. Pharmacies are ideally placed to encourage and support people to make these healthy choices as part of the provision of pharmaceutical services and services commissioned by the County Council and the Clinical Commissioning Group. As can be seen from this section, it is important that NHS England, the Clinical Commissioning Groups (and ICS in the future) and the Public Health Team at Kent County Council work together to maximise the local impact of public health communications, messages and opportunities.

7.1 Need for drugs and appliances

Everyone will at some stage require prescriptions to be dispensed irrespective of whether or not they are in one of the groups identified in section four. This may be for a one-off course of antibiotics or for medication that they will need to take, or an appliance that they will need to use, for the rest of their life in order to manage a long-term condition. This health need can only be met within primary care by the provision of pharmaceutical services be that by pharmacies, dispensing appliance contractors or dispensing doctors.

Coupled with this is the safe collection and disposal of unwanted or out of date dispensed drugs. Both NHS England and pharmacies have a duty to ensure that people living at home, in a children's home or in a residential care home can return unwanted or out of date dispensed drugs for their safe disposal.

Distance selling premises will receive prescriptions remotely (either via the Electronic Prescription Service, post or fax) and are required to deliver all dispensed items and this will clearly be of benefit to people who are unable to access a pharmacy and dispensing appliance contractors delivery the majority, if not all, of the items they dispense.

Many pharmacies collect prescriptions from GP practices, and all are able to access prescriptions via the Electronic Prescription Service. 133 of these pharmacies offer a free delivery service on a private basis (either to all or specified patient groups) and five of the dispensing practices, that responded to the survey, offer a free delivery service on a private basis to certain patient groups.

7.2 Alcohol and Drug Use

As needle exchange and the supervised consumption of substance misuse medicines are commissioned by the Council, it is not envisaged that within the lifetime of this pharmaceutical needs

assessment there is or will be a need for either service to be commissioned as part of pharmaceutical services.

However, there are elements of essential service provision which will help address this health need:

- Pharmacies are required to participate in up to six public health campaigns each calendar year by promoting public health messages to users. The topics for these campaigns are selected by NHS England and could include drug and alcohol abuse. Public health campaigns could include raising awareness about the risks of alcohol consumption through discussing the risks of alcohol consumption over the recommended amounts, displaying posters, and distributing leaflets, scratch cards and other relevant materials
- Where the pharmacy does not provide the locally commissioned services of needle exchange and the supervised consumption of substance misuse medicines, signposting people using the pharmacy to other providers of the services.
- Signposting people who are potentially dependent on alcohol to local specialist alcohol treatment providers
- Providing healthy living advice opportunistically.

7.3 Cancer

In addition to dispensing prescriptions, pharmacies can contribute to many of the public health issues relating to cancer care as part of the essential services they provide:

- Disposal of unwanted drugs, including controlled drugs
- Pharmacies are required to participate in up to six public health campaigns each calendar year by promoting public health messages to users. The topics for these campaigns are selected by NHS England and could include cancer awareness and/or screening
- Signposting people using the pharmacy to other providers of services or support.

7.4 Long-term conditions

In addition to dispensing prescriptions, pharmacies can contribute to many of the public health issues relating to long-term conditions as part of the essential services they provide:

- Where a person presents a prescription, and they appear to have diabetes, be at risk of coronary heart disease (especially those with high blood pressure), smoke or are overweight, the pharmacy is required to give appropriate advice with the aim of increasing that person's knowledge and understanding of the health issues which are relevant to their circumstances
- Pharmacies are required to participate in up to six public health campaigns each calendar year by promoting public health messages to users. The topics for these campaigns are selected by NHS England and could include long-term conditions.
- Signposting people using the pharmacy to other providers of services or support.
- Providing healthy living and selfcare advice

- Provision of the Appliance Use Review, stoma appliance customisation, Discharge Medicines Service and flu vaccination advanced services will also assist people to manage their long-term conditions in order to maximise their quality of life.

7.5 Obesity

Three elements of the essential services will address this health need:

- Where a person presents a prescription, and they are overweight, the pharmacy is required to give appropriate advice with the aim of increasing the person's knowledge and understanding of the health issues which are relevant to their circumstances
- Pharmacies are required to participate in up to six public health campaigns each calendar year by promoting public health messages to users. The topics for these campaigns are selected by NHS England and could include obesity
- Signposting people using the pharmacy to other providers of services or support
- Providing healthy living advice during consultations

7.6 Sexual health

As chlamydia screening is commissioned by the County Council, it is not envisaged that within the lifetime of this pharmaceutical needs assessment there is or will be a need for it to be commissioned as part of pharmaceutical services.

However, there are elements of essential service provision which will help address this health need:

- Pharmacies are required to participate in up to six public health campaigns each calendar year by promoting public health messages to users. The topics for these campaigns are selected by NHS England and could include STIs and Human Immunodeficiency Virus
- Where the pharmacy does not provide the locally commissioned service for chlamydia screening, signposting people using the pharmacy to other providers of this service
- Providing healthy living advice during consultations.

7.7 Teenage pregnancy

As emergency hormonal contraception provision is commissioned by the County Council, it is not envisaged that within the lifetime of this pharmaceutical needs assessment there is or will be a need for it to be commissioned as part of pharmaceutical services.

However, there are elements of essential service provision which will help address this health need:

- Pharmacies are required to participate in up to six public health campaigns each calendar year by promoting public health messages to users. The topics for these campaigns are selected by NHS England and could include teenage pregnancy
- Where the pharmacy does not provide the locally commissioned service of EHC provision, signposting people using the pharmacy to other providers of the service.

7.8 Smoking

Smoking cessation is commissioned as a locally commissioned service and pharmacies are just one of several providers of this service. As smoking cessation is commissioned by the County Council, it is not envisaged that within the lifetime of this pharmaceutical needs assessment there is or will be a need for it to be commissioned as part of pharmaceutical services.

However, there are elements of essential service provision which will help address this health need:

- Where a person presents a prescription, and they appear to have diabetes, be at risk of coronary heart disease (especially those with high blood pressure), smoke or are overweight, the pharmacy is required to give appropriate advice with the aim of increasing that person's knowledge and understanding of the health issues which are relevant to their circumstances
- Pharmacies are required to participate in up to six public health campaigns each calendar year by promoting public health messages to users. The topics for these campaigns are selected by NHS England and could include smoking
- Where the pharmacy does not provide the locally commissioned service of smoking cessation, signposting people using the pharmacy to other providers of the service
- Routinely discussing stopping smoking when selling relevant over the counter medicines
- Providing healthy living advice during consultations.

7.9 Dementia

This Healthy Living Pharmacy (HLP) enabler requires patient facing staff to be trained in communicating with all members of the public including those with dementia. Staff are required to clearly identify themselves and wear name badges.

7.10 Healthy living

All pharmacies are required as part of essential services to obtain level 1 status as a healthy living pharmacy. The aim of healthy living pharmacies to maximise the role of the pharmacy in prevention of ill health, reduction of disease burden, reduction of health inequalities and in support of health and wellbeing. The Healthy Living Pharmacy concept is designed to develop (in respect of health and wellbeing services):

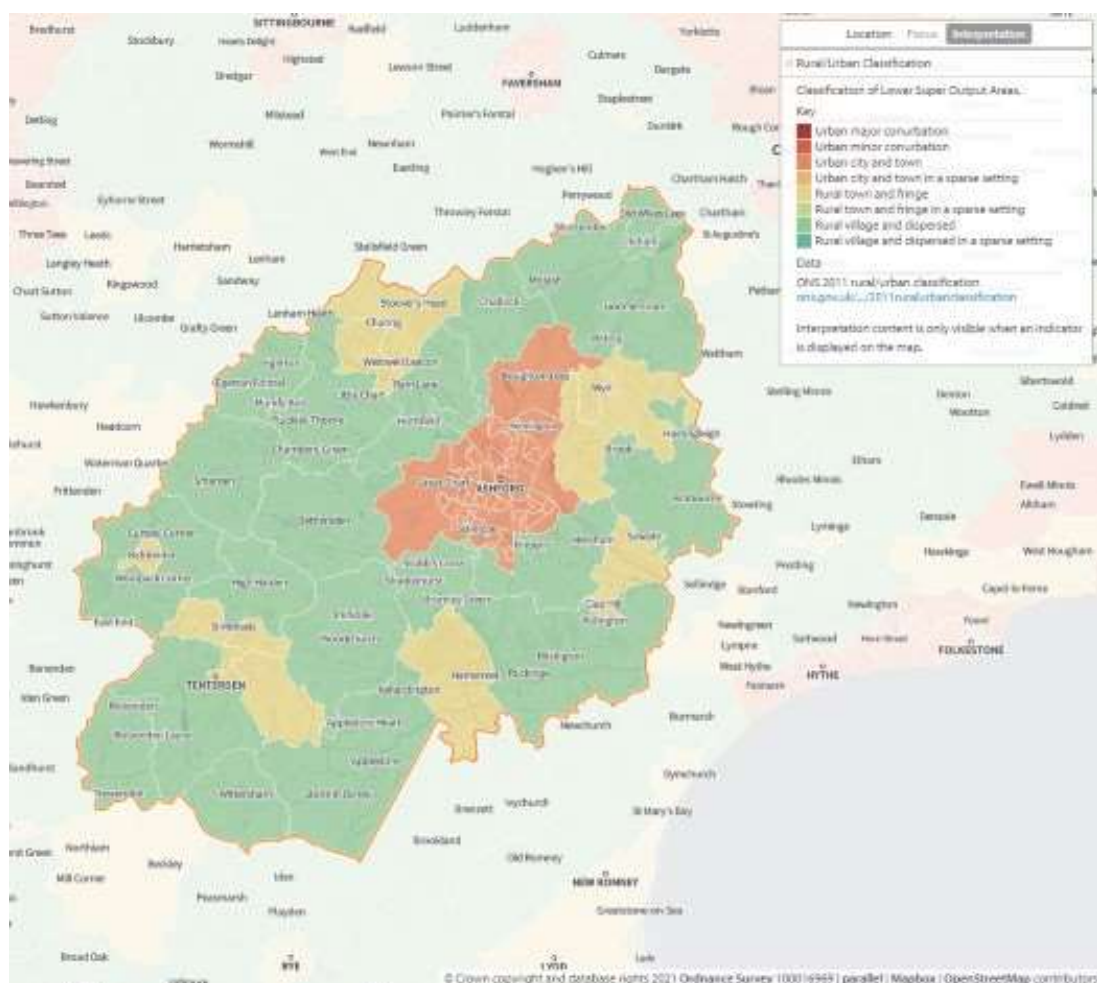

- The community pharmacy workforce
- Community pharmacy engagement with the general public (including "Making Every Contact Count")
- Community pharmacy engagement with local stakeholders such as local authorities, voluntary organisations and other health and social care professionals; and
- The environment in which health and wellbeing services are delivered.

8 Ashford Borough Council Locality Services

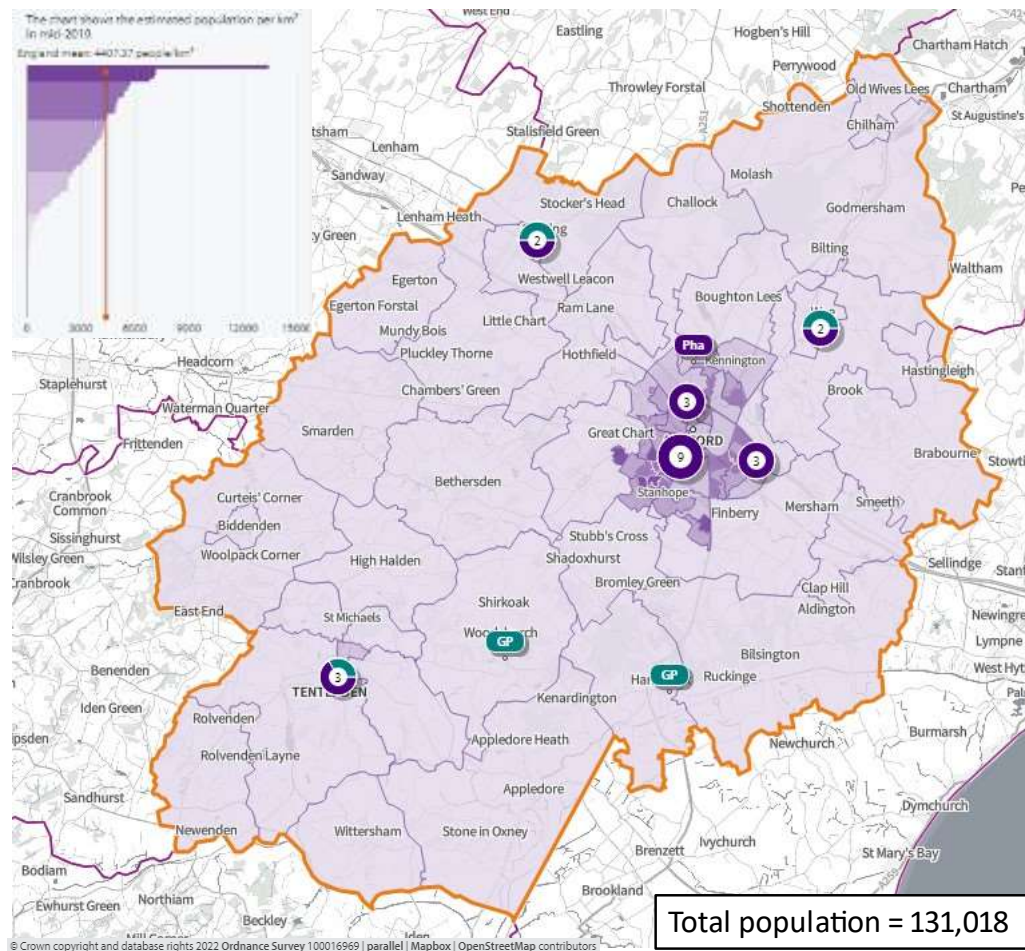

1. Key Facts

The locality of Ashford is a local government authority in the south of the county. It covers an area of 508.6 square kilometres. Most of the population live in and around the town of Ashford. Map 17 shows that the rest of the locality is rural in nature and mainly agricultural. Ashford is the least densely populated district in Kent with 3.3 persons per hectare, the average in Kent is 4.5 ⁽³⁾.

Map 17. Rural/urban classification of lower super output areas in Ashford

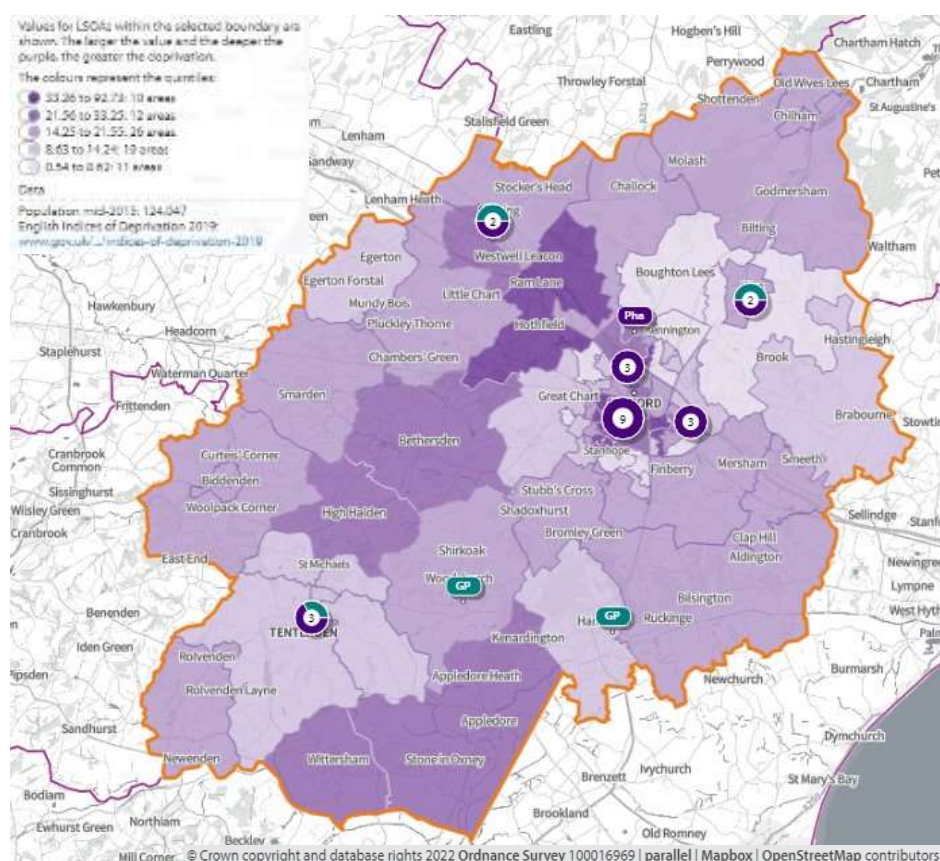

Map 18. Population density of lower super output areas in Ashford overlayed with locations of pharmacies and dispensing doctors

Deprivation

Map 19 shows the areas of deprivation in the Ashford locality. Deprivation tends to be average across the district but there are pockets of high deprivation. Ashford is ranked 7th out of Kent's 12 districts for deprivation. One LSOA on the edge of Ashford town is within the top 10% most deprived areas in England. Employment rates are similar to the Kent average ⁽⁶³⁾ as are educational attainment rates with 55.3% of all children achieving 5 or more GCSEs ⁽⁶⁴⁾.

Map 19. Deprivation of lower super output areas in Ashford overlayed with locations of pharmacies and dispensing doctors

Spoken Language

English is the main language for all people aged 16 or over in 94.9% of households in the district. 2.6% of households have no people with English as the main language ⁽²⁾.

House ownership

69% of houses are owned either outright (32%) or with a mortgage (37%). The average number of occupants per household is 2.4, the same as the Kent average ⁽²⁾.

Age distribution

The average age of Ashford district residents is 41, similar to the Kent average of 41.4 and the highest of all Kent districts. 19.7% of the population is over 65 and 20.6% 0-15 ⁽²⁾. Life expectancy at birth is 78.6 for males and 82.8 for females ⁽⁴⁶⁾.

Employment

By industry, the top three employers in the Ashford district are wholesale and retail trade (20.2%), human health and social work activities (16.7%), and administrative and support service activities (8.8%) ⁽¹⁵⁾. The proportion of jobs in the wholesale and retail trade (20.2%) is the highest for this industry in Kent and only Thanet matches Ashford for the highest proportion of jobs in a single industry ⁽¹⁵⁾.

Car ownership

16% of households in Ashford district do not have a car or van in the household ⁽¹³⁾.

Care Homes

There are a considerable number of care homes in the Ashford area. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services.

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are 20 Community pharmacies providing dispensing services in the Ashford locality. That is one pharmacy per 6,551 head of population. Figure 26 below shows how this compares with the other localities of Kent.

17 of the pharmacies open at least one hour after 17:00 on weekdays. All 20 are open on Saturdays and 6 open Saturday and Sundays. The weekly opening hours range from 48 to 101, with the average opening hours being 62 each week.

In addition, there are five dispensing GP practices in the locality.

Figure 26. Number of people per pharmacy in each locality

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There are 10.4% of prescriptions generated in the area that are dispensed in neighbouring areas and an even smaller percentage that are generated outside the locality and dispensed by Ashford locality community pharmacies ⁽¹⁾.

- 1,153 outside prescribers dispense in Ashford
 - 2.3% of all items dispensed in Ashford
- 41 prescribers in Ashford
 - 97.7% of all items dispensed in Ashford
- 30 dispensers in Ashford
 - 89.6% of all items prescribed
- 2,069 dispensers outside of Ashford
 - 10.4% of all items prescribed in Ashford

Pharmacy locality: Maps 1 and 2 above show the locality of the community pharmacies and GP dispensing practices.

Opening times

Table 24 below show the core and supplementary hours of each pharmacy. ⁽⁶⁵⁾

Table 24. Opening times for all pharmacies in Ashford

Pharmacy	Total weekly hours	Max. hours open after 5pm at least 1 day/week	Saturday hours	Sunday Hours
Lloyds Pharmacy, Bybrook	101	6	15	6
Asda Pharmacy	100	6	15	6
Boots, Sevington	96	7.0	15	6
Tesco Pharmacy, Kingsnorth	84	4	13	6

Well, Brookfield Court	49	1	4	0
Charing Pharmacy	49	1	4	0
Well, Wye	49	1	4	0
Delmergate Ltd, Eureka Park	48	1	3	0
Lloyds Pharmacy, Singleton	46.5	1.5	4	0

The dispensing GP practices in this locality are:

- Woodchurch Surgery TN26 3SF
- The Charing Surgery TN237 0AW
- Ivy Court surgery, Tenterden TN30 6RB
- Wye Surgery TN25 5AY
- Ham Street Surgery TN26 2NS

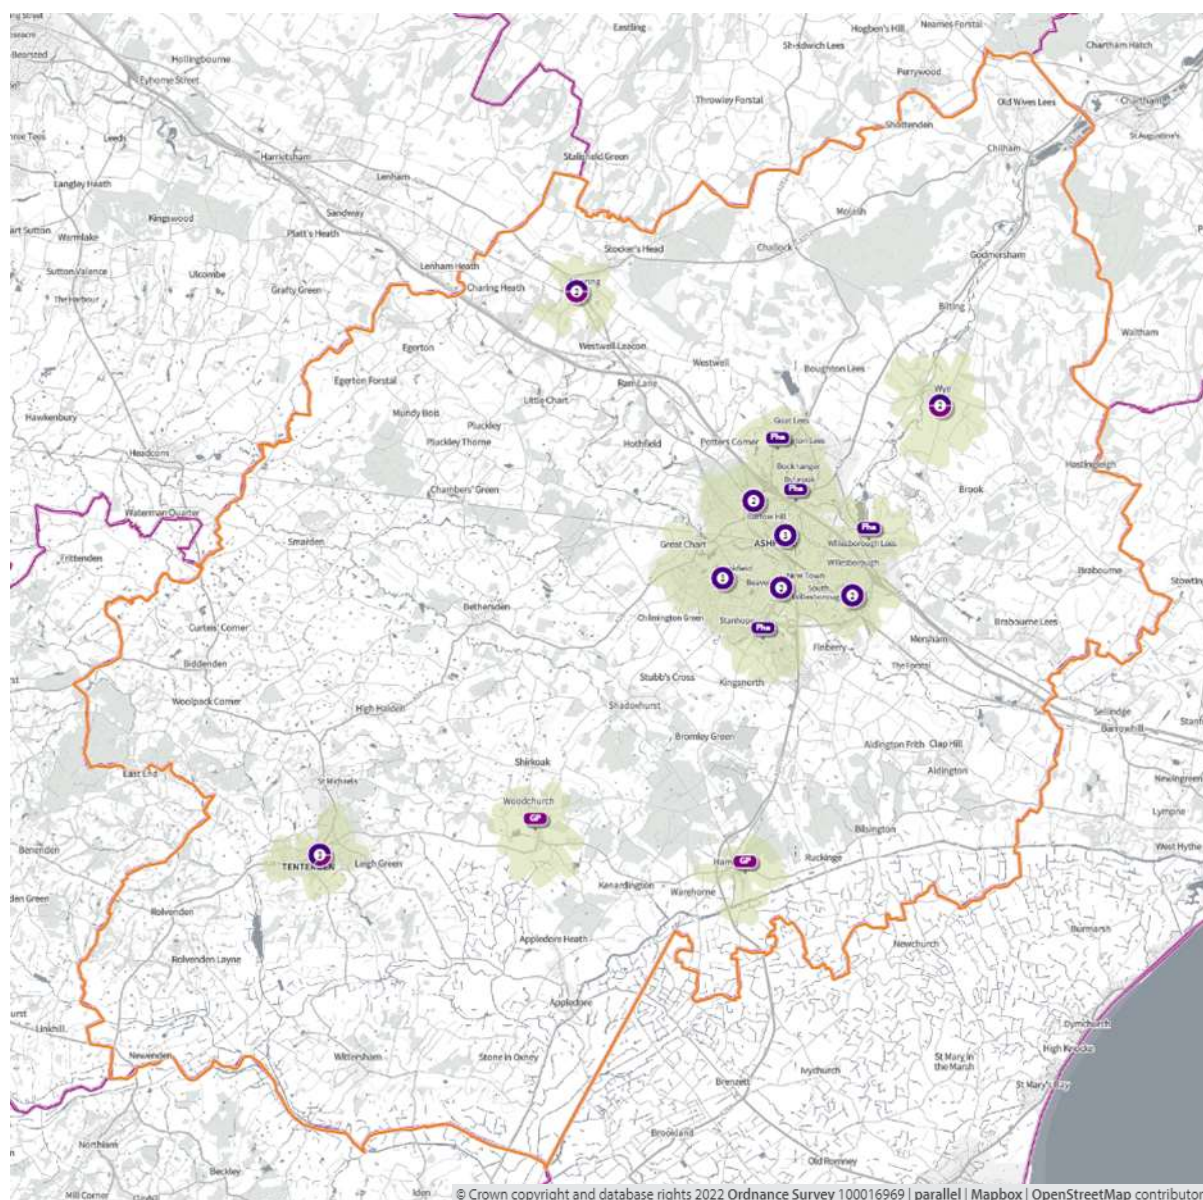

Access to Community Pharmacies

Travel times

Access during core opening times is shown in the maps (4-11) below.

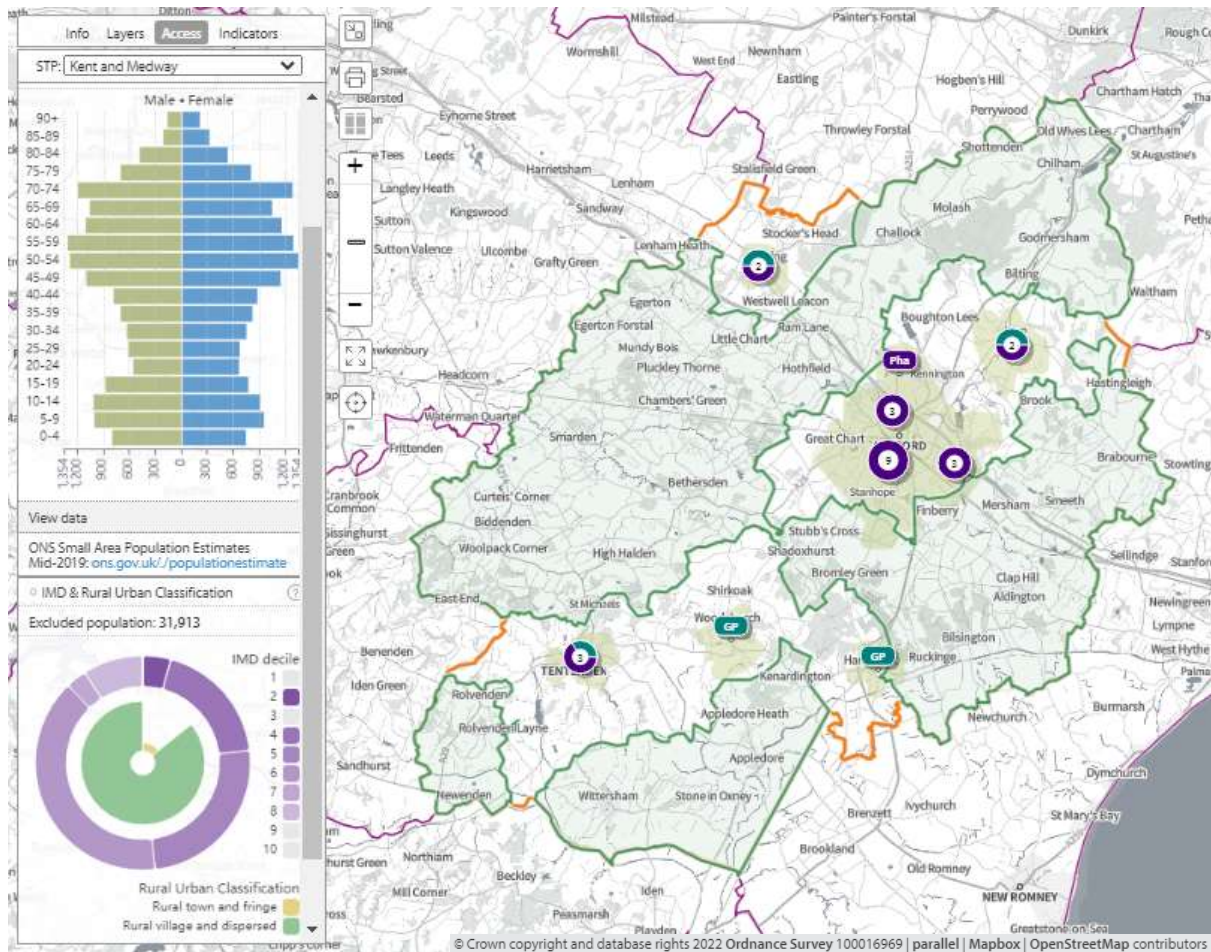

In **map 20** below, the green shaded areas are within a 20-minute walk of a community pharmacy/dispensing GP practice. All pharmacies are open for at least 3 hours on a Saturday in addition to their weekday opening hours. The data indicates that 31,913 (24.4%) people are not within a 20-minute walk.

Map 20. Locations of community pharmacies/dispensing GPs and areas within a 20-minute walk

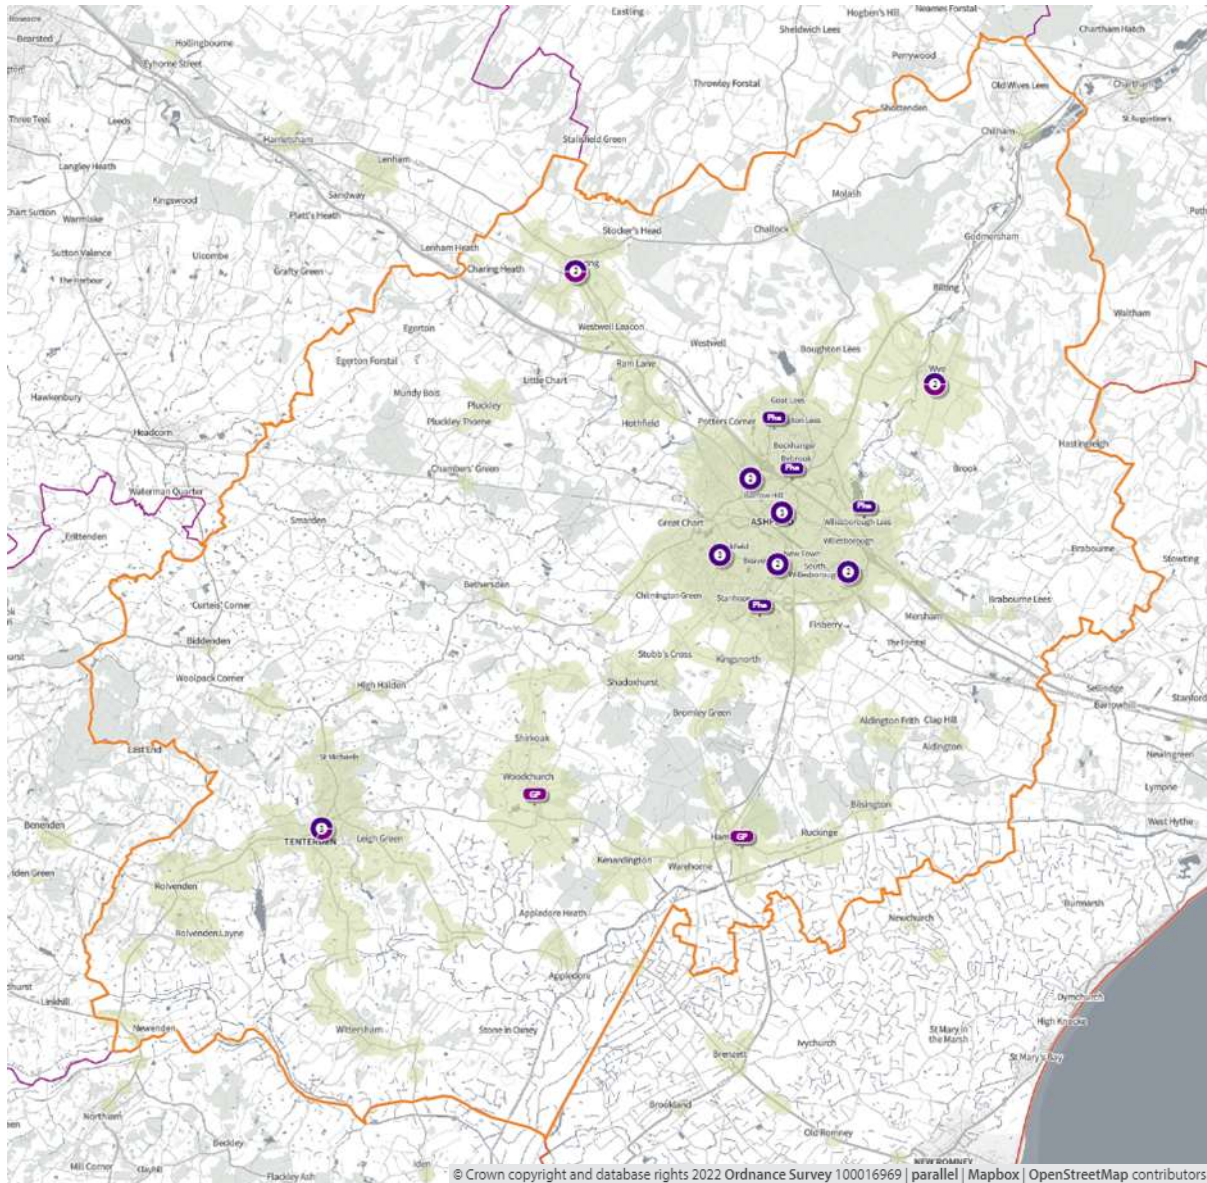

Map 21, below, shows **20 minutes walking access** for those in the population over **65 years of age**. 31.7% of 65+ population is not within a 20 minutes' walk of a community pharmacy or dispensing GP practice

Map 21. Locations of community pharmacies/dispensing GPs and lower super output areas not within a 20-minute walk

Map 22, below, shows **20 minutes public transport access**, on weekday mornings as green shaded areas to community pharmacies/dispensing GP practices. 12,815 (9.8%) people are not within 20-minutes by public transport.

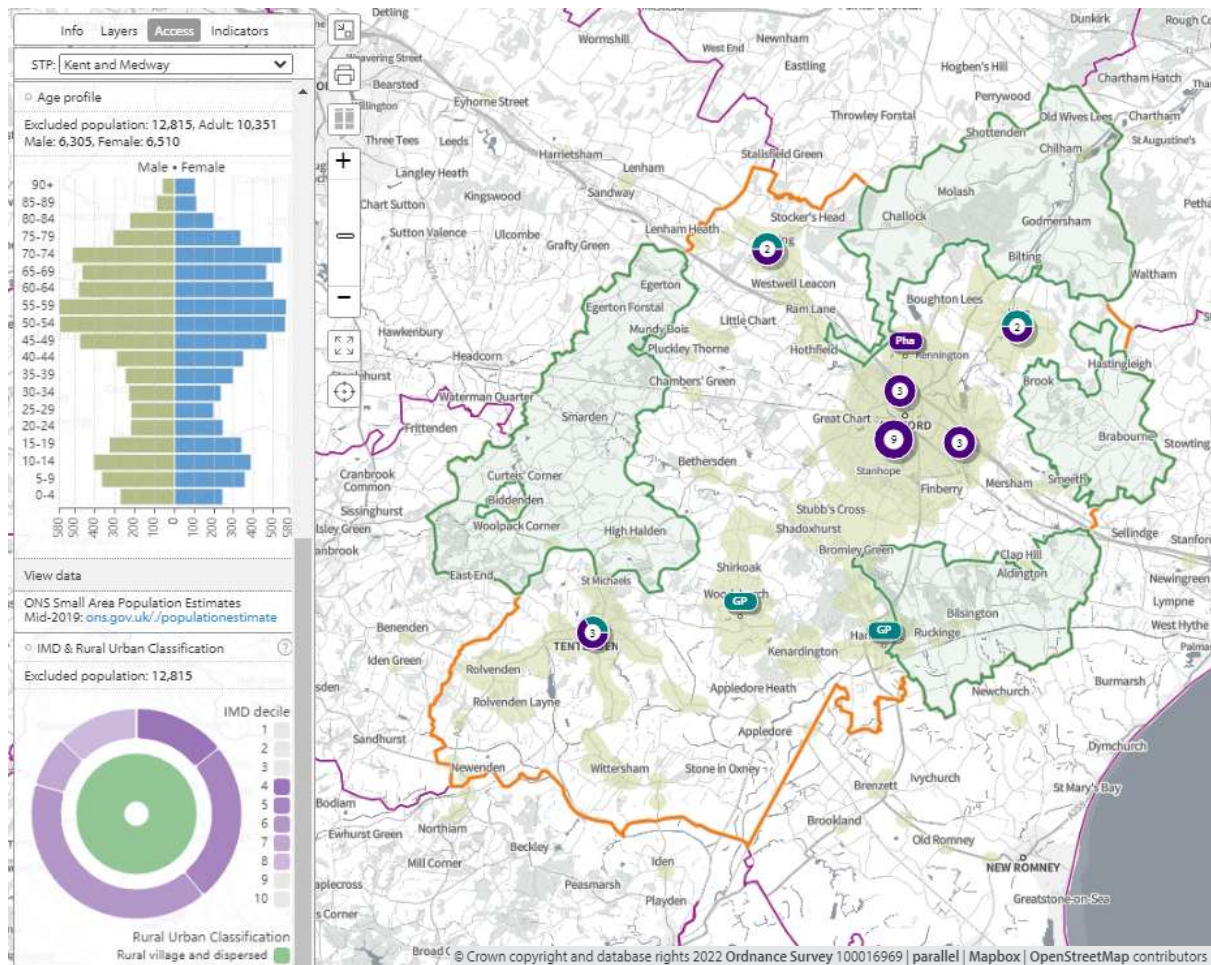

Map 22. Locations of community pharmacies/dispensing GPs and areas within 20-minutes by public transport on weekday mornings

Map 23, below, shows **20 minutes public transport access** on weekday mornings as green shaded areas, for those in the population over **65 years of age** to community pharmacies/dispensing GP practices.

The data reveals that 13.5% people are not within 20-minutes by public transport.

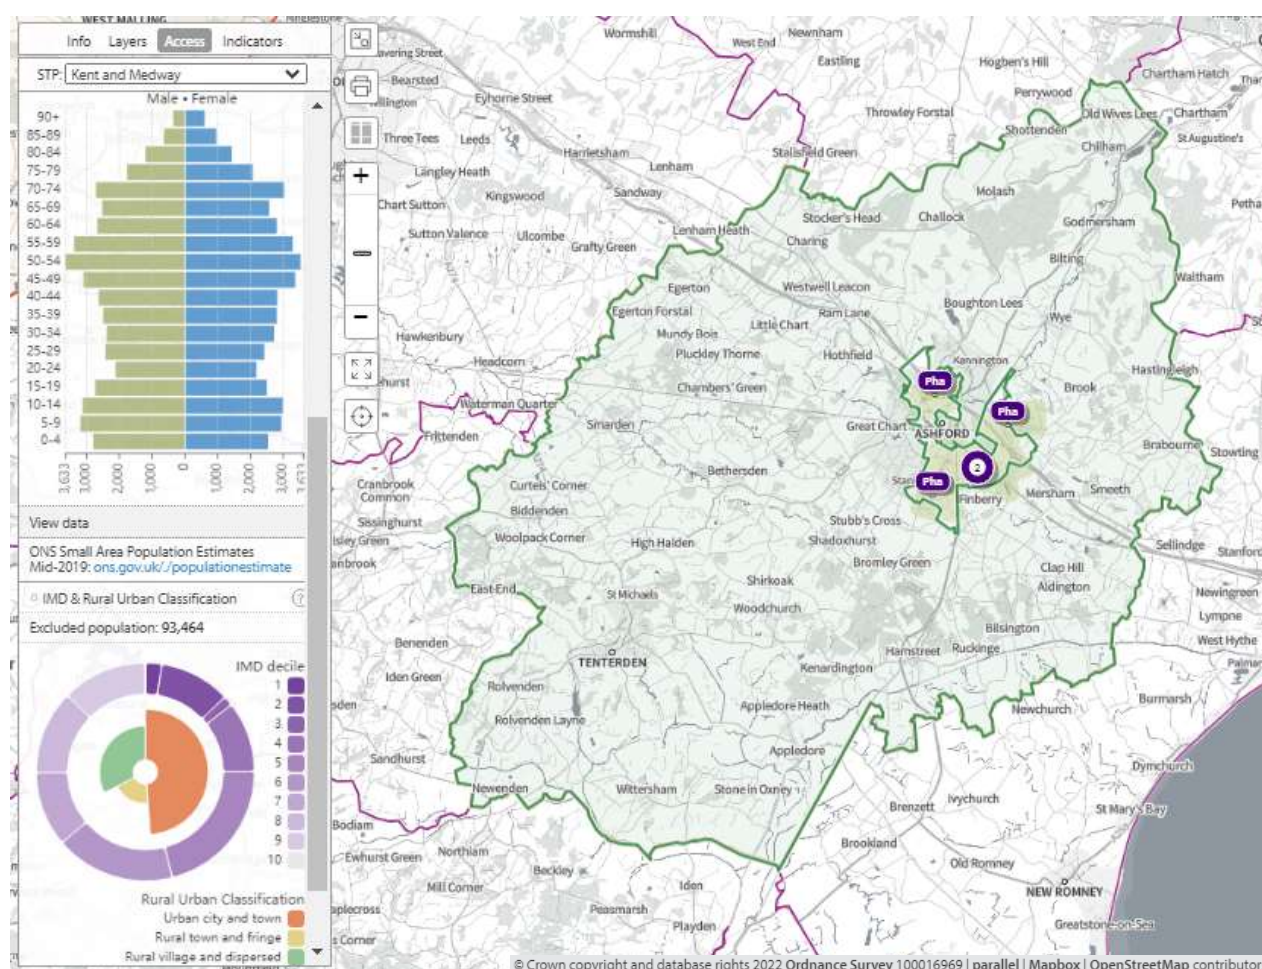

Map 23. Locations of community pharmacies/dispensing GPs and lower super output areas not within 20-minutes by public transport

Maps 24 and 25 show travel times for weekday evenings up to 8pm and Sundays

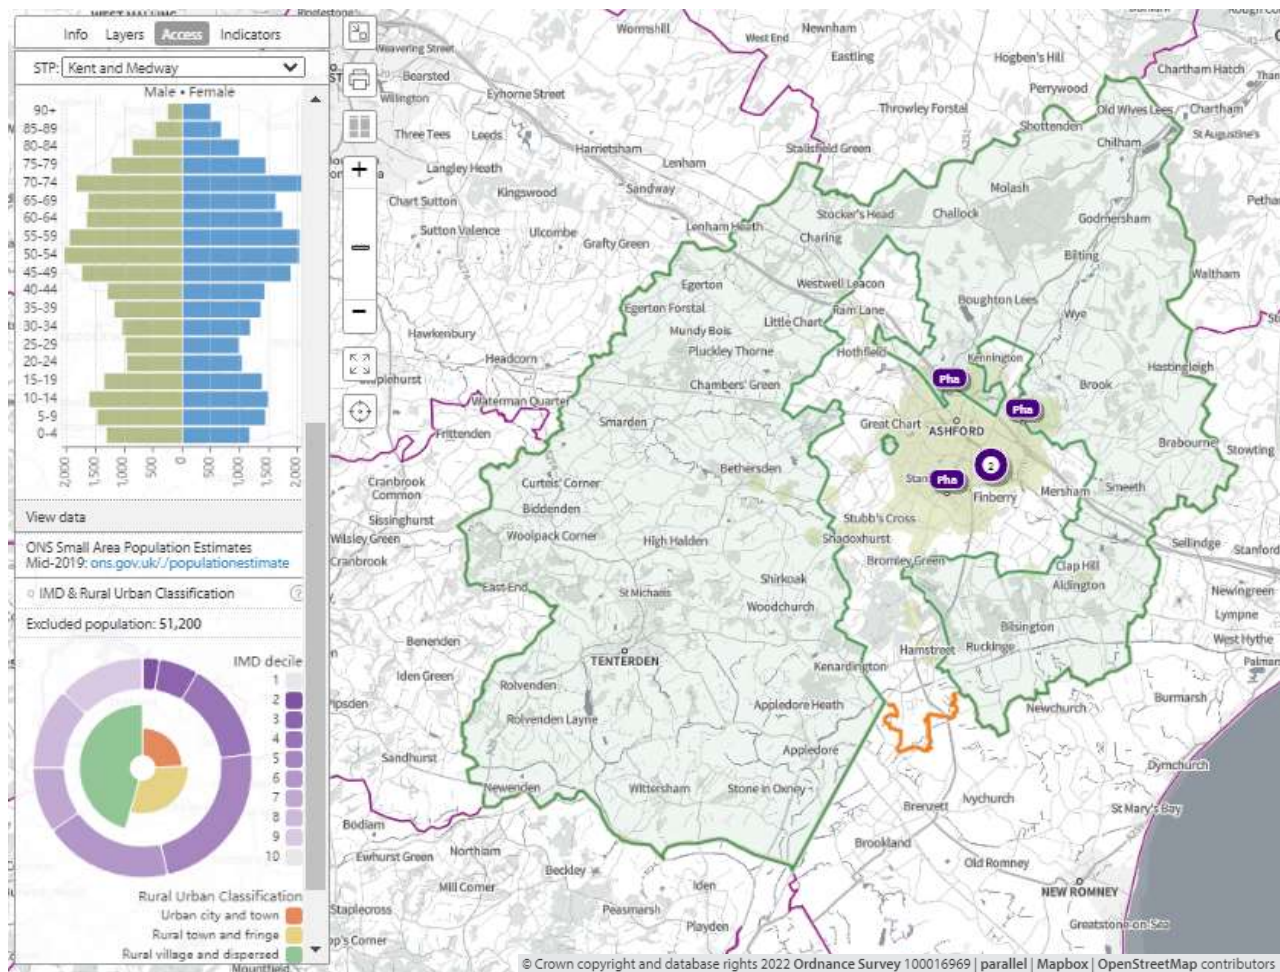

In **map 24**, below, 20-minute **walking access** to community pharmacies that are open until at least **20:00 hours on weekdays and open on Sundays** is shown. The data reveals that 71.3% of the population is not within a 20-minute walk of a community pharmacy at these times. Walking access in the evenings and on Sundays is in the town of Ashford with those living in more rural areas having no walking access.

Map 24. Locations of community pharmacies and lower super output areas not within a 20-minute walk

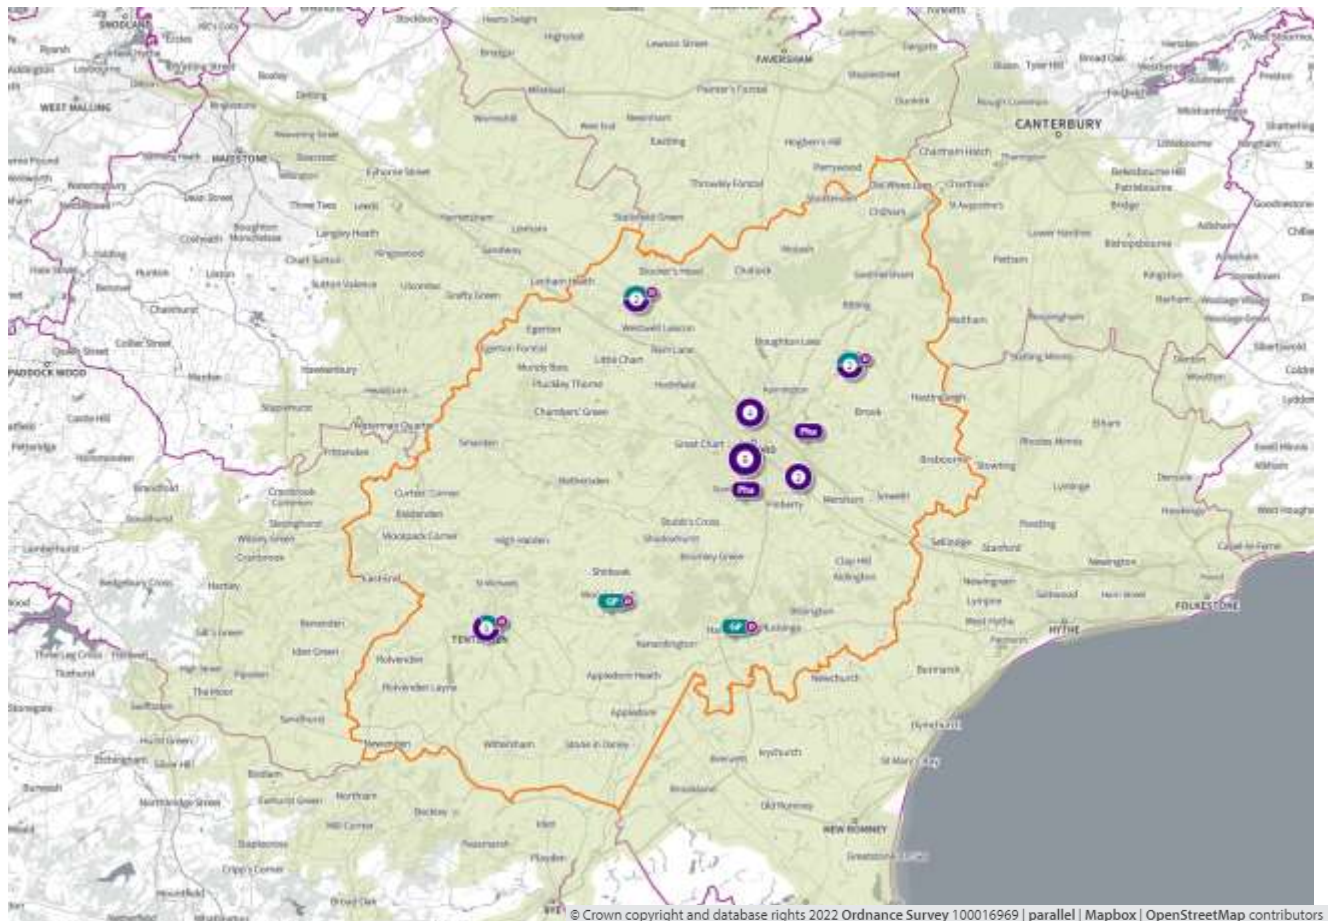

In **map 25**, below, 20-minute **public transport** to community pharmacies that are open until at least **20:00 hours on weekdays and open on Sundays** is shown as green shaded areas. The information shows that 40% of the population is not within 20-minutes by public transport of a community pharmacy at these times. As above this access is for those living in or close to the town of Ashford.

Map 25. Locations of community pharmacies and lower super output areas not within 20-minutes by public transport

Map 26, below, shows **20-minutes car** access, as green shaded areas to community pharmacies/dispensing GP practices. The entire population of Ashford is within 20 minutes by car. All pharmacies are open for at least 3 hours on a Saturday.

Map 26. Locations of community pharmacies/dispensing GPs and areas within 20-minutes by car

In map 27, below, 20-minute **car access** to community pharmacies that are open until at least **20:00 hours on weekdays and open on Sundays** is shown as green shaded areas. The information shows that 9.5% of the population is not within 20 minutes by car of a community pharmacy at these times.

Map 27. Locations of community pharmacies open until at least 8pm and lower super output areas not within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The information below indicates the number of prescriptions dispensed in and outside the locality.

- 2.46 million items prescribed in Ashford
 - 2.2 million items dispensed in Ashford
 - 1.2 million (54.5%) via Electronic Prescription Service
 - 255,908 (10.4%) dispensed outside of the district
 - 115,000 distance selling
 - 50,000 equally split between Folkestone and Hythe, Thanet and Canterbury
- 2.25 million items dispensed in Ashford
 - 1.64 million items dispensed by community pharmacies in Ashford
 - 615,000 dispensed by 10 GP practices:
 - Hamstreet Surgery – 155,116
 - Ivy Court Surgery – 140,747
 - Charing Surgery -119,836
 - Wye Surgery – 57,882
 - 52,844 items prescribed outside borough i.e. more going out than coming in

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling premises
- Which are located near to where they work, shop or visit for leisure or other purposes.

Taking into account this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy and do access a pharmacy within the locality.

4. Other relevant services: current provision

The following advanced services were delivered by pharmacies in the Ashford locality in 2020/21

Table 25. Number of pharmacies providing advanced services

Advanced service name	No. of pharmacies
New Medicine Service	20
Appliance Use Review	0
Hypertension Service‡	20
Stoma Appliance Customisation	2
Community Pharmacist Consultation Service (CPCS)‡	20
Hepatitis C Antibody Testing Service	0
Seasonal Influenza Vaccination Advances Service	20
Covid Vaccination Service*	1
Covid Home Delivery Service*	15
Covid lateral flow device distribution*	20

*Specific to the Covid-19 pandemic

‡Services introduced during the year of study

Please note that three services were specific to the Covid-19 pandemic (Covid vaccination, homedelivery and lateral flow device distribution services) and that others were new services (CPCS, Hypertension service) introduced within the year. There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- Ashford Medical Partnership is open until 8pm on Mondays and 8.15pm on Wednesdays
- Singleton Health Centre is open until 7.15pm on Tuesdays, Wednesdays and Thursdays
- Charing Surgery is open 9am-12.30pm on Saturdays
- Hamstreet Surgery is open until 8pm on Tuesdays and 9am-12pm on Sundays
- Ivy Court Surgery is open from 6.30am on Tuesdays-Thursdays and 9am-12pm on Saturdays and Sundays
- Kingsnorth Medical Practice is open until 8pm on Wednesdays
- New Hayesbank Surgery is open until 8pm on Mondays and from 7am on Wednesdays and Thursdays and 8am-12pm on Saturdays
- Sydenham House Medical Centre is open 8am-2pm on Saturdays
- Woodchurch Surgery is open until 8pm on Tuesdays and from 7.30am on Wednesdays
- Wye Surgery is open until 7pm Monday-Thursday

There is a large district general hospital, The William Harvey Hospital, in Ashford. It has both an accident and emergency and minor ailment and injury services which do use NHS prescriptions.

There are also drug and alcohol services, other Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality

- 14 pharmacies dispensed a total of 3,115 (mean = 222, range = 1-1,266) items from drug and alcohol services
- 20 pharmacies dispensed a total of 1,987 (mean = 99, range = 28-626) items from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- 17 pharmacies dispensed a total of 134 items (mean = 7.9, range = 1-59) from KCHFT
- 20 pharmacies and 2 GP practices dispensed a total of 16,209 items (mean = 1,351, range = 55-2,320) from Kent and Medway hospitals

6. Choice with regard to obtaining pharmaceutical; services

As can be seen from sections 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

Figure 27 shows the predicted increase in the population of the Ashford locality continuing to grow over the lifetime of this PNA. By 2025 it is estimated that each pharmacy will serve a population of 7,120.

Figure 27 – Ashford Population Forecast

 **1 pharmacy per 7,120 people in 2025**

This is an increase of 569 people per pharmacy from 2022. As stated in the community pharmacy contracts survey the 11 pharmacies in the Ashford locality do have capacity to increase their services and 2 stated they did not. 13 responses were received from the 20 pharmacies of the Ashford locality.

Map 28 below shows where there are major housing developments planned in the coming years according to the Ashford Local Plan. Table 26 indicates the number of dwellings planned for each site. With an average of 2.4 people per proposed dwelling, the population around the major urban centre will increase by 11,892 by 2025.

Map 28. Location of housing developments in the Ashford Local Plan

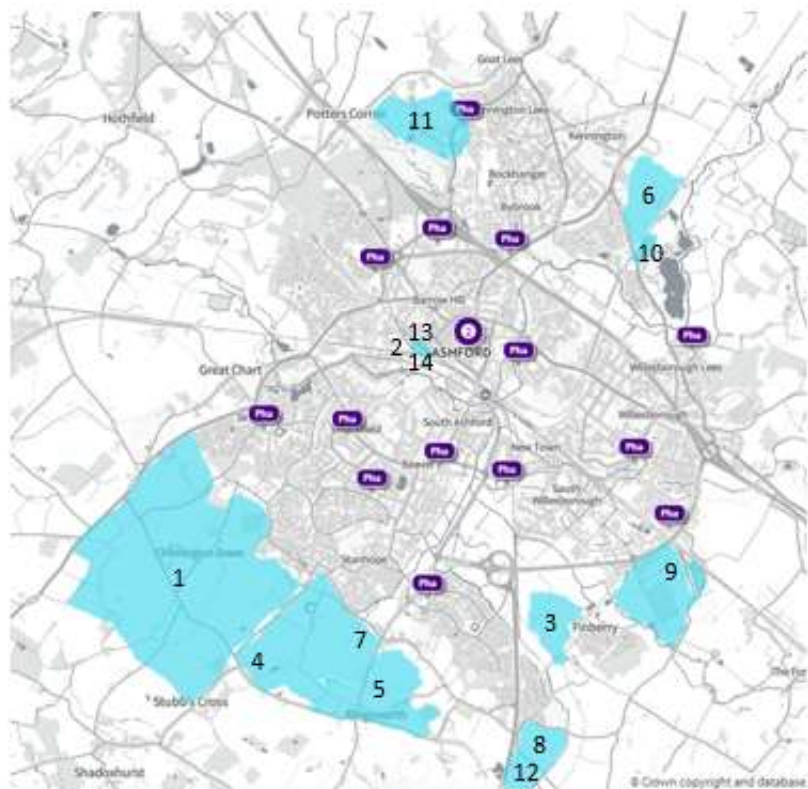

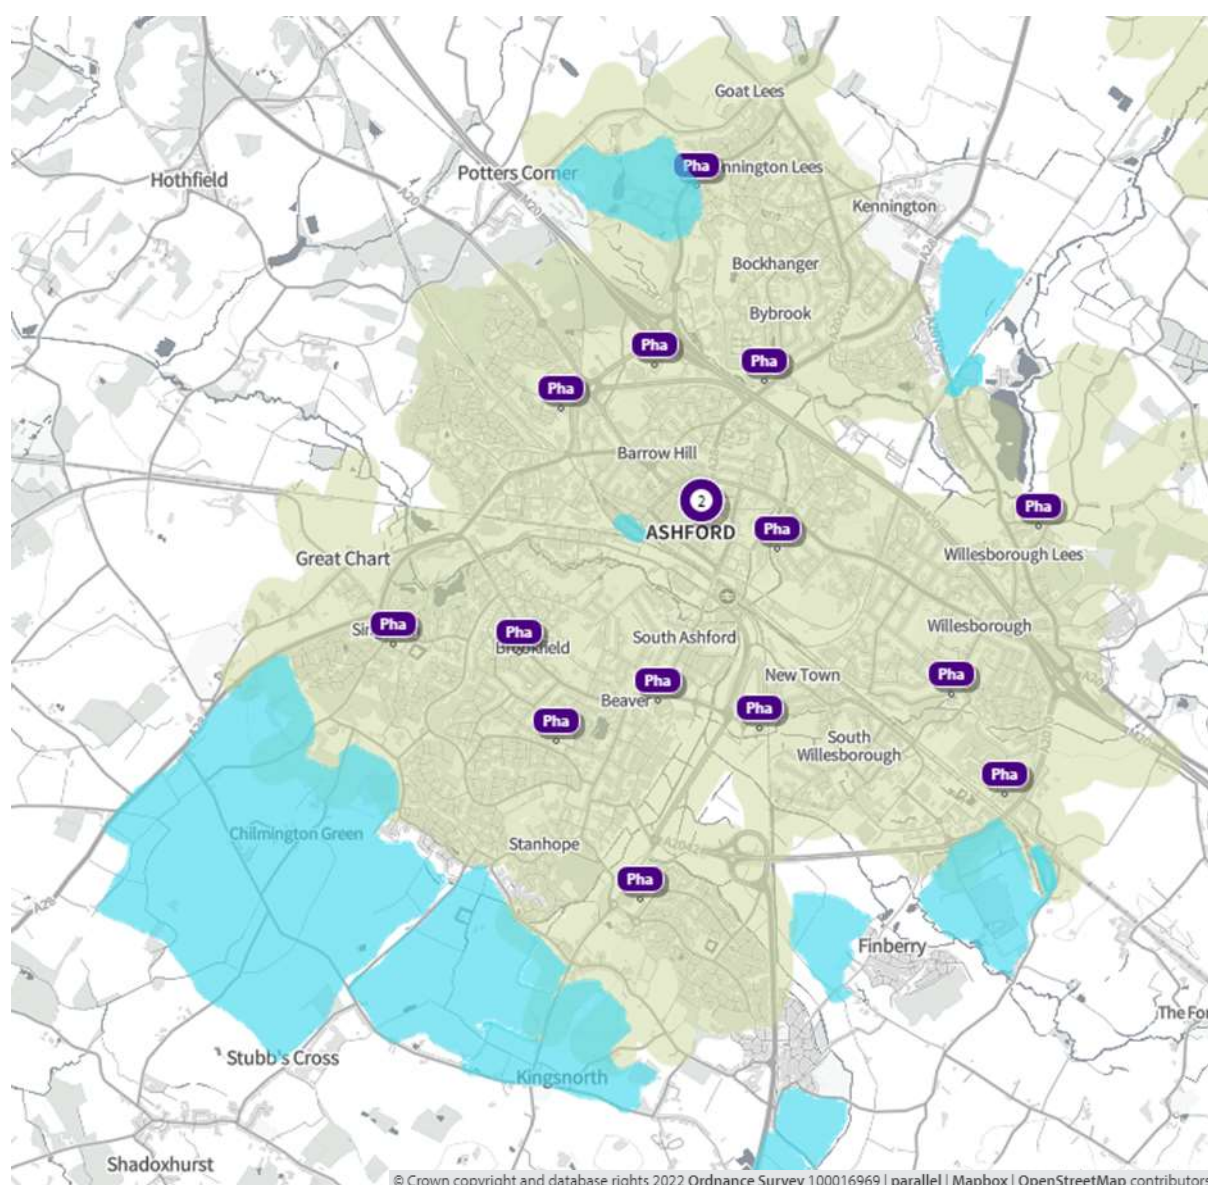

Table 26. Proposed housing developments – number of dwellings per year at each development

14. Victoria Way East	115	100									215	215

Access, with 20 minutes by walking, public transport and driving from these new developments to community pharmacies is shown in the following maps. The maps show access on different days and times of the week.

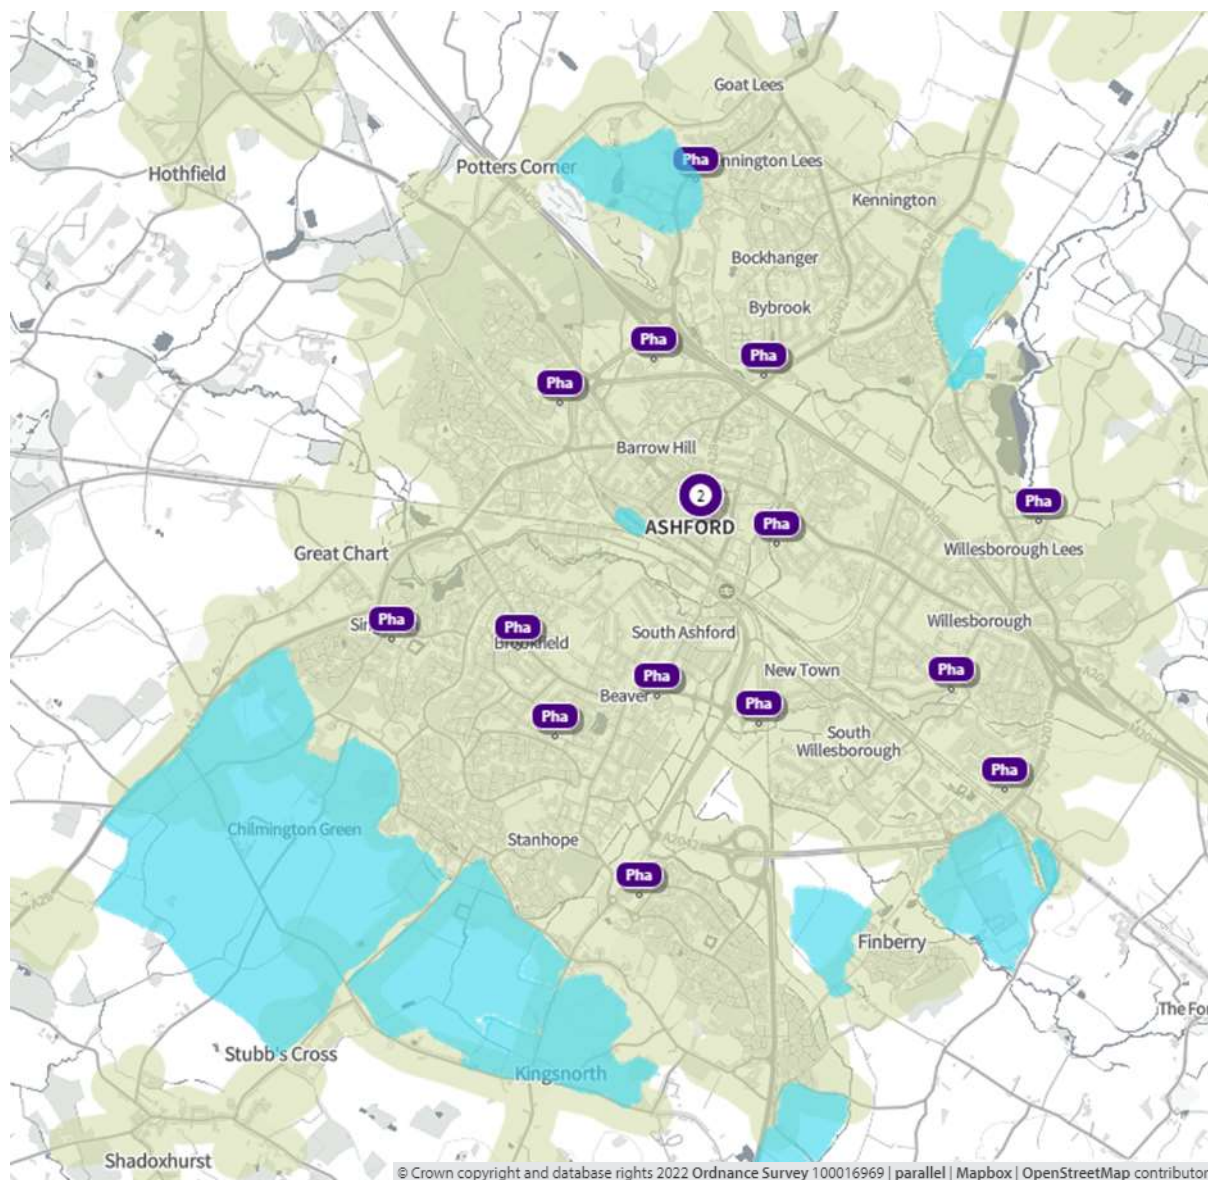

In map 29, below, the **green shaded areas** are within a **20-minute walk** of a community pharmacy/dispersing GP practice and the **blue shaded areas** are locations of **major housing developments (≥100 dwellings)**

Map 29. Location of community pharmacies, proposed housing developments, and areas within a 20 minute walk of a community pharmacy

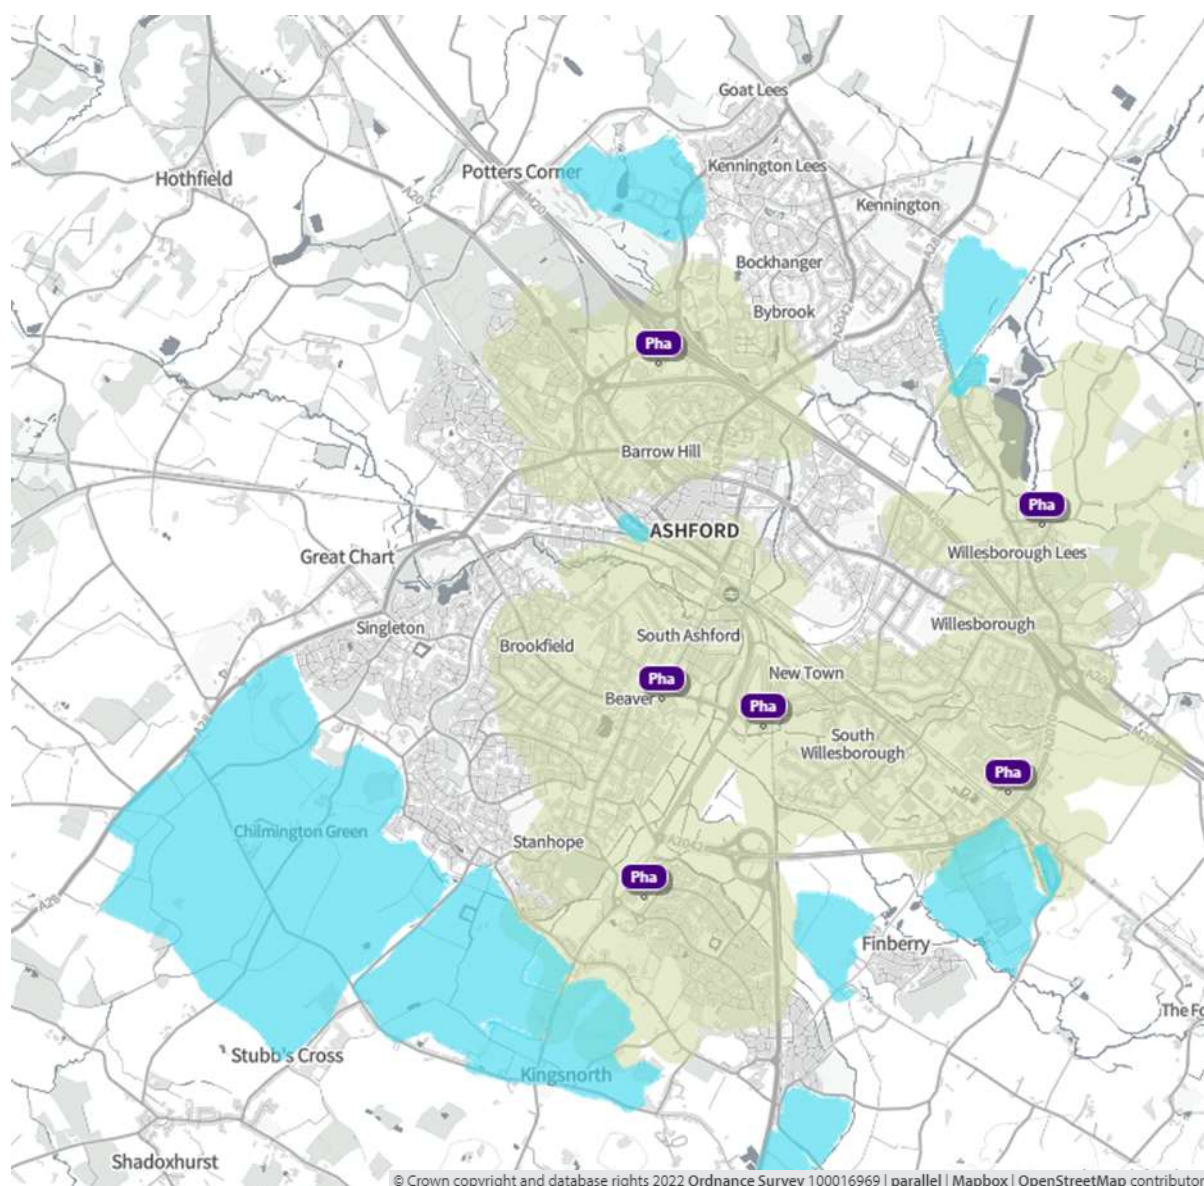

In map 30, below, the green shaded areas are within 20-minutes by public transport of a community pharmacy/dispensing GP practice and the **blue shaded areas are locations of major housing developments (≥100 dwellings)**

Map 30. Location of community pharmacies, proposed housing developments, and areas within 20 minutes of a community pharmacy by public transport on weekday mornings

In map 31, below, the green shaded areas are within a 20-minute walk of a community pharmacy that is open on Sundays and to at least 8pm weekdays. The blue shaded areas are locations of major housing developments (≥ 100 dwellings)

Map 31. Locations of community pharmacies open on Sundays and until at least 8pm, proposed housing developments, and areas within 20 minutes of a community pharmacy by public transport on weekday evenings

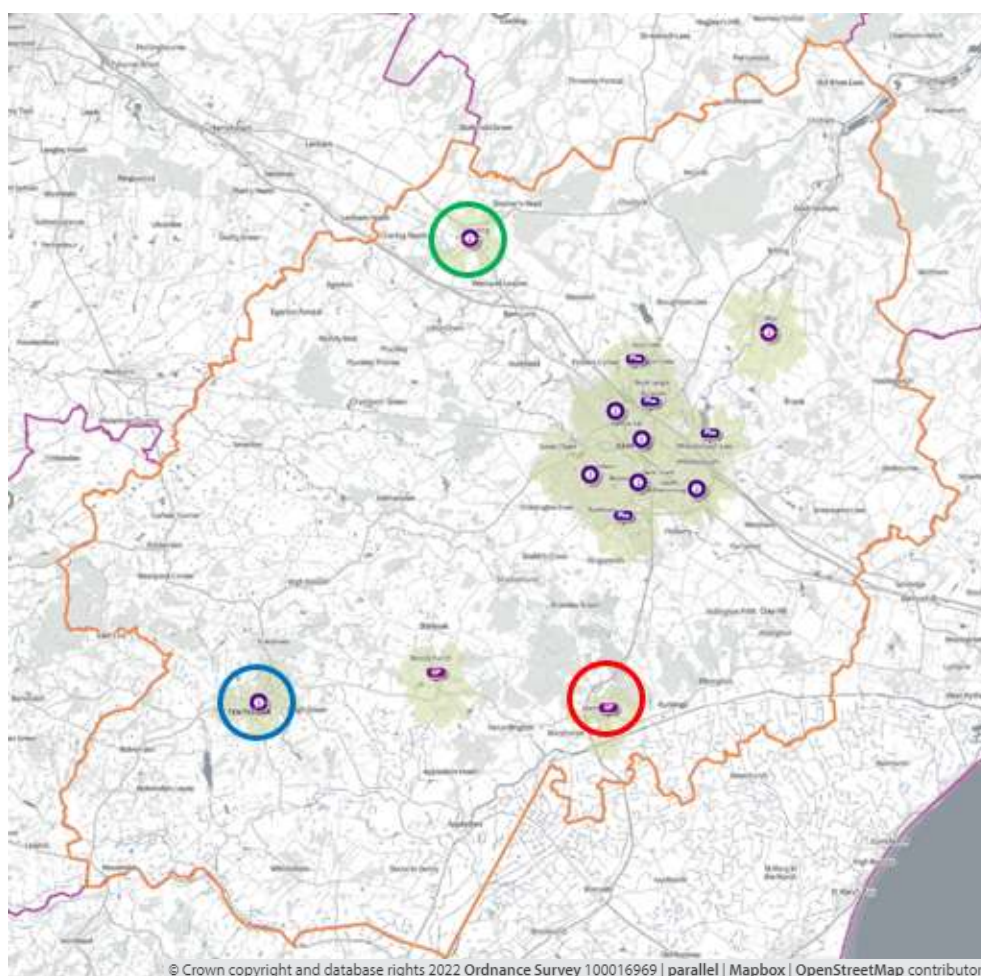

There are additional areas of significant housing development in the vicinity of existing pharmacies or dispensing practices. Hamstreet (shown by the red circle) is considered suitable for 130 new dwellings and a care home of circa 60 beds.

Charing (shown by the green circle) is proposed for development of around 200 dwellings.

Tenterden (shown by the blue circle) is proposed for development of around 225 dwellings

Map 32. Locations of community pharmacies/dispensing GPs and proposed housing developments

8. Necessary services: - Gaps in provision

The current pharmacy services provision matches the distribution of the population. Over the next three years significant development is planned on the periphery of Ashford town, with the greatest development occurring to the south-west of the town. All areas are currently well served by community pharmacies with access within 20 minutes by foot and public transport. It is of note that Ashford has a good off-road cycle network providing access to services.

The pharmacies currently provide service per pharmacy to a higher population than that the English average. In the contractor's questionnaire only two pharmacies out of thirteen responses stated that

they did not have capacity to respond to increased demand. This may be due to current work force constraints. This indicates a gap in provision in the area southwest of Ashford town area for pharmacy services providing both essential and advanced services.

9. Improvements or better access: Gaps in provision

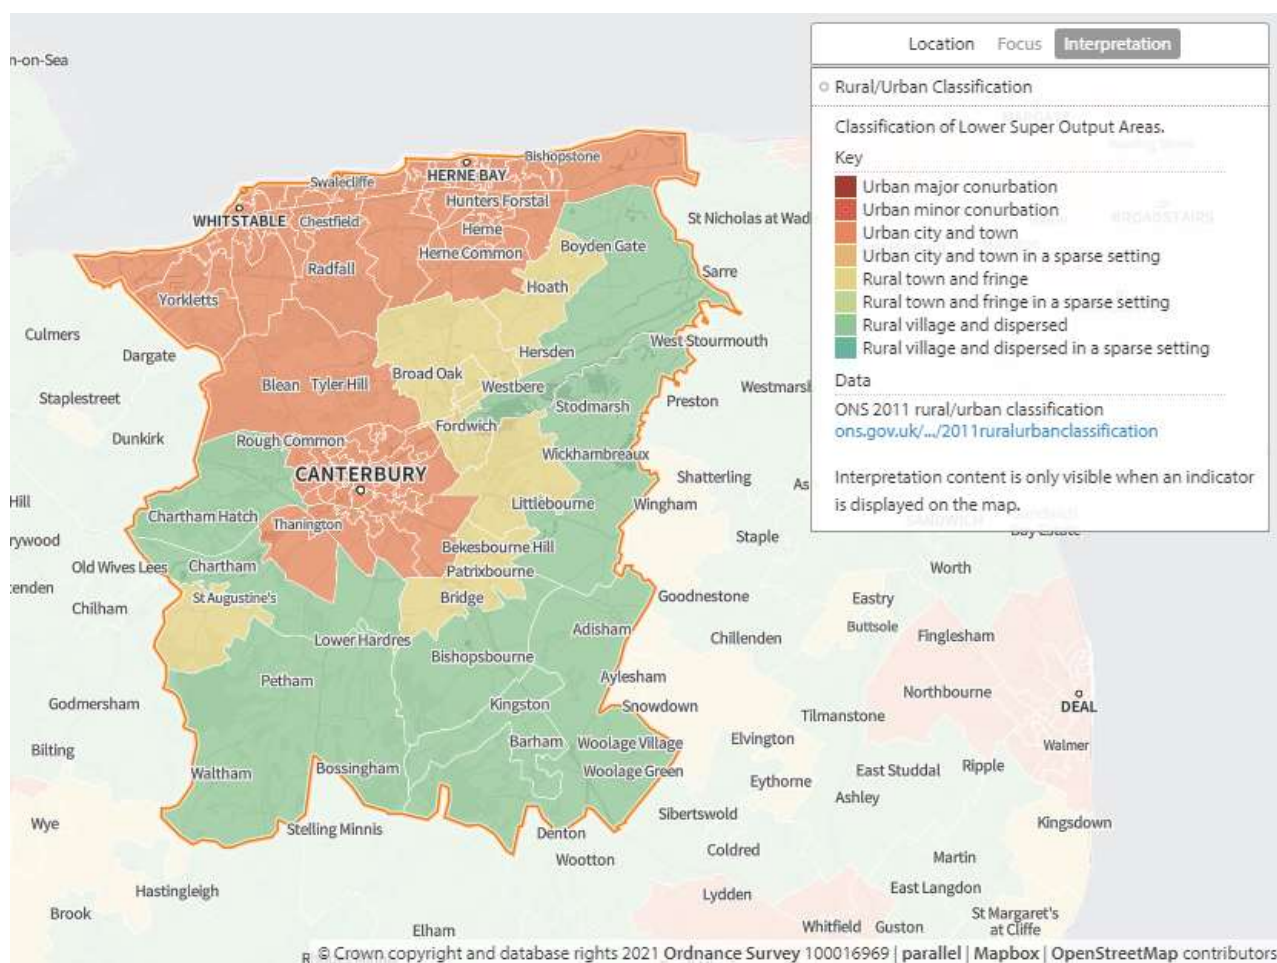

An increase in pharmacy provision, of both essential and advanced services, will be needed in the next three years in the area to the southwest of the Ashford town centre namely the Chilmington and Kingsnorth area, if the proposed housing is built.

9 Canterbury City Council Locality

1. Key Facts

The Canterbury locality is co-terminus with the Canterbury District Council area. The locality is largely rural, with a coastal strip taken up by almost unbroken spread of sea-side towns and beaches. Between the coastal towns of Whitstable and Herne Bay and Canterbury city are hills and wooded areas. The total area is 308.84 square kilometres.

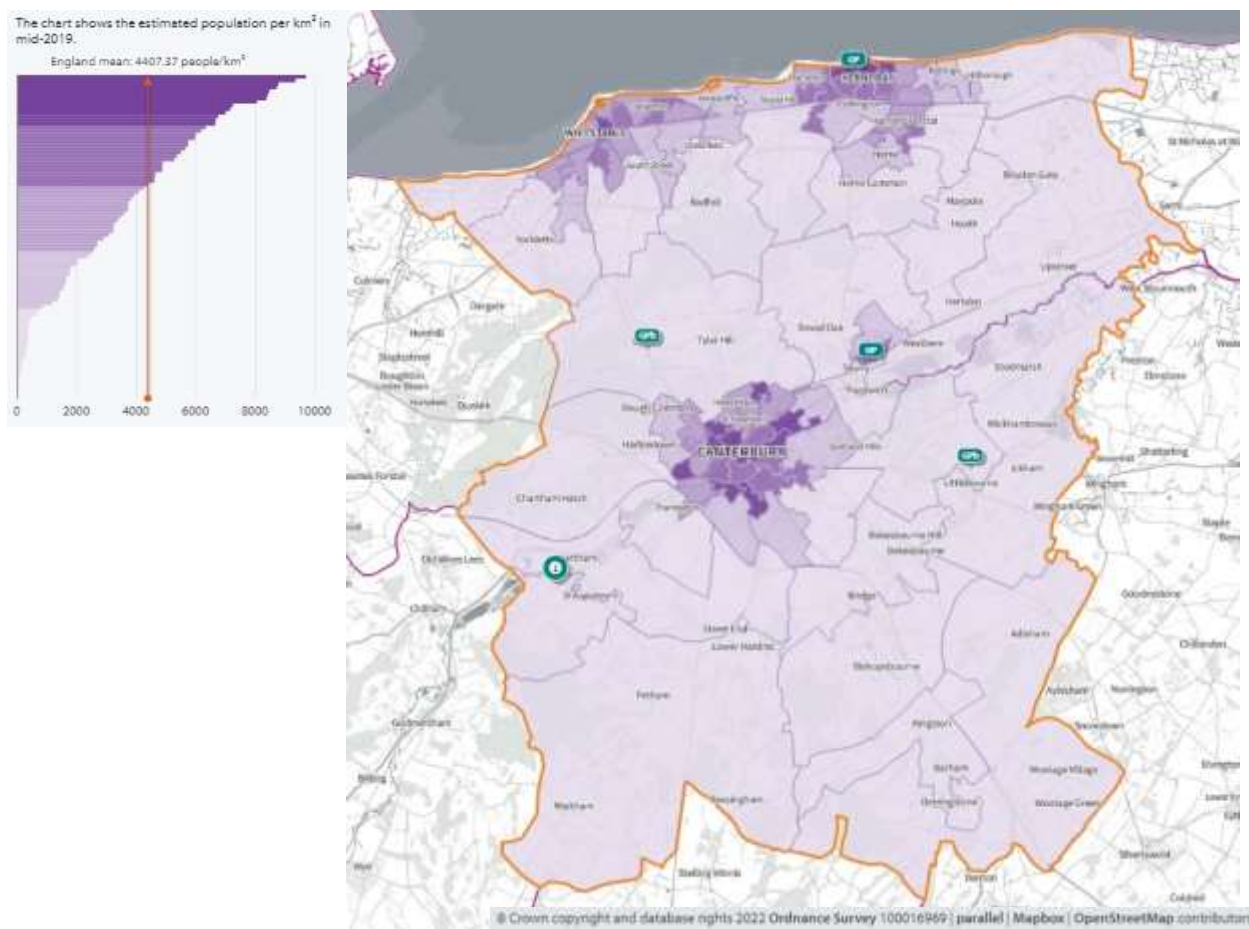

Map 33. Rural/urban classification of lower super output areas

Population

Map 34 below shows the distribution of the population in the locality. The population density is greatest in and around the city of Canterbury and along the northern coastal strip. The southern part of the Canterbury locality is less populated and largely rural. Canterbury has a population of approximately 40,000 students, many of which will temporarily move out of the area at the end of university terms.

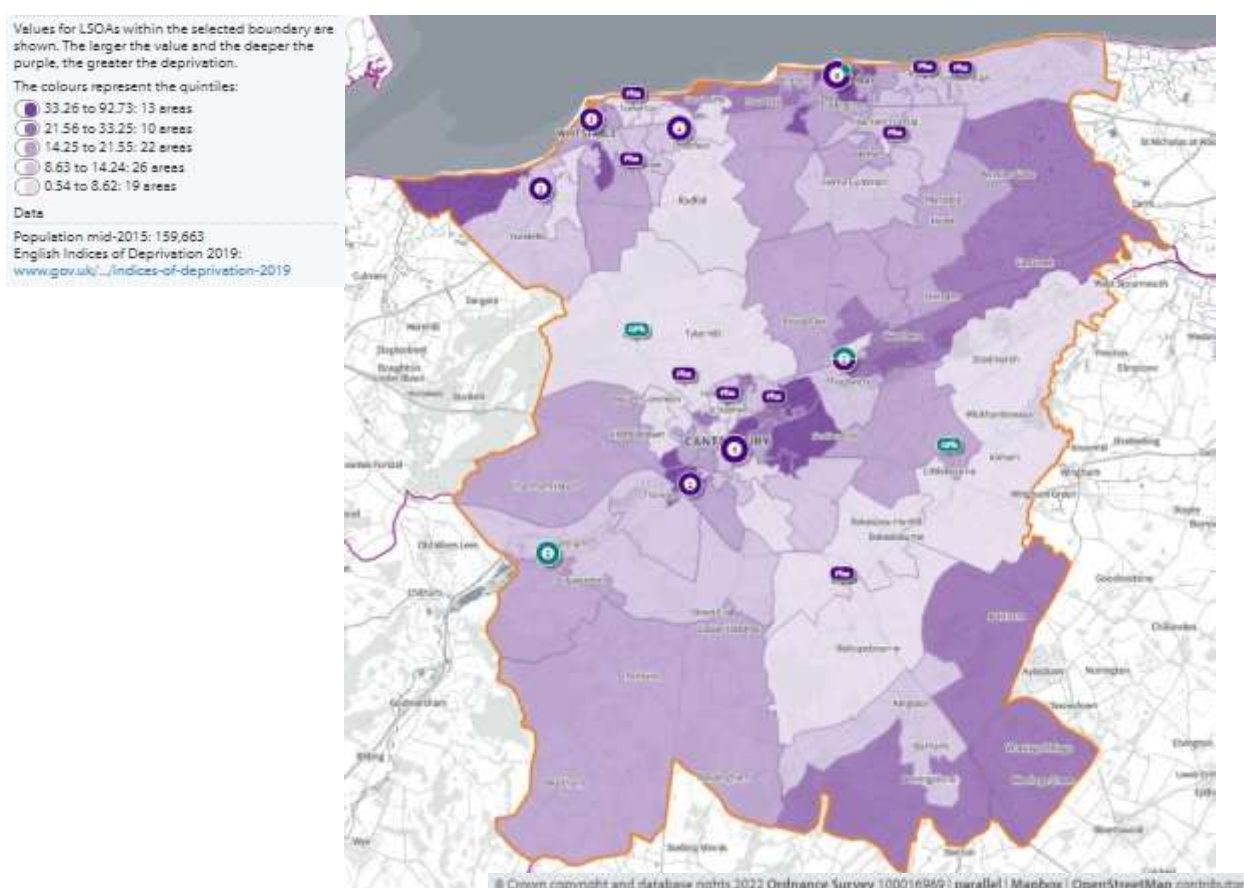

Map 34. Population density of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Deprivation

Map 35 below shows the areas of deprivation in the Canterbury locality. Canterbury is ranked 8th out of Kent's 12 districts for deprivation. The majority of the district has relatively low or average deprivation but there a number of densely populated areas with relatively high deprivation. Two LSOAs are within the top 10% most deprived areas in England: one on the outskirts of the city of Canterbury and one in Herne Bay. Employment rates are similar to the Kent average as are educational attainment⁽⁶³⁾ ⁽⁶⁴⁾.

Map 35. Deprivation of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Language

English is the main language for all people aged 16 or over in 94% of households in the district. 2.6% of households have no people with English as the main language⁽²⁾.

House ownership

66% of houses are owned either outright (36%) or with a mortgage (30%). The average number of occupants per household is 2.3, slightly lower than the Kent average of 2.4 ⁽²⁾.

Age Distribution

The average age of Canterbury district residents is 40.6, slightly lower than the Kent average of 41.4. 20.8% of the population is over 65 and 15.9% 0-15 (the lowest proportion of 0-15 of all Kent districts) ⁽²⁾. Life expectancy at birth is 79.4 for males and 82.8 for females ⁽⁴⁶⁾.

Economy

By industry, the top three employers in the Canterbury district are education (19.7%), wholesale and retail trade (15.9%) and human health and social work activities (15.9%) ⁽¹⁵⁾. Canterbury has a much higher proportion of employees working in education compared to the Kent average (19.7% vs 10.2%). By industrial grouping, 24% of jobs are in Knowledge Economy compared to the Kent average of 15.7% ⁽¹⁵⁾. 24% is the highest proportion of jobs in a single industrial grouping across all districts ⁽¹⁵⁾.

Car ownership

23% of households in Canterbury district do not have a car or van in the household ⁽¹³⁾.

Care Homes

There are a considerable number of care homes in the Canterbury locality. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services.

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are 30 Community pharmacies providing dispensing services in the Canterbury locality. That is one pharmacy per 5,559 head of population. Figure 28 below shows how this compares with the other localities of Kent.

Figure 28. Number of people per pharmacy in each locality

In addition, there are 6 dispensing GP practices in the locality.

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There are 5.6% of prescriptions generated in the area that are dispensed in neighbouring areas and an even slightly greater percentage that are generated outside the locality and dispensed by Canterbury locality community pharmacies⁽¹⁾.

- 1,649 outside prescribers dispense in Canterbury
 - 5.9% of all items dispensed in Canterbury
- 23 prescribers in Canterbury
 - 94.1% of all items dispensed in Canterbury
- 42 dispensers in Canterbury
 - 94.4% of all items prescribed Canterbury
- 2,659 dispensers outside of Canterbury
 - 5.6% of all items prescribed in Canterbury

Pharmacy locality: Maps 1 and 2 above show the locality of the community pharmacies and GP dispensing practices.

Opening times: 22 of the pharmacies open at least one hour after 17:00 on weekdays. 24 are open on Saturdays and 4 open Saturday and Sunday. The weekly opening hours range from 40 to 102, with the average opening hours being 57 each week.

The tables below show the core and supplementary hours of each pharmacy⁽⁶⁵⁾.

Table 27. Opening times for all pharmacies

Pharmacy	Total weekly hours	Max. hours open after 5pm at least 1 day/week	Saturday hours	Sunday Hours
Boots, Wincheap	102	7	16	6

Porter Chemist	40	0.5	0	0

The dispensing GP practices in the Canterbury locality are:

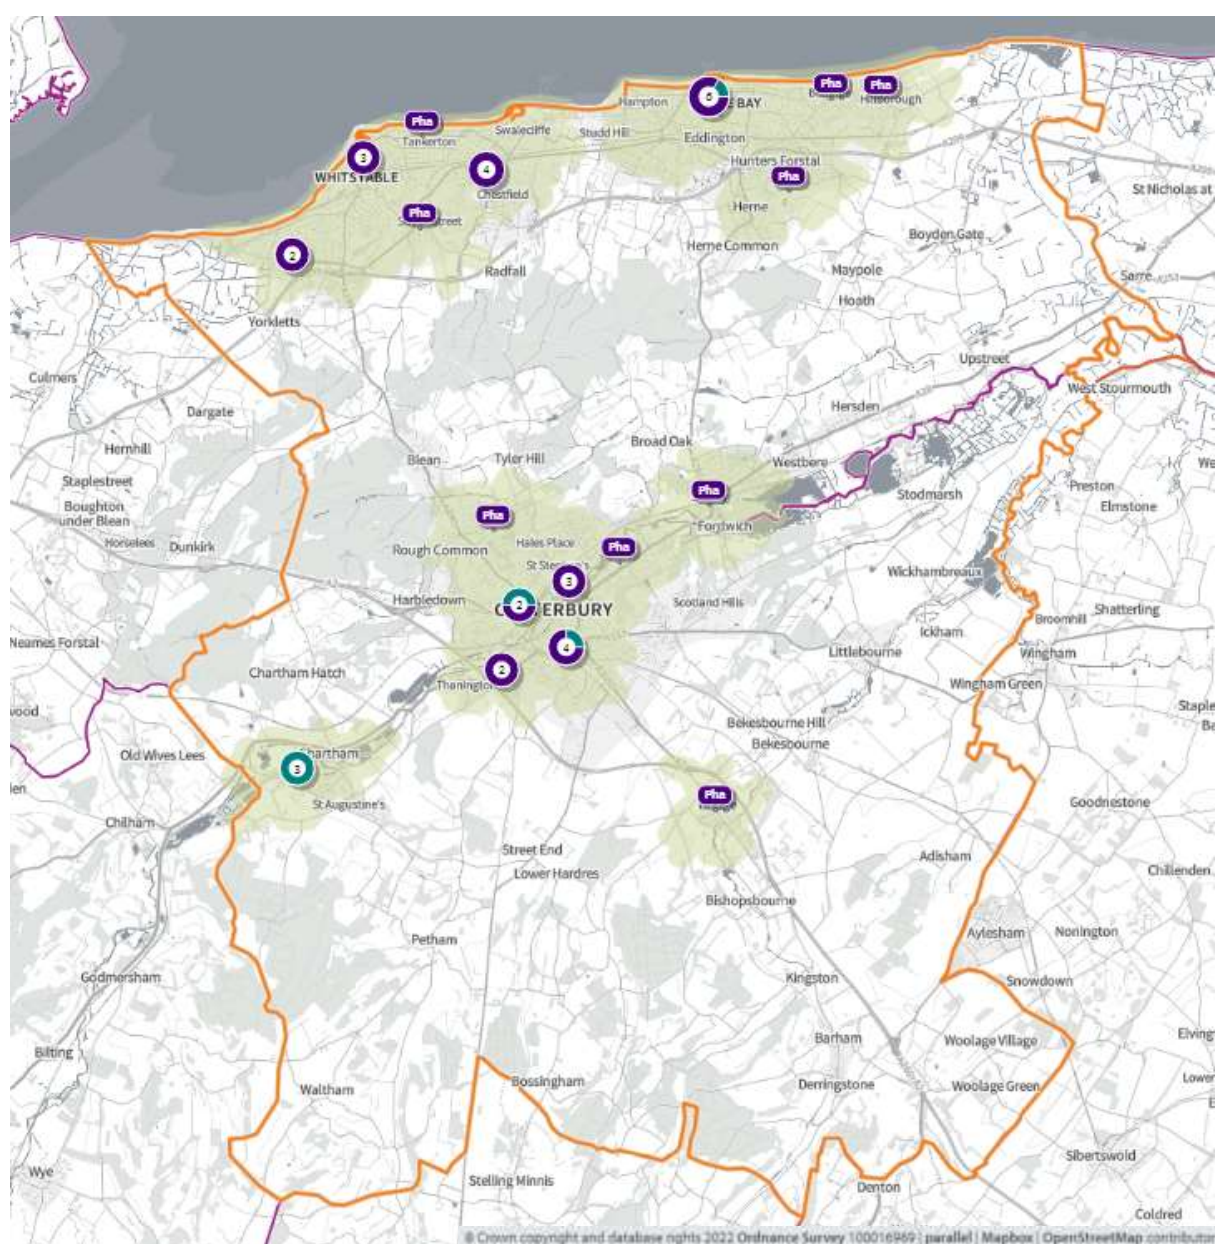

- Blean surgery CVT2 9HP
- Chartham Surgery CT4 7JU
- Sturry Surgery CT2 0EF
- William Street surgery, Herne Bay CT6 5NR
- Littlebourne Surgery CT3 1UH
- The Old School Surgery CT4 7JY

Access to Pharmacy Services

Travel times

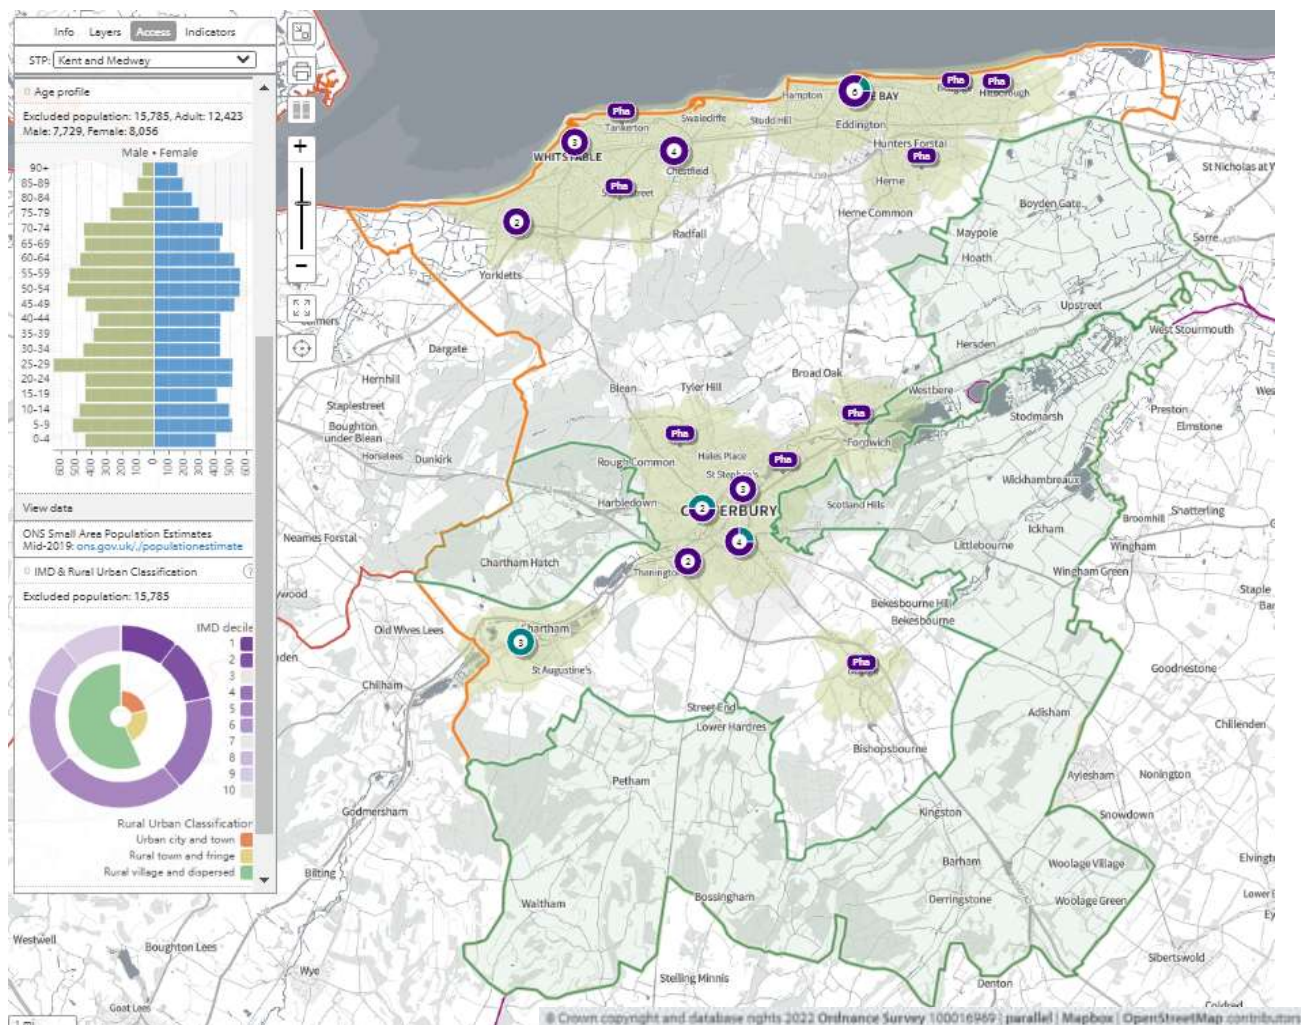

In **map 36**, below, the green shaded areas are within a **20-minute walk** of a community pharmacy/dispensing GP practice. All pharmacies are open for at least 3 hours on a Saturday in addition to their weekday opening hours. The data indicates that 15,785(9.5%) people are not within a 20-minute walk.

Map 36. Locations of community pharmacies/dispensing GPs and areas within a 20-minute walk

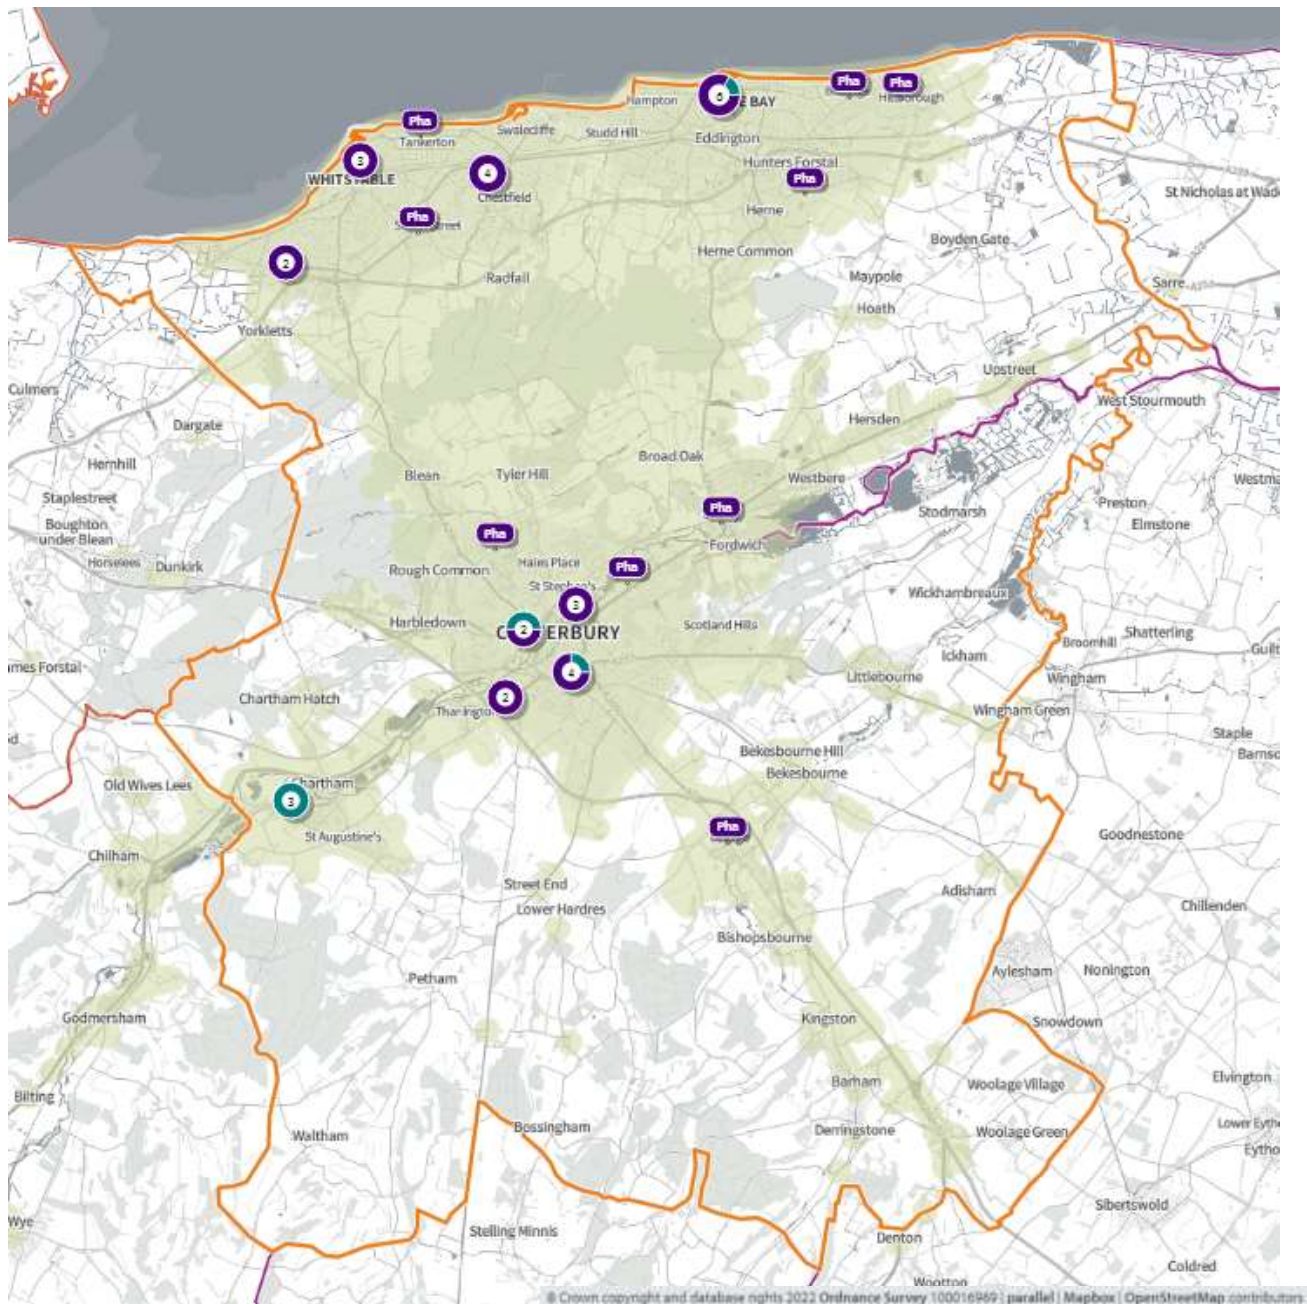

Map 37, below, shows **20 minutes walking** access for those in the population over **65 years of age**. 9.7% of 65+ population is not within a 20 minutes' walk of a community pharmacy or dispensing GP practice.

Map 37. Locations of community pharmacies/dispensing GPs and lower super output areas not within a 20-minute walk

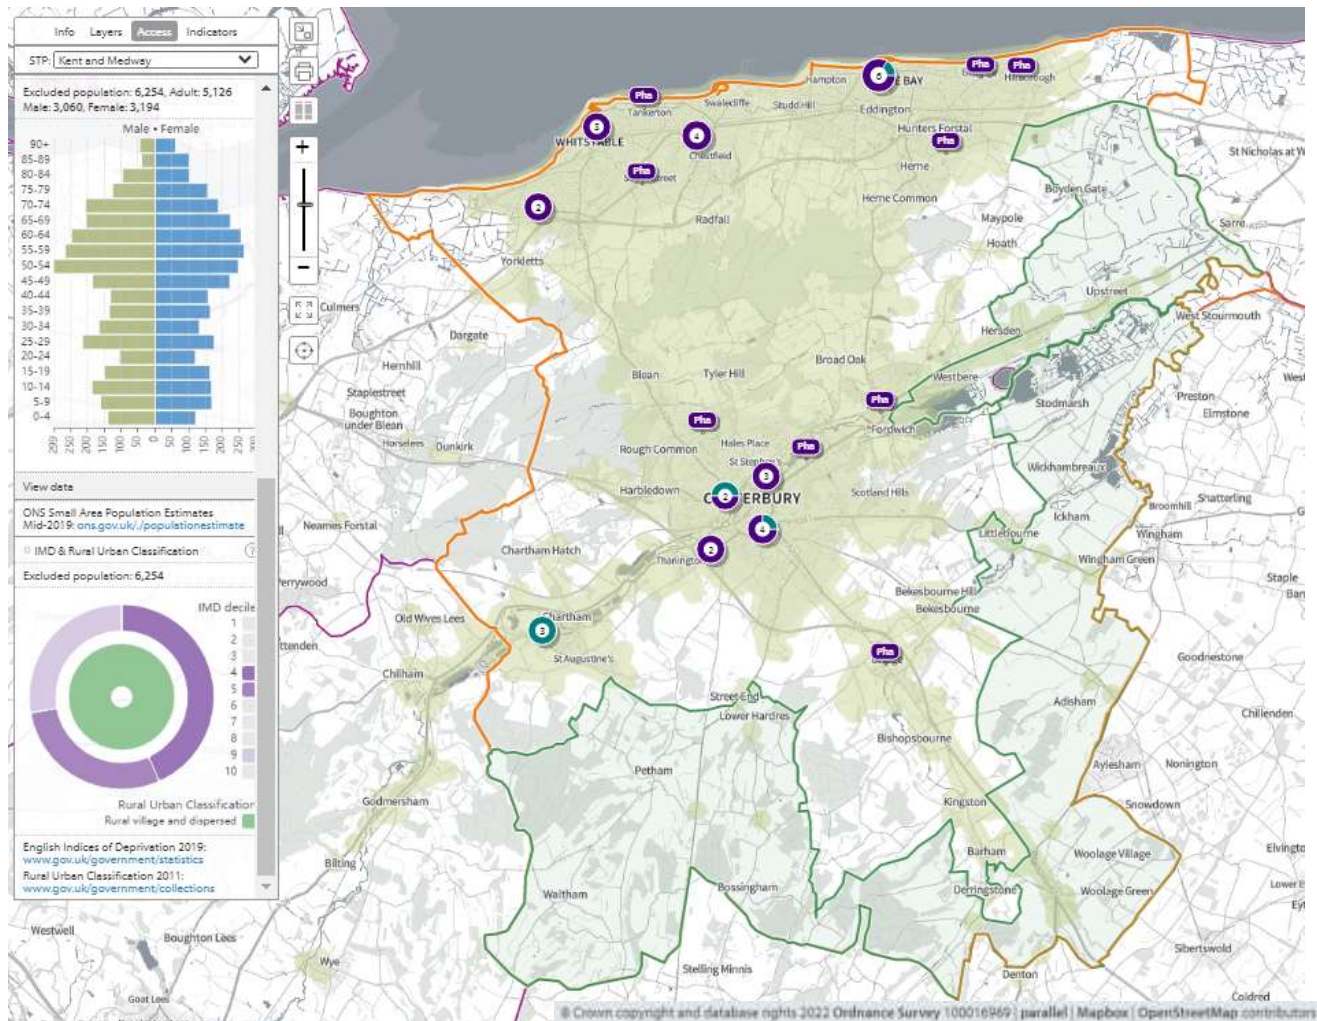

Map 38, below, shows 20 minutes public transport access, as green shaded areas to community pharmacies/dispensing GP practices.

Map 38. Locations of community pharmacies/dispensing GPs and areas within 20-minutes by public transport on weekday mornings

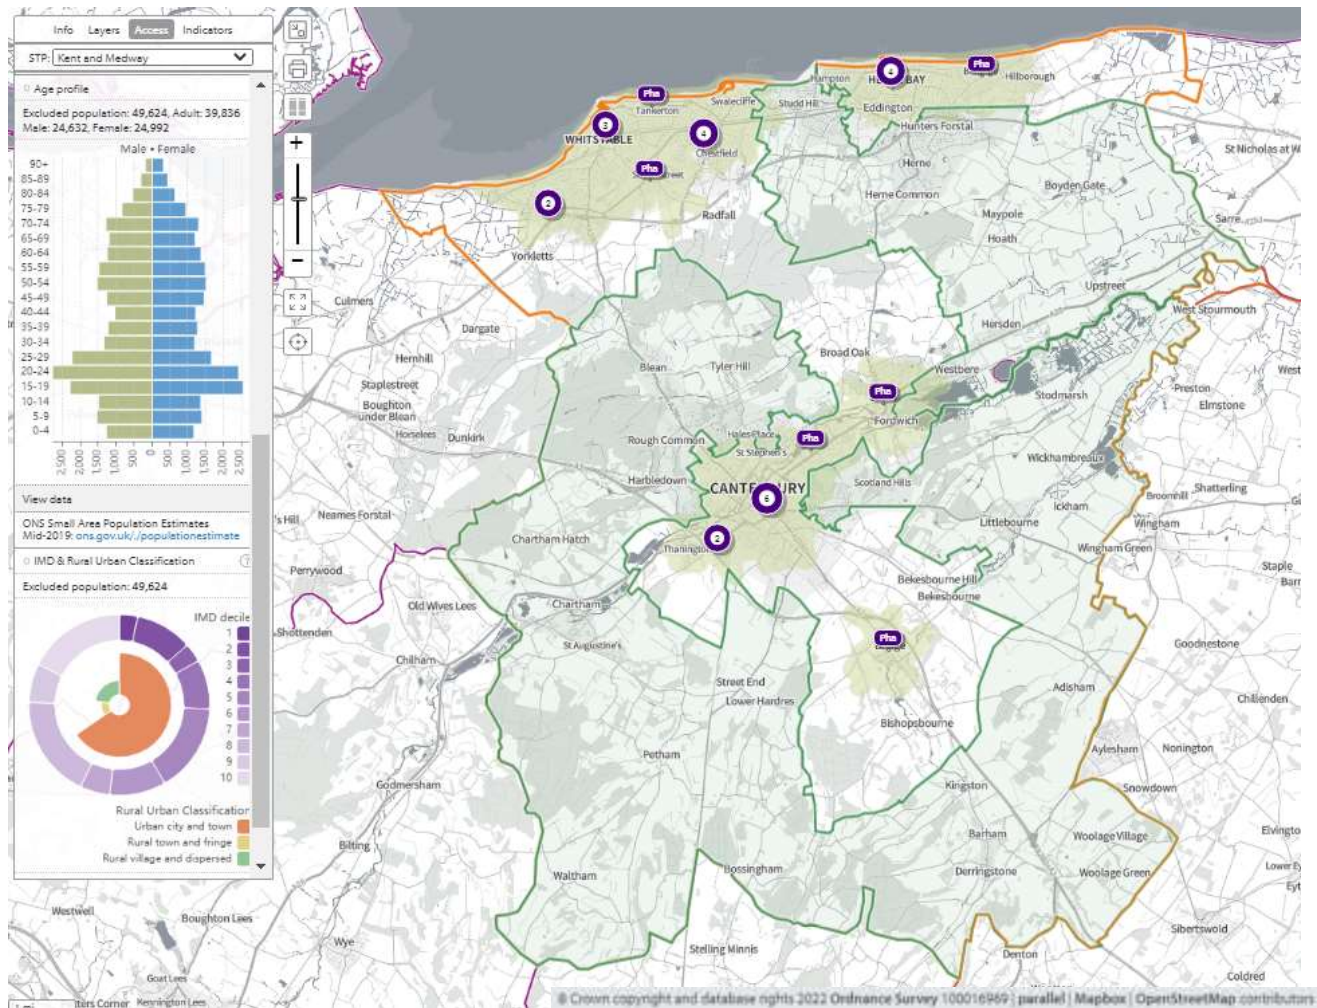

Map 39, below, shows **20-minute public transport** access, as green shaded areas to community pharmacies/dispensing GP practices. 6,254 (3.8%) people are not within 20-minutes by public transport. 9.7% of people aged 65+ are not within 20-minutes by public transport.

Map 39. Locations of community pharmacies/dispensing GPs and lower super output areas not within 20-minutes by public transport on weekday mornings

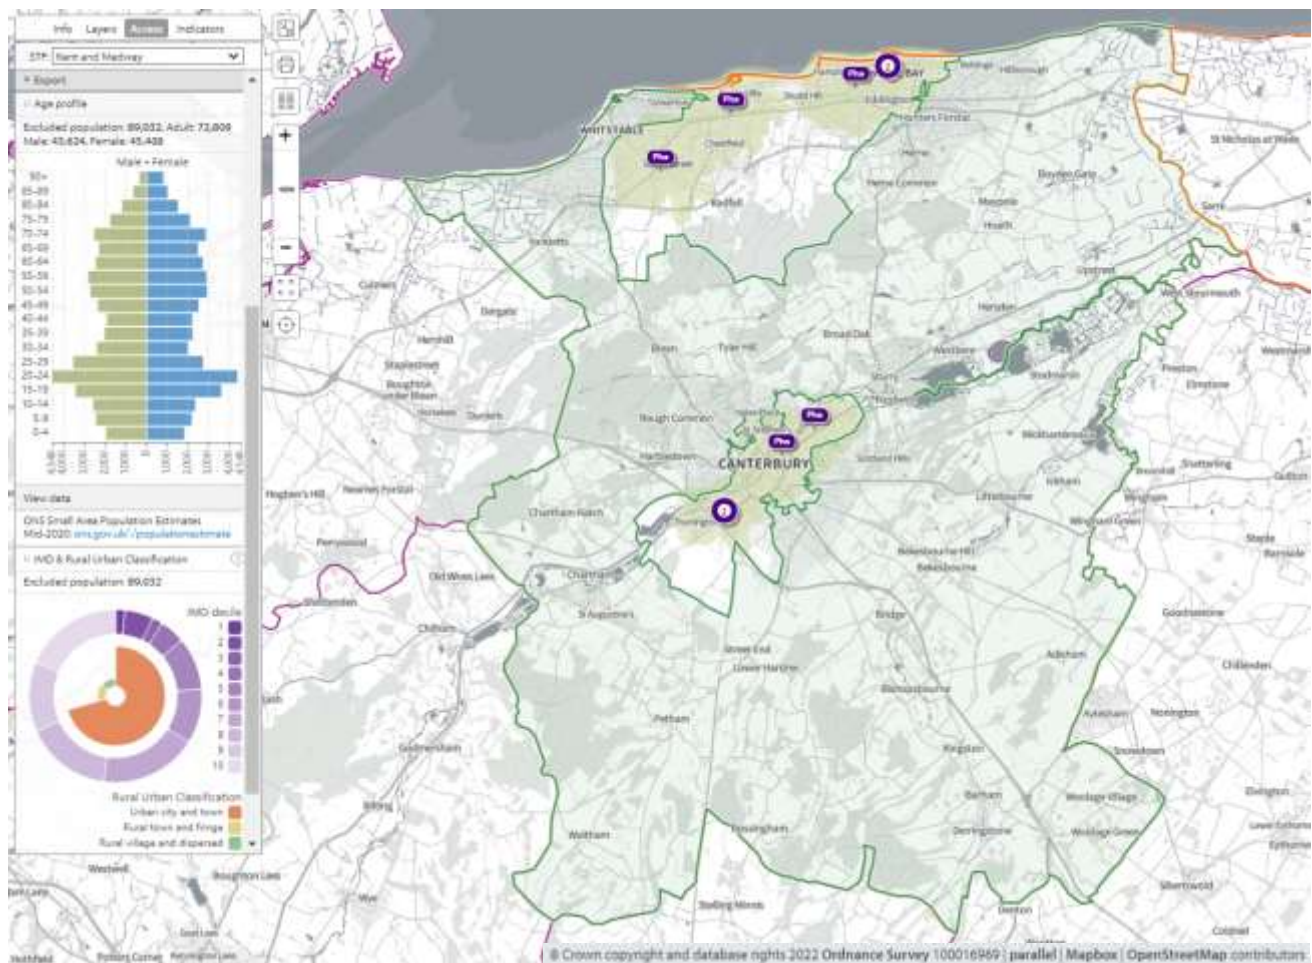

In **map 40**, below, 20-minute **walking access** to community pharmacies that are open at weekends is shown. 29.8% of the population is not within a 20-minute walk of a community pharmacy that opens at the weekend.

Map 40. Locations of community pharmacies open weekends and lower super output areas not within a 20-minute walk

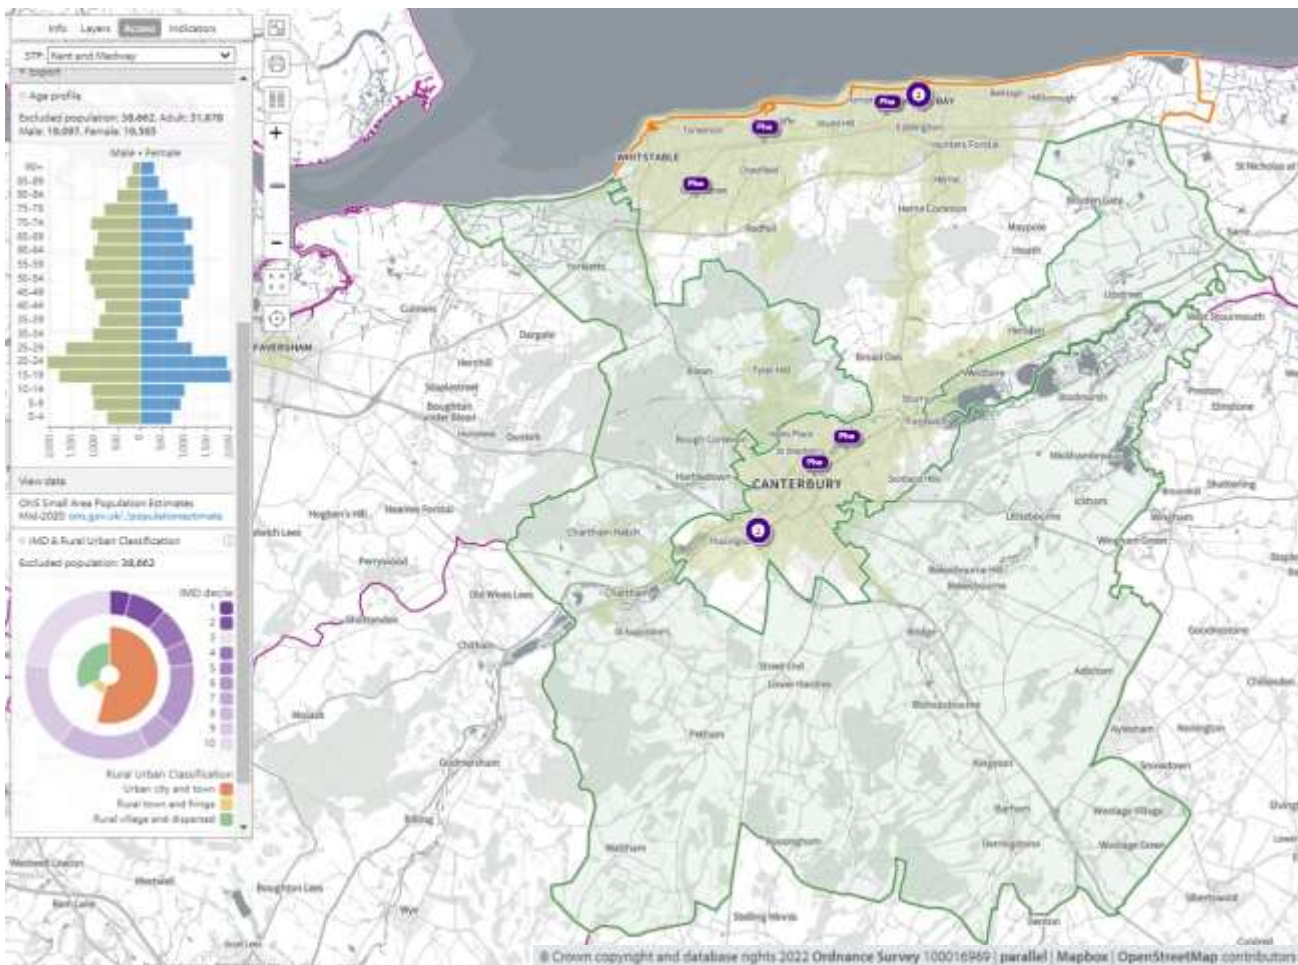

In **map 41**, below, 59% of the population (67.6% of 65+) is not within a 20-minute walk of a community pharmacy that opens until at least 7pm on one day a week

Map 41. Locations of community pharmacies open until at least 7pm and lower super output areas not within a 20-minute walk

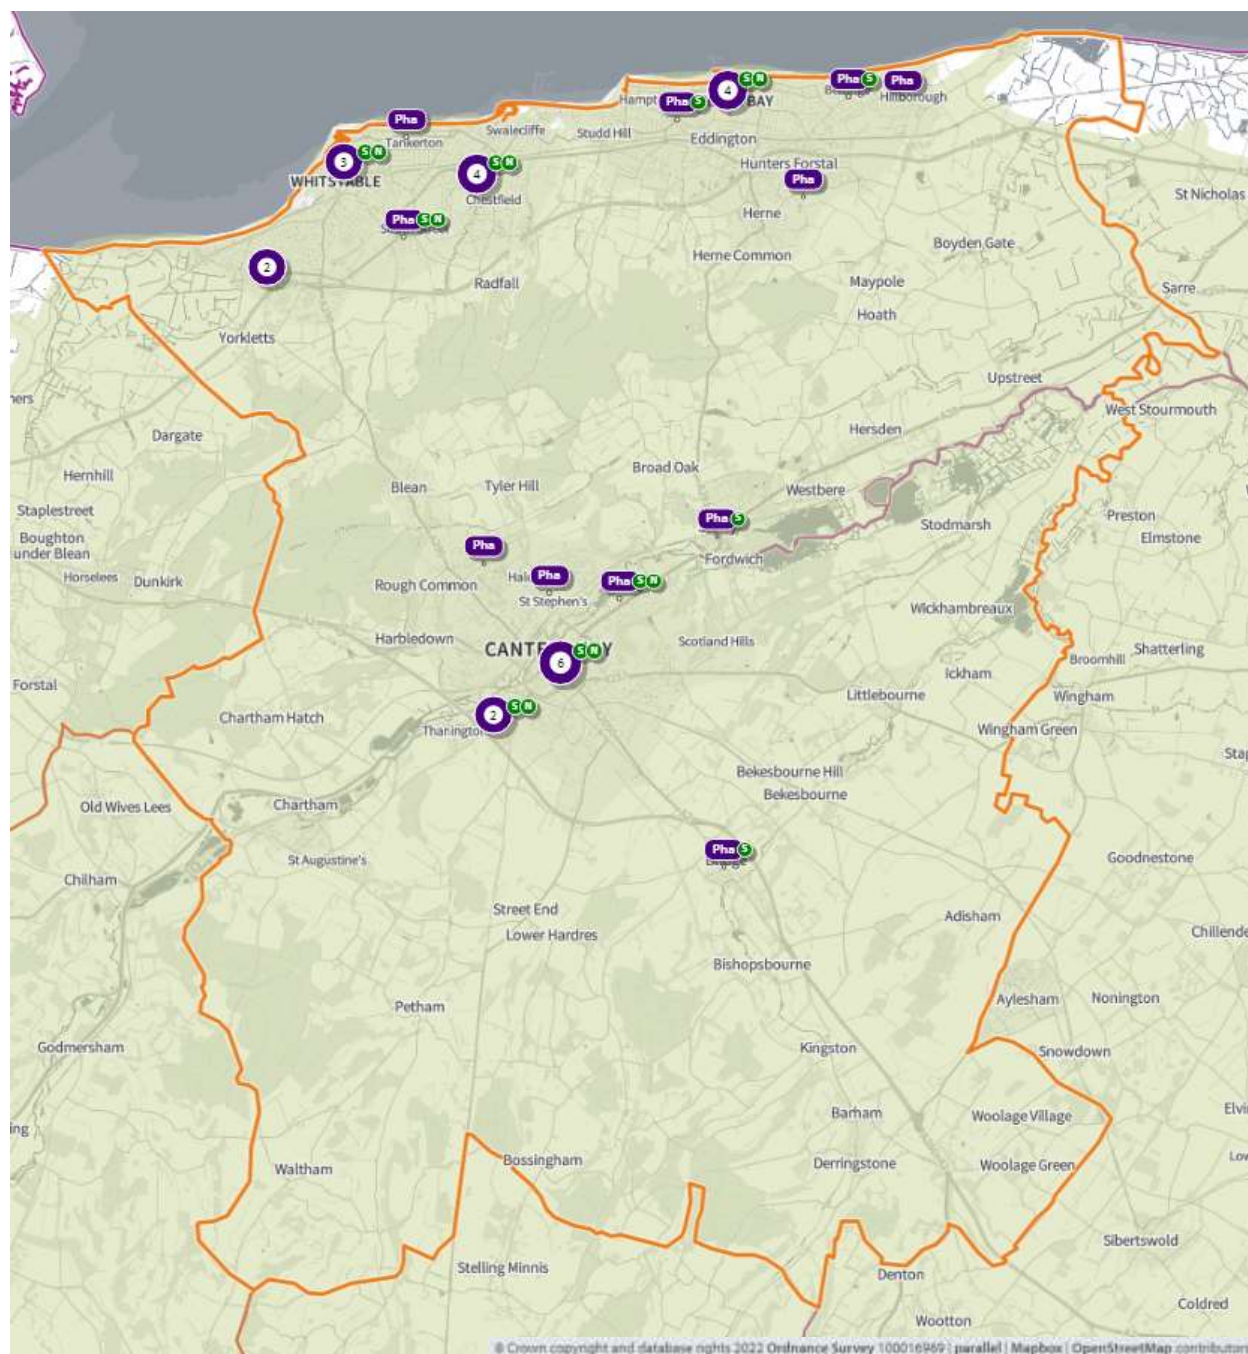

In **map 42**, below, 25.6% of the population (28.1% of 65+) is not within 20 minutes by public transport of a community pharmacy that opens until at least 7pm on one day a week.

Map 42. Locations of community pharmacies open until at least 7pm and lower super output areas not within 20-minutes by public transport

In **map 43**, below, access during **core opening hours, Saturdays and Sundays** is shown. The olive-green shaded areas are within a **20-minute drive** of a community pharmacy/dispensing GP practice. The entire population is within a 20-minute drive.

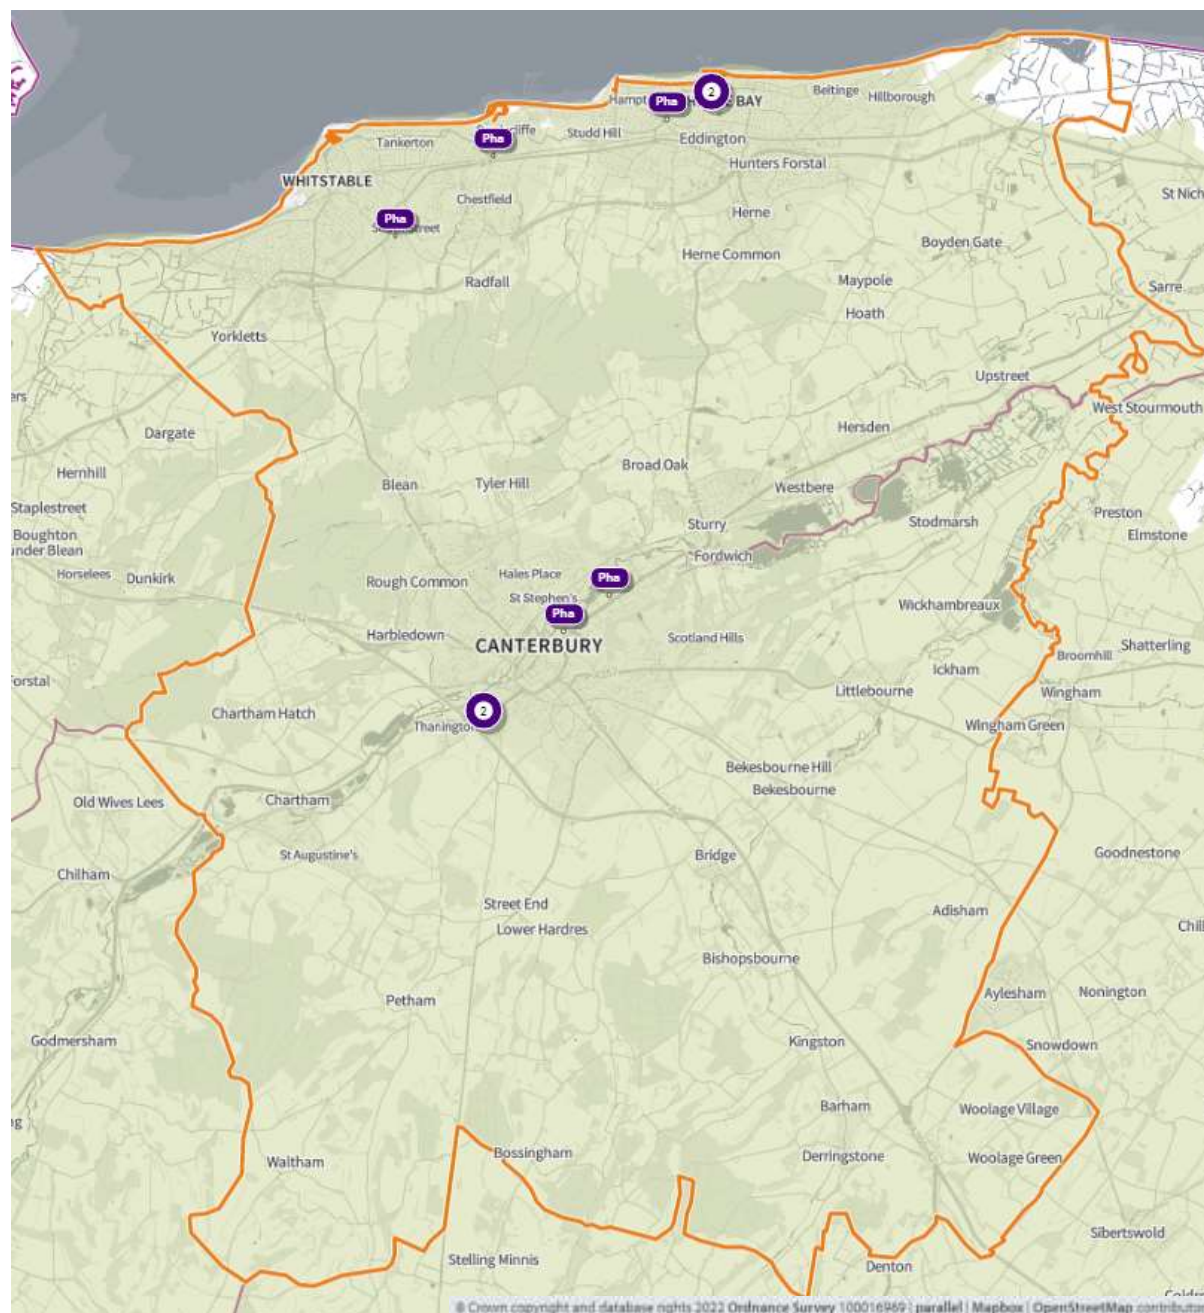

Map 43. Locations of community pharmacies and areas within 20-minutes by car

S = open Saturday N = open Sunday

In **map 44**, below, the green shaded areas are within **20-minutes by car** of a community pharmacy that opens **until at least 7pm on weekdays**. The entire population is within a 20-minute drive.

Map 44. Locations of community pharmacies open until at least 7pm on weekdays and areas within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The information below indicates the number of prescriptions dispensed in and outside the locality.

- 2.9 million items prescribed in Canterbury
 - 2.74 million items dispensed in Canterbury
 - 2.36 (86.1%) million via Electronic Prescription Service
 - 164,096 dispensed outside of the district
 - 97,914 distance selling
 - 18,624 dispensed in Dover
 - 12,140 dispensed in Thanet
- 2.9 million items dispensed in Canterbury
 - 2.6 million items dispensed by community pharmacies in Canterbury
 - 308,401 dispensed by 10 GP practices:
 - Old School Surgery – 143,921
 - Canterbury Medical Practice – 56,881
 - Northgate Medical Practice – 46,796
 - 170,545 items prescribed outside borough i.e. more going out than coming in

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling premises
- Which are located near to where they work, shop or visit for leisure or other purposes.

Taking into account this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy and do access pharmacy services within the locality.

4. Other relevant services: current provision

The following advanced services were delivered by pharmacies in the Folkestone and Hythe locality in 2020/21.

Table 28. Number of pharmacies providing advanced services

Advanced service name	No. of pharmacies
New Medicine Service	27
Appliance Use Review	0
Hypertension Service [‡]	27
Stoma Appliance Customisation	1
Community Pharmacist Consultation Service (CPCS) [‡]	28
Hepatitis C Antibody Testing Service	0
Seasonal Influenza Vaccination Advances Service	29
Covid Vaccination Service*	0
Covid Home Delivery Service*	22
Covid lateral flow device distribution*	31

*Specific to the Covid-19 pandemic

[‡]Services introduced during the year of study

Please note that three of these services were specific to the Covid-19 pandemic and that others were new services introduced within the year. There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- Canterbury Health Centre is open 7.45pm on Monday and Wednesday
- Canterbury Medical Centre is open until 8.30pm on Thursdays and 8.45am-1pm on Saturdays
- Littlebourne Surgery is open until 8.30pm on Tuesdays
- Heron Medical Practice is open until 8pm Tuesdays-Thursdays
- New Dover Road Surgery is open until 8.15pm on Wednesdays and Thursdays
- Northgate Medical Practice is open until 8pm Tuesdays-Thursdays
- Chartham Surgery is open until 7.30pm on Wednesdays
- Sturry Surgery is open until 8pm on Tuesdays and from 7am on Wednesdays
- University Medical Centre is open until 8.45pm on Tuesdays and Thursdays
- Whitstable Medical Practice is open 8am-8pm every day
- Chestfield Medical Centre is open from 7am on Thursdays
- Whitstable Heath Centre is open from 7am on Wednesdays

There are also drug and alcohol services, Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality.

- ^{*} 22 pharmacies dispensed a total of 4,902 items (mean = 223, range = 1-747) from drug and alcohol services
- ^{**} 30 pharmacies dispensed a total of 3,287 (mean = 110, range = 20-299) items from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- ^{*} 24 pharmacies dispensed a total of 132 (mean = 5.5, range = 1-15) items from KCHFT
- ^{*} 30 pharmacies and 3 GP practices dispensed a total of 19,290 (mean = 585, range = 63-1,680) items from KCHFT

^{*} 1 pharmacy closed in April 2021

^{**} 1 pharmacy on the current list of 30 was not open in financial year 2020/21 and 1 pharmacy that dispensed KMPT items closed in April 2021

6. Choice with regard to obtaining pharmaceutical; services

As can be seen from sections 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

Figure 29 below shows the predicted increase in the population of the Canterbury locality continuing to grow over the lifetime of this PNA. By 2025 it is estimated that each pharmacy will serve a population of 5,833.

Figure 29 Canterbury Population forecast

 **1 pharmacy per 5,833 people in 2025**

This is an increase of 244 people per pharmacy from 2022. As stated in the community pharmacy contracts survey the pharmacies in the Canterbury locality do have capacity to respond to an increase in demand for their service.

Map 45 below shows where there are major housing developments planned in the coming years and the table indicates the number of dwellings planned for each site. With an average of 2.4 people per proposed dwelling, the population around the major urban centre will increase by 12,079 by 2025.

Map 45. Location of housing developments

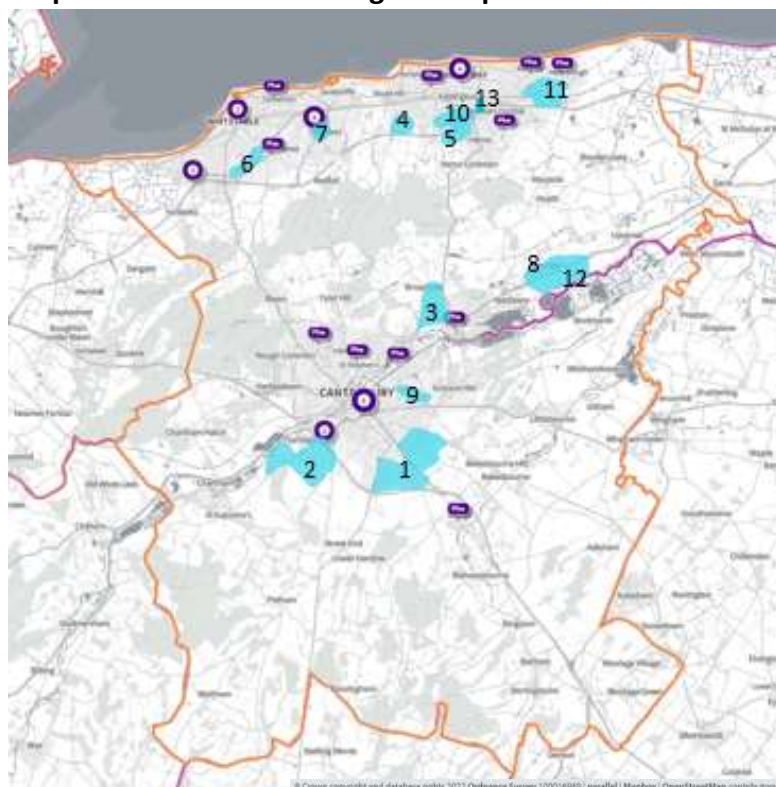

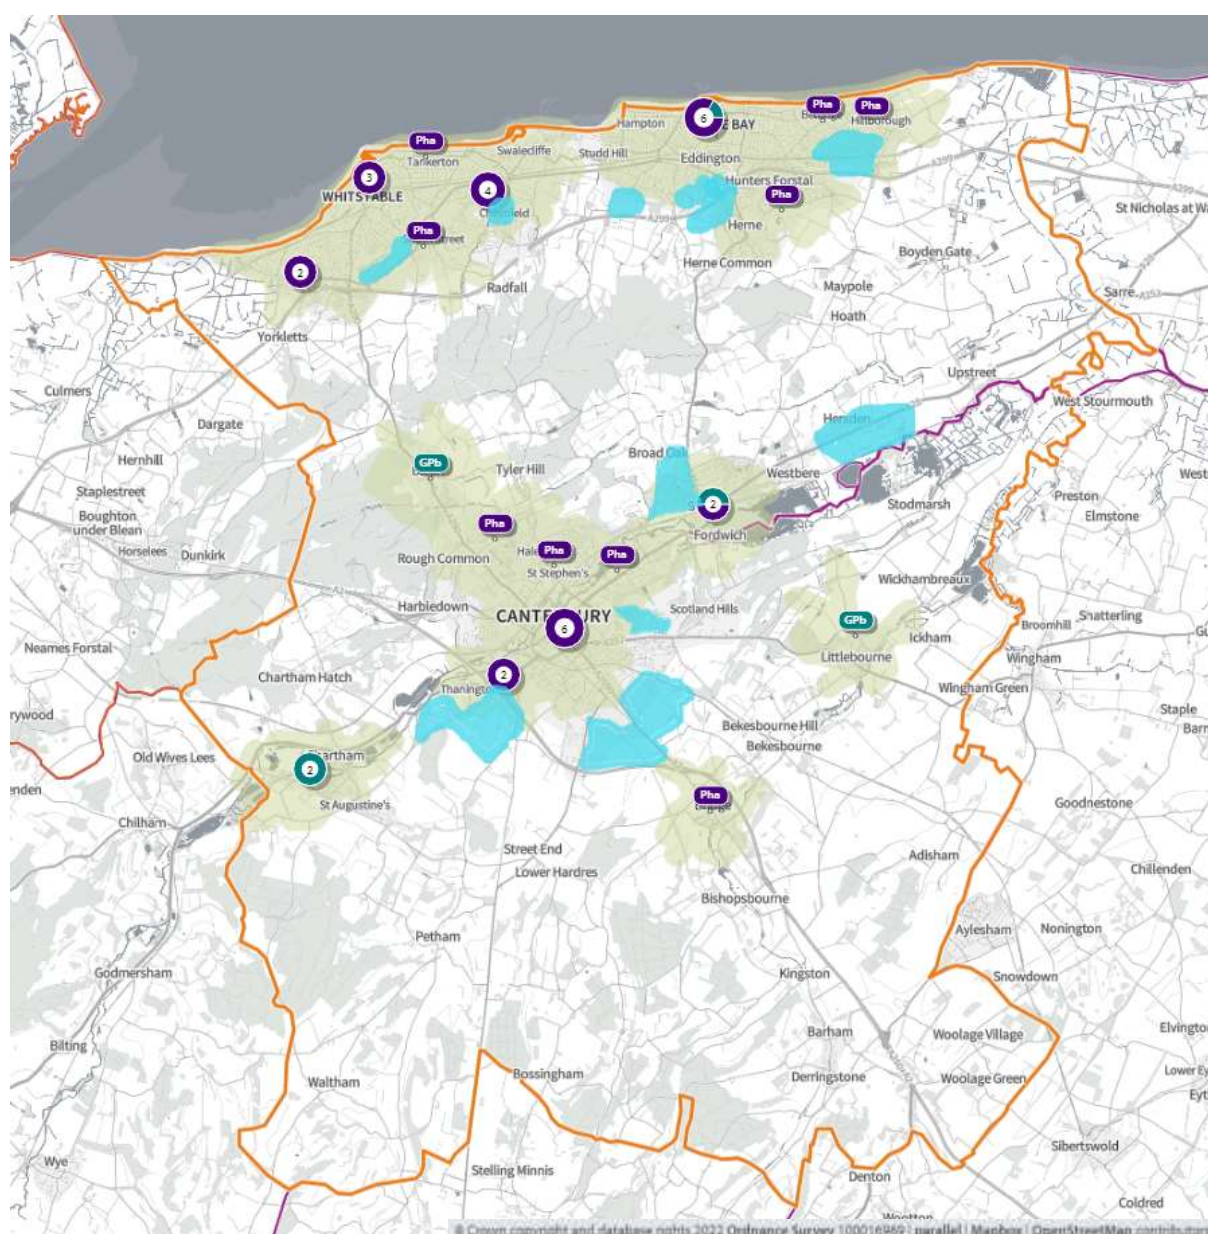

Table 29. Table of proposed housing developments – number of dwellings per year at each development

Site Name	20/21	21/22	22/23	23/24	24/25	25/26	26/27	27/28	28/29	29/30	2025	2030

In **map 51, below**, the green shaded areas are within a 20-minutes by public transport of a community pharmacy that is open to at least 8pm weekdays and the blue shaded areas are locations of major housing developments (≥ 100 dwellings)

Map 51. Locations of community pharmacies open until at least 8pm on weekdays, proposed housing developments, and areas within 20 minutes of a community pharmacy by public transport on weekday evenings

8. Necessary services: - Gaps in provision

Currently there are no gaps in provision of pharmacy services in the Canterbury locality. There are housing developments planned across the locality. The access to pharmacies from the new developments is good and the 24 pharmacies that responded to the contractor questionnaire stated that they had capacity to respond to an increased demand.

No gaps in provision have been identified.

9. Improvements or better access: Gaps in provision

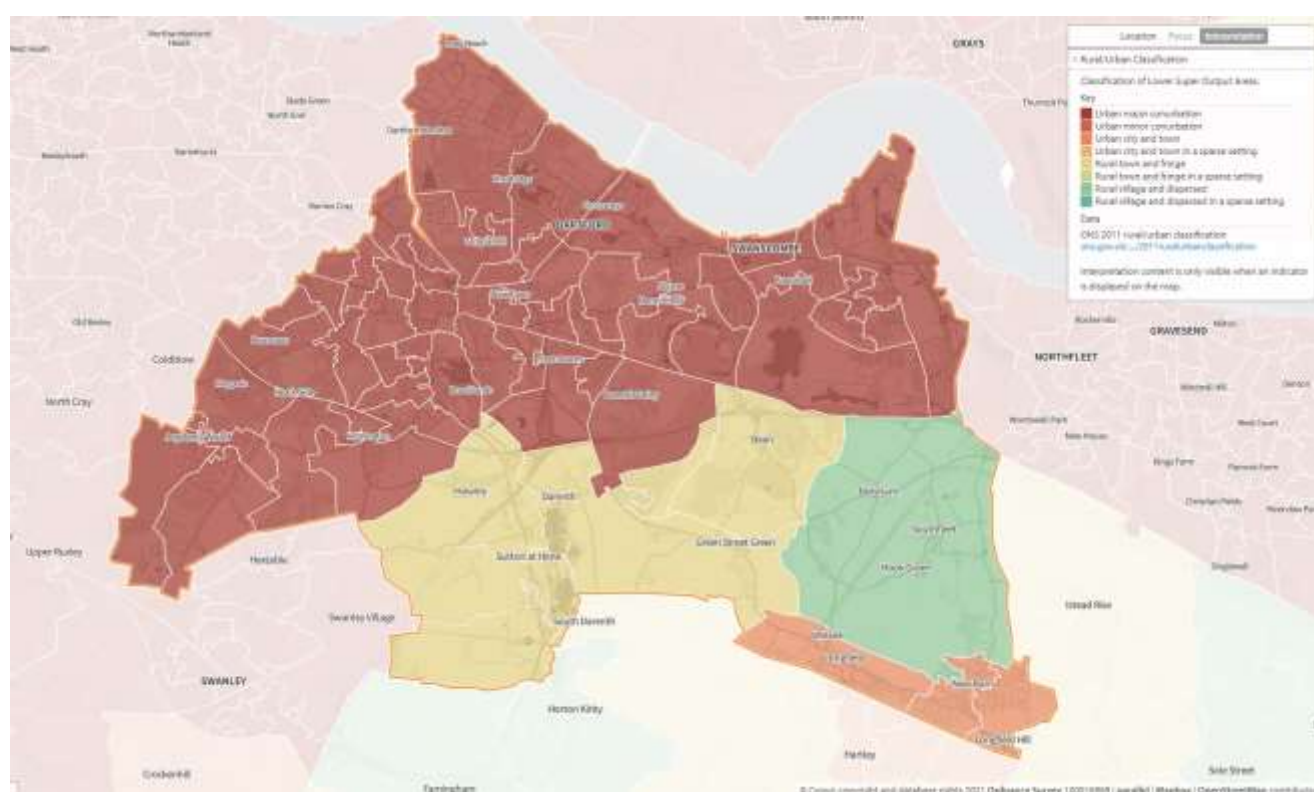

There are no suggested improvements.

10 Dartford Borough Council Locality

1. Key Facts

Dartford is a local government district in the north-west of the county, bordering the London borough of Bexley to the west. Dartford covers an area of 72.8 square km, the smallest of all Kent districts. Map 52 shows that the majority of the district is urban with densely populated areas throughout the northern section. The south of the district is more rural comprised of small-medium villages. Dartford is the most densely populated district in Kent with 15.7 persons per hectare, the average in Kent is 4.5 (3).

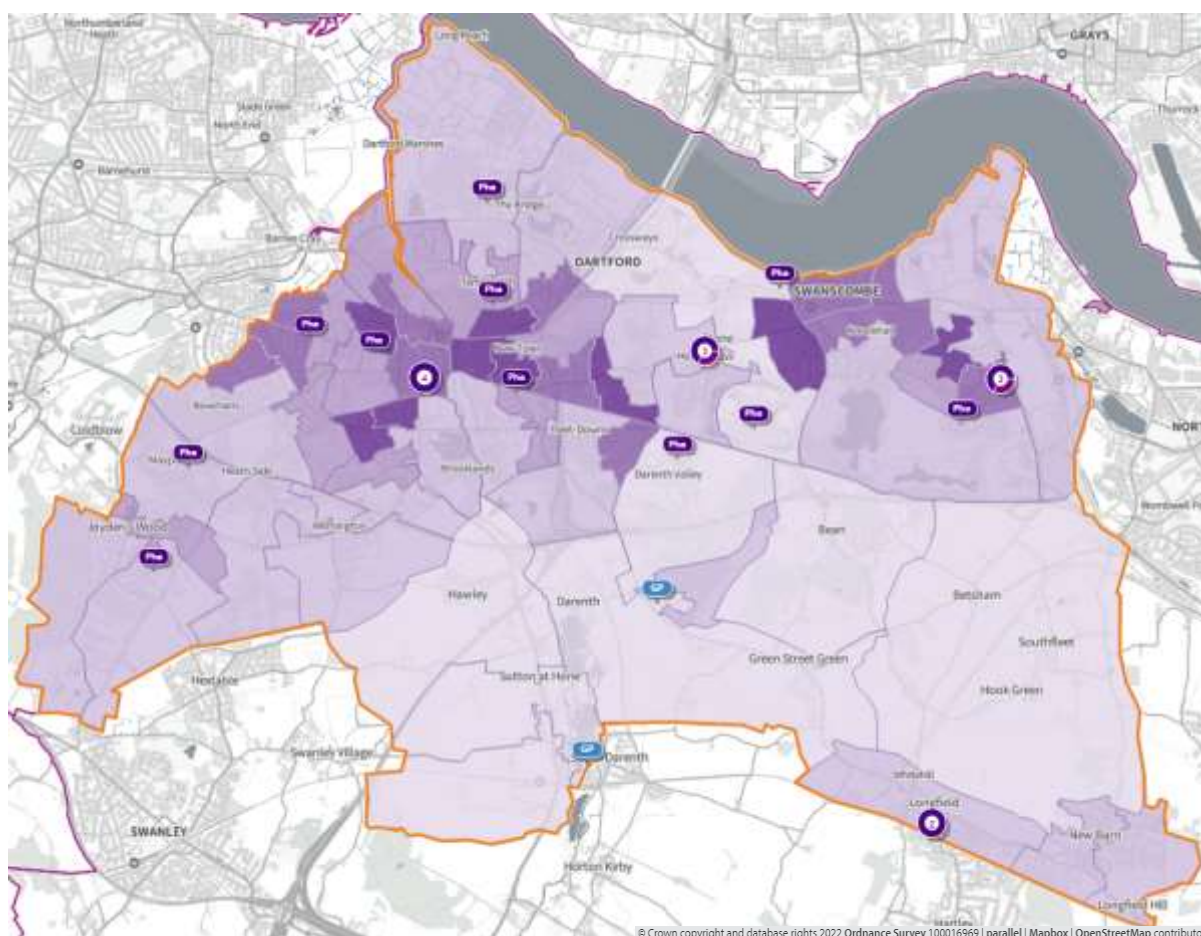

Map 52. Rural/urban classification of lower super output areas

Population

Map 53 below shows the distribution of the population in the locality. Dartford has a population of 114,051. The majority of the population is spread across the urban north of the district, however there are a number of high-density areas in this part of the district.

Map 53. Population density of lower super output areas overlayed with locations of pharmacies and dispensing doctors

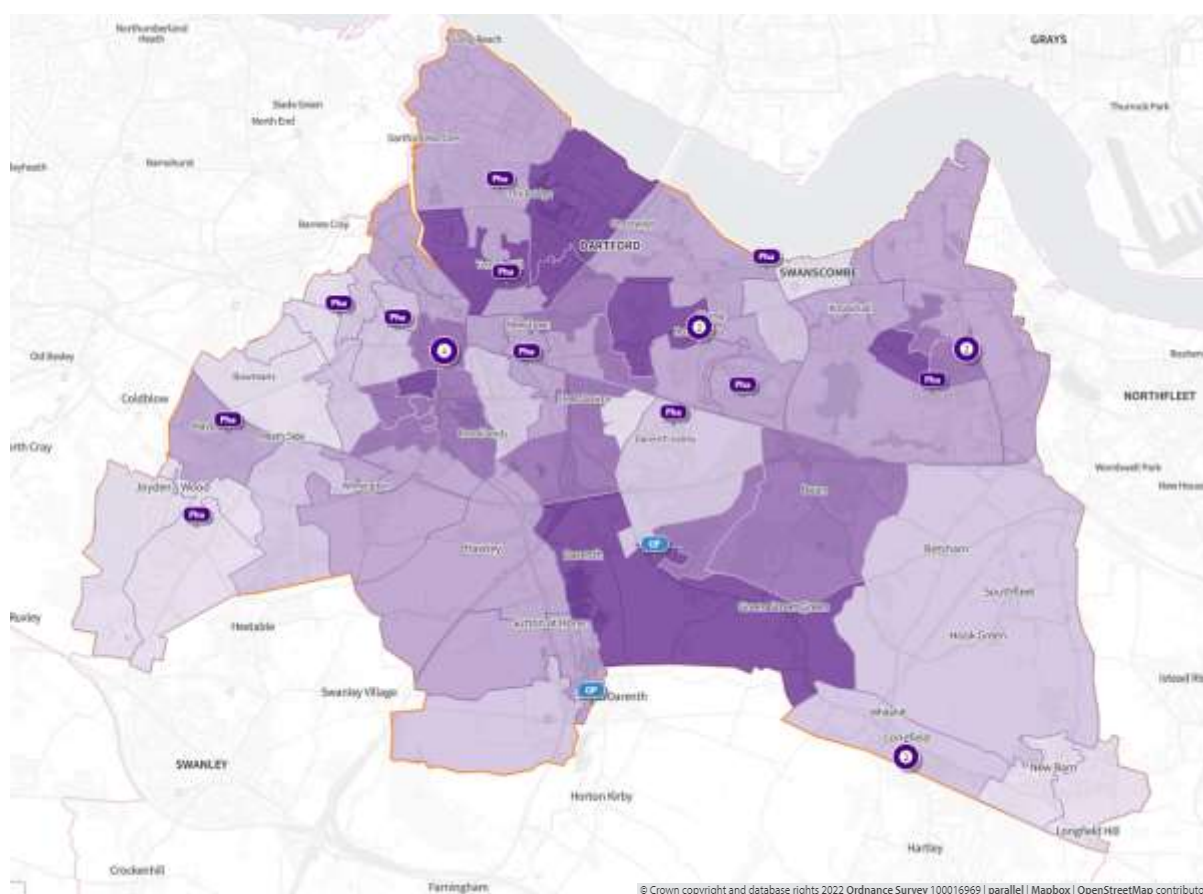

© Crown copyright and database rights 2022 Ordnance Survey 100016969 | parallel | Mapbox | OpenStreetMap contributors

Deprivation

Map 54 below shows the areas of deprivation in the Dartford locality. Dartford is ranked 6th out of Kent's 12 districts for deprivation, with significant areas of low deprivation contrasted with significant areas of high deprivation. One lower super output area (LSOA) on the edge of Dartford town is within the top 10% most deprived areas in England. Employment rates are similar to the Kent average ⁽⁶³⁾ but educational attainment is higher than the Kent average and third highest of all Kent districts ⁽⁶⁴⁾.

Map 54. Deprivation of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Language

English is the main language for all people aged 16 or over in 93.4% of households in the district. 3.3% of households have no people with English as the main language ⁽²⁾.

Home ownership

66% of houses are owned either outright (27%) or with a mortgage (39%). The average number of occupants per household is 2.4, the same as the Kent average ⁽²⁾.

Age Distribution

The average age of Dartford district residents is 37.5, lower than the Kent average of 41.4 and the lowest of all Kent districts. 13.9% of the population is over 65 (the lowest proportion of 65+ of all Kent districts) and 22.9% 0-15 ⁽²⁾. Life expectancy at birth is 77.9 for males and 82.2 for females ⁽⁴⁶⁾.

Economy

By industry, the top three employers in the Dartford district are wholesale and retail trade (19.5%), human health and social work activities (14.6%), and administrative and support service activities (11.4%) ⁽¹⁵⁾. Dartford has a much higher proportion of employees working in transportation and storage compared to the Kent average (10.6% vs 5.4%) ⁽¹⁵⁾.

Car ownership

19% of households in Dartford district do not have a car or van in the household ⁽¹³⁾.

Care Homes

There are a considerable number of care homes in the Dartford locality. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services.

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are 20 Community pharmacies providing dispensing services in the Dartford locality. That is one 1 pharmacy per 5,300 people slightly higher than the England figure of 1 per 4,700. If 4 dispensing practices are included, then it 1 dispensary per 4,700 people. Figure 30 below shows how this compares with the other localities of Kent.

Figure 30. Number of people per pharmacy in each locality

18 of the pharmacies open at least one hour after 17:00 on weekdays. 17 are open on Saturdays and 4 open Saturday and Sunday. The weekly opening hours range from 42.5 to 96, with the average opening hours being 55.5 hours each week.

In addition, there are 4 dispensing GP practices and 1 dispensing compliance contractor in the Dartford locality.

The dispensing GP practices in the Dartford locality are:

- Devon Road Surgery, Dartford DA4 9AB
- Swanscombe Health Centre DA10 0BF
- Elmdene Surgery, Greenhithe DA9 9BA
- Bennett Way Surgery, Darenth DA2 7JT

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There are 26% of prescriptions generated in the area that are dispensed in neighbouring areas and 23% that are generated outside the locality and dispensed by Dartford locality community pharmacies⁽¹⁾. This is a greater proportion than the other Kent localities.

- 1,798 outside prescribers dispense in Dartford
 - 23% of all items dispensed in Dartford
- 15 prescribers in Dartford
 - 77% of all items dispensed in Dartford

- 32 dispensers in Dartford
 - 74% of all items prescribed
- 1,302 dispensers outside of Dartford
 - 26% of all items prescribed in Dartford

Pharmacy locality: Maps 1 and 2 above show the locality of the community pharmacies and GP dispensing practices.

The tables below show the core and supplementary hours of each pharmacy ⁽⁶⁵⁾

Travel times

In **map 55**, below, the green shaded areas are within a **20-minute walk** of a community pharmacy/dispensing GP practice. 85.5% of people are not within a 20-minute walk. 20% of 65+ population is not within a 20-minute walk of a community pharmacy/dispensing GP.

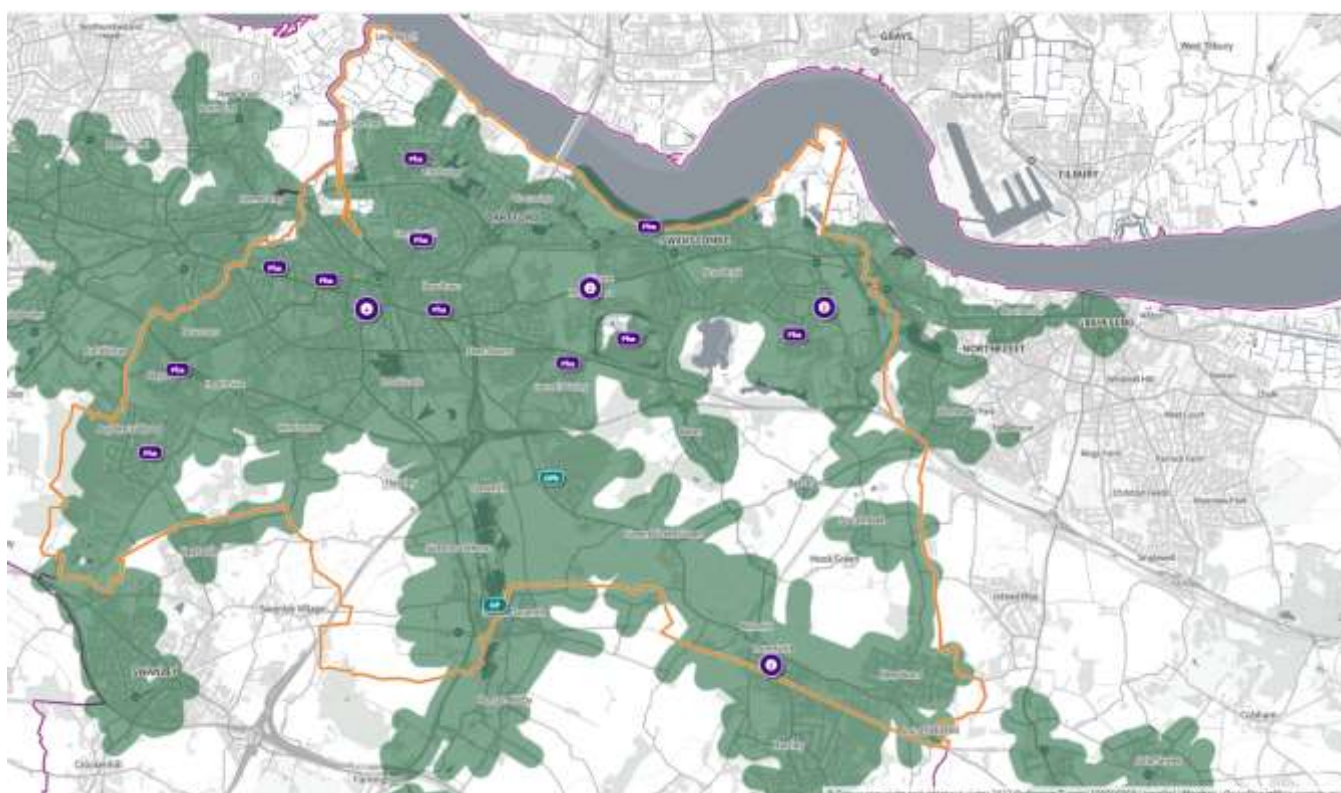

Map 55. Locations of community pharmacies/dispensing GPs and lower super output areas not within a 20-minute walk

Public Transport 20 minutes

In **map 56**, below, the green shaded areas are within 20-minutes by public transport of a community pharmacy/dispensing GP practice. The entire population (by LSOA) is within 20-minutes by public transport of a community pharmacy/dispensing GP practice.

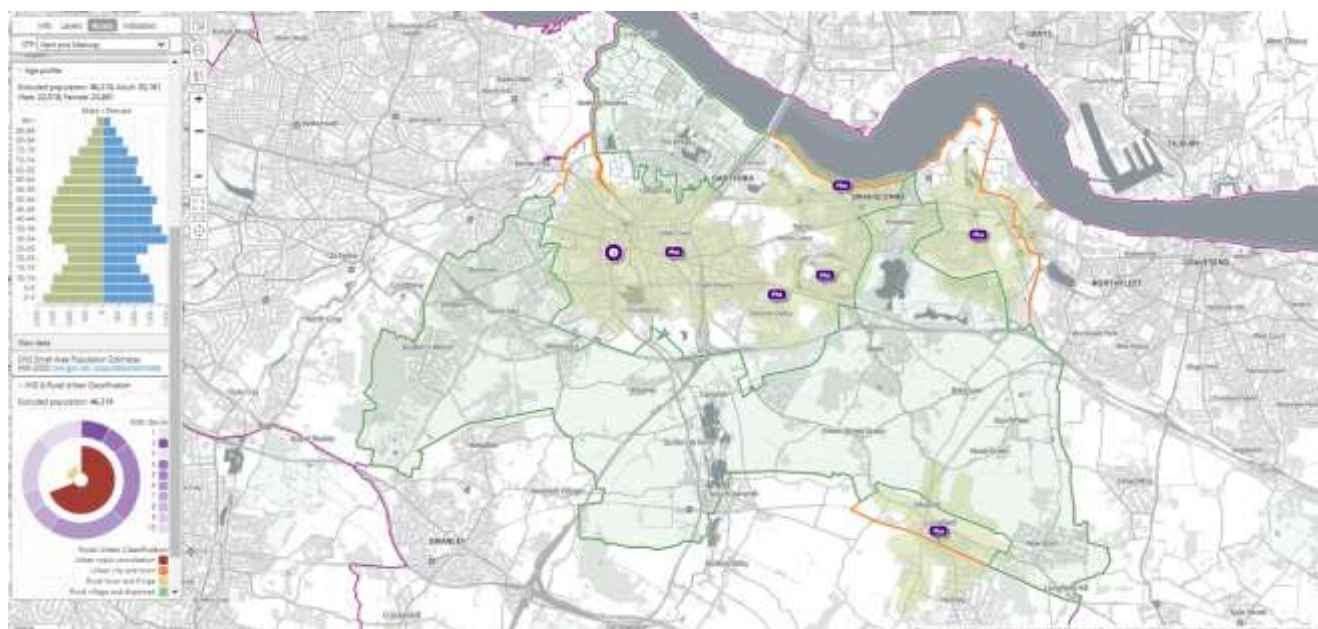

Map 56. Locations of community pharmacies/dispensing GPs and areas within 20-minutes by public transport on weekday mornings

After 7 pm weekdays walking

In **map 57**, below, the olive-green shaded areas are within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays. 41,426 (36.3%) people are not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays. 44.2% (7,023) of 65+ population is not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays.

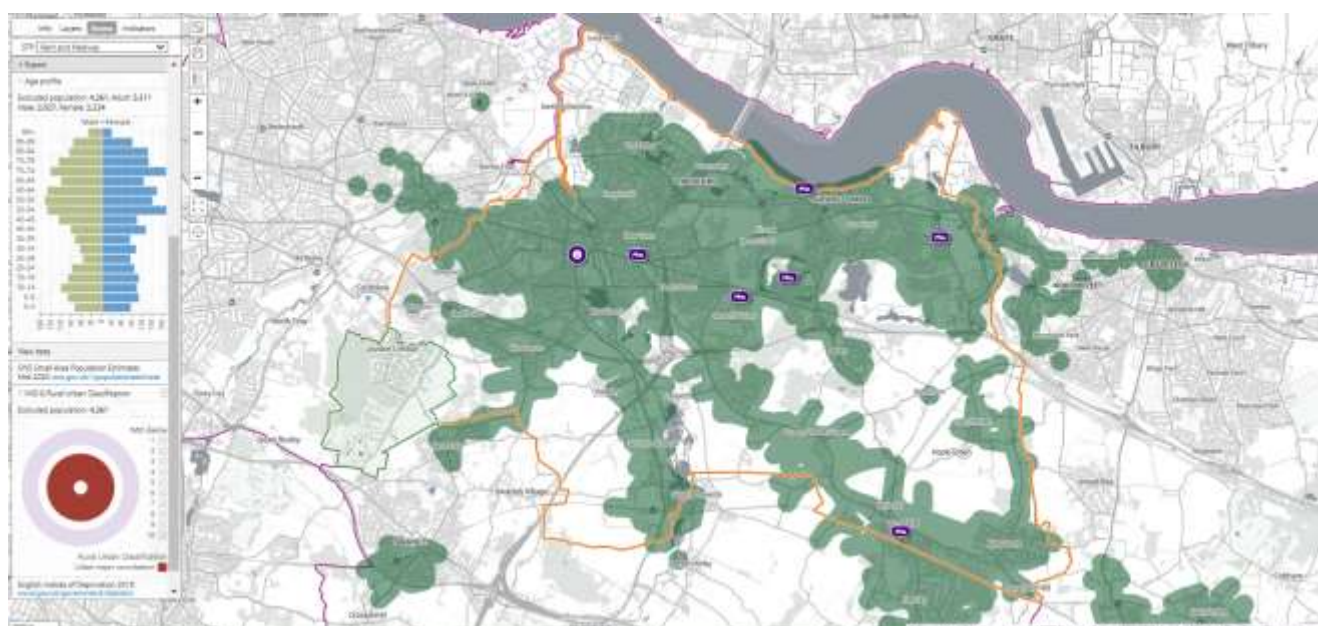

Map 57. Locations of community pharmacies open until at least 7pm and lower super output areas not within a 20-minute walk

After 7pm weekdays public transport

In **map 58**, below, the green shaded areas are within 20-minutes by public transport of a community pharmacy that opens past 7pm on weekdays. 4,261 (3.7%) people are not within 20-minutes by public transport that opens past 7pm on weekdays. 8.4% (1,336) of 65+ population is not within 20 minutes by public transport of a community pharmacy that opens past 7pm on weekdays.

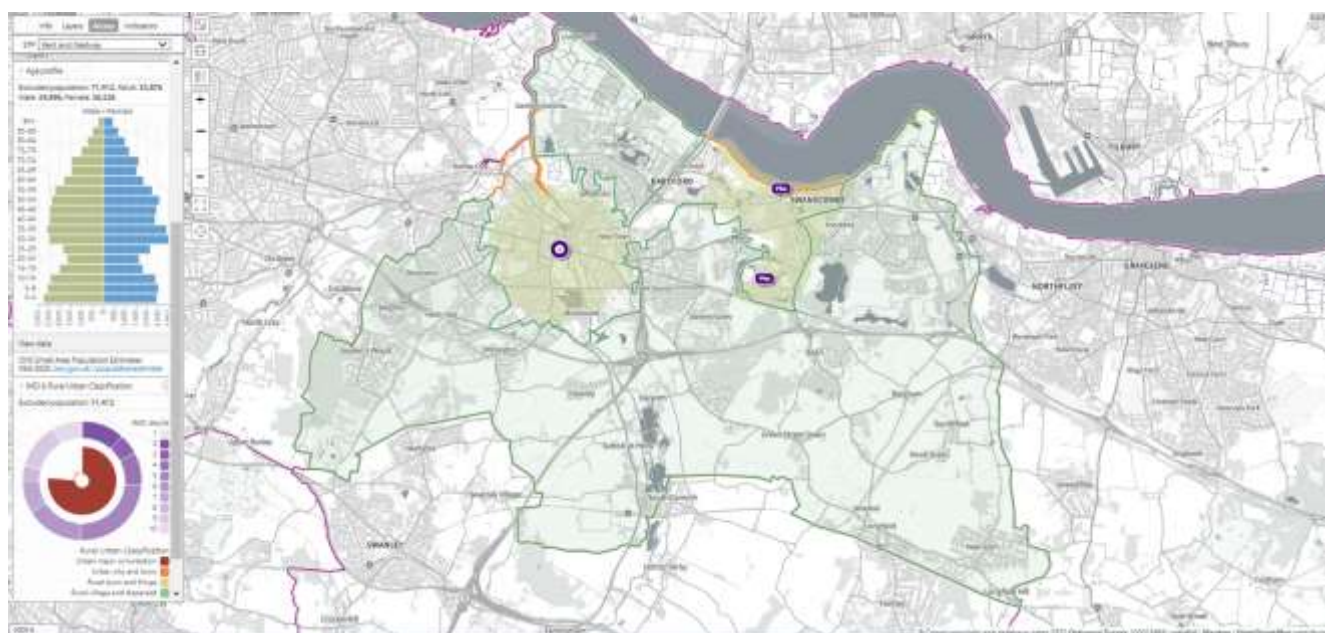

Map 58. Locations of community pharmacies open until at least 7pm on weekdays and areas within 20-minutes by public transport on weekday evenings

Access on Sundays

In **map 59**, below, the olive-green shaded areas are within a 20-minute walk of a community pharmacy that opens on Sundays. 69.7% (79,505) of the population is not within a 20-minute walk of a community pharmacy that opens on Sundays. 69.7% (12,370) of 65+ population is not within a 20-minute walk of a community pharmacy that opens on Sundays.

Map 59. Locations of community pharmacies open on Sundays and lower super output areas not within a 20-minute walk

In **map 60** below, access during **core opening hours, Saturdays and Sundays** is shown. The olive-green shaded areas are within a **20-minute drive** of a community pharmacy/dispensing GP practice. The entire population is within a 20-minute drive.

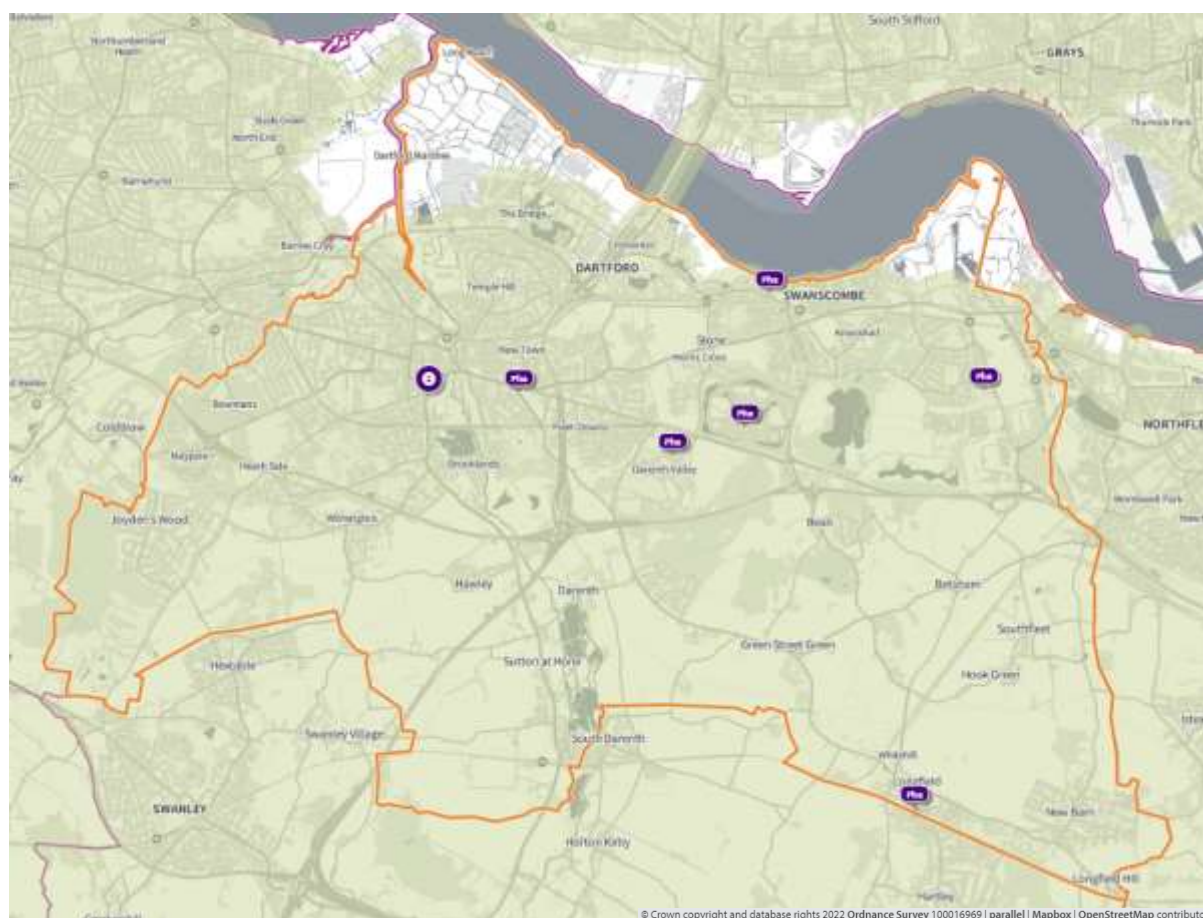

Map 60. Locations of community pharmacies/dispensing GPs and areas within 20-minutes by car

S = open Saturday N = open Sunday

In **map 61** below, the green shaded areas are within **20-minutes by car** of a community pharmacy that opens **until at least 7pm on weekdays**. The entire population is within a 20-minute drive.

Map 61. Locations of community pharmacies open until at least 7pm on weekdays and areas within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The information below indicates the number of prescriptions dispensed in and outside the locality.

- 1.89 million items prescribed in Dartford
 - 1.4 million items dispensed in Dartford
 - 1.3 million (93%) via Electronic Prescription Service
 - 490,000 (26%) dispensed outside of the district (approximately 50% is due to prescriptions from branch surgeries outside of Dartford)
 - 240,000 in Sevenoaks
 - 102,183 in Bexley
 - 75, 000 in Gravesham
- 1.81 million items dispensed in Dartford
 - 1.74 million items dispensed by community pharmacies in Dartford
 - 68,000 dispensed by 11 GP practices:
 - Swanscombe Health Centre – 28,068
 - Devon Road Surgery – 18,875
 - 410,000 items prescribed outside borough i.e. more coming in than going out

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling pharmacies
- Which are located near to where they work, shop or visit for leisure or other purposes.

Taking into account this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy within the locality.

4. Other relevant services: current provision

The following advanced services were delivered by pharmacies in the Dartford locality in 2020/21.

Table 31. Number of pharmacies providing advanced services

Advanced service name	No. of pharmacies
New Medicine Service	17
Appliance Use Review	1
Hypertension Service [‡]	17
Stoma Appliance Customisation	2
Community Pharmacist Consultation Service (CPCS) [‡]	18
Hepatitis C Antibody Testing Service	2
Seasonal Influenza Vaccination Advances Service	19
Covid Vaccination Service*	1
Covid Home Delivery Service*	15
Covid lateral flow device distribution*	22

*Specific to the Covid-19 pandemic

[‡]Services introduced during the year of study

Please note that three services were specific to the Covid-19 pandemic (Covid vaccination, homedelivery and lateral flow device distribution services) and that others were new services (CPCS, Hypertension service) introduced within the year. There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- Devon Road Surgery opens until 7.30pm on Mondays, Tuesdays and Thursdays
- Downs Way Medical Practice: Summerhouse Surgery is open until 8.30 pm on Tuesdays
- Redwood Practice is open 9am-12pm on Saturdays
- Swanscombe and Bean Partnership: Bean Village Surgery is open until 7.30pm on Wednesdays
- Temple Hill Surgery is open 8am-8pm on Mondays and Tuesdays, and 7am-6.30pm on Wednesdays and Thursdays
- The orchard Practice is open 8am-12pm on Saturdays

There is an Accident and Emergency department situated in the Darent Valley Hospital at Pembury. It is open 24 hours a day every day of the year.

There are also drug and alcohol services, Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality.

The number of prescriptions from these services is shown below:

- 13 pharmacies dispensed a total of 2,341 items (mean = 180, range = 1-902) from drug and alcohol services
- 20 pharmacies dispensed a total of 1,455 items from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- 15 pharmacies dispensed a total of 135 items from KCHFT (paediatrics)
- 20 pharmacies and 2 GP practices dispensed a total of 4,403 items (mean = 200, range = 1-1,190) from Kent and Medway hospitals

6. Choice with regard to obtaining pharmaceutical; services

As can be seen from sections 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

Most recently, the highest rates of population growth in the county have been in Dartford and the trend is forecast to continue (see graph below). KCC's housing-led population forecast projects that the population of Dartford will increase by 10% to 131,300 by 2025. This is an increase of approximately 1,200 people per pharmacy from 2020.

Figure 31 Dartford Population forecast

 **1 pharmacy per 6,945 people in 2025**

In **map 62**, below, in the two shaded areas, the Dartford Local Plan produced by Dartford Borough Council states between 2020/21 and 2029/2030 5676 new homes are planned for these 2 areas - 75% of all homes planned in Dartford in that period. Approx. 3000 planned to be completed by 2026 i.e. within the lifespan of this PNA. A number of smaller developments are planned across the borough but are very small in comparison – the majority with 5-9 proposed new dwellings.

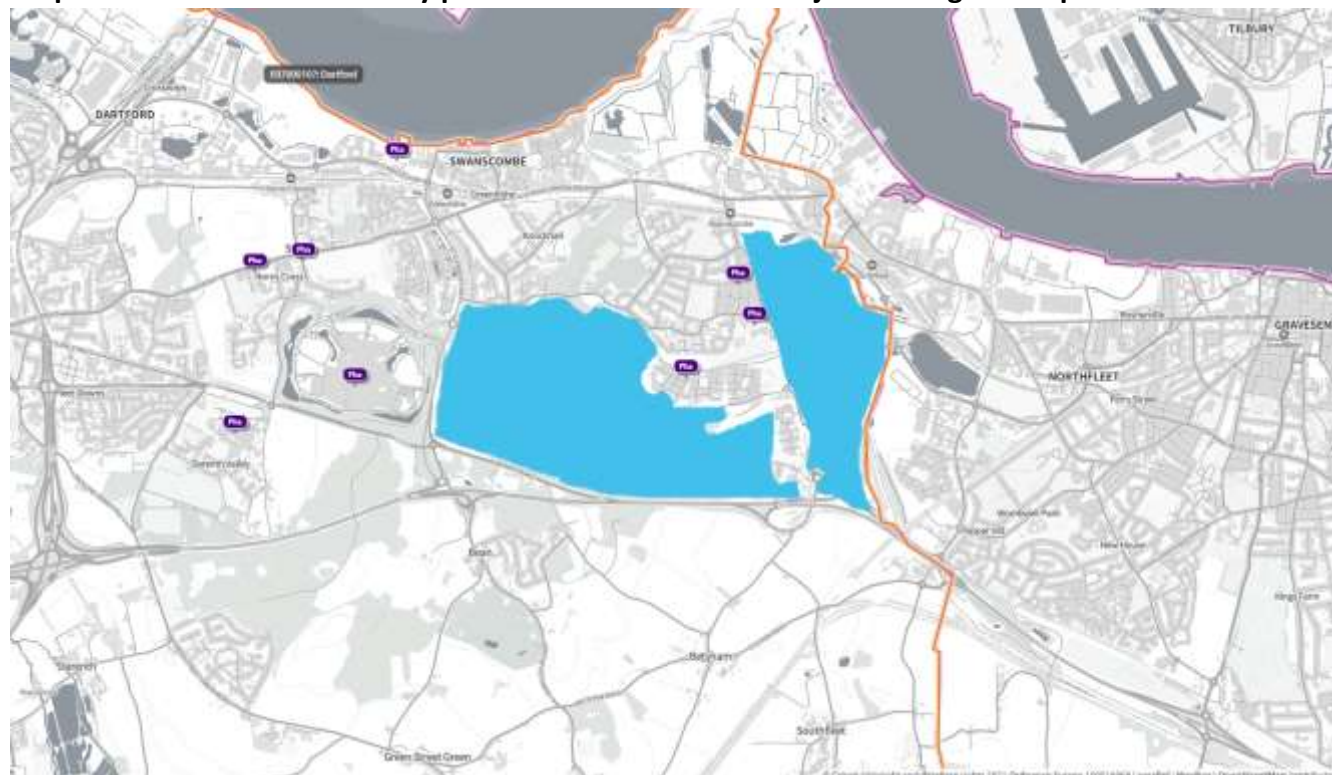

Map 62. Location of major housing developments

In **map 63**, below, by 2029/30 Approximately 14,000 (7,800 by 2026) new inhabitants to be served by 4/5 existing pharmacies.

Also, a dispensing GP at Swanscombe Health Centre which houses Swan Valley Pharmacy.

Map 63. Location of community pharmacies and areas of major housing developments

In **map 64**, below, A one mile radius from 2 pharmacies covers the entirety of the proposed developments.

Map 64. One mile radius from 2 pharmacies

In **map 65**, below, A one mile radius from pharmacies that open at least one day at the weekend covers the vast majority of the proposed developments.

Map 65. One mile radius from pharmacies that open at least one day at the weekend

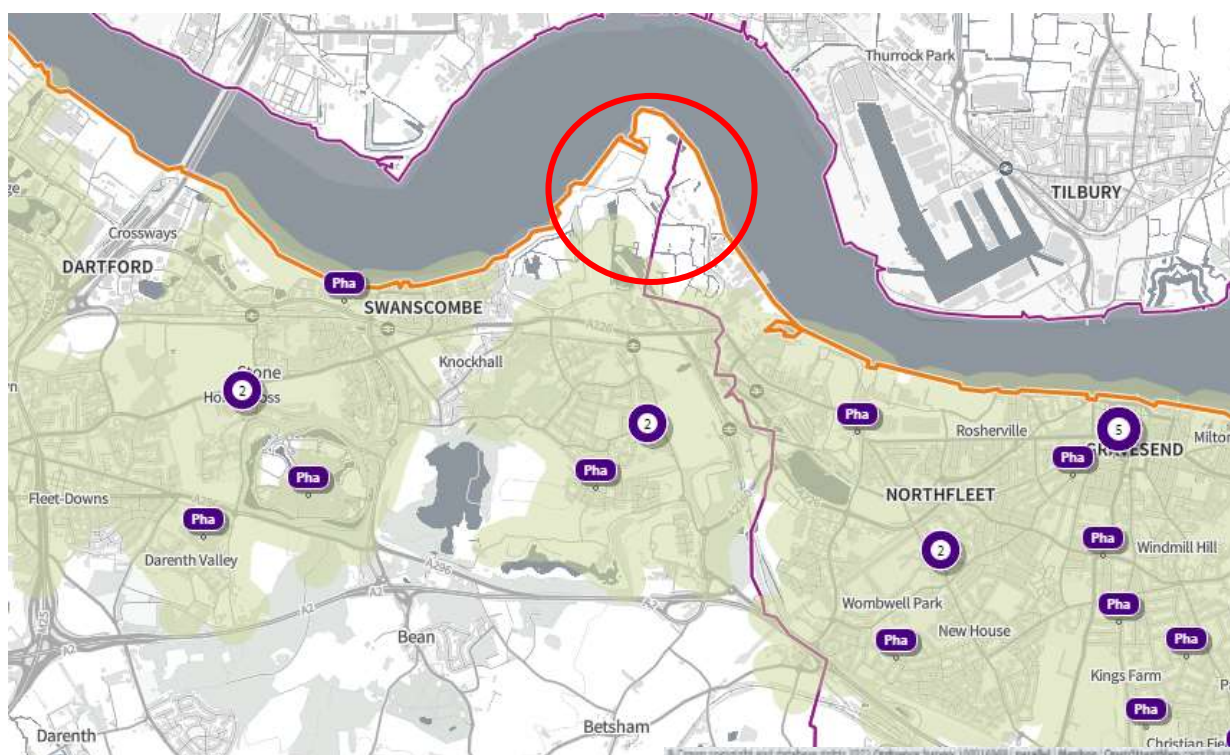

Necessary services: - Gaps in provision

The London Resort ⁽⁵⁸⁾

The construction of the London Resort will require a large workforce; up to 5,000 construction workers are expected on-site in the peak year of Gate One construction (2023). Of these, however, up to half are expected to live too far from the site to commute daily and will seek temporary accommodation close to the site. There are three preliminary options for the London Resort strategy: rely on existing accommodation options; purchase or rent a decommissioned cruise ship (likely with 1,000 to 2,000 room capacity); and/or locate mobile homes (500 – 700 rooms) on-site. There is estimated to be up to 3,100 construction workers seeking temporary accommodation in the area in 2023. *Please note at the time of writing (April 2022) a new planning submission has been made for the London Resort development so the time scales stated may alter.*

Map 67 below shows the proposed location of The London Resort. The green shaded areas are within a 20- minute walk of the pharmacies displayed on the map. Construction workers living on-site will be within a 20-minute walk of the nearest pharmacy. Two pharmacies in the Dartford locality are within a 20-minute walk of the site. Neither of these pharmacies responded to the contractor's questionnaire so it is unknown whether these pharmacies feel they have capacity to meet increased demand for services or medicines.

Map 67. Location of community pharmacies, proposed location of The London Resort and areas within a 20 minute walk of a community pharmacy

Lloyds Pharmacy (FP204) has indicated that it does not have capacity for increased demand for services or medicines. However, there are another 7 pharmacies within a 1-mile radius of Lloyds Pharmacy (FP204) and no gaps in provision of necessary services have been identified.

8. Improvements or better access: Gaps in provision

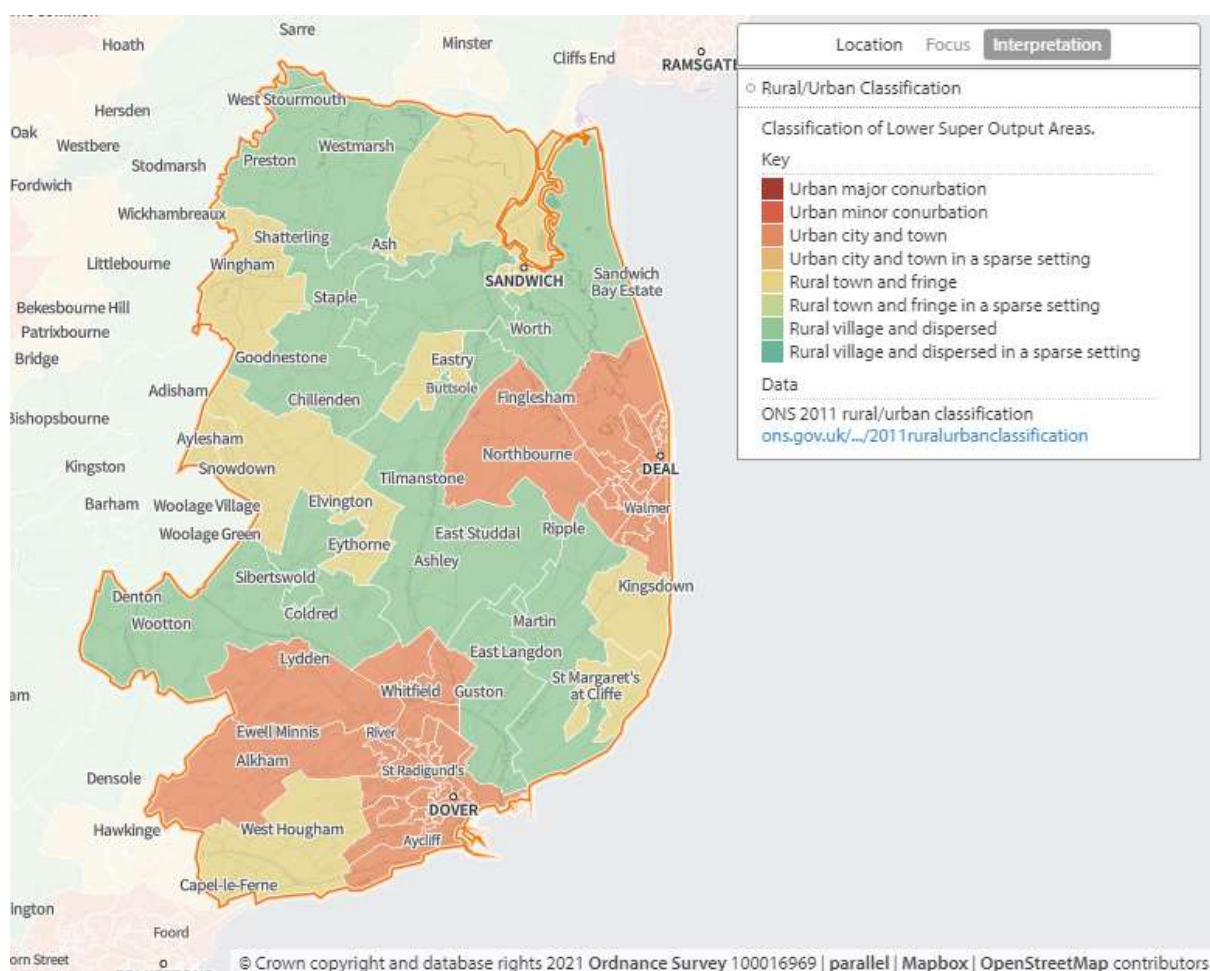

No improvements have been identified.

11 Dover Borough Council Locality

1. Key Facts

Dover is a local government district in the south-east of the county. It covers an area of 314.8 square km. Most of the population live in the coastal towns of Deal and Dover. Beyond the urban towns, the district is very sparsely populated. However, there are two small pockets of higher density in Sandwich and Aylesham. The east and south of the district are bordered by the sea while the west and north border rural areas of the Canterbury and Thanet districts.

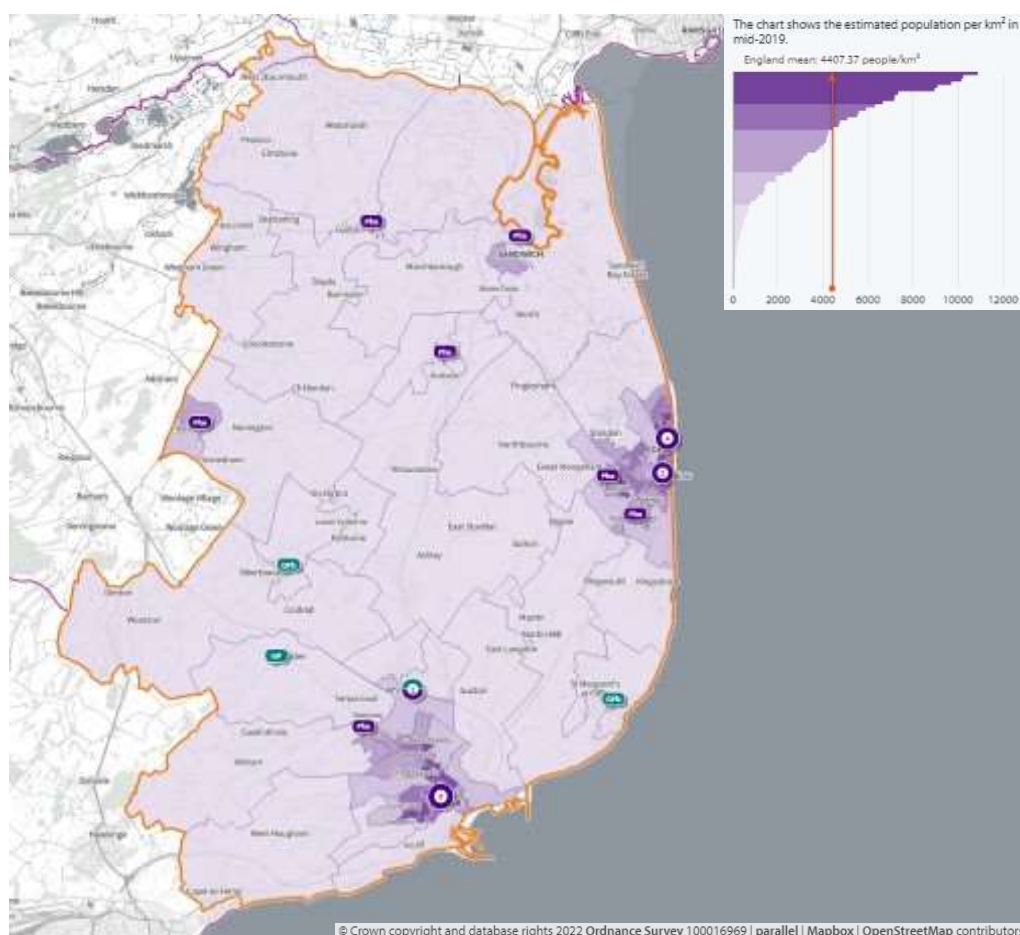

Map 68. Rural/urban classification of lower super output areas

Population

Dover has a population of 118,514. Map 69 shows that the majority of the population is split between the two largest towns of Dover and Deal. The remaining area of the district is very sparsely populated with the exceptions of a couple of small pockets of more densely populated areas at Sandwich and Aylesham.

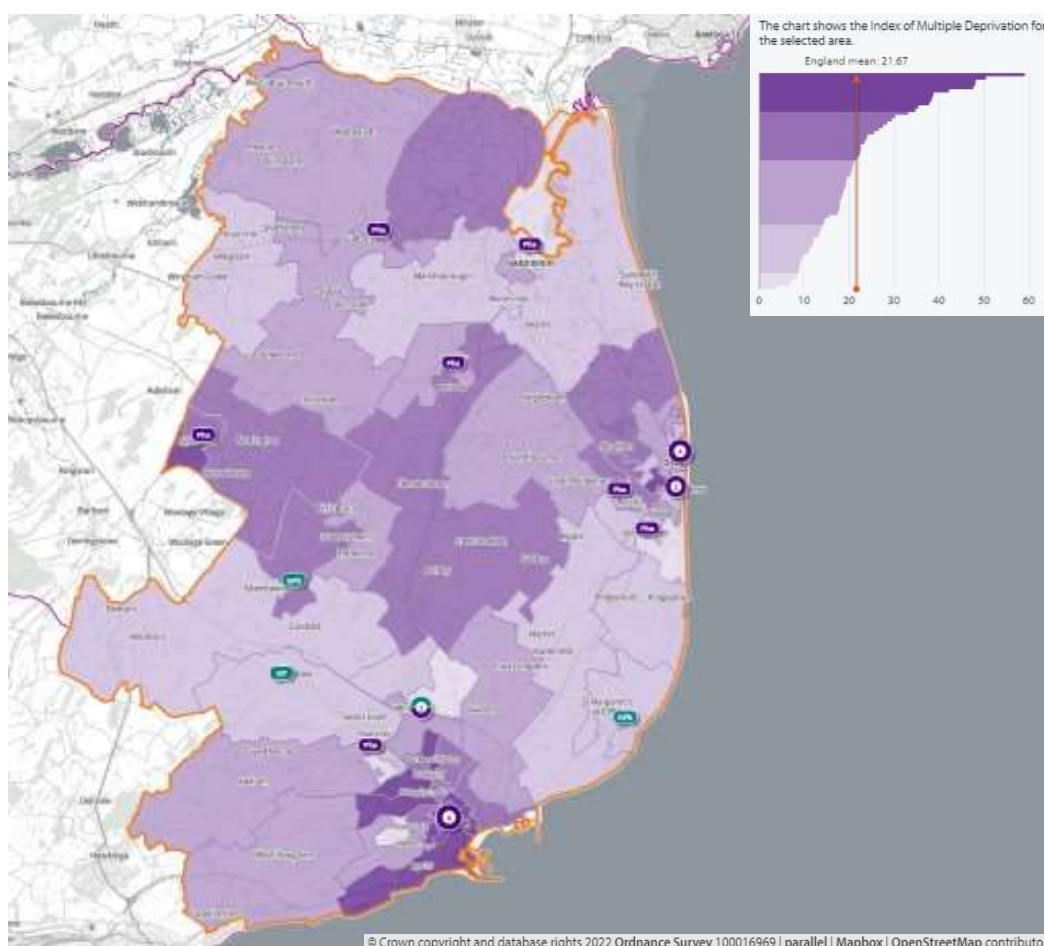

Map 69. Population density of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Deprivation

Map 70 below shows the areas of deprivation in the Dover locality. Dover is ranked 4th out of Kent's 12 districts for deprivation and the most deprived areas are in and around the town of Dover. Five LSOAs in the district are within the top 10% most deprived areas in England. Employment rates are the second lowest of all Kent districts ⁽⁶³⁾ and educational attainment is significantly lower than the Kent average ⁽⁶⁴⁾.

Map 70. Deprivation of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Language

English is the main language for all people aged 16 or over in 96.4% of households in the district. 1.8% of households have no people with English as the main language ⁽²⁾.

Home ownership

66% of houses are owned either outright (35%) or with a mortgage (31%). The average number of occupants per household is 2.3, slightly lower than the Kent average of 2.4 ⁽²⁾.

Age Distribution

The average age of Dover district residents is 43.9, higher than the Kent average of 41.4 and the second highest of all Kent districts ⁽²⁾. 23.8% of the population is over 65 and 17.6% 0-15. Life expectancy at birth is 78.6 for males and 81.7 for females ⁽⁴⁶⁾.

Economy

By industry, the top three employers in the Dover district are wholesale and retail trade (12.7%), human health and social work activities (12.7%), and administrative and transportation and storage (10.4%) ⁽¹⁵⁾. Dover has a much higher proportion of employees working in transportation and storage compared to the Kent average (10.4% vs 5.4%) ⁽¹⁵⁾.

Car ownership

23% of households in Dover district do not have a car or van in the household, this is higher than the Kent average of 20% ⁽¹³⁾.

Care Homes

There are a considerable number of care homes in the Dover locality. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services.

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are 20 Community pharmacies providing dispensing services in the Dover locality. That is one pharmacy per 5,926 head of population. Figure 32 below shows how this compares with the other localities of Kent.

Figure 32 Number of people per pharmacy in each locality

15 of the pharmacies open at least one hour after 17:00 on weekdays. 19 are open on Saturdays and 3 open Saturday and Sunday. The weekly opening hours range from 40 to 102, with the average opening hours being 57 each week.

In addition, there are 4 dispensing GP practices in the locality.

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There are 7.4% of prescriptions generated in the area that are dispensed in neighbouring areas and a smaller percentage that are generated outside the locality and dispensed by Dover locality community pharmacies ⁽¹⁾.

- 1,072 outside prescribers dispense in Dover
 - 3.1% of all items dispensed in Dover
- 24 prescribers in Dover
 - 96.9% of items dispensed in Dover
- 35 dispensers in Dover
 - 92.6% of all items prescribed in Dover
- 978 dispensers outside of Dover
 - 7.4% of all items prescribed in Dover

Pharmacy locality: Maps 1 and 2 above show the locality of the community pharmacies and GP dispensing practices.

Opening times

All are open Monday to Friday, with 19 opening on Saturdays and 3 opening on Saturdays and Sundays. This gives a weekly opening hours range of 40 to 102 hours and an average of 57 hours of opening each week. Fifteen of these pharmacies open for at least one hour after 5pm on weekdays. The tables below show the core and supplementary hours of each pharmacy ⁽⁶⁵⁾.

Table 32. Opening times for all pharmacies

Pharmacy	Total weekly core hours	Total supplementary weekly hours	Total weekly hours	Max. hours open after 5pm at least 1 day/week	Saturday hours	Sunday Hours

The dispensing GP practices in the Dover locality are:

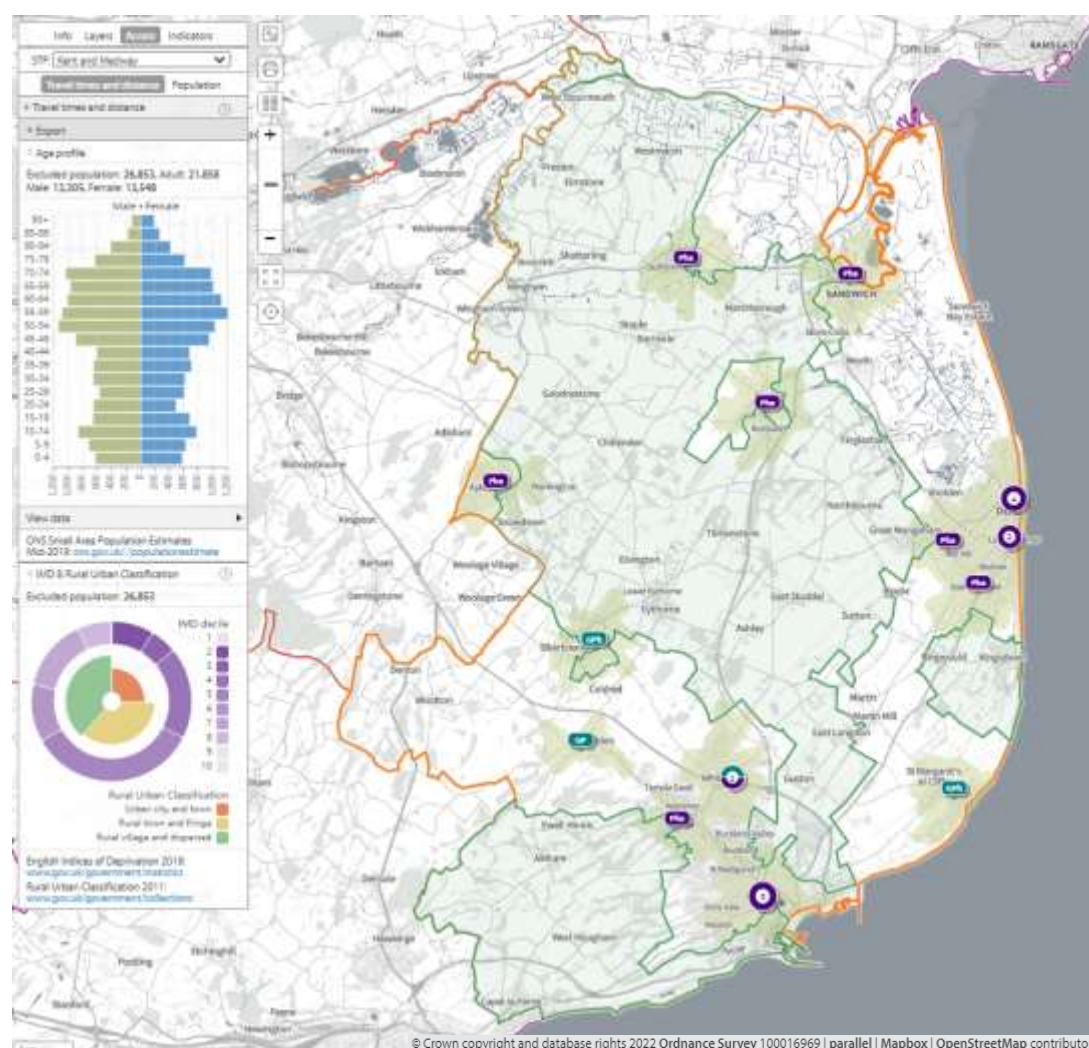

- Whitfield Surgery CT16 3LT
- Lydden Surgery CT15 7ET
- Tara, The Surgery, St Margarets Bay CT15 6BT

Travel times

Access during core opening times is shown in the maps (4-7) below.

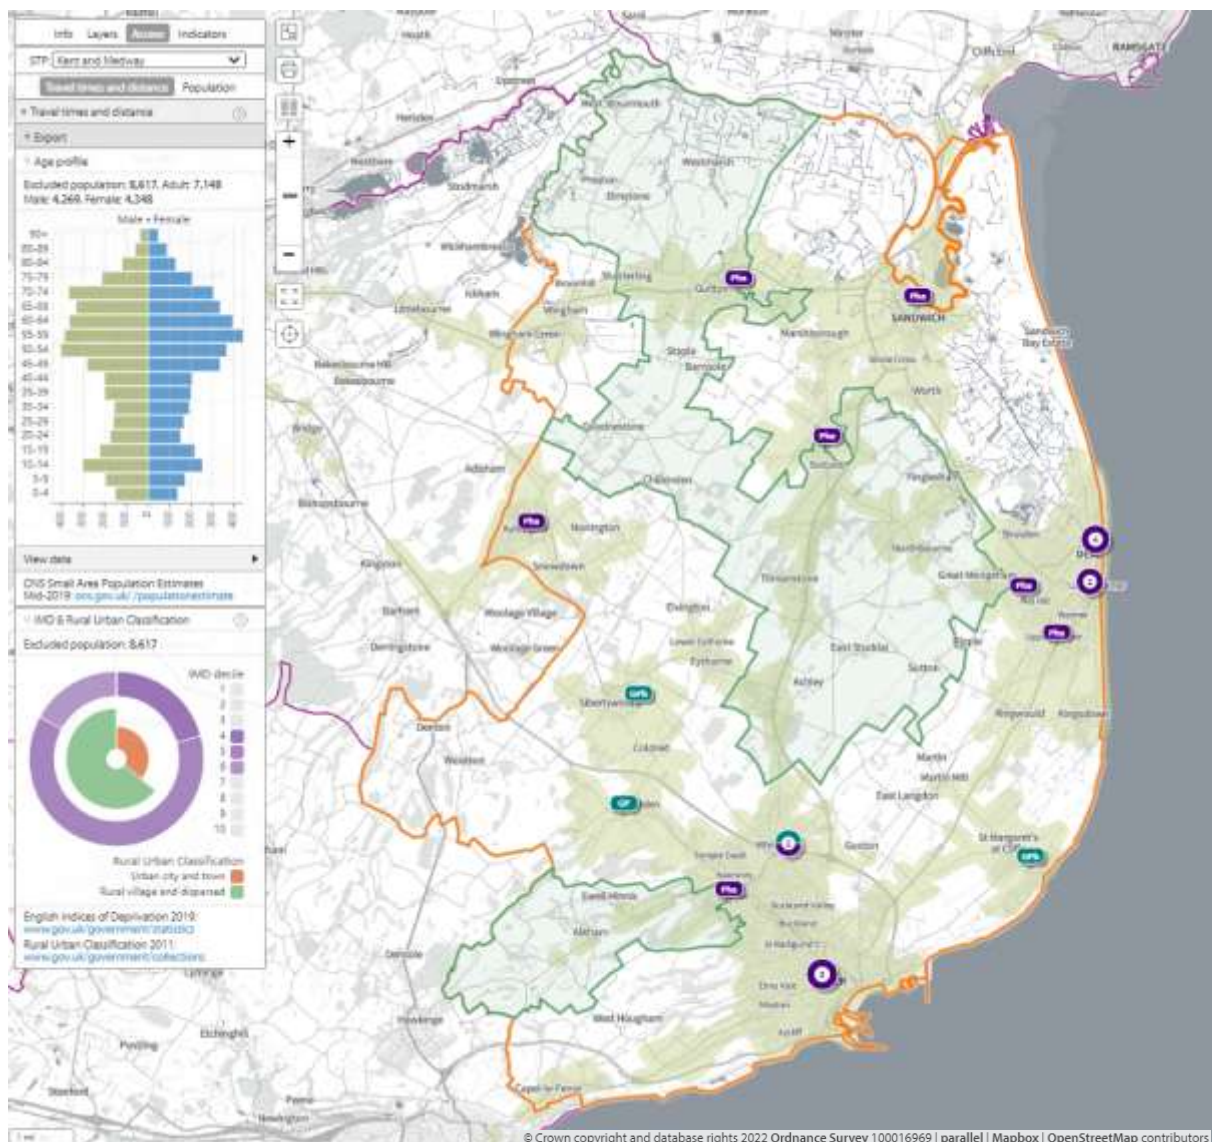

In **map 71**, below, the green shaded areas are within a **20-minute walk** of a community pharmacy/dispensing GP practice. The data indicates that 26,853 (22.7%) people are not within a 20-minute walk and 24.4% of 65+ population is not within a 20-minute walk of a community pharmacy or dispensing GP practice

Map 71. Locations of community pharmacies/dispensing GPs and lower super output areas not within a 20-minute walk

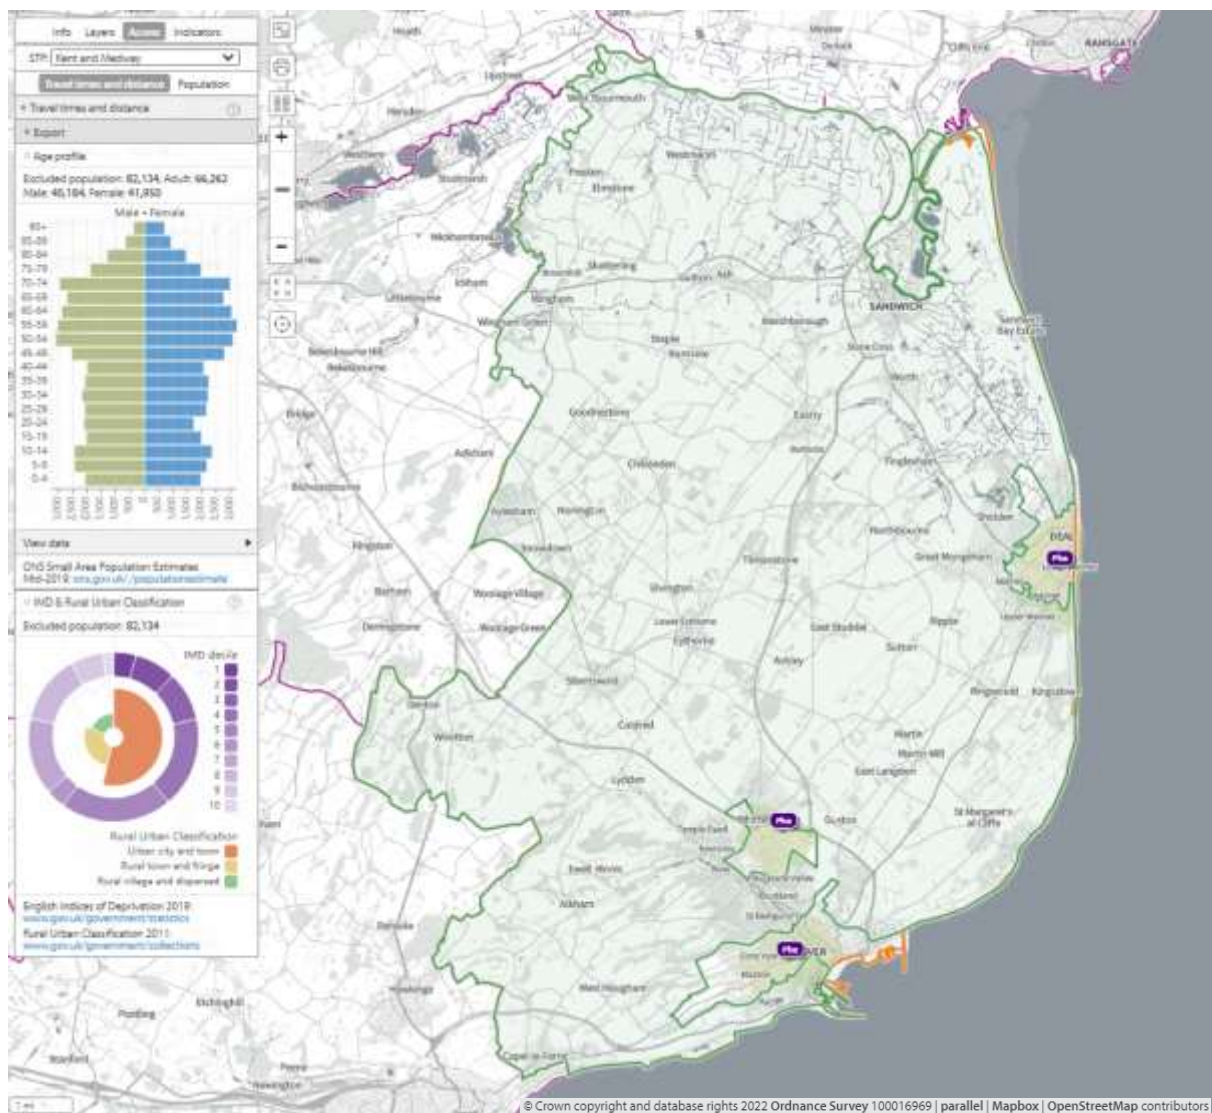

In **map 72**, below, the olive-green shaded areas indicate areas within 20-minutes by public transport of a community pharmacy/dispensing GP practice. 8,617 (7.3%) people are not within 20-minutes by public transport. 8% of 65+ population is not within 20 minutes by public transport of a community pharmacy or dispensing GP practice

Map 72. Locations of community pharmacies/dispensing GPs and lower super output areas not within 20-minutes by public transport on weekday mornings

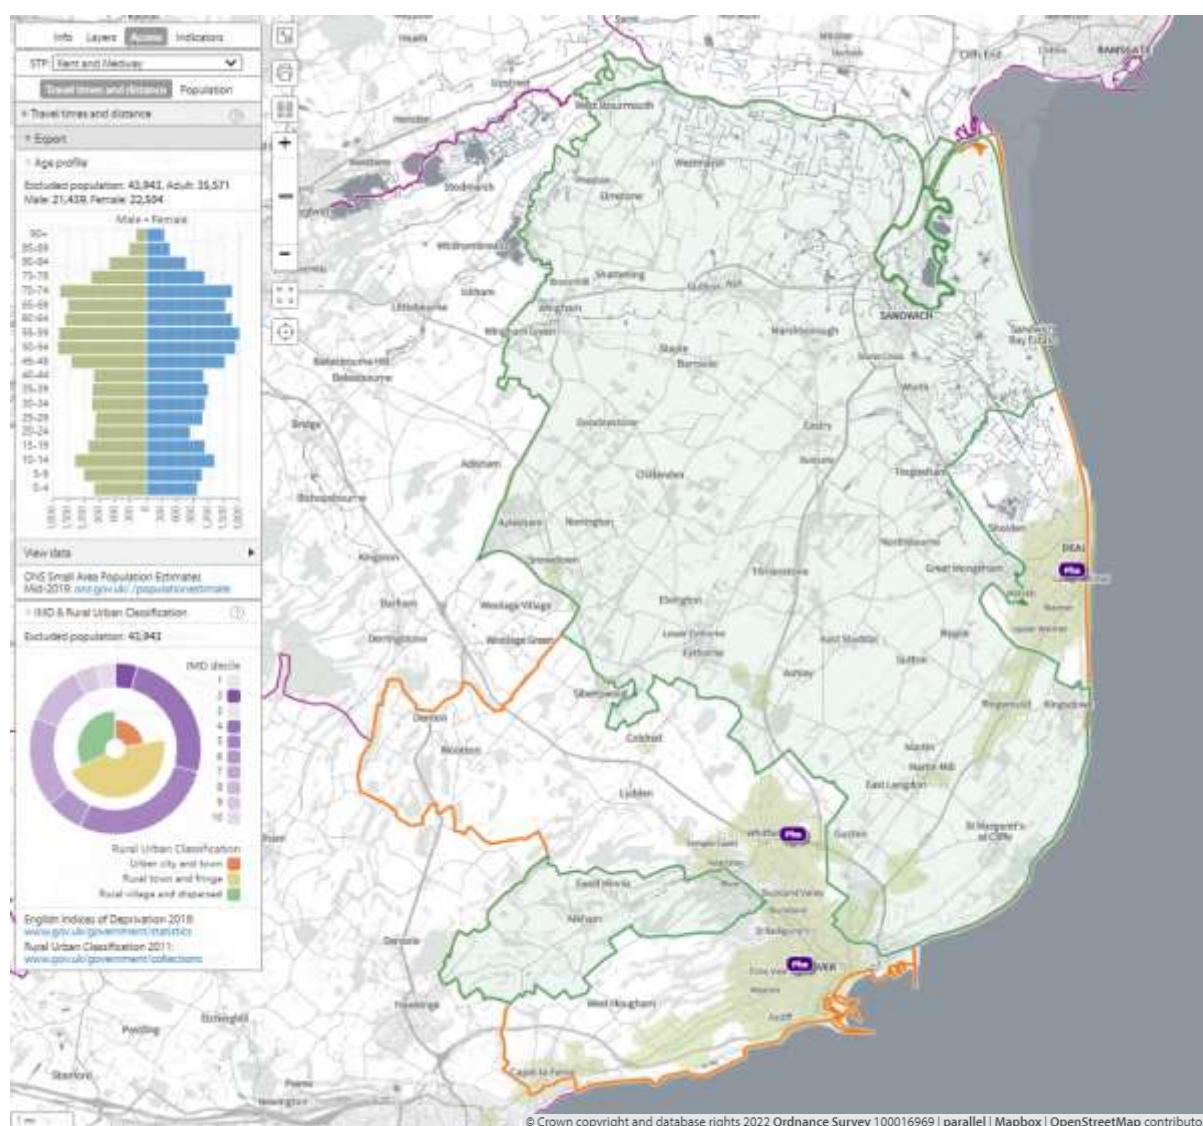

In **map 73**, below, shows **20 minutes walking** access as green shaded areas to community pharmacies that open until 8pm one day a week. 69.3% of the population is not within a 20-minute walk of a community pharmacy that opens until at least 8pm on one day a week

Map 73. Locations of community pharmacies open until at least until 8pm one day a week and lower super output areas not within a 20-minute walk

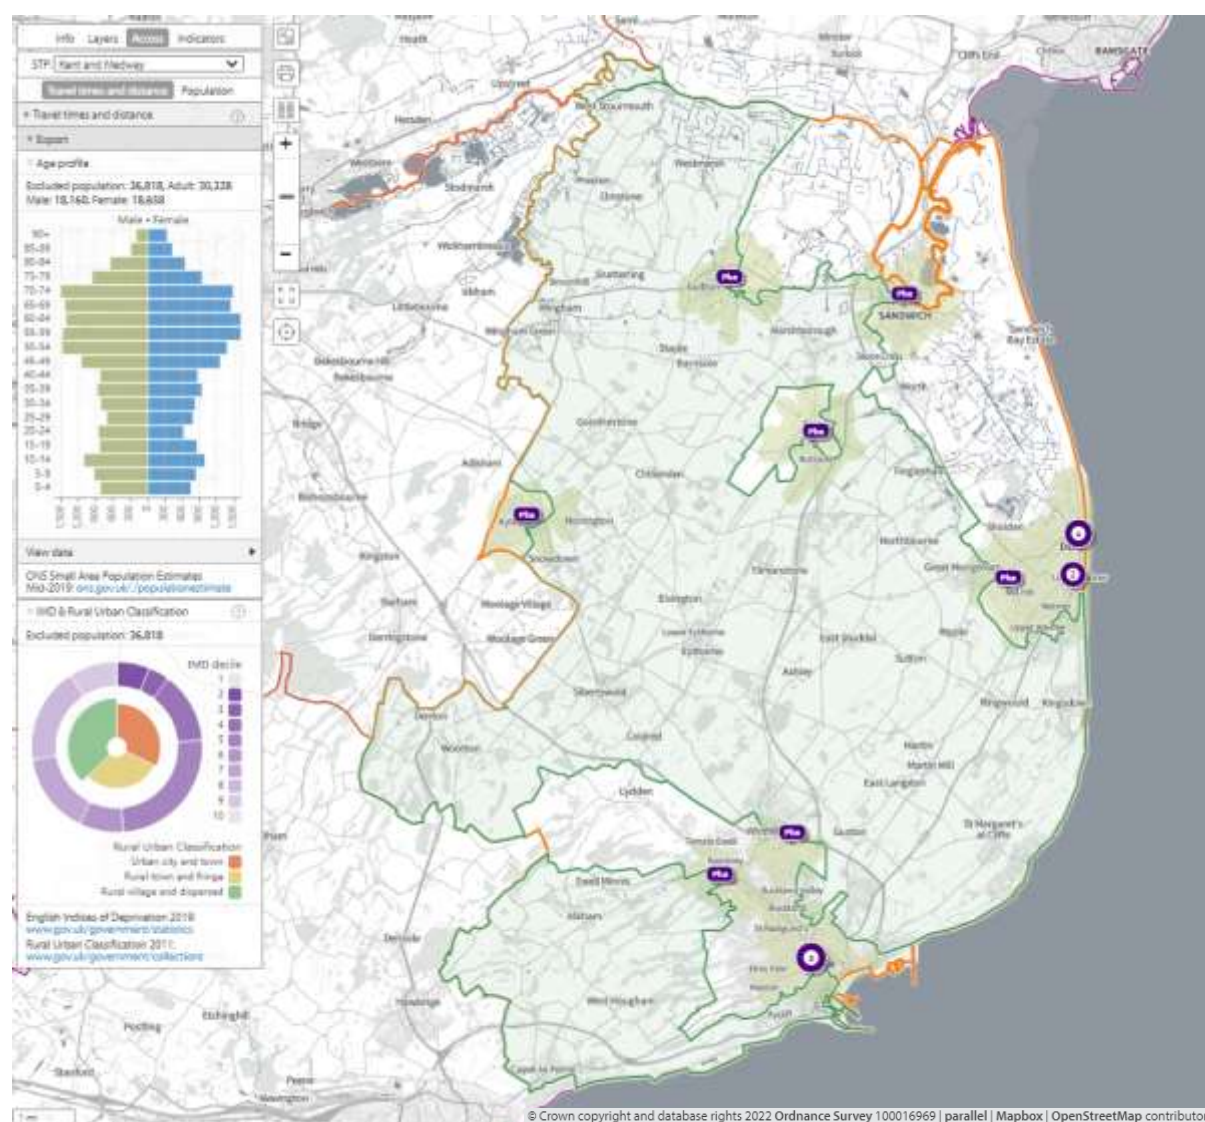

In **map 74**, below, shows **20 minutes public transport** access, as green shaded areas to community pharmacies/dispensing GP practices. The data reveals that 37.1% of the population is not within 20 minutes by public transport of a community pharmacy that opens until at least 8pm on one day a week

Map 74. Locations of community pharmacies open until at least until 8pm one day a week and lower super output areas not within 20-minutes by public transport on weekday evenings

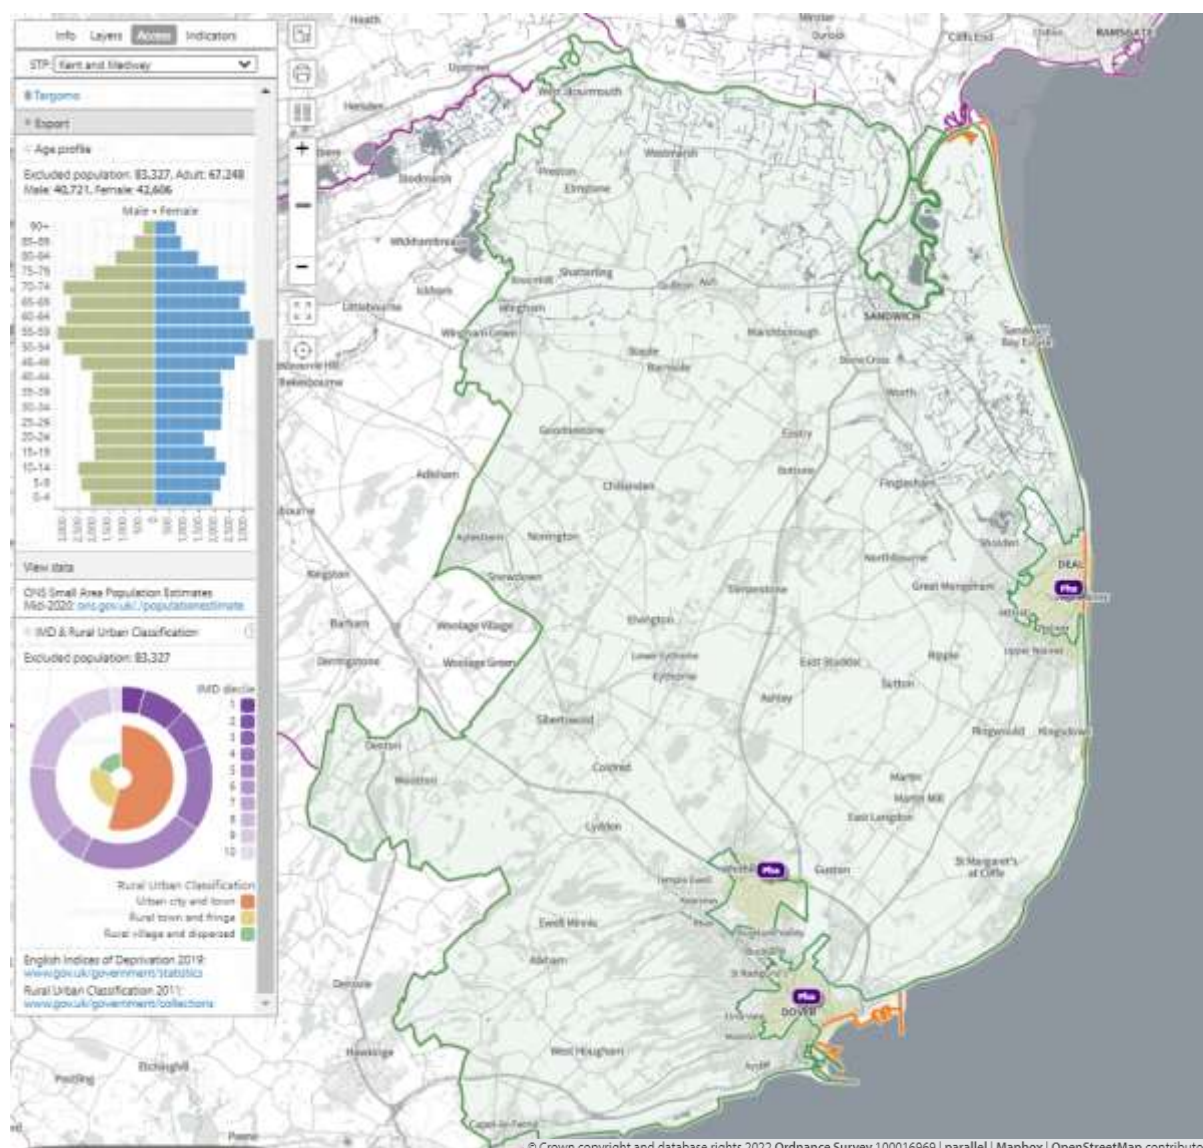

In **map 75**, below, 20-minute **walking access** to community pharmacies that are open at weekends. The data reveals that 31.1% of the population is not within a 20-minute walk of a community pharmacy that opens at the weekend.

Map 75. Locations of community pharmacies open at weekends and lower super output areas not within a 20-minute walk

In **map 76**, below, 20-minute **walk** to community pharmacies that are **open on Sundays** is shown as green shaded areas. The information shows that 73.5% (8,327) of the population is not within a 20-minute walk of a community pharmacy that opens on Sundays and 75.3% (21,112) of the 65+ population is not within a 20 minute walk of a community pharmacy that opens on Sundays.

Map 76. Locations of community pharmacies open on Sundays and lower super output areas not within a 20-minute walk

In **map 77** below, access during **core opening hours, Saturdays and Sundays** is shown. The olive-green shaded areas are within a **20-minute drive** of a community pharmacy/dispensing GP practice. The entire population is within a 20-minute drive.

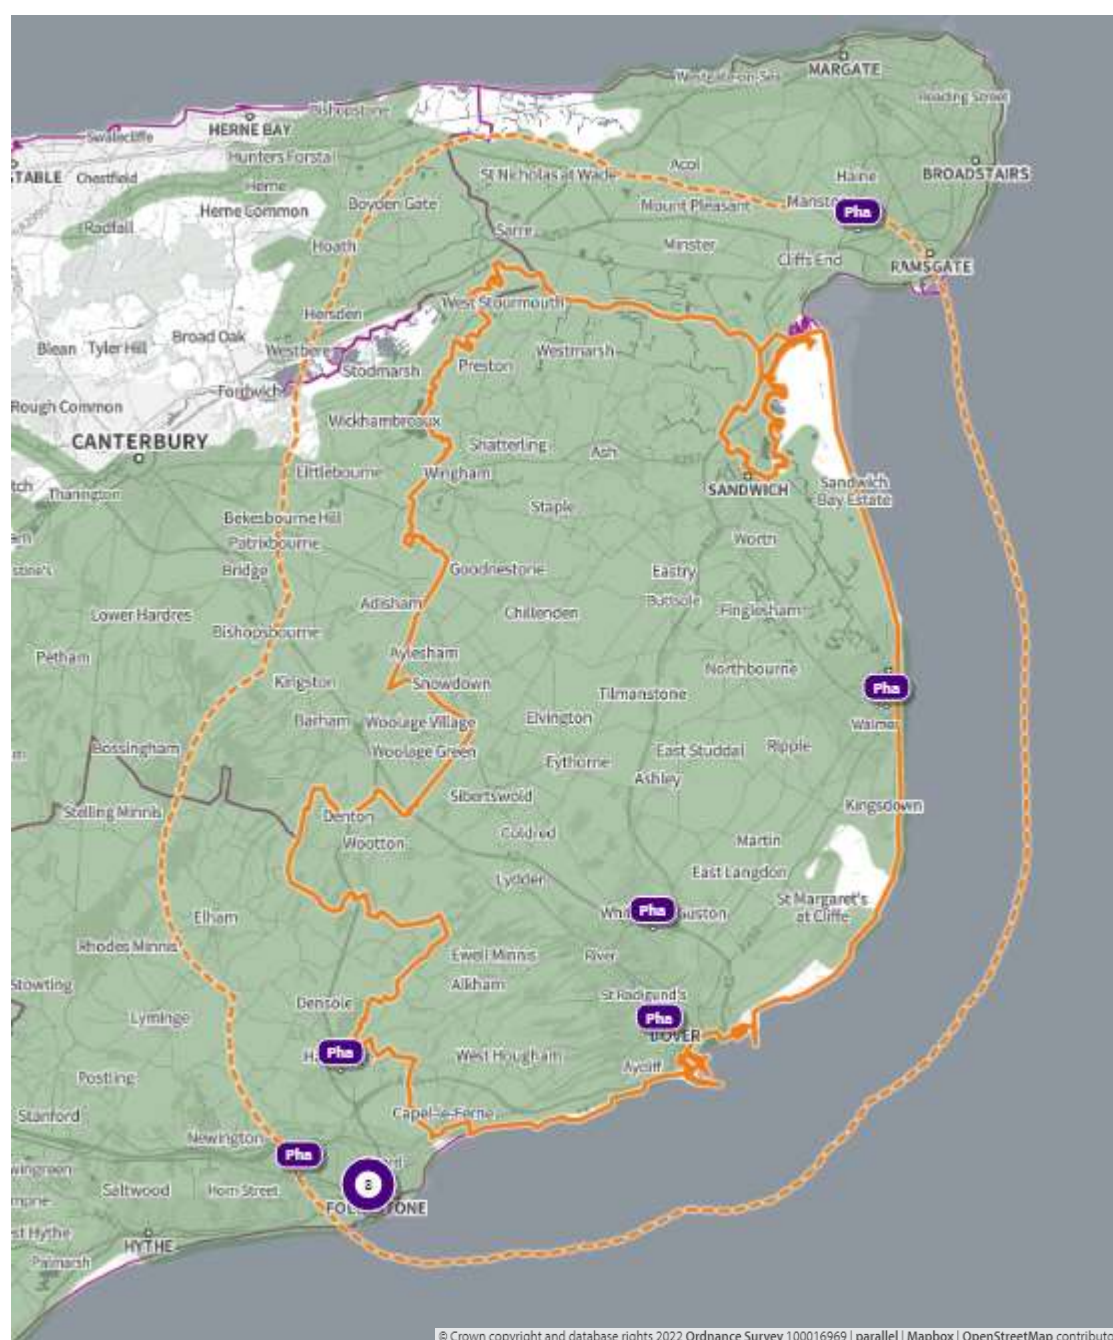

Map 77. Locations of community pharmacies/dispensing GPs and areas within 20-minutes by car

S = open Saturday N = open Sunday

In **map 78** below, the green shaded areas are within **20-minutes by car** of a community pharmacy that opens **until at least 7pm on weekdays**. The entire population is within a 20-minute drive.

Map 78. Locations of community pharmacies open until at least 7pm on weekdays and areas within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The information below indicates the number of prescriptions dispensed in and outside the locality.

- 2.03 million items prescribed in Dover
 - 1.88 million items dispensed in Dover
 - 1.65 (87.8%) million via Electronic Prescription Service
 - 150,381 dispensed outside of the district
 - 68,869 distance selling
 - 33,504 dispensed in Folkestone and Hythe
 - 29, 164 dispensed in Canterbury
- 1.94 million items dispensed in Dover
 - 1.76 million items dispensed by community pharmacies in Dover
 - 175,920 dispensed by 14 GP practices:
 - Buckland Medical Practice – 54,445
 - Lydden Surgery – 42,448
 - White Cliffs Medical Centre – 37,402
 - 59,410 items prescribed outside borough i.e. more going out than coming in

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling premises
- Which are located near to where they work, shop or visit for leisure or other purposes.

Taking into account this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy and do access pharmacy services within the locality.

4. Other relevant services: current provision

The following advanced services were delivered by pharmacies in the Dover locality in 2020/21.

Table 33. Opening times for all pharmacies

Advanced service name	No. of pharmacies
New Medicine Service	17
Appliance Use Review	0
Hypertension Service [‡]	20
Stoma Appliance Customisation	0
Community Pharmacist Consultation Service (CPCS) [‡]	20
Hepatitis C Antibody Testing Service	0
Seasonal Influenza Vaccination Advances Service	19
Covid Vaccination Service*	1
Covid Home Delivery Service*	16
Covid lateral flow device distribution*	21

*Specific to the Covid-19 pandemic

[‡]Services introduced during the year of study

Please note that three services were specific to the Covid-19 pandemic (Covid vaccination, homedelivery and lateral flow device distribution services) and that others were new services (CPCS, Hypertension service) introduced within the year. There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- High Street Surgery open until 7.30pm on Mondays
- Manor Road Surgery open until 7.30pm on Tuesdays
- St Richards Road Surgery open Saturdays 8.30am – 12pm

There are urgent treatment centres situated in the Buckland Hospital in Dover and Victoria Memorial Hospital, Deal. Both are open 8am to 8pm every day of the year.

There are also drug and alcohol services, Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality.

The number of prescriptions from these services is shown below:

- 12 pharmacies dispensed a total of 3,484 items (mean = 290, range = 2-1,035) from drug and alcohol services
- 20 pharmacies dispensed a total of 2,146 items (mean = 107, range = 17-246) from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- 15 pharmacies dispensed a total of 103 items (mean = 7, range = 1-36) from KCHFT
- 21* pharmacies and 1 GP practice dispensed a total of 16,856 items (mean = 766, range = 61-2,567)

6. Choice with regard to obtaining pharmaceutical; services

As can be seen from sections 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

Figure 33 below shows the predicted increase in the population of the Dover locality continuing to grow over the lifetime of this PNA. By 2025 it is estimated that each pharmacy will serve a population of 6,310.

Figure 33 Dover Population Forecast

The population of Dover district is projected to increase by 5% to 126,200 in 2025. This is an increase of approximately 400 people per pharmacy from 2020. As stated in the community pharmacy contracts survey one pharmacy in the Dover locality does not have the capacity to meet an increased demand for services. However, only 90 new houses are proposed in the catchment area of the pharmacy.

The next map below shows where there are major housing developments planned in the coming years and the table indicates the number of dwellings planned for each site. With an average of 2.4 people per proposed dwelling, by 2025 these sites will provide accommodation for approximately 4,600 people.

Map 79. Location of housing developments

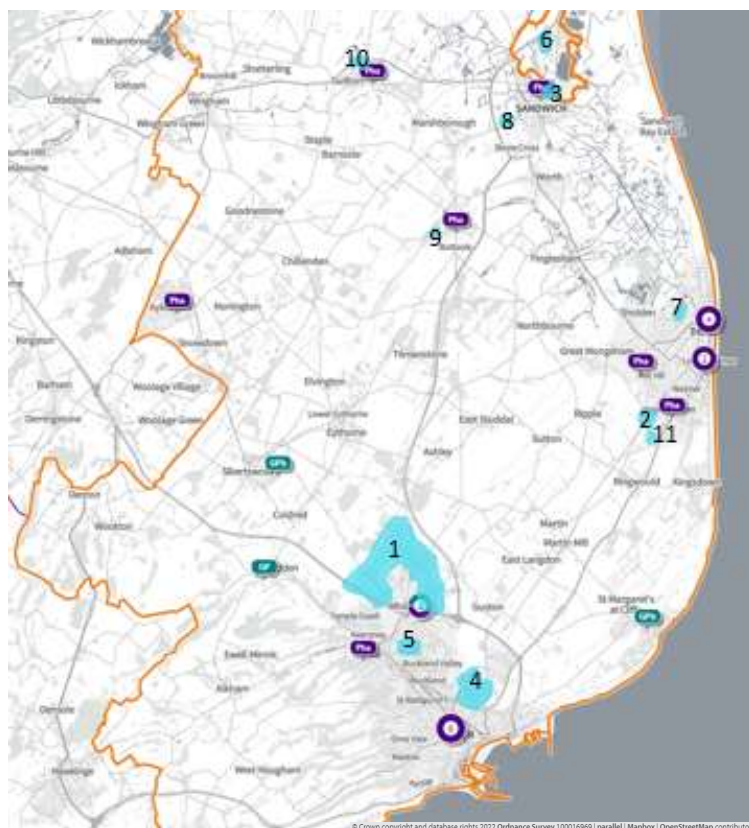

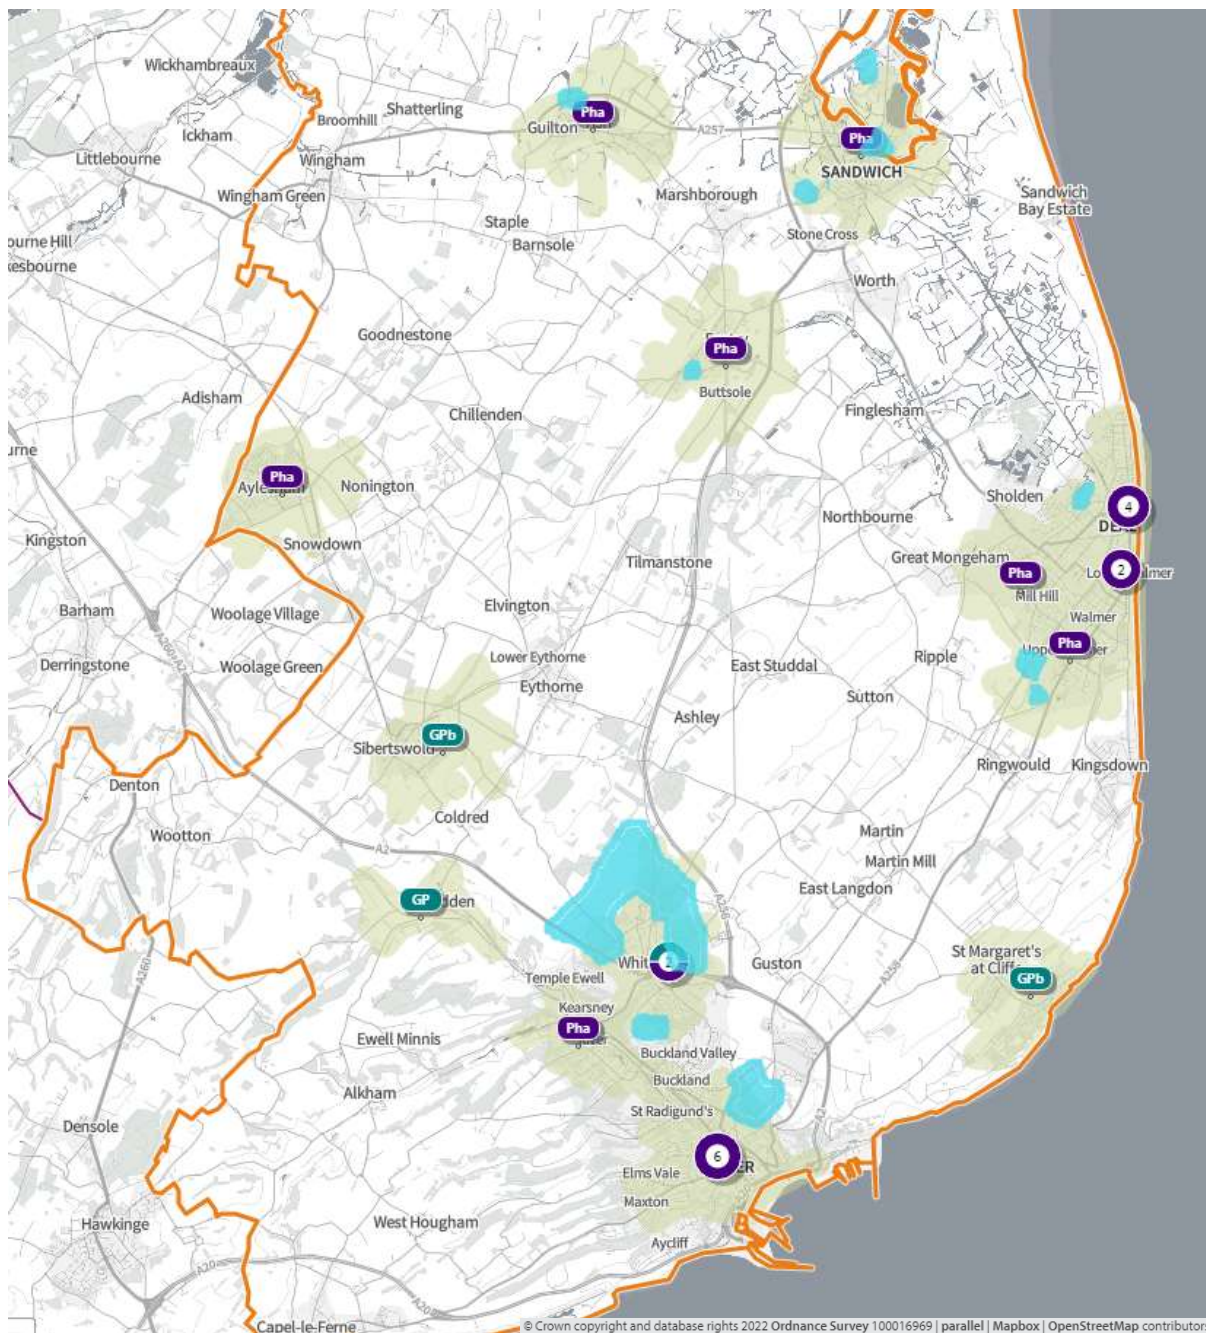

Table 34. Proposed housing developments – number of dwellings per year at each development

Site Name	20/21	21/22	22/23	23/24	24/25	25/26	26/27	27/28	28/29	29/30	2025	2030

Map 84. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open on Saturdays

In **map 85**, below, the green shaded areas are within a **20-minute walk** of a community pharmacy that is open on a **Sunday** and the blue shaded areas are locations of major housing developments.

Map 84. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open on Sundays

8. Necessary services: - Gaps in provision

There are no gaps in provision of necessary services

9. Improvements or better access: Gaps in provision

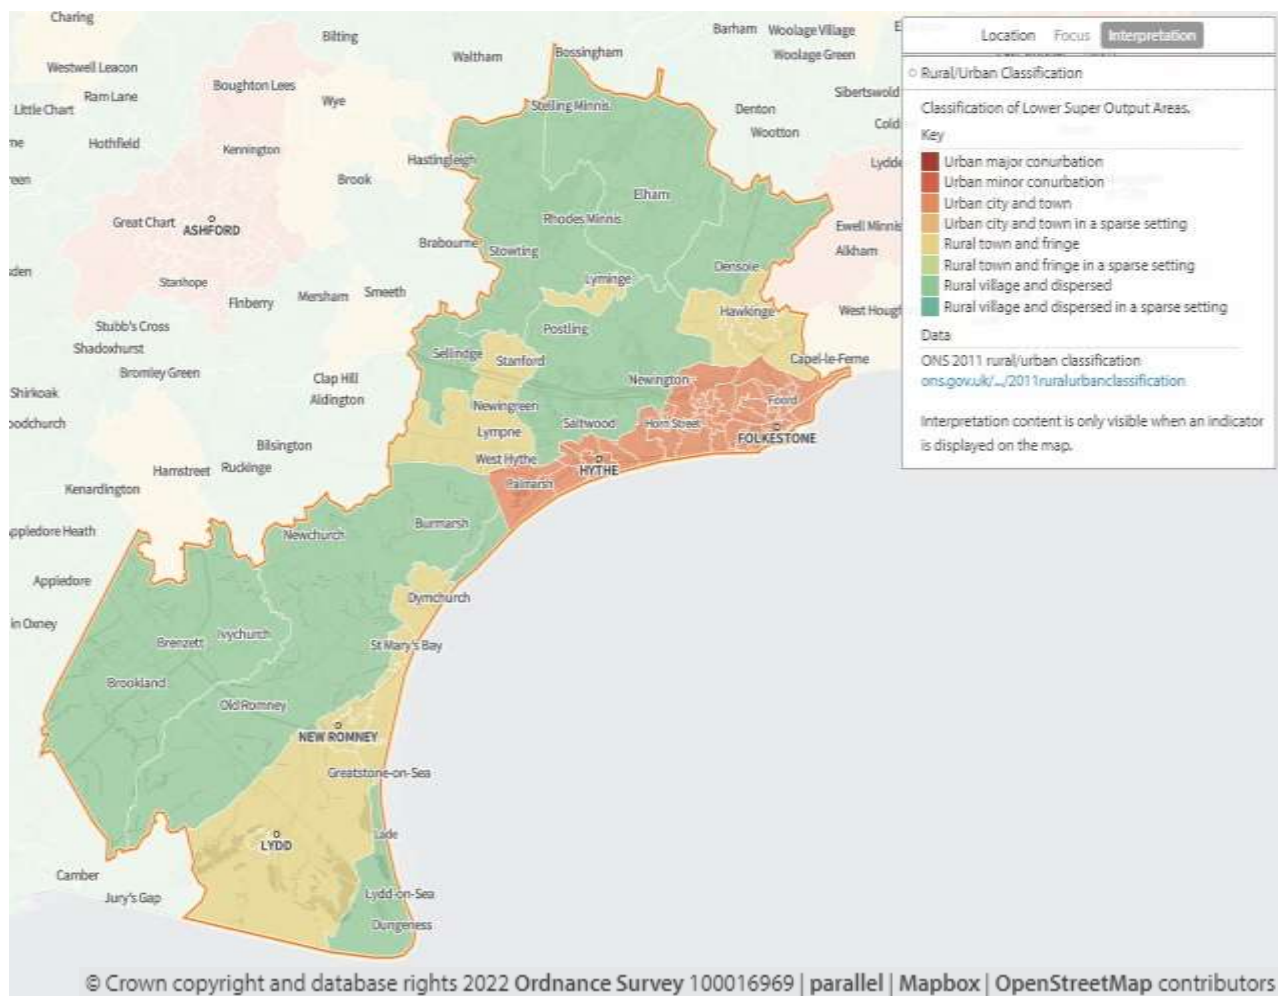

New medicine service not available at Eastry Pharmacy. Approximately 2,000 more people would be able to access a pharmacy by public transport or on foot within 20 minutes if Eastry Pharmacy provided the new medicine service.

12 Folkestone and Hythe Locality

1. Key Facts

Folkestone and Hythe is a local government district in the south-east of the county. It covers an area of 356.6 square km. Most of the population live in the coastal towns of Hythe and Folkestone. The north of the district consists of villages situated amongst farmland of the North Downs. The south features a coastal expanse of lower lying reclaimed land including Romney Marsh.

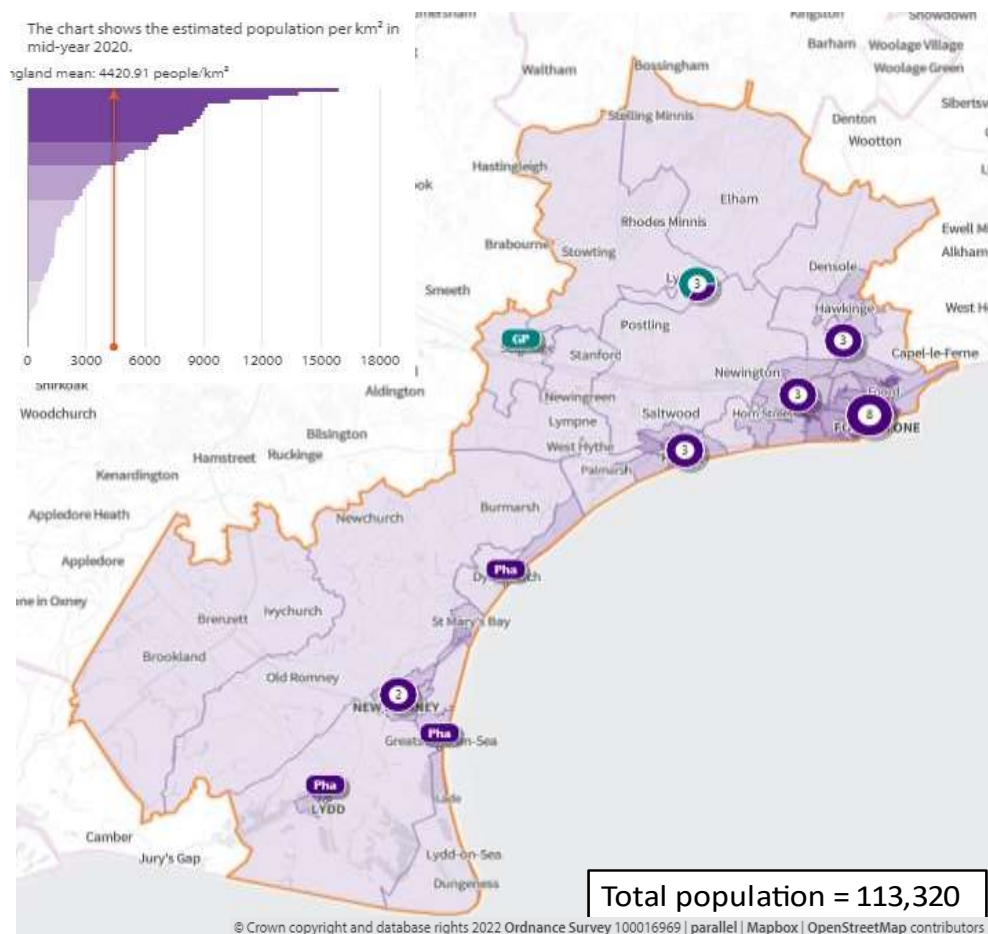

Map 86. Rural/urban classification of lower super output areas

Population

Map 87 shows the distribution of the population in the locality. The population density is greatest in the coastal towns of Folkestone, Hythe, Dymchurch and New Romney. Much of the locality is rural in nature. Sheep farming being the predominant form of agriculture in both the downs and marsh areas.

Map 87. Population density of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Home ownership

64% of houses are owned either outright (35%) or with a mortgage (29%). The average number of occupants per household is 2.2, lower than the Kent average of 2.4 ⁽²⁾.

Age distribution

The average age of Folkestone and Hythe district residents is 44.6, higher than the Kent average of 41.4 and the highest of all Kent districts ⁽²⁾. 25% of the population is over 65 (the highest proportion of all Kent districts) and 16.8% 0-15 ⁽²⁾. Life expectancy at birth is 78.1 for males and 82.6 for females ⁽⁴⁶⁾.

Economy

By industry, the top three employers in the Folkestone and Hythe district are wholesale and retail trade (13.3%), human health and social work activities (13.3%), and administrative and support service activities (10.7%) ⁽¹⁵⁾. By industrial grouping, tourism is the highest employer – 16% of employee jobs are in tourism compared to the Kent average of 10.5% ⁽¹⁵⁾. Folkestone and Hythe district has the highest proportion of jobs in tourism of all Kent districts ⁽¹⁵⁾.

Car ownership

24% of households in Folkestone and Hythe district do not have a car or van in the household ⁽¹³⁾.

Care Homes

There are a considerable number of care homes in the Folkestone and Hythe locality. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are 23 Community pharmacies providing dispensing services in the Folkestone and Hythe locality.

In addition, there are three dispensing GP practices in the locality.

Each pharmacy provides on average, services for 4,927 of the area's population. Figure 34 below shows how this compares with the other localities of Kent.

Figure 34. Number of people per pharmacy in each locality

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There is a small percentage of prescriptions generated in the area that are dispensed in neighbouring areas and an even smaller percentage that are generated outside the locality and dispensed by Folkestone and Hythe community pharmacies ⁽¹⁾.

- 1,277 outside prescribers dispense in Folkestone & Hythe
 - 3.2% of all items dispensed in Folkestone & Hythe
- 36 prescribers in Folkestone & Hythe
 - 96.7% of all items dispensed in Folkestone & Hythe
- 40 dispensers in Folkestone & Hythe
 - 93.2% of all items prescribed in Folkestone & Hythe
- 956 dispensers outside of Folkestone & Hythe
 - 6.8% of all items prescribed in Folkestone & Hythe

Pharmacy locality

Maps 1 and 2 above show the locality of the community pharmacies and GP dispensing practices.

Opening times

All are open Monday to Friday, with 21 opening on Saturdays only and 5 opening on Saturday and Sundays. This gives a weekly opening hours range of 44 to 106 hours and an average of 61 hours of opening each week. Twenty of these pharmacies open for at least one hour after 5pm on weekdays.

Table 35 below shows the core and supplementary hours of each pharmacy ⁽⁶⁵⁾.

Table 35. Opening times for all pharmacies

Pharmacy	Total core weekly hours	Total supplementary weekly hours	Total weekly hours	Max. hours open after 5pm at least 1 day/week	Saturday hours	Sunday Hours

- Sellinge Surgery TN25 6JX
- New Lyminge Surgery CT18 8NJ

Access to Community Pharmacies

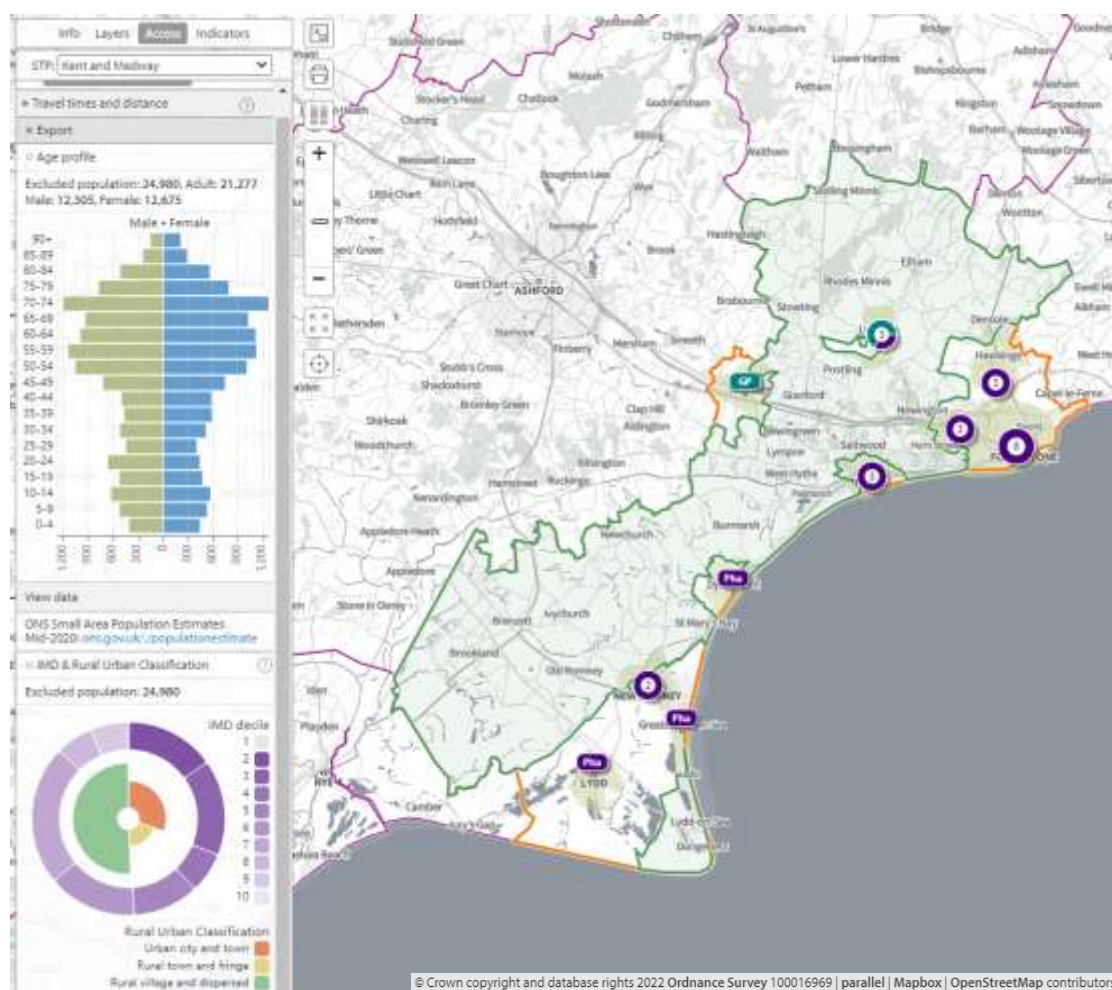

Travel times

In **Map 89**, below, access during core opening hours is shown. The olive-green shaded areas are within a 20-minute walk of a community pharmacy/dispensing GP practice. 24,980 (22%) people are not within a 20-minute walk.

2 pharmacies do not open on Saturday, but this does not affect the population within a 20-minute walk on a Saturday.

28.3% (7,922) of 65+ population is not within a 20 -minute walk of a community pharmacy or dispensing GP practice.

Map 89. Locations of community pharmacies/dispensing GPs and lower super output areas not within a 20-minute walk

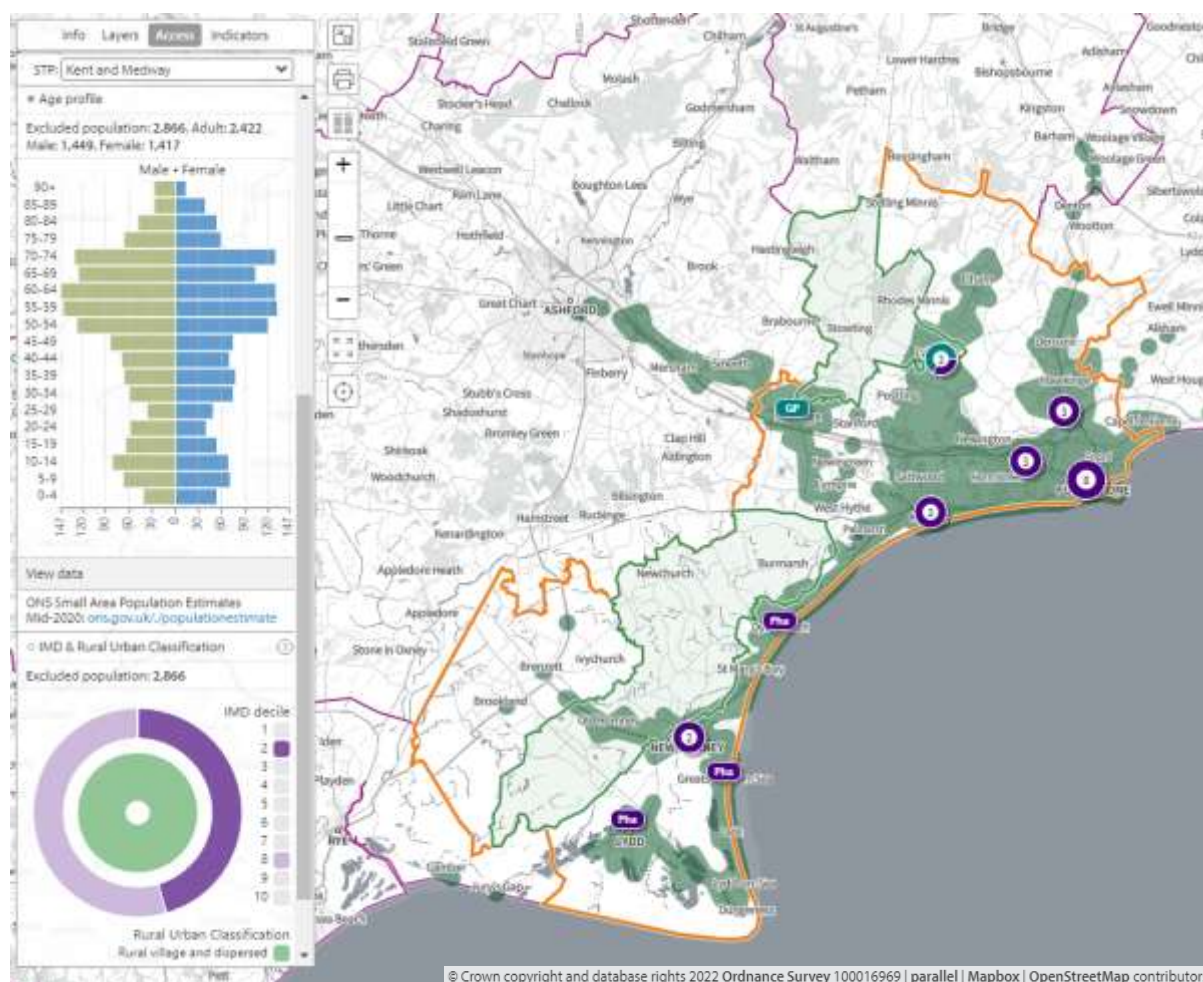

In **map 90**, below, the green-shaded areas are **within 20-minutes by public transport** of a community pharmacy/dispensing GP practice.

2,866 (2.5%) people are not within 20-minutes by public transport.

All pharmacies are open for at least 3 hours on a Saturday.

2.9% of 65+ population is not within 20 minutes by public transport of a community pharmacy or dispensing GP practice.

Map 90. Locations of community pharmacies/dispensing GPs and lower super output areas not within 20-minutes by public transport

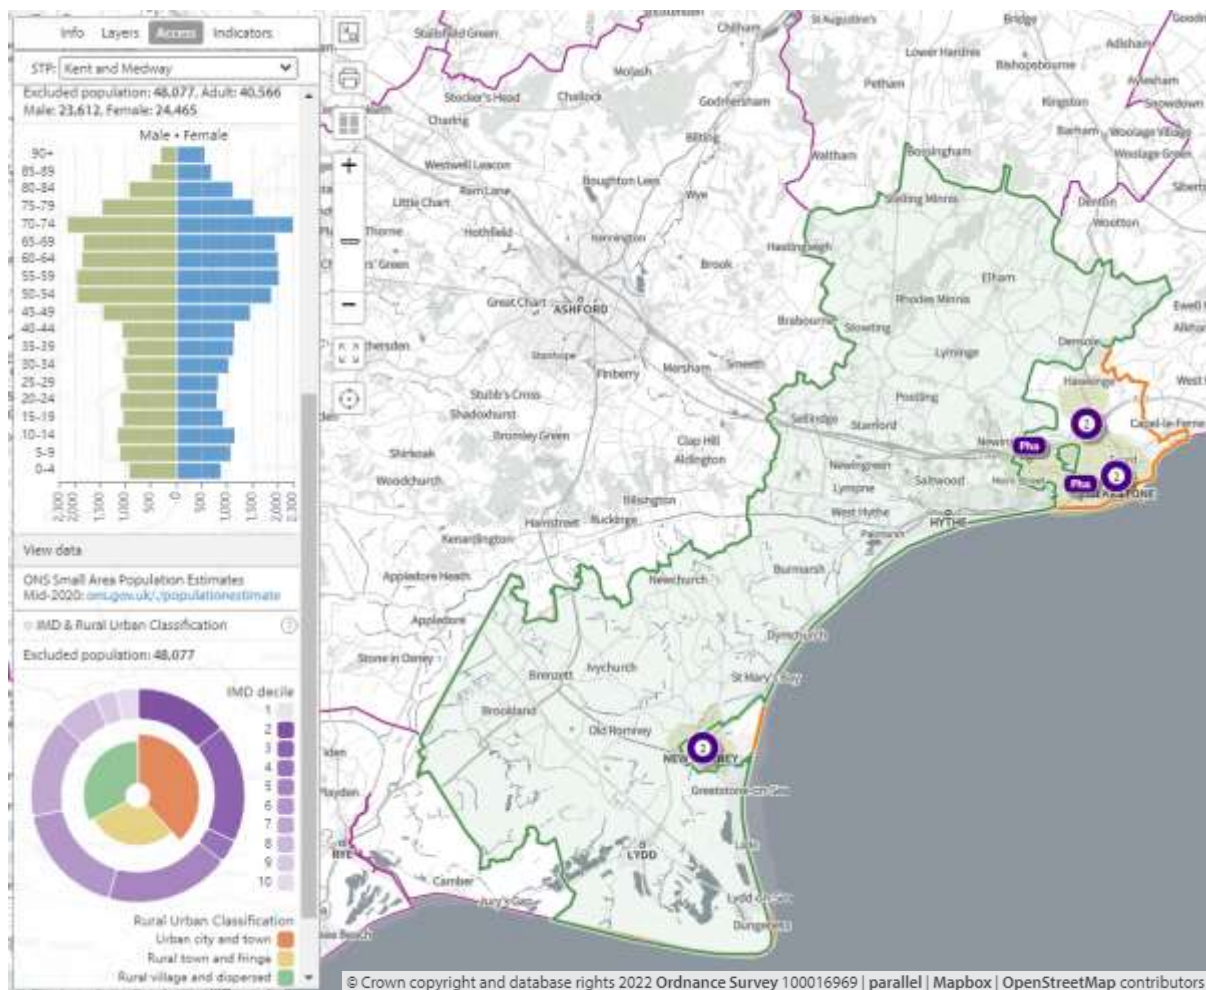

In **map 91**, below, the olive-green shaded areas are **within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays**.

48,077 (42.4%) people are not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays.

54.4% (15,252) of 65+ population is not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays.

Map 91. Locations of community pharmacies open until at least 7pm and lower super output areas not within a 20-minute walk

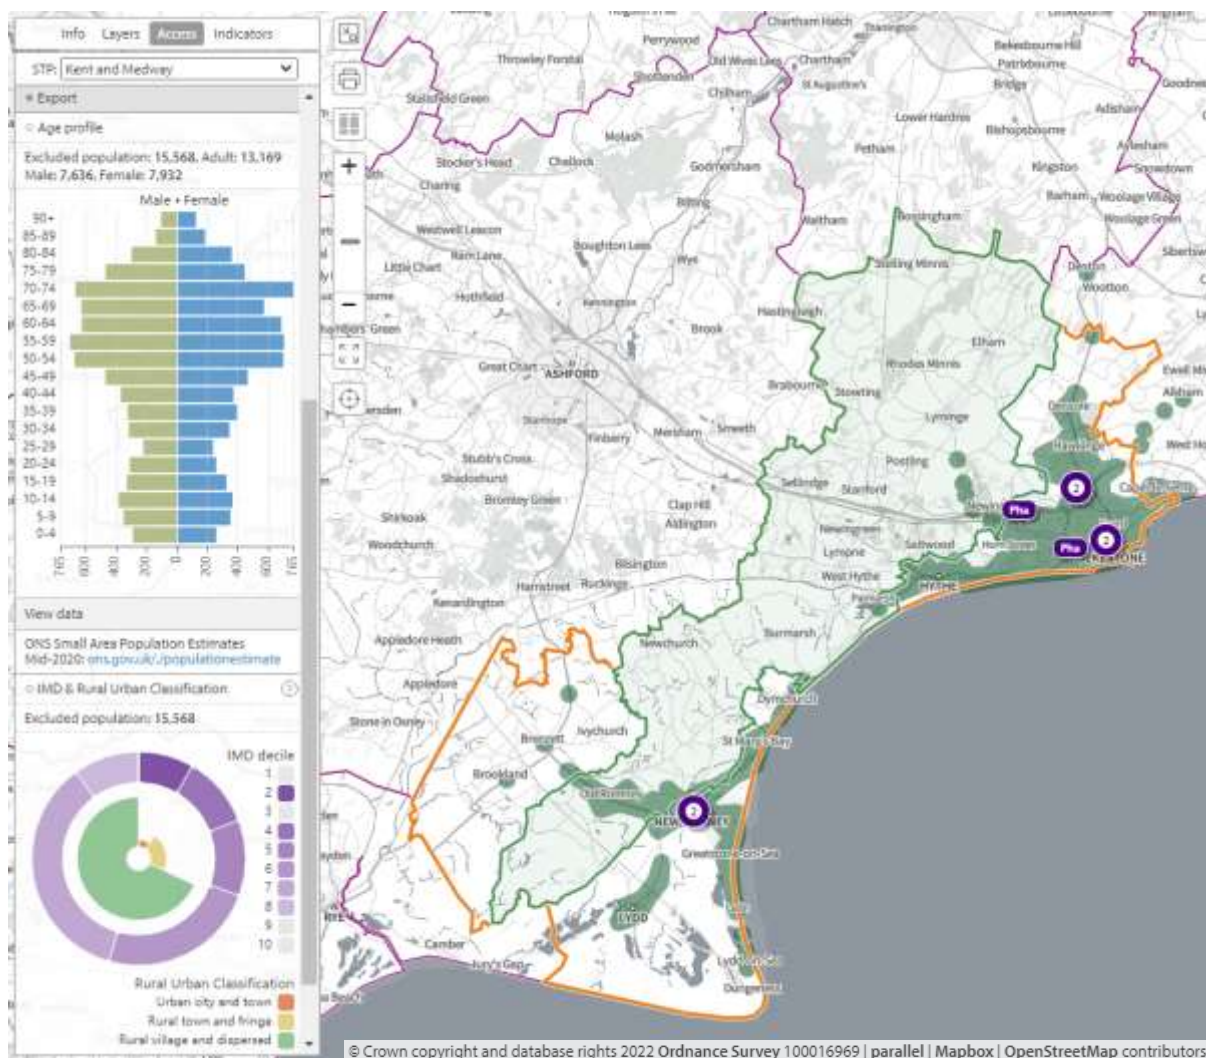

In **map 92**, below, the green shaded areas are within **20-minutes by public transport of a community pharmacy that opens until at least 7pm on weekdays**.

15,568 (13.7%) people are not within 20-minutes by public transport that until at least past 7pm on weekdays.

17% (4,752) of 65+ population is not within 20 minutes by public transport of a community pharmacy that opens until at least 7pm on weekdays.

Map 92. Locations of community pharmacies open until at least 7pm and lower super output areas not within 20-minutes by public transport on weekday evenings

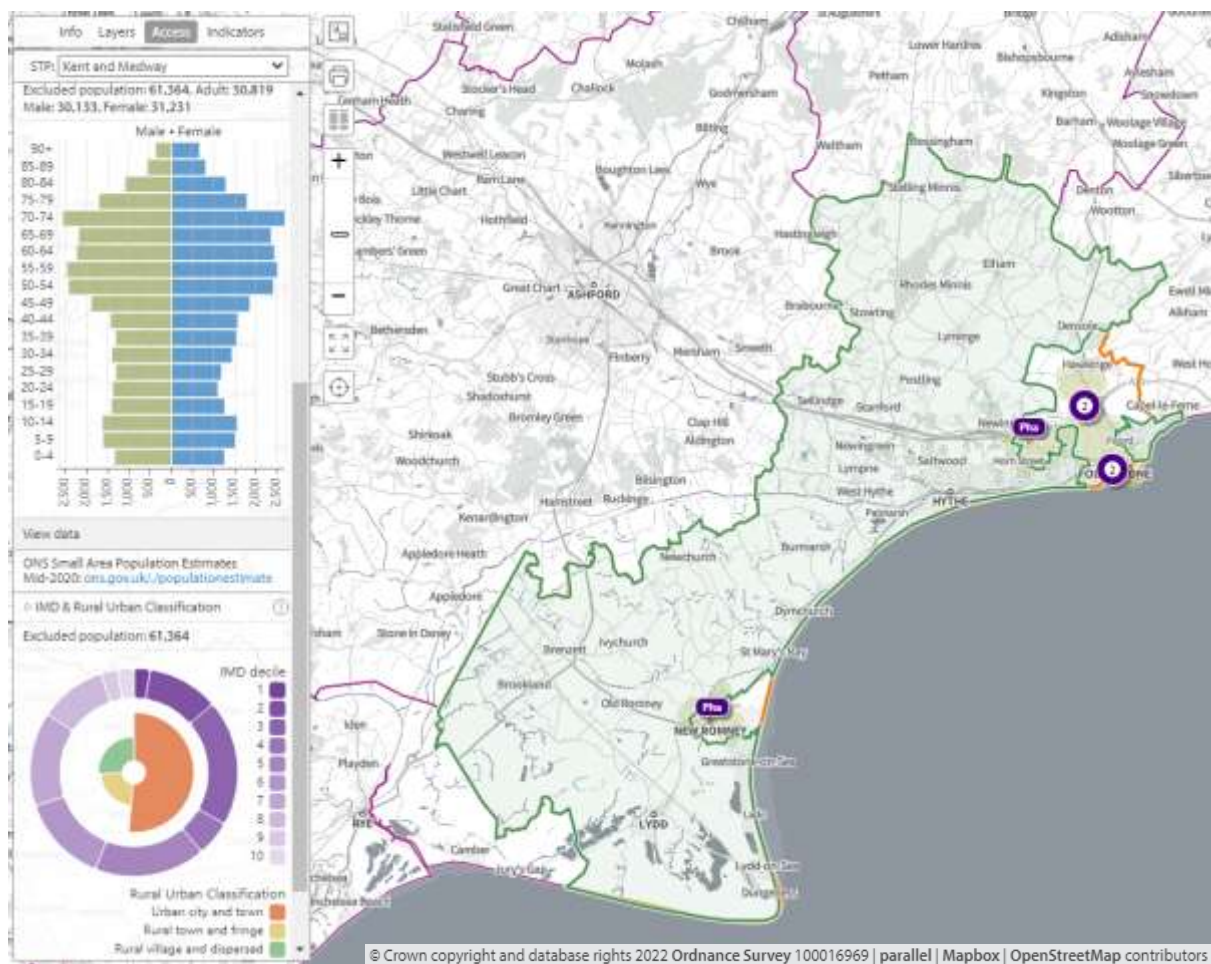

In **map 93**, below, the olive-green shaded areas are within a **20-minute walk of a community pharmacy that opens on Sundays**.

54.2% (61,364) of the population is not within a 20-minute walk of a community pharmacy that opens on Sundays.

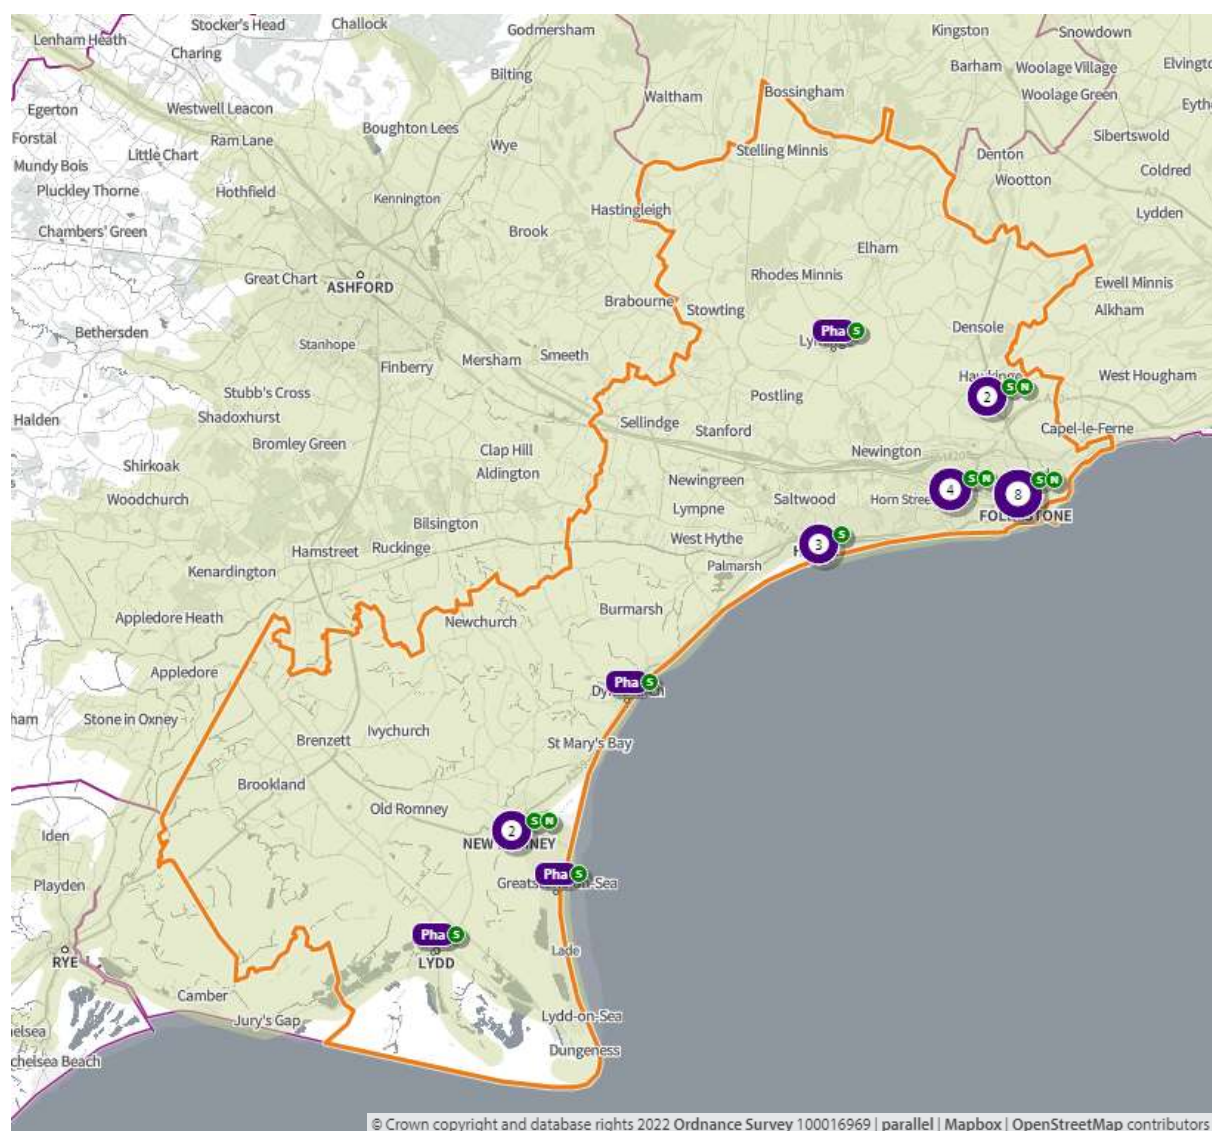

64.3% (18,012) of 65+ population is not within a 20-minute walk of a community pharmacy that opens on Sundays.

Map 93. Locations of community pharmacies open on Sundays and lower super output areas not within a 20-minute walk

In **map 94**, below, access during **core opening hours, Saturdays and Sundays** is shown. The olive-green shaded areas are **within a 20-minute drive** of a community pharmacy/dispensing GP practice. The entire population is within a 20-minute drive.

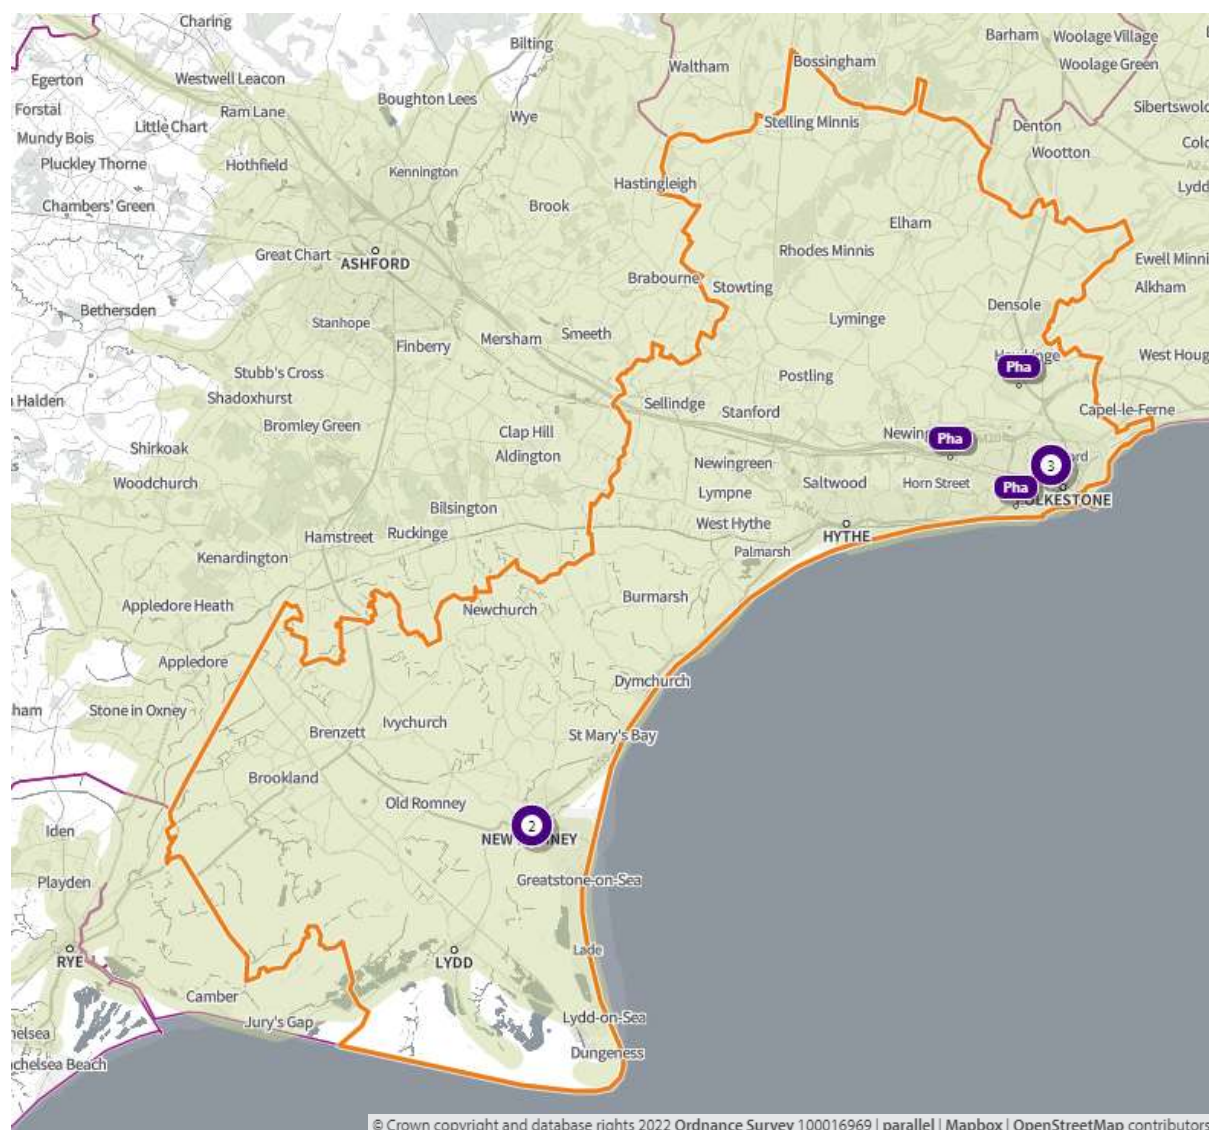

Map 94. Locations of community pharmacies and areas within 20-minutes by car

S = Saturday opening N = Sunday opening

In **map 95**, below, the green shaded areas are **within 20-minutes by car** of a community pharmacy that opens until **at least 7pm on weekdays**. The entire population is within a 20-minute drive.

Map 44. Locations of community pharmacies open until at least 7pm on weekdays and areas within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The information below indicates the number of prescriptions dispensed in and outside of the locality.

- 2.32 million items prescribed in Folkestone
 - 2.16 million items dispensed in Folkestone
 - 1.9 million (88%) via Electronic Prescription Service
 - 158,403 (6.8%) dispensed outside of the district
 - 89,000 distance selling
 - 23,000 Ashford
 - 14,000 Canterbury
 - 12,000 Dover
- 2.23 million items dispensed in Folkestone
 - 2.04 million items dispensed by community pharmacies in Folkestone
 - 194,000 dispensed by 16 GP practices:
 - Sellindge Surgery – 104,515
 - New Lyminge Surgery – 37,768
 - Church Road Surgery – 16,672
 - 72,184 items prescribed outside borough i.e. more going out than coming in

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling premises
- Which are located near to where they work, shop or visit for leisure or other purposes.

Considering this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy and do access pharmacy services within the locality.

4. Other relevant services: current provision

The following advanced services were delivered by pharmacies in the Folkestone and Hythe locality in 2020/21.

Table 36. Number of pharmacies providing advanced services

Advanced service name	No. of pharmacies
New Medicine Service	22
Appliance Use Review	0
Hypertension Service [‡]	22
Stoma Appliance Customisation	4
Community Pharmacist Consultation Service (CPCS) [‡]	23
Hepatitis C Antibody Testing Service	0
Seasonal Influenza Vaccination Advances Service	22
*Covid Vaccination Service	1
*Covid Home Delivery Service	20
*Covid lateral flow device distribution	23

*Specific to the Covid-19 pandemic

[‡]Services introduced during the year of study

Please note that three services were specific to the Covid-19 pandemic (*Covid Vaccination, *Home Delivery, and *lateral flow device distribution) and that others were new services introduced within the year (CPCS and Hypertension service). There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- Hawkinge Health Centre is open 8.30am – 1pm on Saturdays
- Lyminge Surgery is open 6.30pm – 8pm on Thursdays
- Manor Clinic is open until 7pm on weekdays and 8.30am – 12.30pm on Saturdays
- Martello Health Centre is open until 8pm on Mondays
- New Lyminge Surgery is open until 8pm on Tuesdays
- Oak Hall Surgery is open 7pm on Tuesdays, Wednesdays and Fridays
- Oaklands Health Centre is open until 8pm on Mondays and Tuesdays
- Sandgate Road Surgery is open 9am – 1pm on Saturdays

There is a minor Injury unit situated in the Royal Victoria Hospital in Folkestone. It is open 8am to 8pm every day of the year.

There are also drug and alcohol services, Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality.

The number of prescriptions from these services is shown below:

- 13 pharmacies dispensed a total of 4,344 (mean = 334, range = 1-2,051) items from drug and alcohol services
- 24* pharmacies and 2 GP practices dispensed a total of 2,522 (mean = 97, range = 2-295) items from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- 20 pharmacies dispensed a total of 102 items (mean = 5, range = 1-17) from KCHFT
- 24* pharmacies and 2 GP practices dispensed a total of 15,965 items (mean = 614, range = 42-1,217) from Kent and Medway hospitals

6. Choice with regard to obtaining pharmaceutical services

As can be seen from sections 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

Figure 35 below shows the predicted increase in the population of the Folkestone and Hythe locality continuing to grow over the lifetime of this PNA. By 2025 it is estimated that each pharmacy will serve a population of 5,287.

Figure 35 Folkestone & Hythe population forecast

 **1 pharmacy per 5,287 people in 2025**

This is an increase of 360 people per pharmacy from 2022. As stated in the community pharmacy contractors survey 16 pharmacies in the Folkestone and Hythe locality do have capacity to increase their services and 1 stated it did not. A total of 17 out of 23 pharmacies responded to the survey.

Table 37. Proposed housing developments – number of dwellings per year at each development

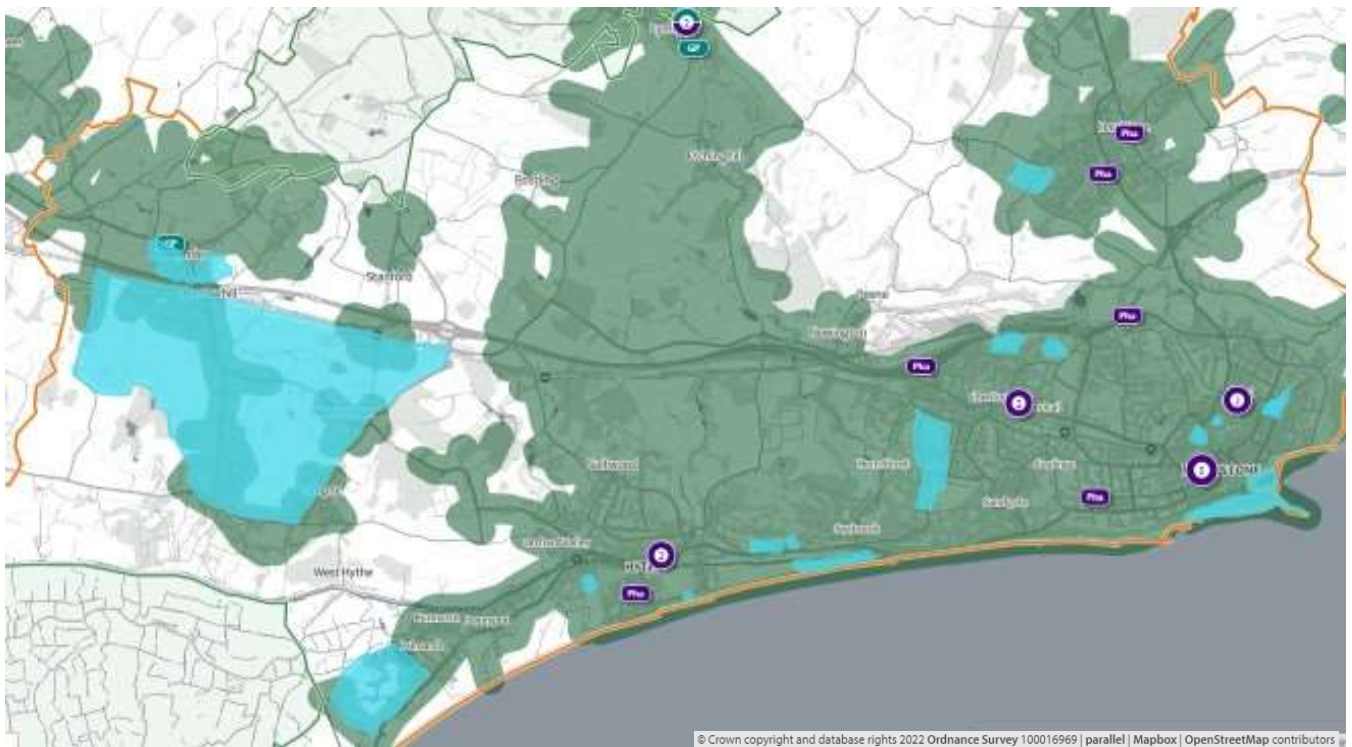

Site Name	20/21	21/22	22/23	23/24	24/25	25/26	26/27	27/28	28/29	29/30	2025	2030

17. East Station Goods Yard, Folkestone	-	-	-	20	21	-	-	-	-	-	41	41

In the following maps: access within 20 minutes by walking, public transport and driving from these new developments to community pharmacies is shown with access on different days and times of the week.

Map 97. Location of community pharmacies/dispensing GPs, proposed housing developments, and areas within a 20 minute walk of a community pharmacy/dispensing GP

Map 98. Location of community pharmacies, proposed housing developments, and areas within 20 minutes of a community pharmacy by public transport on weekday mornings

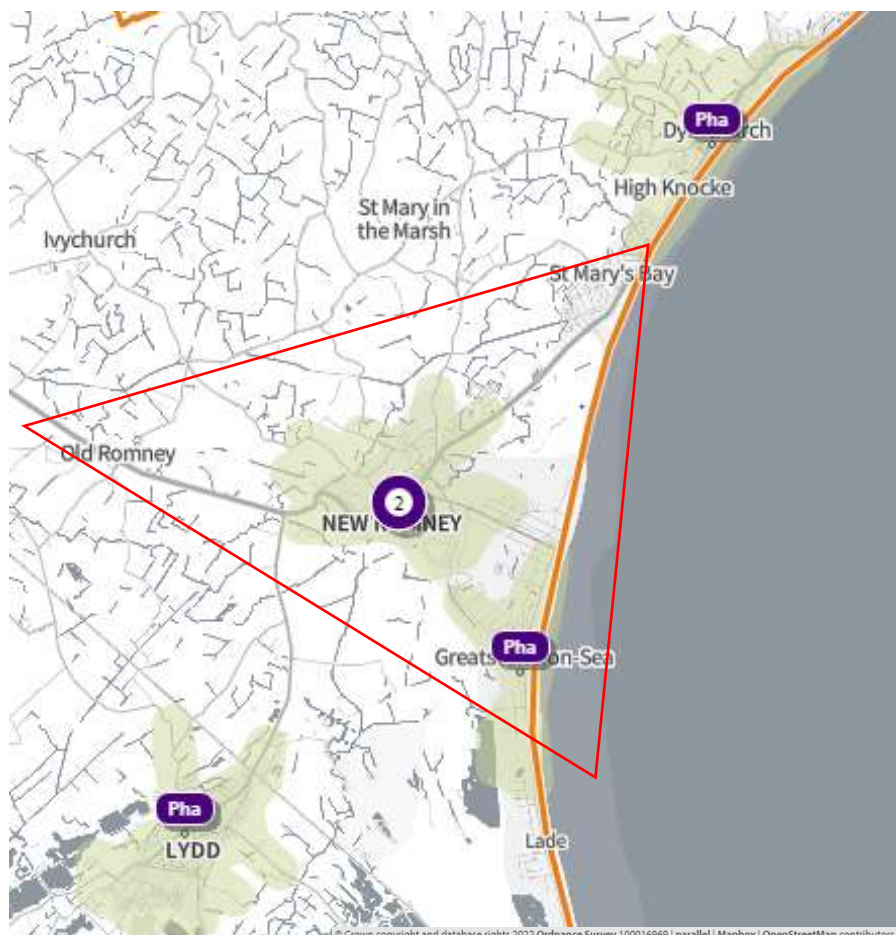

Map 99. Location of community pharmacies, proposed housing developments, and areas within a 20 minute walk of a community pharmacy that is open until at least 7pm

Map 101. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open on Sundays

There is additional significant housing development in the area highlighted by the red triangle. Around 450 dwellings are proposed in the area marked by the red triangle.

8. Necessary services: - Gaps in provision

The developments at (1) Otterpool Park, (5) Main Road, Sellenge and (6) Sellenge phase 2 site B do not have access to a pharmacy within 20 minutes walking or public transport. By 2025/26 it is estimated that the population will have grown by 2,063.

The Otterpool development is predicted to see an increase in population of 1600 by 2025/26, if building goes ahead as predicted. At present there is no access by walking or public transport to a community pharmacy at any day of the week or time.

9. Improvements or better access: Gaps in provision

There will be a future need for a pharmacy providing necessary (essential) services and a selection of advanced services pertinent to the population in 2025/26, if the three developments occur as planned. It is noted that there is a dispensing GP practice in Sellindge on the edge of the proposed Sellindge developments. Those patients that live over 1.6km from a community pharmacy and are registered with the practice would be eligible to have their prescriptions dispensed by the practice.

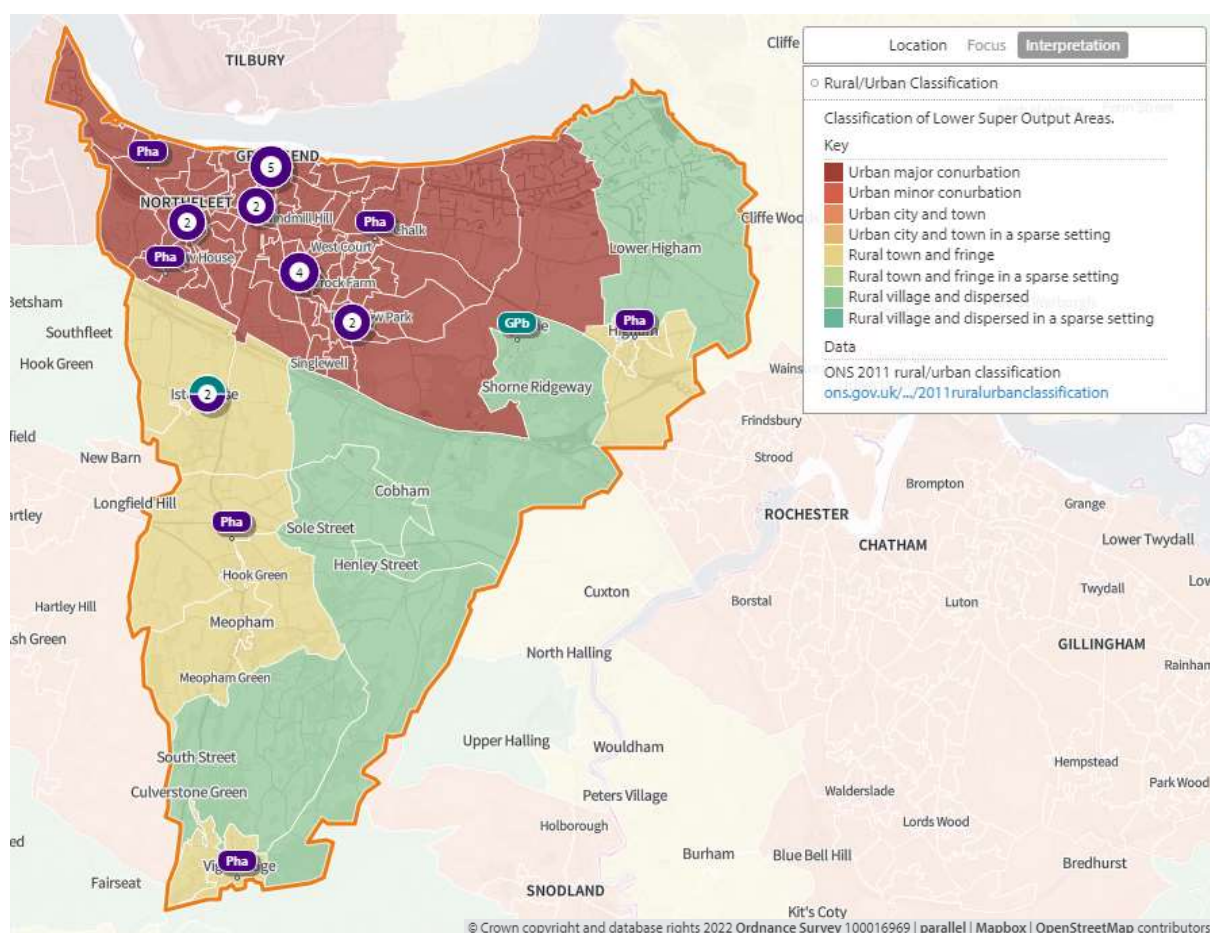

13 Gravesham Council Locality

PNA Gravesham Locality

1. Key Facts

Gravesham is a local government district in the north-west of the county. It covers an area of 99 square km. Most of the population live in the Thames riverside town of Gravesend and within its urban sprawl. Map 102 shows that approximately one-third of the district is classified as urban, the remainder of the district is dotted with villages. The villages of Vigo and Higham are relatively densely populated amongst the more rural areas of the district.

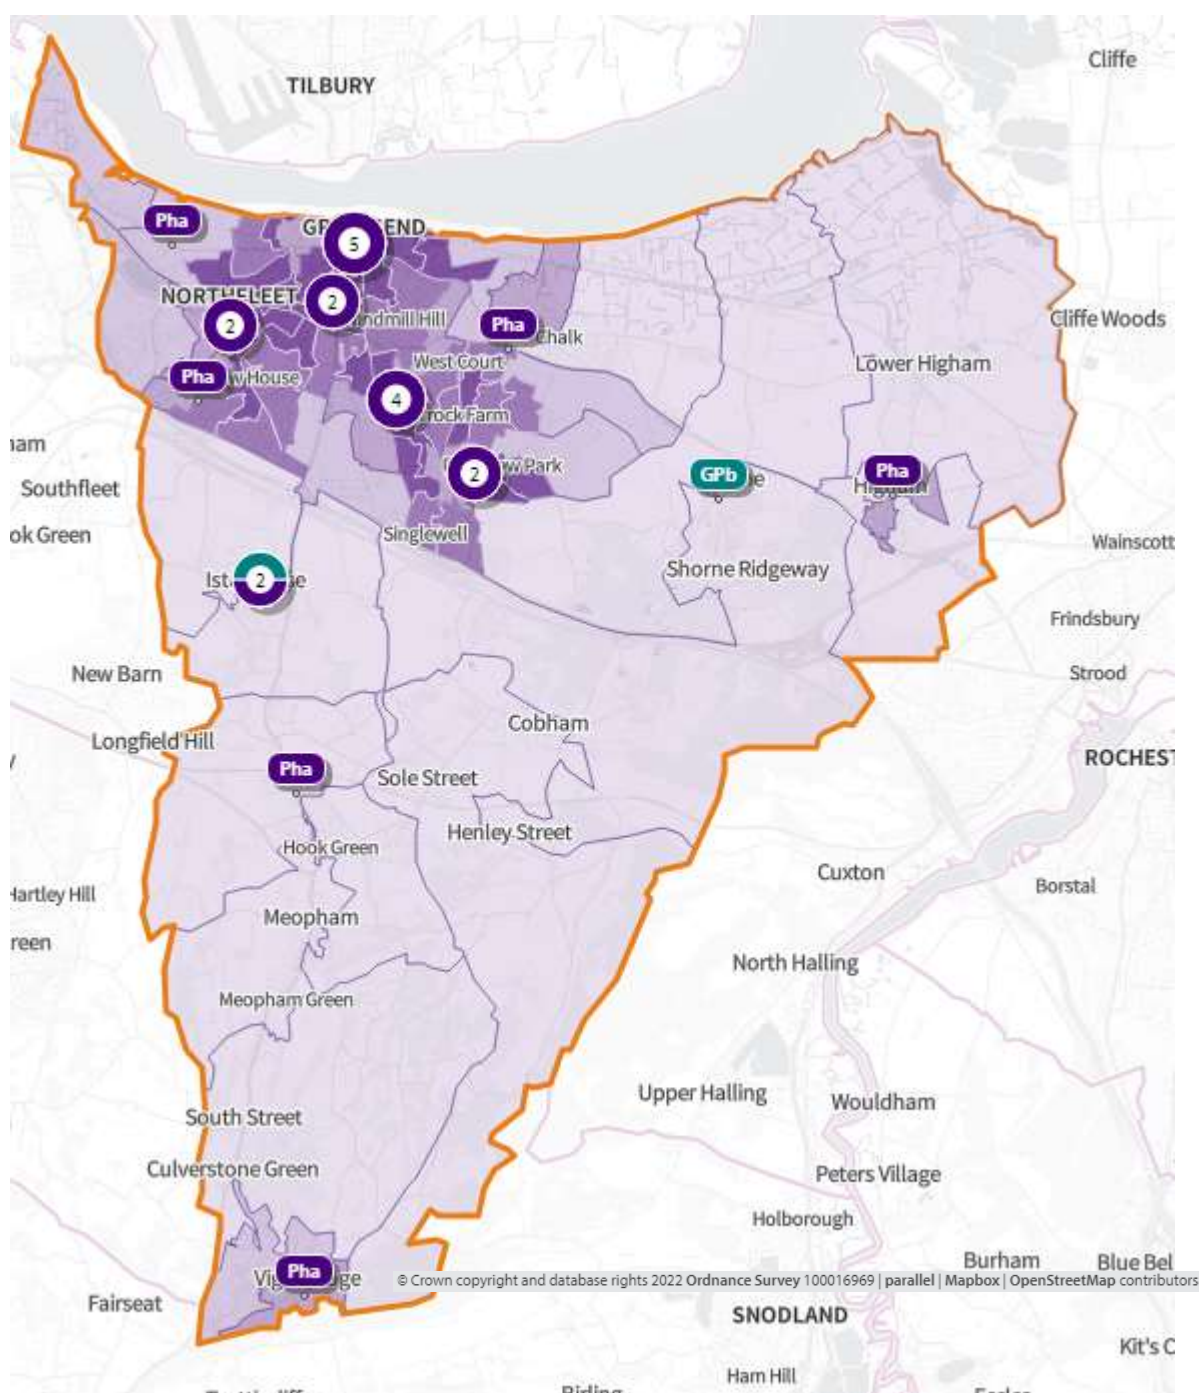

Map 102. Rural/urban classification of lower super output areas

Population

Map 103 below shows the distribution of the population in the locality. Gravesend has a population of 106,890. The population density is greatest in the town of Gravesend and surrounding area. This highly densely populated area covers a large area of the district, approximately one quarter.

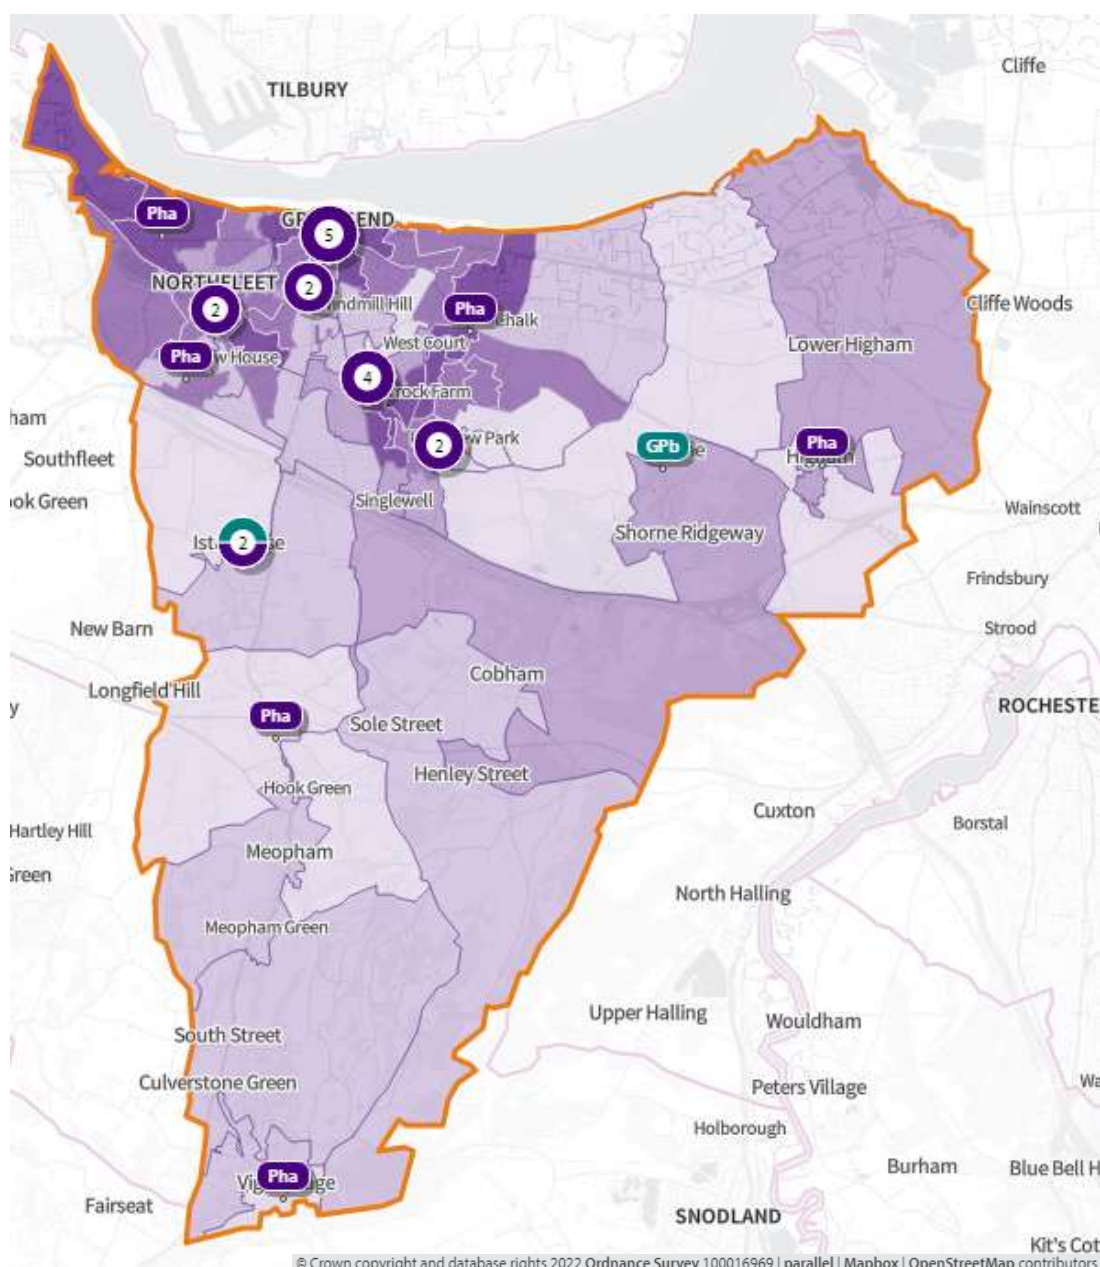

Map 103. Population density of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Deprivation

Map 104 below shows the areas of deprivation in the Gravesend locality. Gravesend is ranked 5th out of Kent's 12 districts for deprivation. Deprivation is relatively low or average across the majority of the districts area, however there is a concentration of higher deprivation in the densely populated areas in and around Gravesend. Two LSOAs are within the top 10% most deprived areas in England. Employment rates are third lowest in Kent ⁽⁶³⁾ but educational attainment is slightly higher than the Kent average ⁽⁶⁴⁾.

Map 104. Deprivation of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Language

English is the main language for all people aged 16 or over in 89.6% of households in the district. 5% of households have no people with English as the main language, this is the highest of all Kent districts ⁽²⁾.

Home ownership

65% of houses are owned either outright (31%) or with a mortgage (34%). The average number of occupants per household is 2.5, slightly higher than the Kent average of 2.4 ⁽²⁾.

Age Distribution

The average age of Gravesham district residents is 39.6, lower than the Kent average of 41.4 and second lowest of all Kent districts. 17.4% of the population is over 65 (the lowest proportion of 65+ of all Kent districts) and 21.5% 0-15 ⁽²⁾. Life expectancy at birth is 78.2 for males and 82.2 for females ⁽⁴⁶⁾.

Economy

By industry, the top three employers in the Gravesham district are administrative and support service activities (14.6%), wholesale and retail trade (13.8%) and education (11.5%) ⁽¹⁵⁾. Gravesham has a much higher proportion of employees working in administrative and support service activities compared to the Kent average (14.6% vs 8.6%) ⁽¹⁵⁾.

Car ownership

23% of households in Gravesham district do not have a car or van in the household ⁽¹³⁾.

Care Homes

There are a considerable number of care homes in the Gravesham locality. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services.

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are 22 Community pharmacies providing dispensing services in the Gravesham locality. That is one pharmacy per 4,858 head of population. Figure 36 below shows how this compares with the other localities of Kent.

Figure 36 Number of people per pharmacy in each locality

In addition, there are 2 dispensing GP practices in the locality.

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There are 13.8% of prescriptions generated in the area that are dispensed in neighbouring areas and a slightly smaller percentage that are generated outside the locality and dispensed by Gravesham locality community pharmacies.

- 943 outside prescribers dispense in Gravesham
 - 10% of all items dispensed in Gravesham
- 18 prescribers in Gravesham
 - 90% of all items dispensed in Gravesham
- 32 dispensers in Gravesham
 - 86.2% of all items prescribed in Gravesham
- 1,137 dispensers outside of Gravesham
 - 13.8% of all items prescribed in Gravesham

Pharmacy locality: Maps 1 and 2 above show the locality of the community pharmacies and GP dispensing practices.

Opening times

All pharmacies are open Monday to Friday. 18 of the pharmacies open at least one hour after 17:00 on weekdays. 17 are open on Saturdays and 3 open Saturday and Sunday. The weekly opening hours range from 40 to 100, with the average opening hours being 52 each week.

Table 38 below show the core and supplementary hours of each pharmacy ⁽⁶⁵⁾.

Table 38. Opening times for all pharmacies

Pharmacy	Total core weekly hours	Total supplementary weekly hours	Total weekly hours	Max. hours open after 5pm at least 1 day/week	Saturday hours	Sunday Hours

The dispensing GP practices Gravesham locality are:

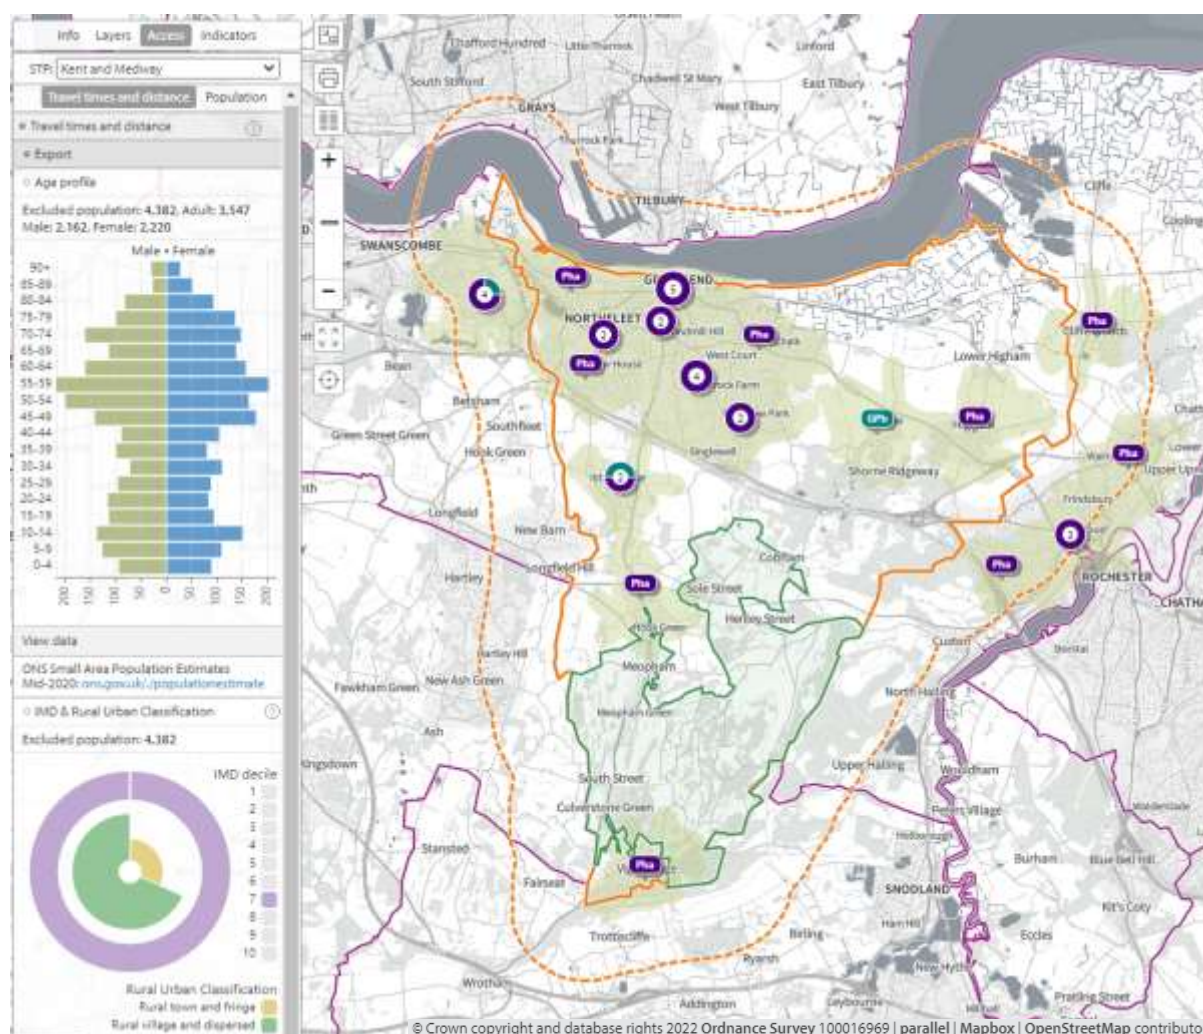

- Instead Rise surgery DA13 9BL
- Shorne Village Surgery DA12 3DY

Travel times

Access during core opening times is shown in the maps (4-7) below.

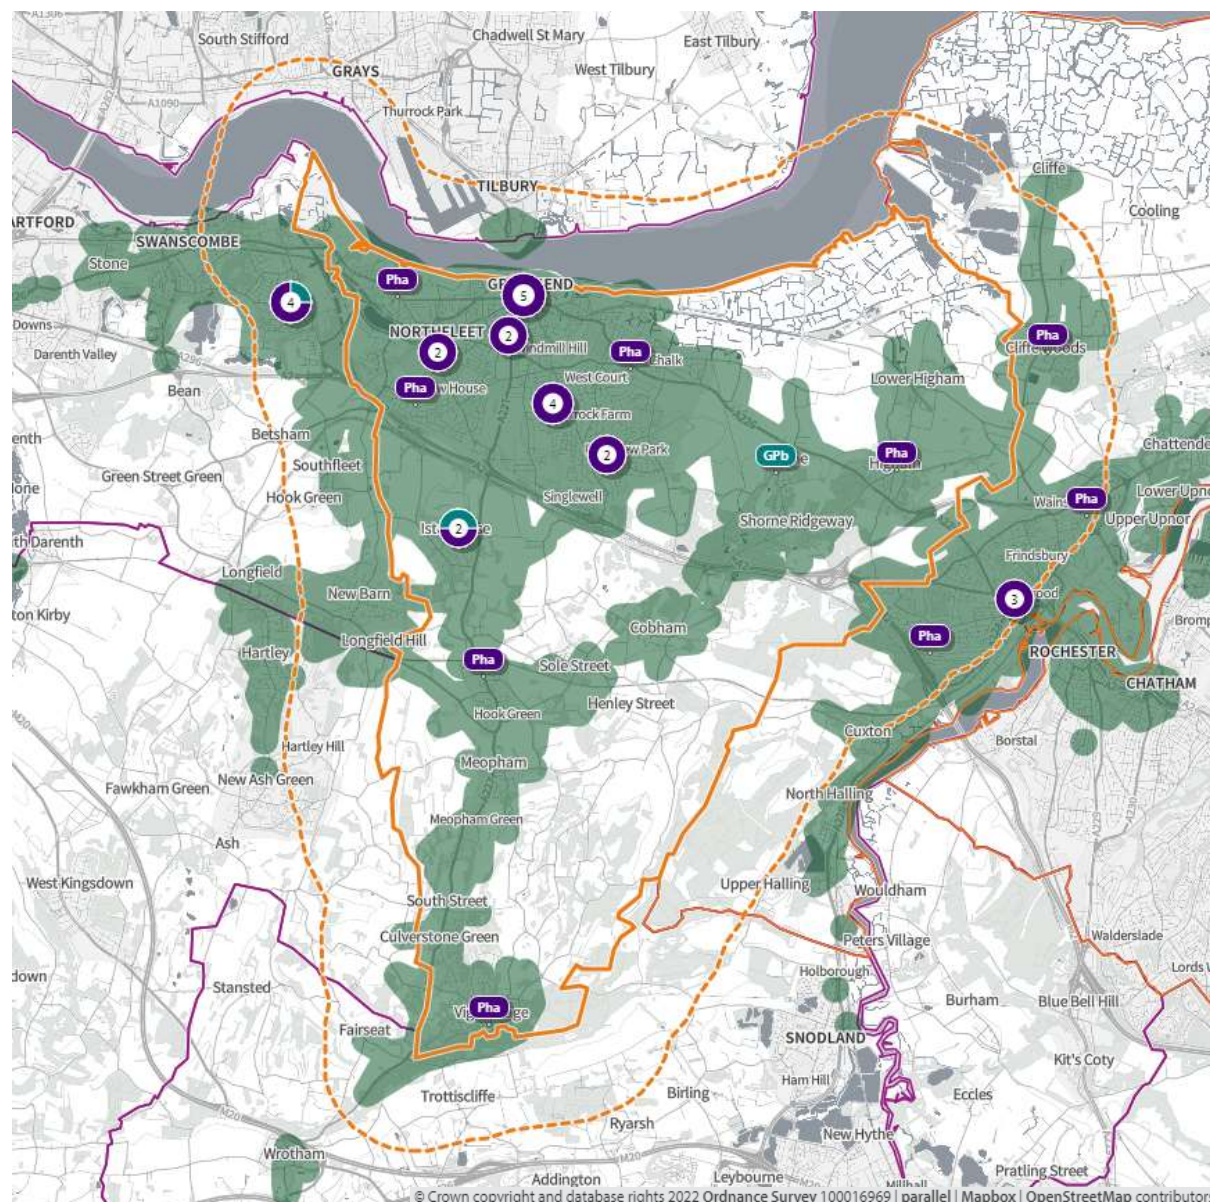

In **map 105**, below, the olive-green shaded areas are within a 20-minute walk of a community pharmacy/dispensing GP practice. 4,382 (4.1%) people are not within a 20-minute walk. 5 pharmacies do not open on Saturdays but this does not affect the population within a 20-minute walk on a Saturday. 6% (1,105) of 65+ population is not within a 20-minute walk of a community pharmacy or dispensing GP practice

Map 105. Locations of community pharmacies/dispensing GPs and lower super output areas not within a 20-minute walk

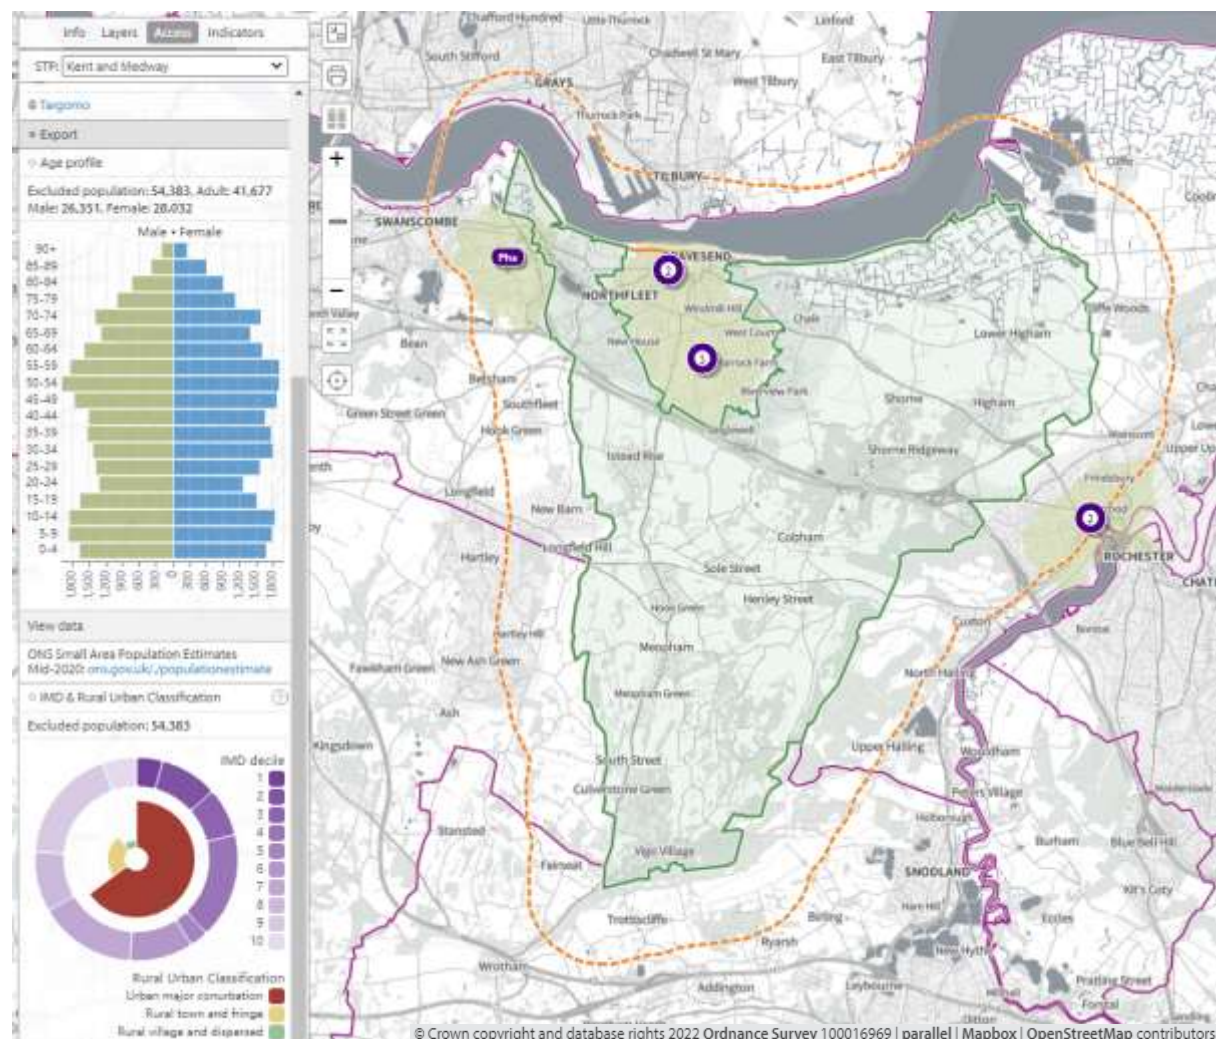

In **map 106**, below, the green shaded areas are within 20-minutes by public transport of a community pharmacy/dispensing GP practice. The entire population (by LSOA) is within 20-minutes by public transport of a community pharmacy/dispensing GP practice.

Map 106. Locations of community pharmacies/dispensing GPs and areas within 20-minutes by public transport on weekday mornings

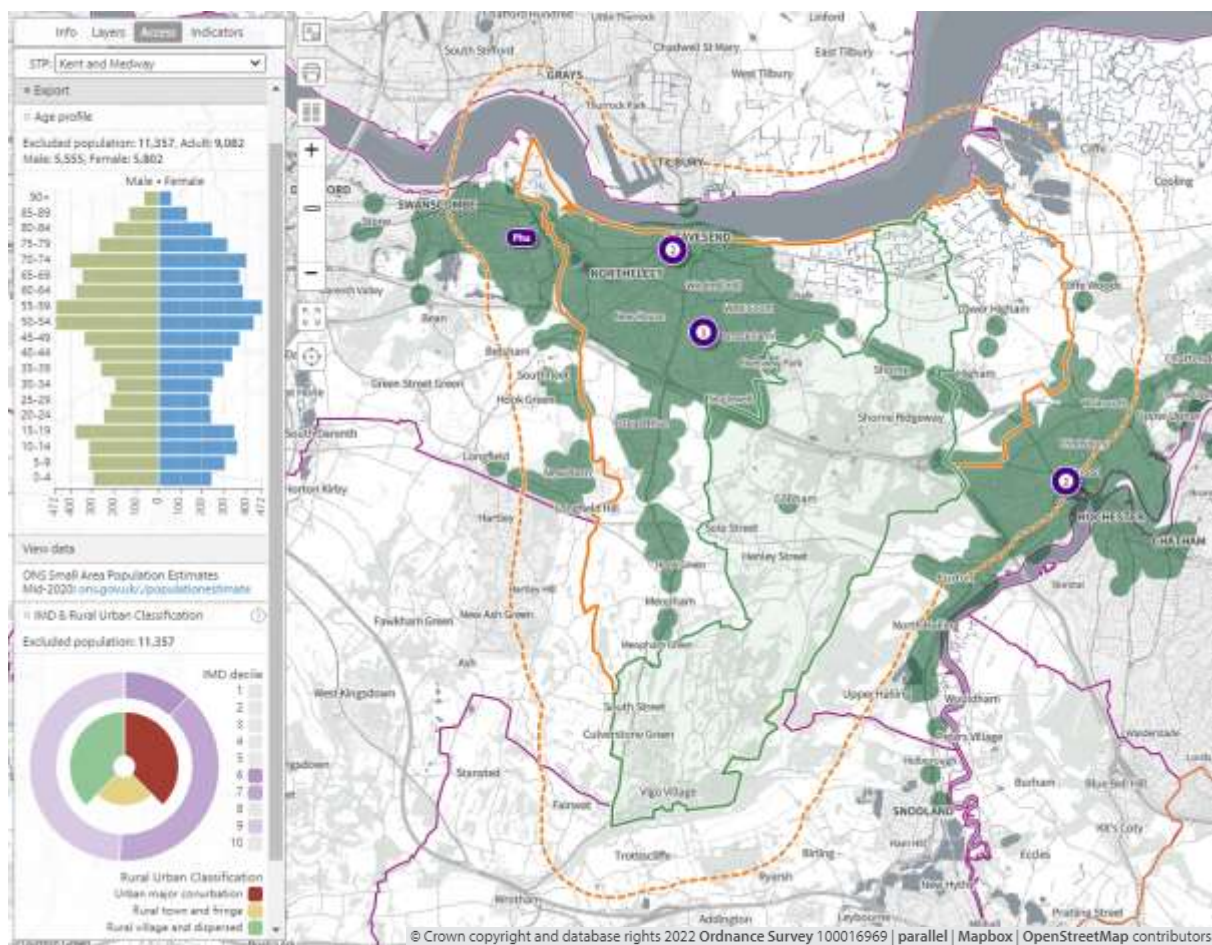

In **map 107, below**, the olive-green shaded areas are within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays. 54,383 (48%) people are not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays. 38.7% (10,834) of 65+ population is not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays.

Map 107. Locations of community pharmacies open until at least 7pm and lower super output areas not within a 20-minute walk

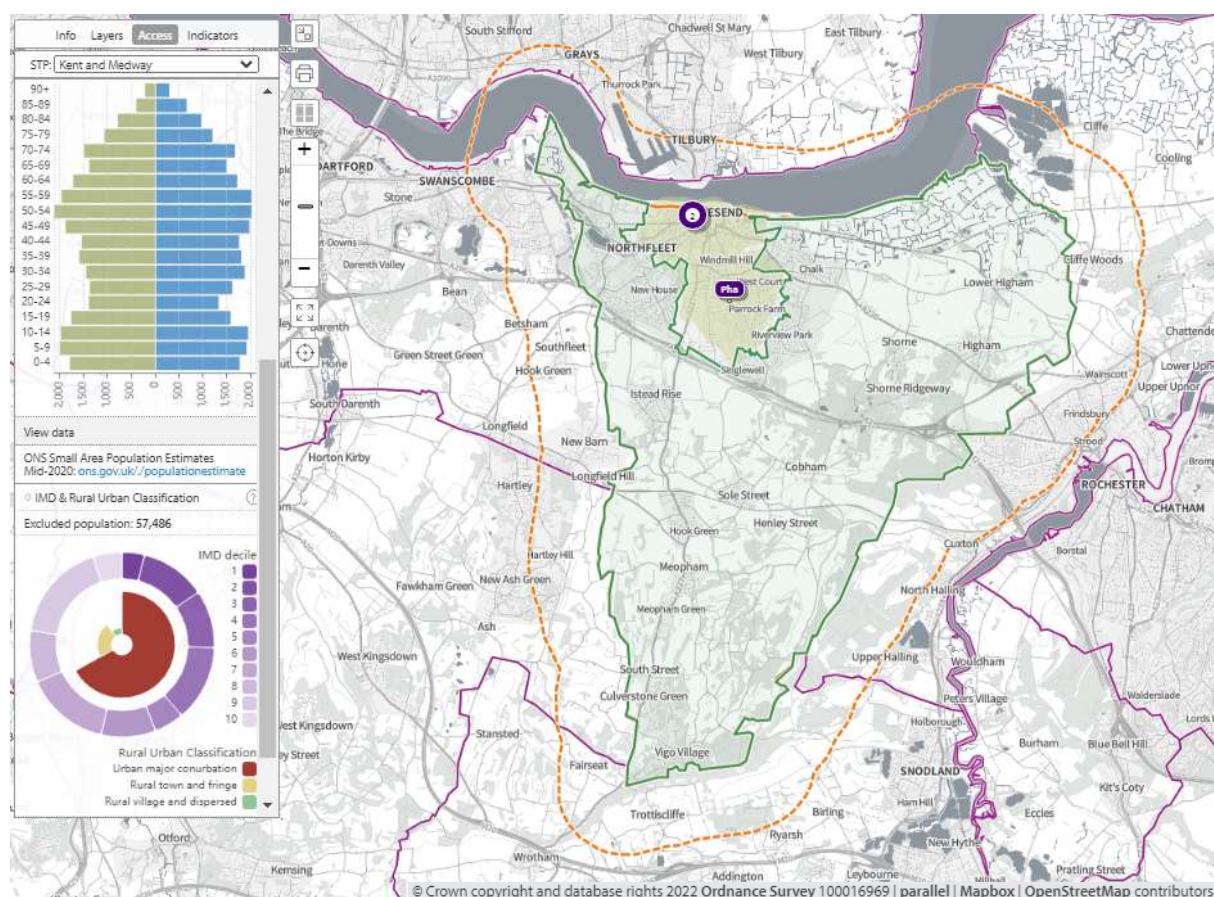

In **map 108**, below, the green shaded areas are within 20-minutes by public transport of a community pharmacy that opens past 7pm on weekdays. 11,357 (10.6%) people are not within 20-minutes by public transport that opens past 7pm on weekdays. 15.8% (2,935) of 65+ population is not within 20 minutes by public transport of a community pharmacy that opens past 7pm on weekdays.

Map 108. Locations of community pharmacies open until at least 7pm and lower super output areas not within 20-minutes by public transport on weekday evenings

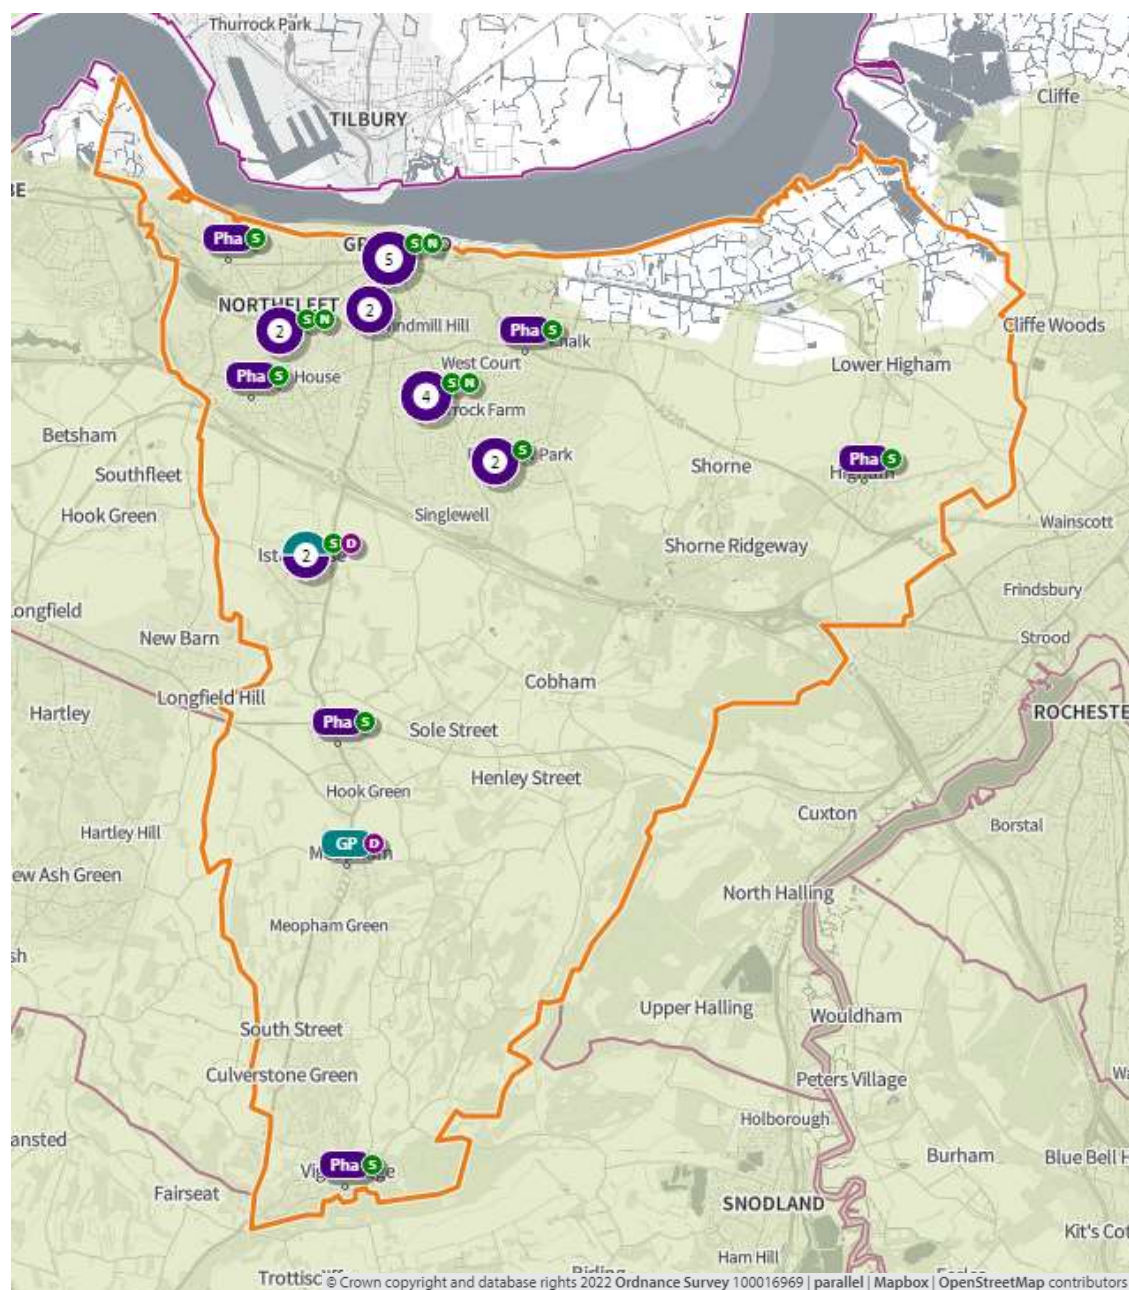

In **map 109**, below, the olive-green shaded areas are within a 20-minute walk of a community pharmacy that opens on Sundays. 53.8% (57,486) of the population is not within a 20-minute walk of a community pharmacy that opens on Sundays. 62.6% (11,618) of 65+ population is not within a 20-minute walk of a community pharmacy that opens on Sundays

Map 109. Locations of community pharmacies open on Sundays and lower super output areas not within a 20-minute walk

In **map 111** below, access during **core opening hours, Saturdays and Sundays** is shown. The olive-green shaded areas are within a **20-minute drive** of a community pharmacy/dispensing GP practice. The entire population is within a 20-minute drive.

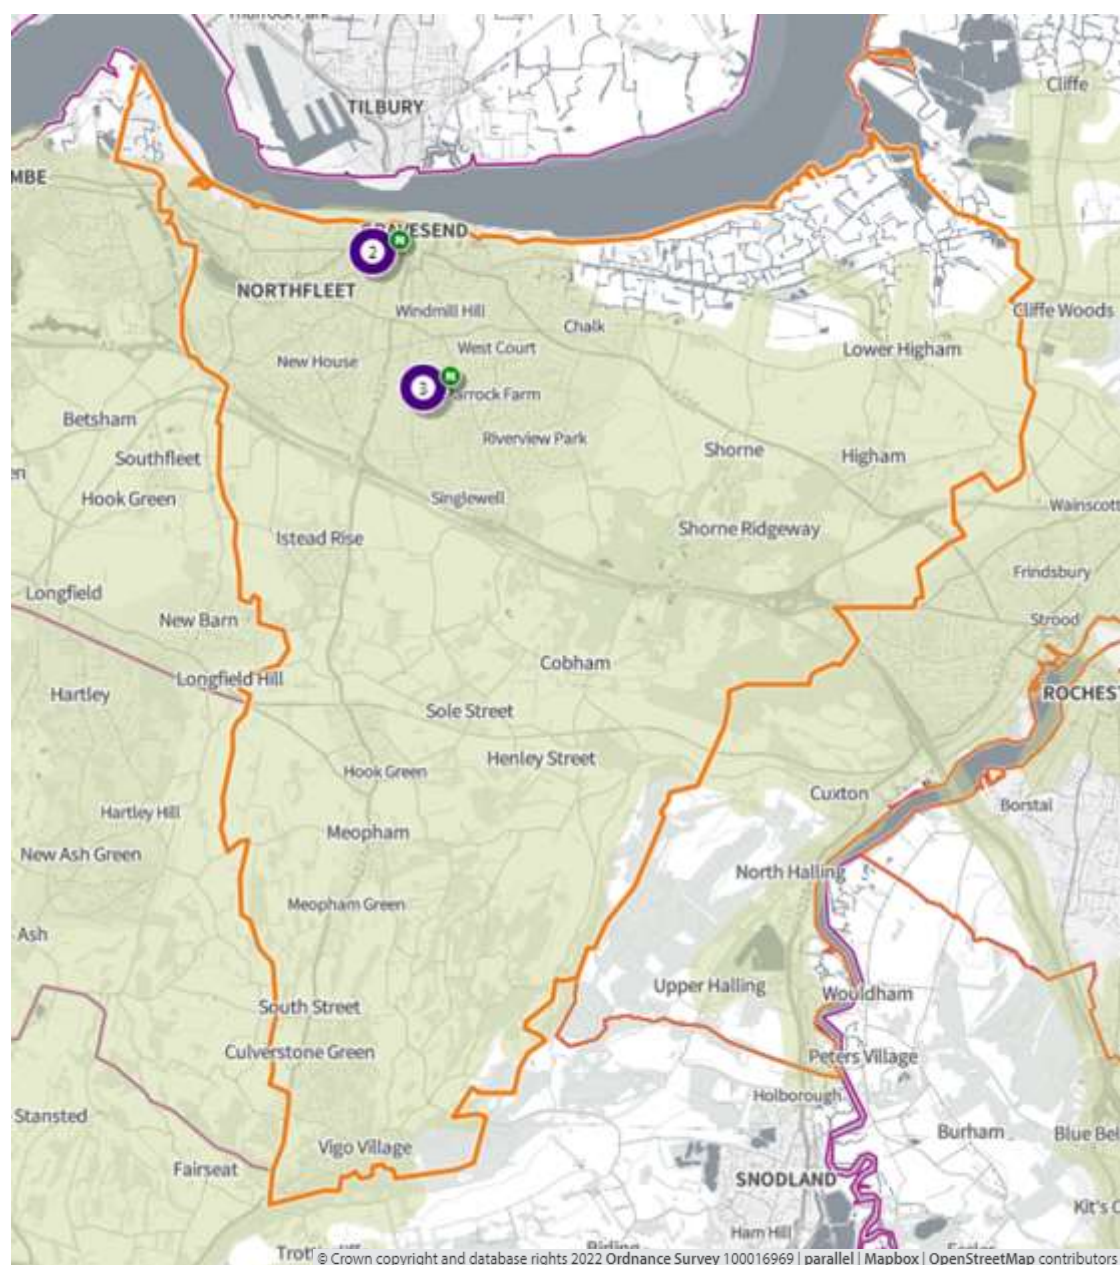

Map 111. Locations of community pharmacies, dispensing GPs and areas within 20-minutes by car

S = open Saturday N = open Sunday

In **map 112** below, the green shaded areas are within **20-minutes by car** of a community pharmacy that opens **until at least 7pm on weekdays**. The entire population is within a 20-minute drive.

Map 112. Locations of community pharmacies open until at least 7pm on weekdays and areas within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The information below indicates the number of prescriptions dispensed in and outside of the locality.

- 1.99 million items prescribed in Gravesham
 - 1.7 million items dispensed in Gravesham
 - 1.47 (86%) million via Electronic Prescription Service
 - 274,809 (13.8%) dispensed outside of the district
 - 154,688 Dartford
 - 56,500 distance selling
 - 22,274 Bexley
 - 16,698 Medway
- 1.9 million items dispensed in Gravesham
 - 1.77 million items dispensed by community pharmacies in Gravesham
 - 131,124 dispensed by 10 GP practices:
 - Meopham Medical Centre – 60,930
 - Downs Way Medical Practice – 52,985
 - 190,874 items prescribed outside borough i.e. more going out than coming in

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling premises
- Which are located near to where they work, shop or visit for leisure or other purposes.

Taking into account this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy within the locality

4. Other relevant services: current provision

The following advanced services were delivered by pharmacies in the Gravesham locality in 2020/21.

Table 39. Number of pharmacies providing advanced services

Advanced service name	No. of pharmacies
New Medicine Service	16
Appliance Use Review	0
Hypertension Service [‡]	18
Stoma Appliance Customisation	2
Community Pharmacist Consultation Service (CPCS) [‡]	21
Hepatitis C Antibody Testing Service	0
Seasonal Influenza Vaccination Advances Service	20
Covid Vaccination Service*	0
Covid Home Delivery Service*	20
Covid lateral flow device distribution*	22

*Specific to the Covid-19 pandemic

[‡]Services introduced during the year of study

Please note that three services were specific to the Covid-19 pandemic (Covid vaccination, homedelivery and lateral flow device distribution services) and that others were new services (CPCS, Hypertension service) introduced within the year. There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- Downs Way Medical Practice, Gravesend is open until 8.30pm on Wednesdays and Thursdays
- Parrock Street Surgery is open until 8pm on Tuesdays and Wednesdays
- Pelham Medical Practice: St. Gregory's Crescent Surgery is open until 8pm on Tuesdays and Wednesdays
- Shrubbery Surgery is open until 8pm on Mondays and Tuesdays
- Springhead Health opens from 3pm until 6.30pm but on Tuesdays and Thursdays remains open until 8pm

There is an urgent treatment centre situated in the Gravesham Community Hospital. It is open 8am to 8pm every day of the year.

There is a walk-in centre at The White Horse Surgery which is open 8am-8pm every day.

There are also drug and alcohol services, Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality.

The number of prescriptions from these services is shown below:

- 12 pharmacies dispensed a total of 3,663 (mean = 305, range = 2-1,309) items from drug and alcohol services
- 22 pharmacies and 1 GP practices dispensed a total of 1,013 (mean = 44, range = 1-90) items from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- 19 pharmacies dispensed a total of 68 items (mean = 3.6, range = 1-12) from KCHFT
- 22 pharmacies and 1 GP practices dispensed a total of 3,414 items (mean = 148, range = 13-411) from Kent and Medway hospitals

6. Choice with regard to obtaining pharmaceutical services

As can be seen from sections 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

Figure 37 below shows the predicted increase in the population of the Gravesham locality continuing to grow over the lifetime of this PNA. By 2025 it is estimated that each pharmacy will serve a population of 5,131.

Figure 37 Gravesham population forecast

1 pharmacy per 5,131 people in 2025

The population of Gravesham district is projected to increase by 6% to 112,900 in 2025. This is an increase of approximately 300 people per pharmacy from 2020.

Map 113 below shows where there are major housing developments planned in the coming years and the table indicates the number of dwellings planned for each site.

Map 113. Location of housing developments

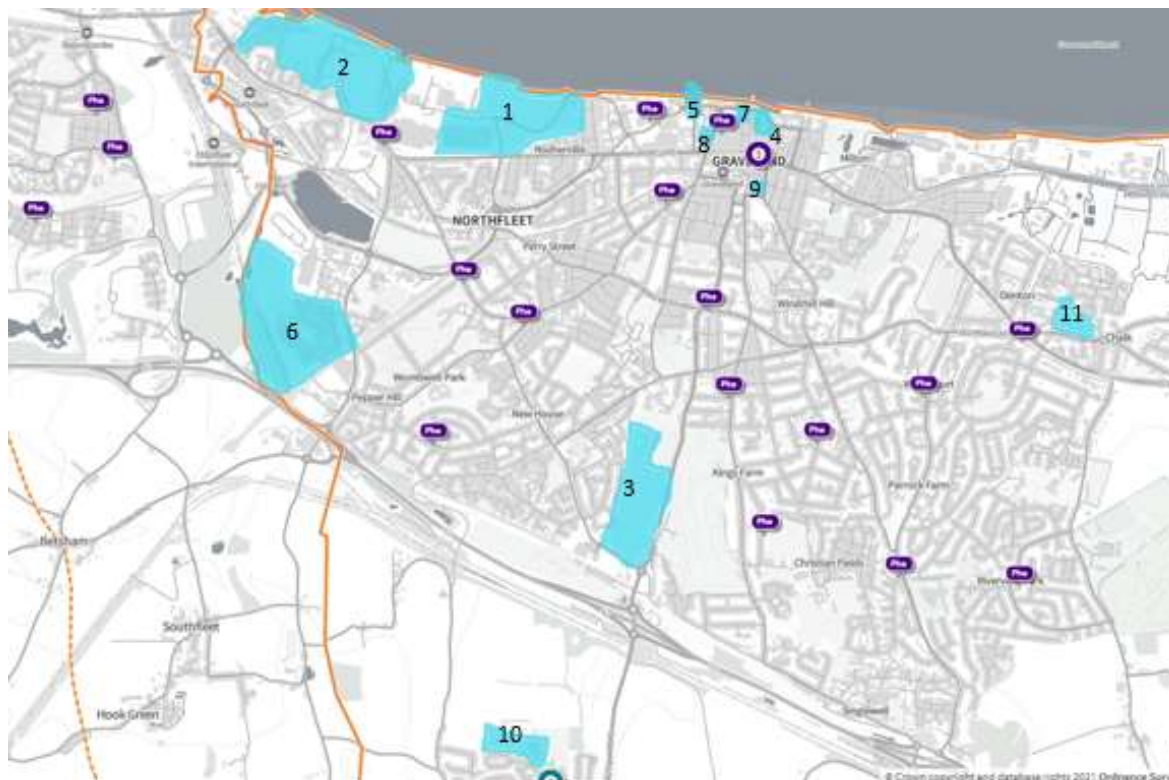

Table 40. Proposed housing developments – number of dwellings per year at each development

Map 117. Location of community pharmacies open until at least 7pm, proposed housing developments, and areas within 20 minutes of a community pharmacy by public transport on weekday evenings

In **map 118**, below, the green shaded areas are within 20-minutes' walk of a community pharmacy that is open on Sundays. Blue shaded areas are locations of major housing developments.

Map 118. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open on Sundays

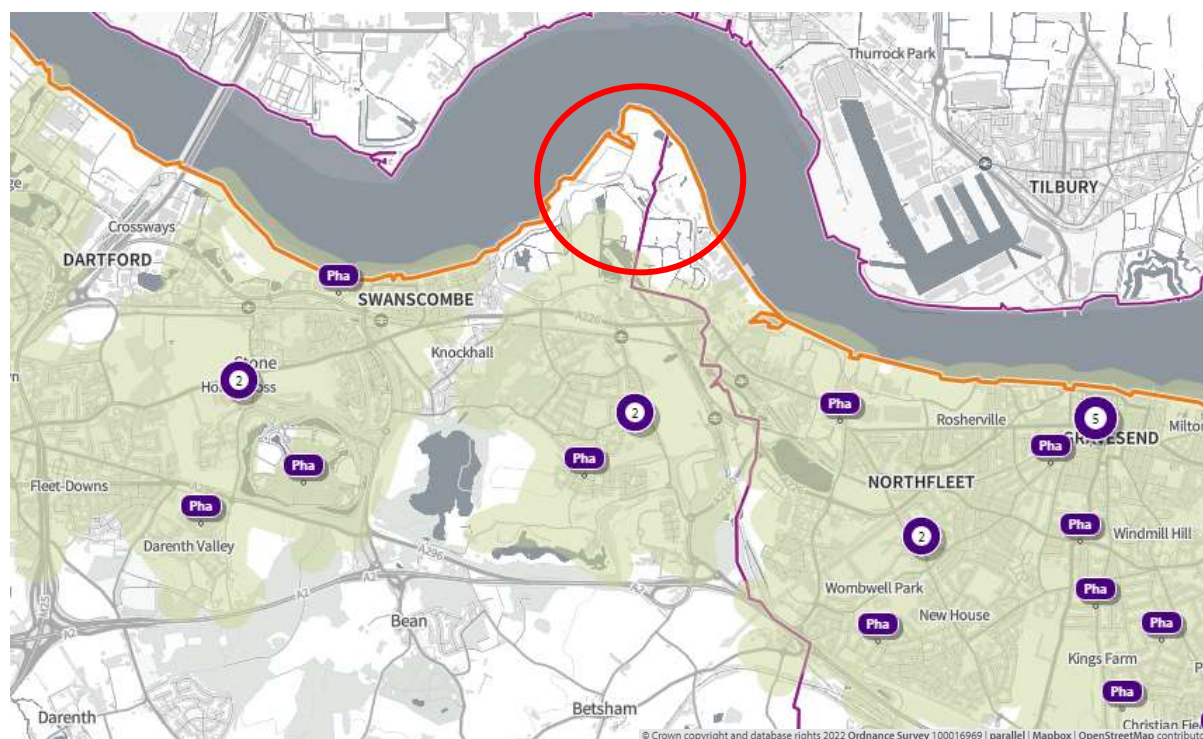

The London Resort ⁽⁵⁸⁾

The construction of the London Resort will require a large workforce; up to 5,000 construction workers are expected on-site in the peak year of Gate One construction (2023). Of these, however, up to half are expected to live too far from the site to commute daily and will seek temporary accommodation close to the site. There are three preliminary options for the London Resort strategy: rely on existing accommodation options; purchase or rent a decommissioned cruise ship (likely with 1,000 to 2,000 room capacity); and/or locate mobile homes (500 – 700 rooms) on-site. There is estimated to be up to 3,100 construction workers seeking temporary accommodation in the area in 2023.

Map 119 below shows the proposed location of The London Resort. The green shaded areas are within a 20-minute walk of the pharmacies displayed on the map. Construction workers living on-site will be within a 20-minute walk of the nearest pharmacy. Two pharmacies in the Dartford locality are within a 20-minute walk of the site. Neither of these pharmacies responded to the contractors questionnaire so it is unknown whether these pharmacies feel they have capacity to meet increased demand for services or medicines. There is a pharmacy in the Gravesham locality that is just beyond a 20-minute walk of The London Resort site so it is likely that this pharmacy will meet some of the demand from the temporary increase in local population. *Please note at the time of writing (April 2022) a new planning submission has been made for the London Resort development so the time scales stated may alter.*

Map 119. Proposed location of The London Resort

8. Necessary services: - Gaps in provision

No gaps in the provision of necessary services have been identified.

9. Improvements or better access: Gaps in provision

Neither Meopham nor Vigo pharmacy provide the new medicine service. Approximately 4% are not within 20 minutes by public transport of a pharmacy providing new medicine service.

Hill pharmacy is nearest to the majority of new housing development and The London Resort but has indicated that it has capacity to meet an increased demand for services and medicines

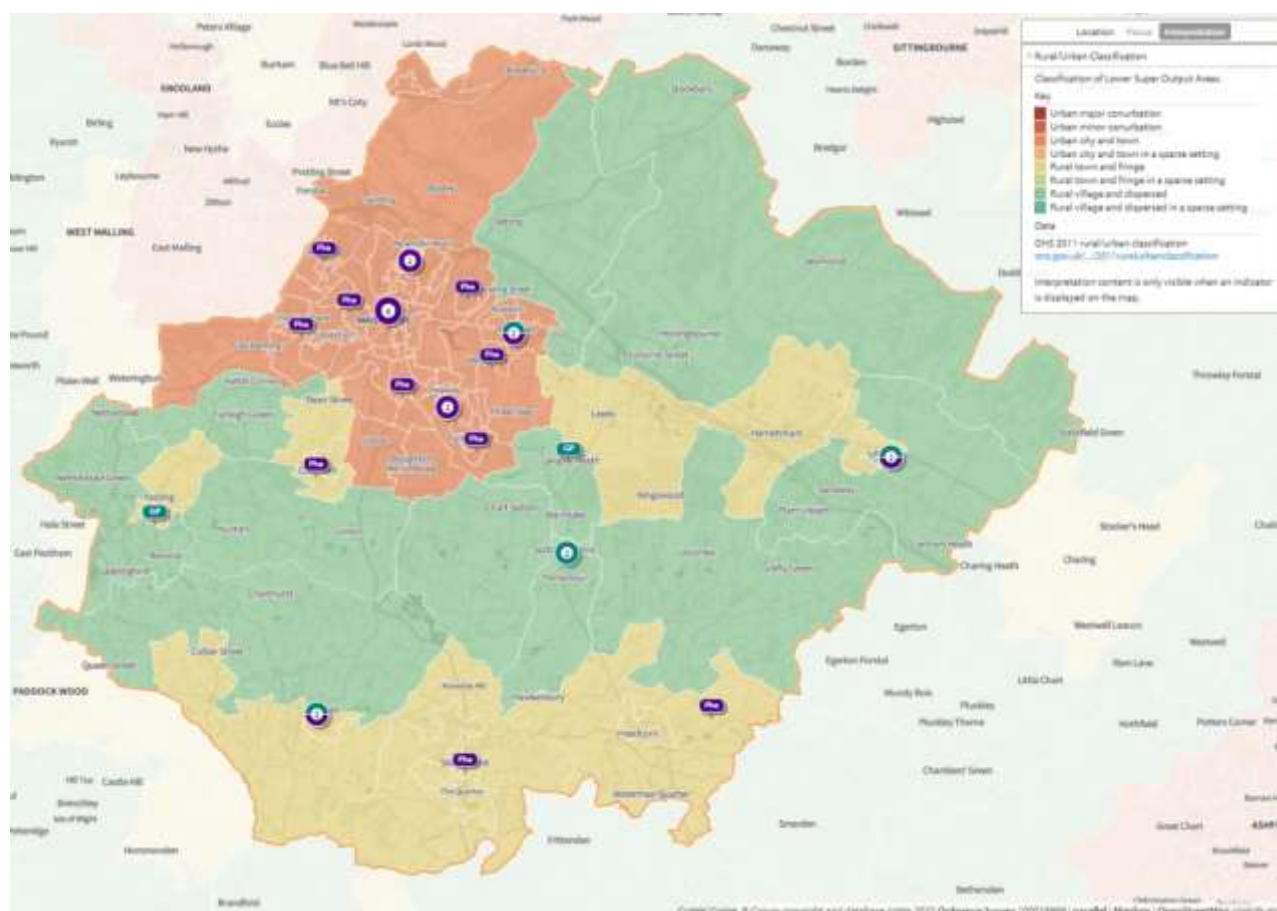

There are no pharmacies that provide Hep C. Only 5.3% of people within the locality are with 20 minutes by public transport of a pharmacy providing Hep C. however, by car 99% are within 20 minutes

14 Maidstone Borough Council Locality

1. Key Facts

Maidstone is a local government district in the mid-west of the county. It covers an area of 393.3 square km. Most of the population lives in the county town of Maidstone. Beyond the county town and its urban sprawl, most of the district is rural/semi-rural dotted with villages, some of which contain significant concentrations of the population with associated facilities.

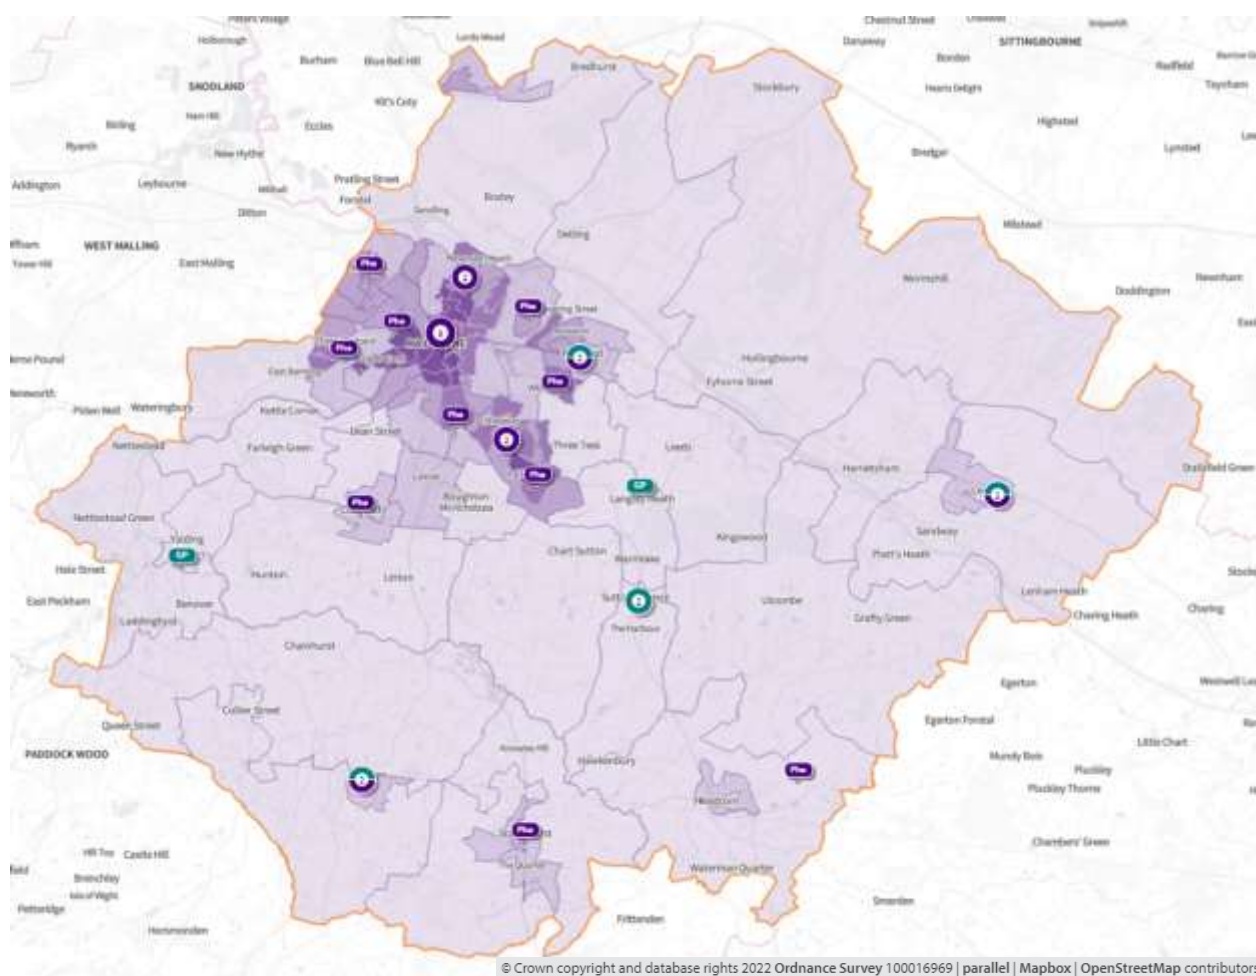

Map 120. Rural/urban classification of lower super output areas

Population

Map 121 below shows the distribution of the population in the locality. The greatest density is in and around the county town of Maidstone, with the majority of the rest of the locality having a low population density. The villages of Staplehurst, Headcorn and Lenham are relatively densely populated amongst the more rural areas of the district.

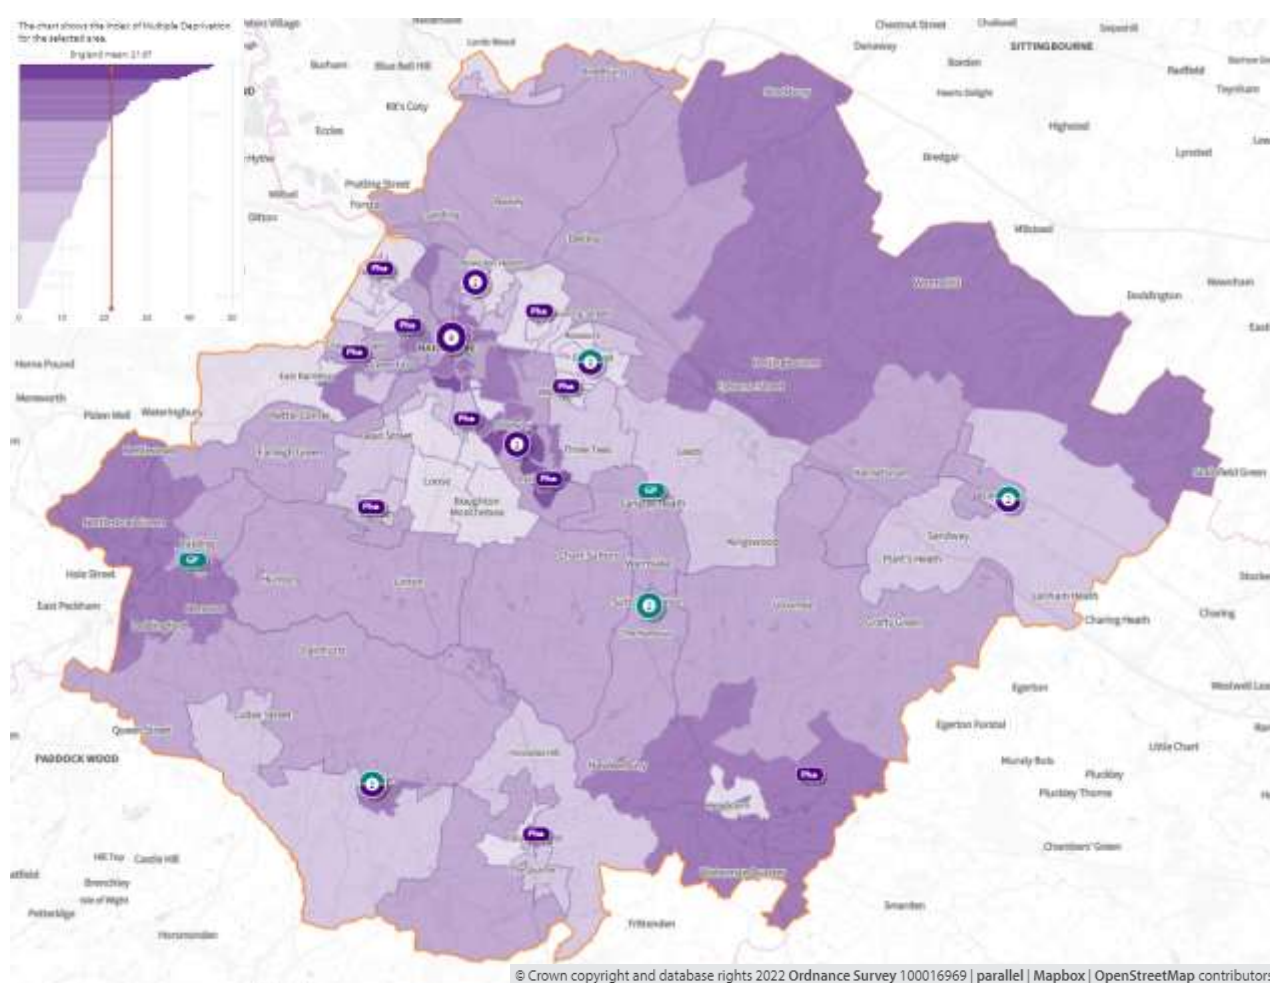

Map 121. Population density of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Deprivation

Map 122 below shows the areas of deprivation in the Maidstone District locality. The district has relatively low deprivation as a whole with a number of areas amongst the least deprived in Kent, however there are small pockets of high deprivation in suburban and rural areas. Maidstone district is similar to the Kent average for rates of unemployment and educational attainment ⁽⁶³⁾ ⁽⁶⁴⁾.

Map 122. Deprivation of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Language

English is the main language for all people aged 16 or over in 94.5% of households in the district. 2.9% of households have no people with English as the main language ⁽²⁾.

Home ownership

71% of houses are owned either outright (33%) or with a mortgage (38%). The average number of occupants per household is 2.4, the same as the Kent average ⁽²⁾.

Age Distribution

The average age of Maidstone district residents is 40.9, slightly lower than the Kent average of 41.4. 19.3% of the population is over 65 and 20% 0-15 ⁽²⁾. Life expectancy at birth is 79.9 for males and 83 for females ⁽⁴⁶⁾.

Economy

By industry, the top three employers in the Maidstone district are wholesale and retail trade (14.7%), human health and social work activities (13.3%), and construction (9.3%) ⁽¹⁵⁾. In comparison to Kent as a whole, the district has a much higher proportion of public administration jobs, perhaps due to Maidstone being the location of the County Council headquarters ⁽¹⁵⁾.

Car ownership

16% of households in Maidstone district do not have a car or van in the household, this is lower than the Kent average of 20% ⁽¹³⁾.

Care Homes

There are a considerable number of care homes in the Maidstone locality. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services.

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are 23 Community pharmacies providing dispensing services in the Maidstone locality.

In addition, there are seven dispensing GP practices in the locality.

Each pharmacy provides on average services for 7,528 of the area’s population. Figure38 below shows how this compares with the other localities of Kent.

Figure 38 Number of people per pharmacy in each locality

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There is a small percentage of prescriptions generated in the area that are dispensed in neighbouring areas and an even smaller percentage that are generated outside the locality and dispensed by Maidstone community pharmacies ⁽¹⁾.

- 1,286 outside prescribers dispense in Maidstone
 - 2.6% of all items dispensed in Maidstone
- 30 prescribers in Maidstone
 - 97.4% of all items dispensed in Maidstone
- 42 dispensers in Maidstone
 - 89.3% of all items prescribed in Maidstone
- 1,332 dispensers outside of Maidstone
 - 10.7% of all items prescribed in Maidstone

Pharmacy locality: Maps 1 and 2 above show the locality of the community pharmacies and GP dispensing practices.

Opening times: All are open Monday to Friday, with 21 opening on Saturdays and 4 opening on Saturdays and Sundays. This gives a weekly opening hours range of 40 to 100 hours and an average of 56 hours of opening each week. Eighteen of these pharmacies open for at least one hour after 5pm on weekdays.

Table 50 below show the core and supplementary hours of each pharmacy ⁽⁶⁵⁾.

Table 50. Opening times for all pharmacies

Pharmacy	Total core weekly hours	Total supplementary weekly hours	Total weekly hours	Max. hours open after 5pm at least 1 day/week	Saturday hours	Sunday Hours

Map 129. Locations of community pharmacies open until at least 7pm and areas within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The information below indicates the number of prescriptions dispensed in and outside of the locality.

- 3.37 million items prescribed in Maidstone
 - 3.01 million items dispensed in Maidstone
 - 2.13 million (71%) via Electronic Prescription Service
 - 361,867 dispensed outside of the district
 - 200,000 distance selling
 - 70, 288 Tonbridge & Malling
 - 24,149 Medway
- 3.09 million items dispensed in Maidstone
 - 2.54 million items dispensed by community pharmacies in Maidstone
 - 549,923 dispensed by 18 GP practices:
 - Len Valley Practice – 155,146
 - Sutton Valence Group Practice – 127,451
 - Yalding Surgery – 99,405
 - 80,890 items prescribed outside borough i.e. more going out than coming in

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling premises
- Which are located near to where they work, shop or visit for leisure or other purposes.

Taking into account this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy and do access pharmacy services within the locality.

4. Other relevant services: current provision

The following advanced services were delivered by pharmacies in the Maidstone locality in 2020/21.

Table 51. Number of pharmacies providing advanced services

Advanced service name	No. of pharmacies
New Medicine Service	19
Appliance Use Review	1
Hypertension Service [‡]	3
Stoma Appliance Customisation	5
Community Pharmacist Consultation Service (CPCS) [‡]	22
Hepatitis C Antibody Testing Service	3
Seasonal Influenza Vaccination Advances Service	23
Covid Vaccination Service*	0
Covid Home Delivery Service*	22
Covid lateral flow device distribution*	24

*Specific to the Covid-19 pandemic

[‡]Services introduced during the year of study

Please note that three of these services were specific to the Covid-19 pandemic and that others were new services introduced within the year. There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- Albion Place Medical Practice is open from 7am 4 days a week and open until 8pm on Wednesdays. It is also open 9am-1pm on Saturdays.
- Blackthorn Medical Practice is open from 7.30am 4 days a week.
- College Practice is open 8.30am-11am on Saturdays
- Greensands Health Centre provides an evening surgery 6.30pm-7pm Monday-Thursday
- Len Valley Practice is open from 7am on Mondays and until 8pm on Fridays
- Malling Health Four is open until 8pm on Wednesdays and from 7.30am on Tuesdays and Thursdays
- Marden Medical Centre provides an evening surgery 6.30pm-8pm on Mondays
- Sutton Valence Group practice provides a morning surgery 7am-8am on Thursdays
- Shepway Medical Centre is open 9am-1pm on Saturdays
- The Orchard Surgery provides an evening surgery 6.30pm-7.45pm on Tuesdays
- The Vine Medical Centre provides a morning surgery 7am-8am on Tuesdays and Fridays
- Yalding Surgery is open until 7.45pm on Thursdays

Maidstone Hospital has an urgent care service between 8.30am and 6.30pm. There is also an emergency department situated at Maidstone Hospital which is open 24 hours a day.

There are also drug and alcohol services, Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality.

- 20 pharmacies dispensed a total of 4,077 (mean = 204, range = 1-2,104) items from drug and alcohol services
- All 23 pharmacies, 2 GP practices dispensed a total of 1,325 (mean = 53, range = 1-232) items from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- 19 pharmacies and 1 GP practice dispensed a total of 373 items (mean = 19, range = 1-122) from KCHFT
- 24 pharmacies and 4 GP practices dispensed a total of 5,349 items (mean = 191, range = 1-566) from Kent and Medway hospitals

6. Choice with regard to obtaining pharmaceutical; services

As can be seen from sections 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

Figure 39 below shows the predicted increase in the population of the Maidstone locality continuing to grow over the lifetime of this PNA.

Figure 39 Maidstone population forecast

 **1 pharmacy per 8,047 people in 2025**

The population of Maidstone district is projected to increase by 6% to 185,100 in 2025. This is an increase of 500 people per pharmacy from 2020. As stated in the community pharmacy contracts survey 16 responding pharmacies have capacity to increase dispensing and 15 are willing and able to increase delivery of other services the Maidstone locality.

In map 130 below the blue shaded areas are locations of major housing developments that are planned in the coming years and the table indicates the number of dwellings planned for each site year by year.

Map 130. Location of housing developments

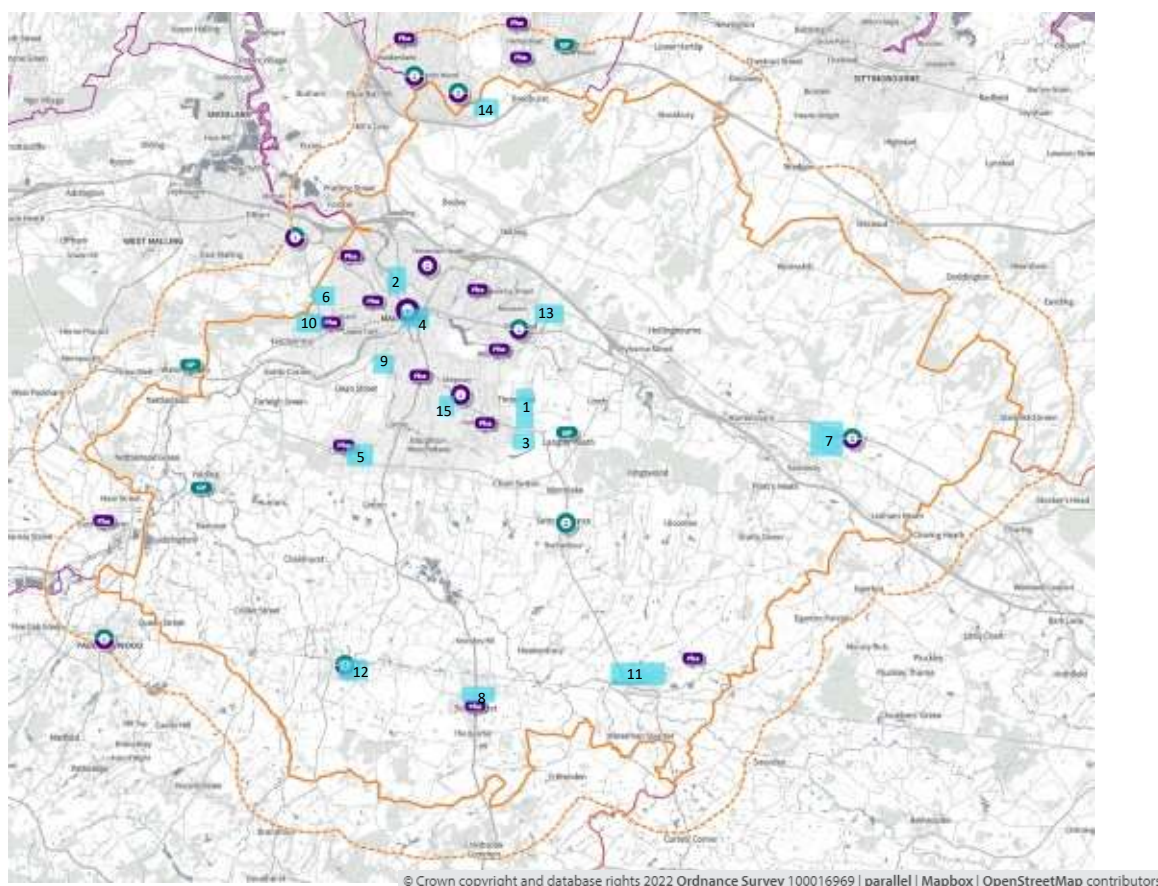

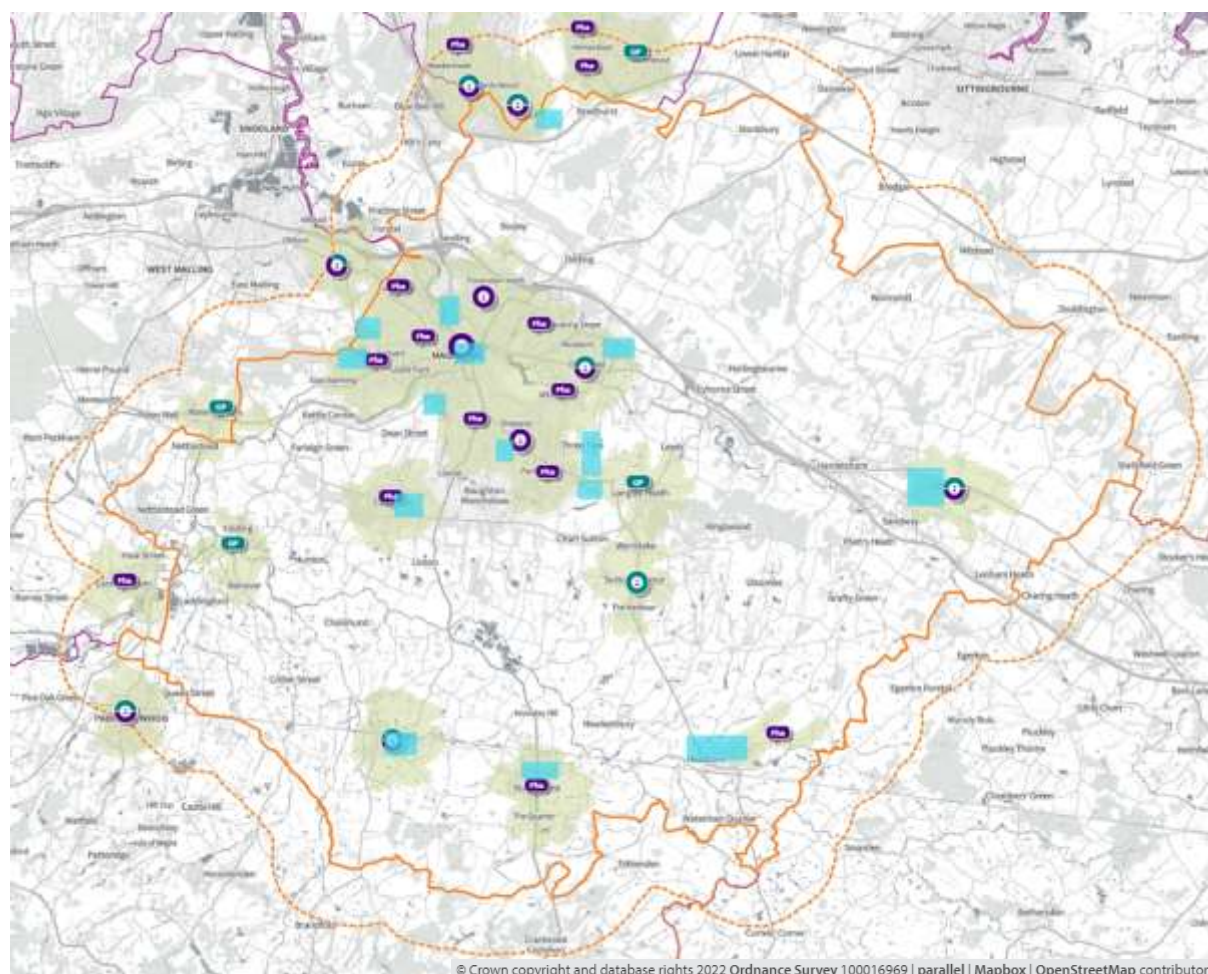

Table 52. Proposed housing developments – number of dwellings per year at each development

Site Name	21/22	22/23	23/24	24/25	25/26	26/27	27/28	28/29	29/30	30/31	2025	2030

In **map 135**, below, the green shaded areas are within **20-minutes' walk** of a community pharmacy that is open on **Sundays** and the blue shaded areas are locations of major housing developments

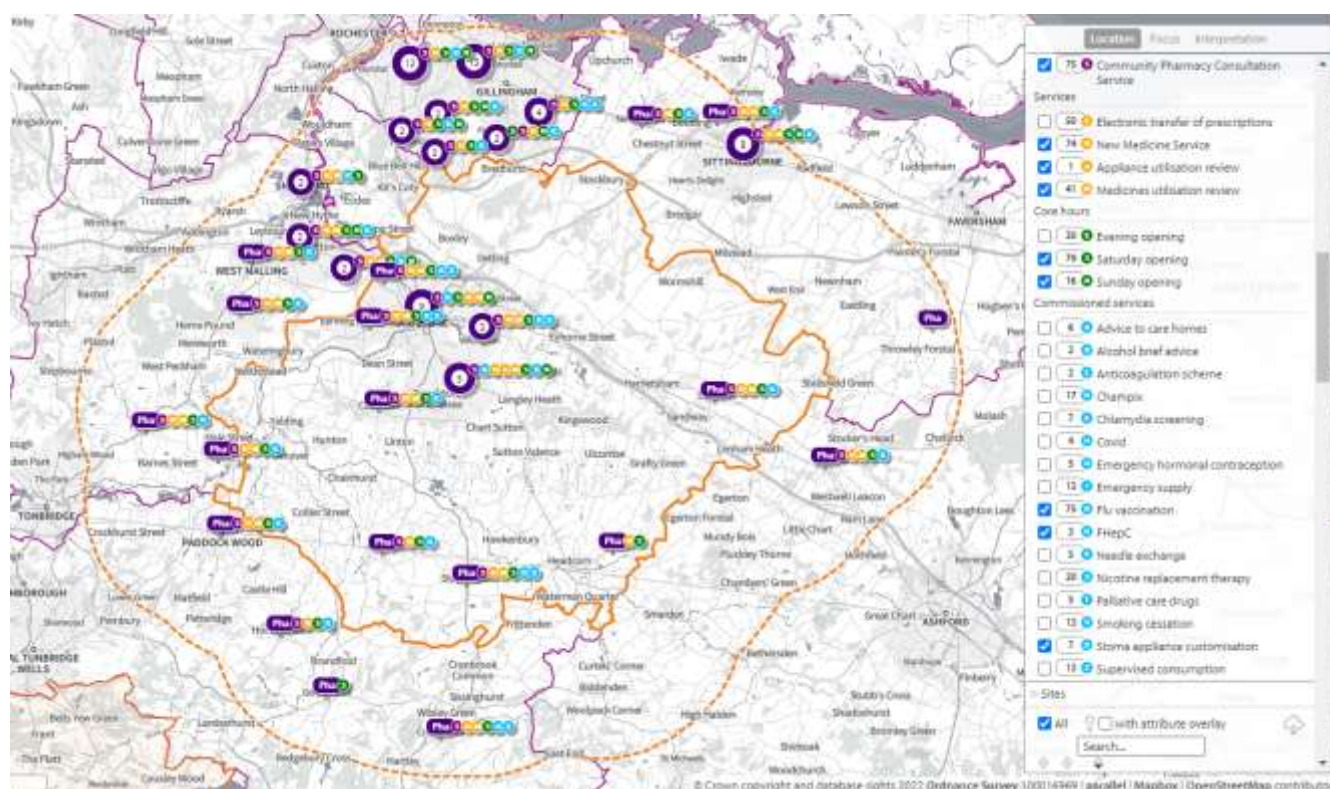

Map 135. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open on Sundays

8. Necessary services: - Gaps in provision

Maidstone has the highest number of prescriptions dispensed per head of population of all districts. Good access in urban areas to pharmacy services but not as good in rural areas, although the dispensing practices provide for this rural population.

Map 136. Pharmacy locations and services provided

9. Improvements or better access: Gaps in provision

Access could be improved to essential and advanced services on a Sunday in south of district - no pharmacies open on a Sunday. However, this part of the district is within a 20-minute drive of a Sunday opening pharmacy.

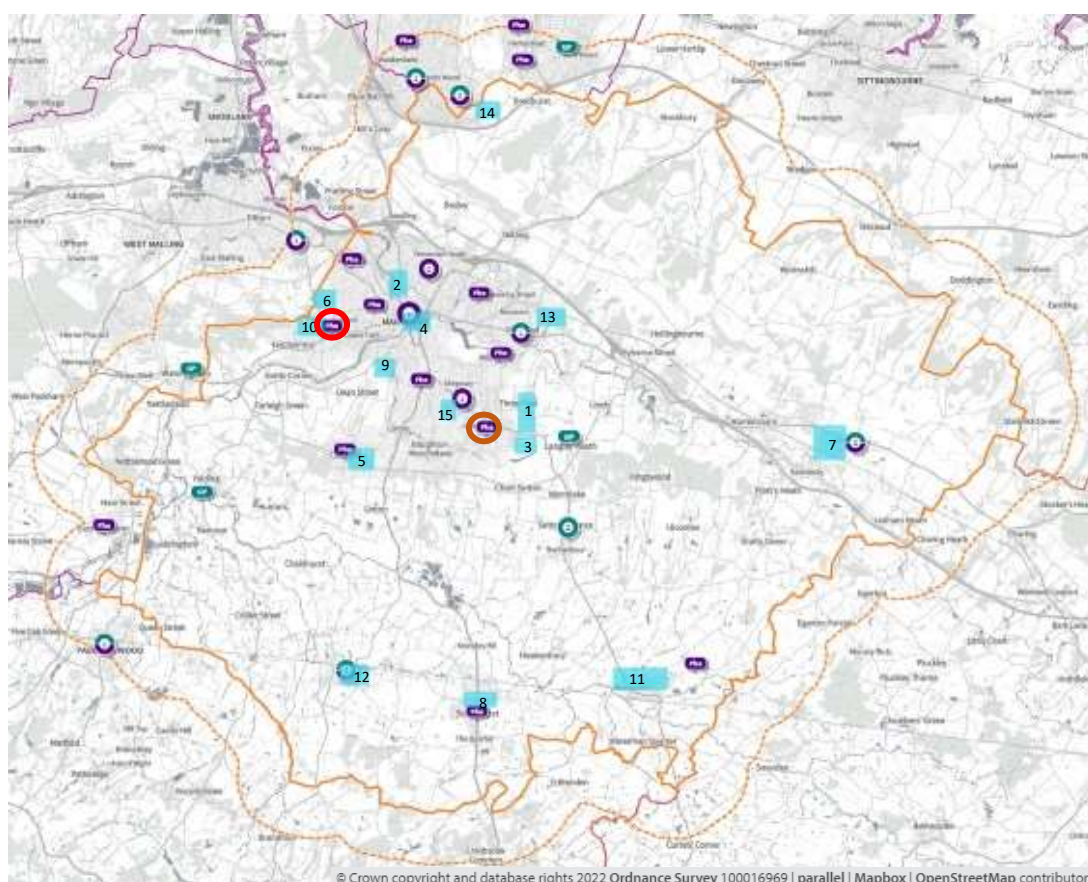

Map 137 shows that Hep C only offered at 3 pharmacies in or on outskirts of Maidstone.

Map 137. Location of pharmacies providing hepatitis C service

Flu vaccine not provided by Headcorn pharmacy. 2 LSOAs primarily served by this pharmacy have a relatively high proportion of over 50s, ranked 9th and 14th out of 95 Maidstone LSOAs. However, majority of the population of these LSOAs are within 20 minutes by public transport of a pharmacy that provides flu vaccine.

Map 138. Location of pharmacies, dispensing GPs, housing developments. Pharmacies circled do not have the capacity to meet an increase in demand for the services currently provided

Pharmacies circled have stated that they do not have the capacity to meet an increase in demand for the services currently provided. The pharmacy circled red has stated that it also does not have capacity to meet an increase in demand for dispensing of medication. Significant development near to both of these pharmacies could increase demand. Table 53 below shows the time scales for these developments.

Table 53. Numbers of dwellings per year at selected housing developments

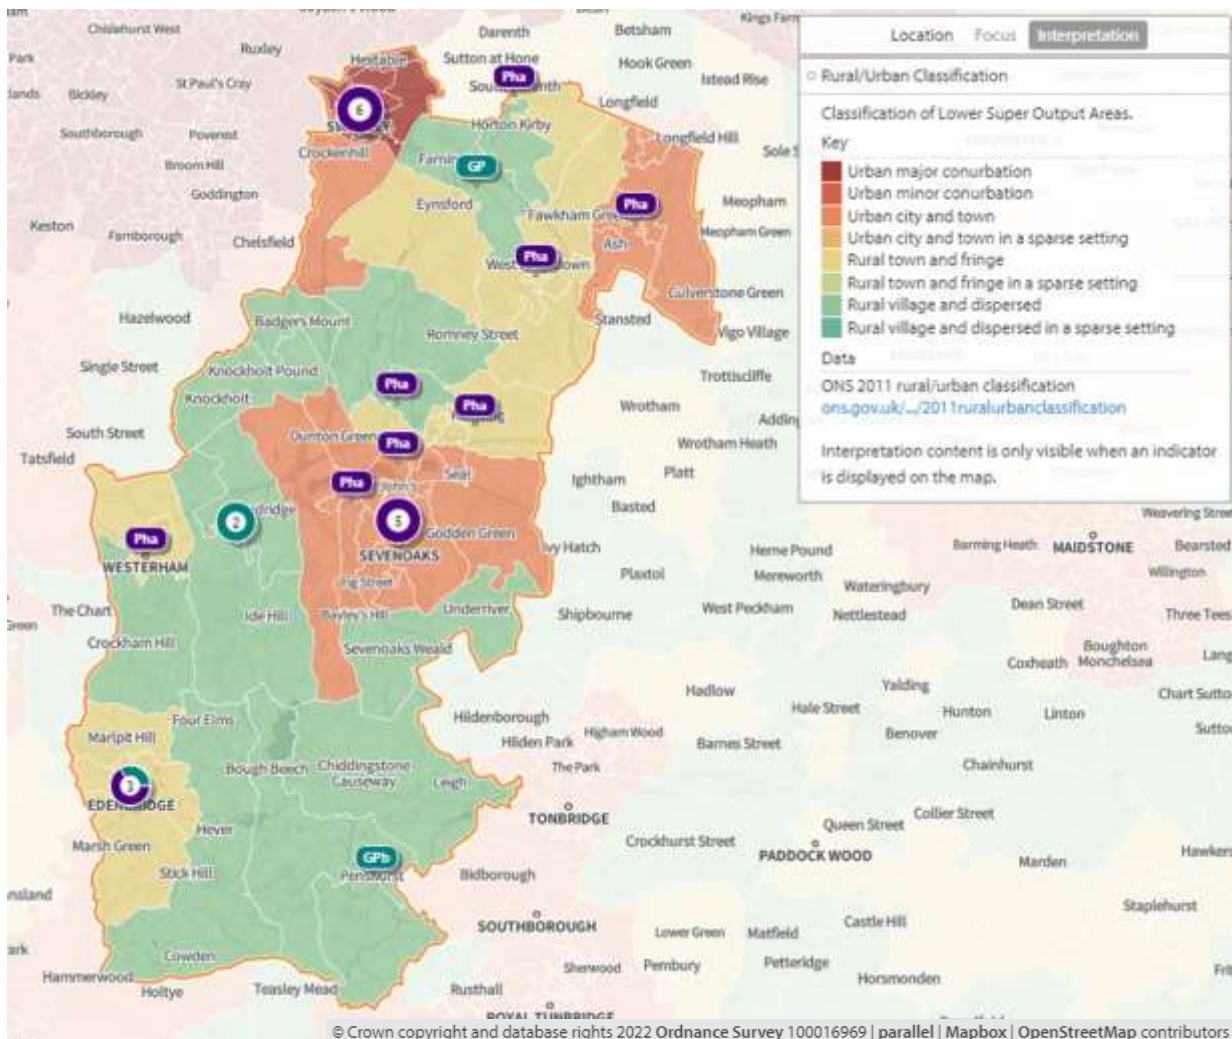

Site Name	20/21	21/22	22/23	23/24	24/25	25/26	26/27	27/28	28/29	29/30	2025	2030

15 Sevenoaks Locality

1. Key Facts

Sevenoaks is a local government district in the west of the county. It covers an area of 370.4 square km. The district is relatively sparsely populated with 3.3 persons per hectare, second only to Ashford district (2.3 persons per hectare) ⁽³⁾. Map 139 shows that there are two main urban centres, Sevenoaks and Swanley, the latter being much more densely populated. There are two small towns in the south-west of the district but much of the south is rural. The north of the district borders London's urban sprawl.

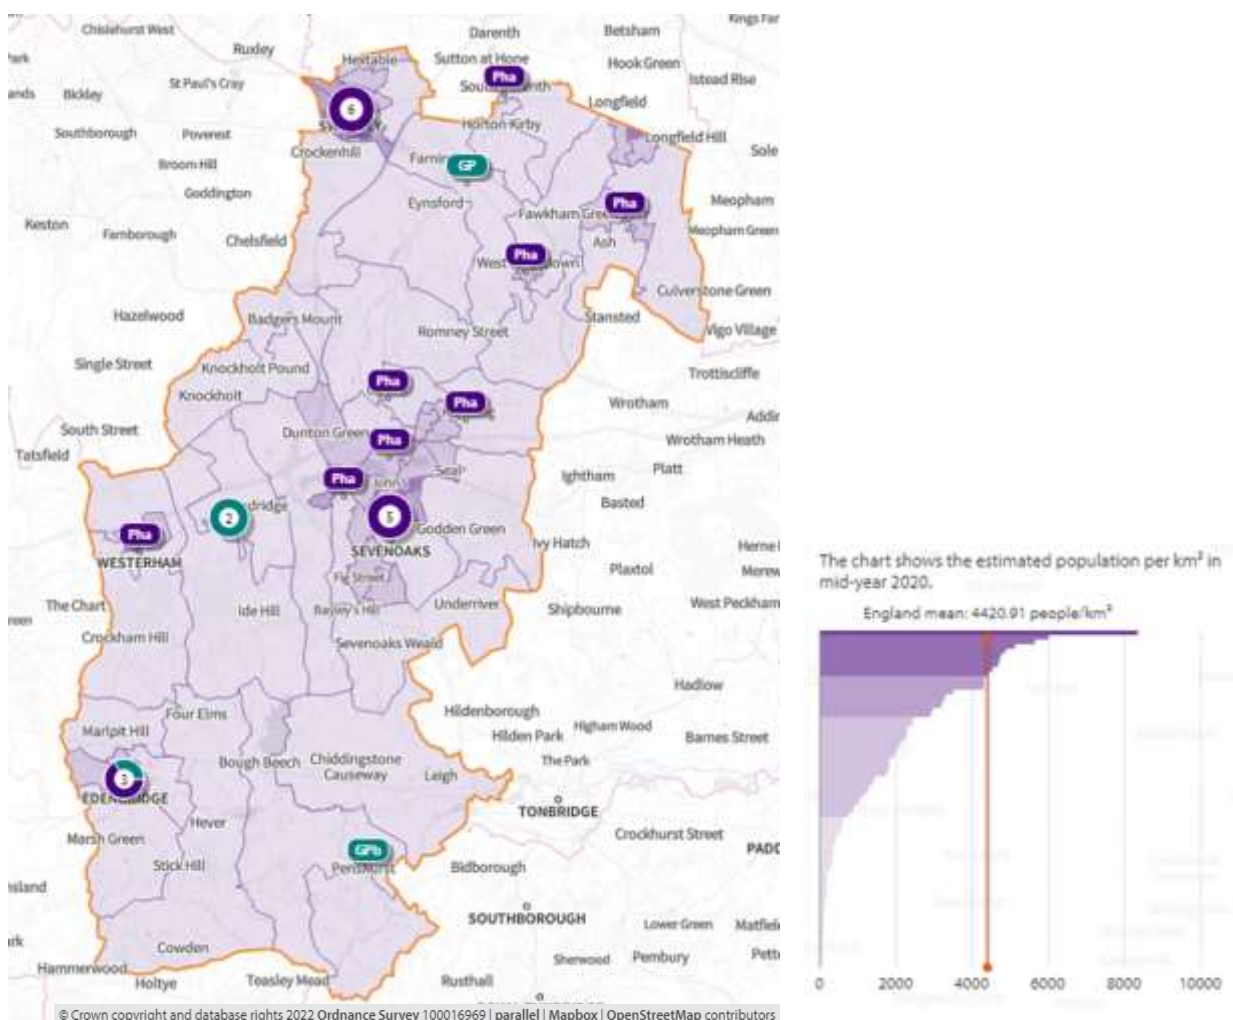

Map 139. Rural/urban classification of lower super output areas

Population

Map 140 below shows the distribution of the population in the locality. Sevenoaks has a population of 121,387. The areas in and around the main town of Sevenoaks are the most densely populated, however the borough has a relatively low number of highly densely populated areas. Areas in the north of the borough are more densely populated with the town of Swanley having small highly densely populated urban areas.

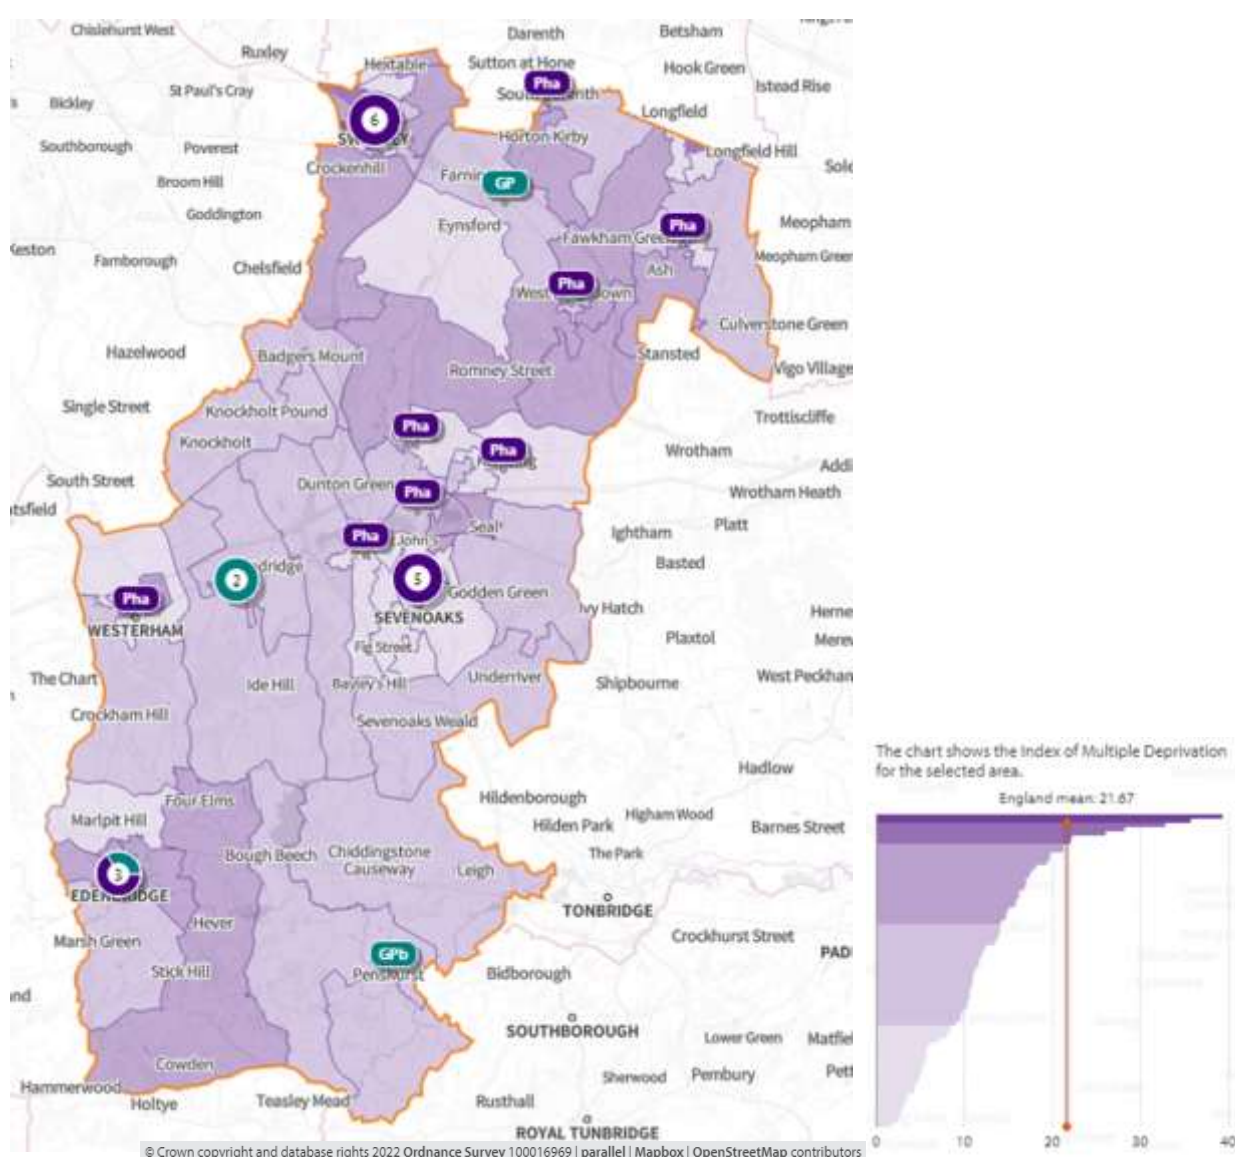

Map 140. Population density of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Deprivation

Map 141 below shows the areas of deprivation in the Sevenoaks District locality. Deprivation is low across the district and average deprivation is the second lowest in Kent. Employment rates are the highest in Kent ⁽⁶³⁾ and educational attainment are second highest ⁽⁶⁴⁾.

Map 141. Deprivation of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Language

English is the main language for all people aged 16 or over in 96.4% of households in the district. 1.2% of households have no people with English as the main language ⁽²⁾.

Home ownership

73% of houses are owned either outright (38%) or with a mortgage (35%). The average number of occupants per household is 2.4, the same as the Kent average ⁽²⁾.

Age Distribution

The average age of Sevenoaks district residents is 42.3, slightly higher than the Kent average of 41.4. 21.6% of the population is over 65 and 20.3% 0-15 ⁽²⁾. Life expectancy at birth is 81 for males and 84.2 for females ⁽⁴⁶⁾.

Economy

By industry, the top three employers in the Sevenoaks district are wholesale and retail trade (13.5%), construction (12.5%), and human health and social work activities (9.9%) ⁽¹⁵⁾. In comparison to Kent as a whole, the district has a much higher proportion of construction and professional, scientific jobs ⁽¹⁵⁾.

Car Ownership

13% of households in Sevenoaks district do not have a car or van in the household, this is the lowest in Kent ⁽¹³⁾.

Care Homes

There are a thirteen of care homes in the Sevenoaks locality. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services.

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are 21 Community pharmacies providing dispensing services in the Sevenoaks locality.

In addition, there are five dispensing GP practices in the locality.

Each pharmacy provides on average services for 5,780 of the area’s population. Figure 40 below shows how this compares with the other localities of Kent.

Figure 40 Number of people per pharmacy in each locality

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There is a small percentage of prescriptions generated in the area that are dispensed in neighbouring areas and an even smaller percentage that are generated outside the locality and dispensed by Sevenoaks community pharmacies ⁽¹⁾.

- 1,219 outside prescribers dispense in Sevenoaks
 - 4.3% of all items dispensed in Sevenoaks
- 12 prescribers in Sevenoaks
 - 95.7% of all items dispensed in Sevenoaks
- 32 dispensers in Sevenoaks
 - 90.4% of all items prescribed in Sevenoaks
- 1,262 dispensers outside of Sevenoaks
 - 9.6% of all items prescribed in Sevenoaks

Pharmacy locality: Maps 1 and 2 above show the locality of the community pharmacies and GP dispensing practices.

Opening times:

All are open Monday to Friday, with 21 opening on Saturdays and 4 opening on Saturdays and Sundays. This gives a weekly opening hours range of 41.5 to 101 hours and an average of 58 hours of opening each week. Sixteen of these pharmacies open for at least one hour after 5pm on weekdays.

Table 54 below show the core and supplementary hours of each pharmacy ⁽⁶⁵⁾.

Table 54. Opening times for all pharmacies

Pharmacy	Total core weekly hours	Total supplementary weekly hours	Total weekly hours	Max. hours open after 5pm at least 1 day/week	Saturday hours	Sunday Hours
Lloyds Sainsbury's	101	0	101	5.50	15	6

There are the following dispensing GP practices in the Sevenoaks locality:

- Brasted Practice TN16 1HU
- Edenbridge Medical Practice TN8 5ND
- The Surgery, Penhurst TN11 8BP
- The Medical Practice (Sundridge) TN14 6EH
- Braeside Surgery, Farringham DA4 0JH

Access to pharmacies

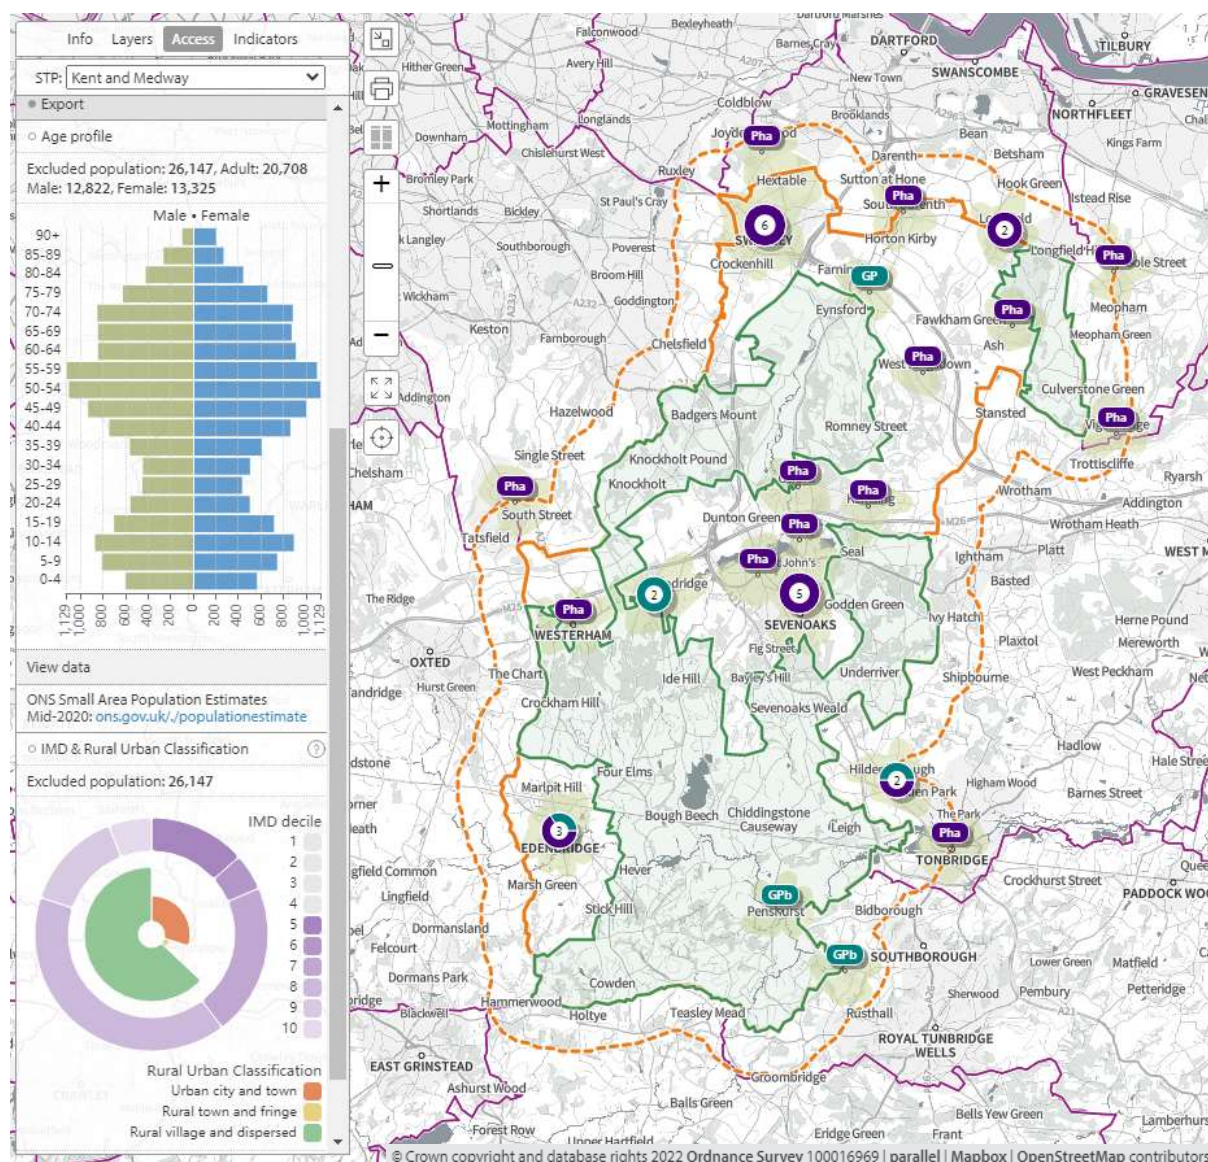

Travel times

In **map 142**, below, the olive-green shaded areas are within a **20-minute walk of a community pharmacy/dispensing GP practice during core hours**.

26,147 (21.5%) people are not within a 20-minute walk

24.6% (6,432) of 65+ population is not within a 20-minute walk of a community pharmacy or dispensing GP practice

Map 142. Locations of community pharmacies/dispensing GPs and lower super output areas not within a 20-minute walk

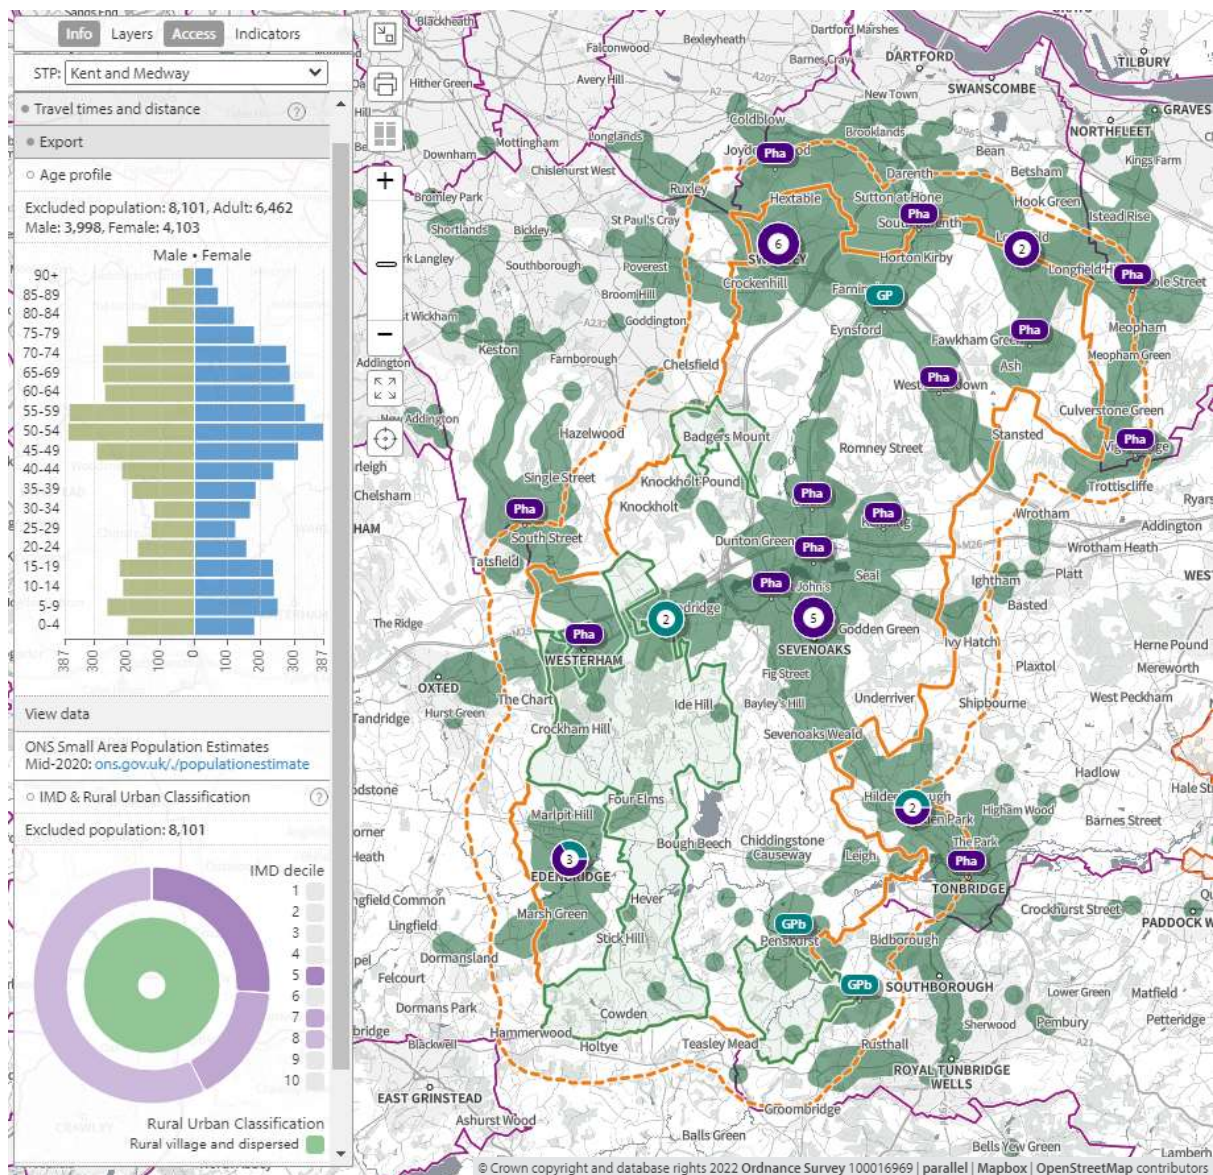

In **map 143**, below, the green shaded areas are within **20-minutes by public transport** of a community pharmacy/dispensing GP practice **on weekdays**.

8,101 (6.7%) people are not within 20-minutes by public transport of a community pharmacy/dispensing GP practice.

7.6% (1,981) of 65+ population is not within 20-minutes by public transport of a community pharmacy or dispensing GP practice

Map 143. Locations of community pharmacies/dispensing GPs and lower super output areas not within 20-minutes by public transport on weekday mornings

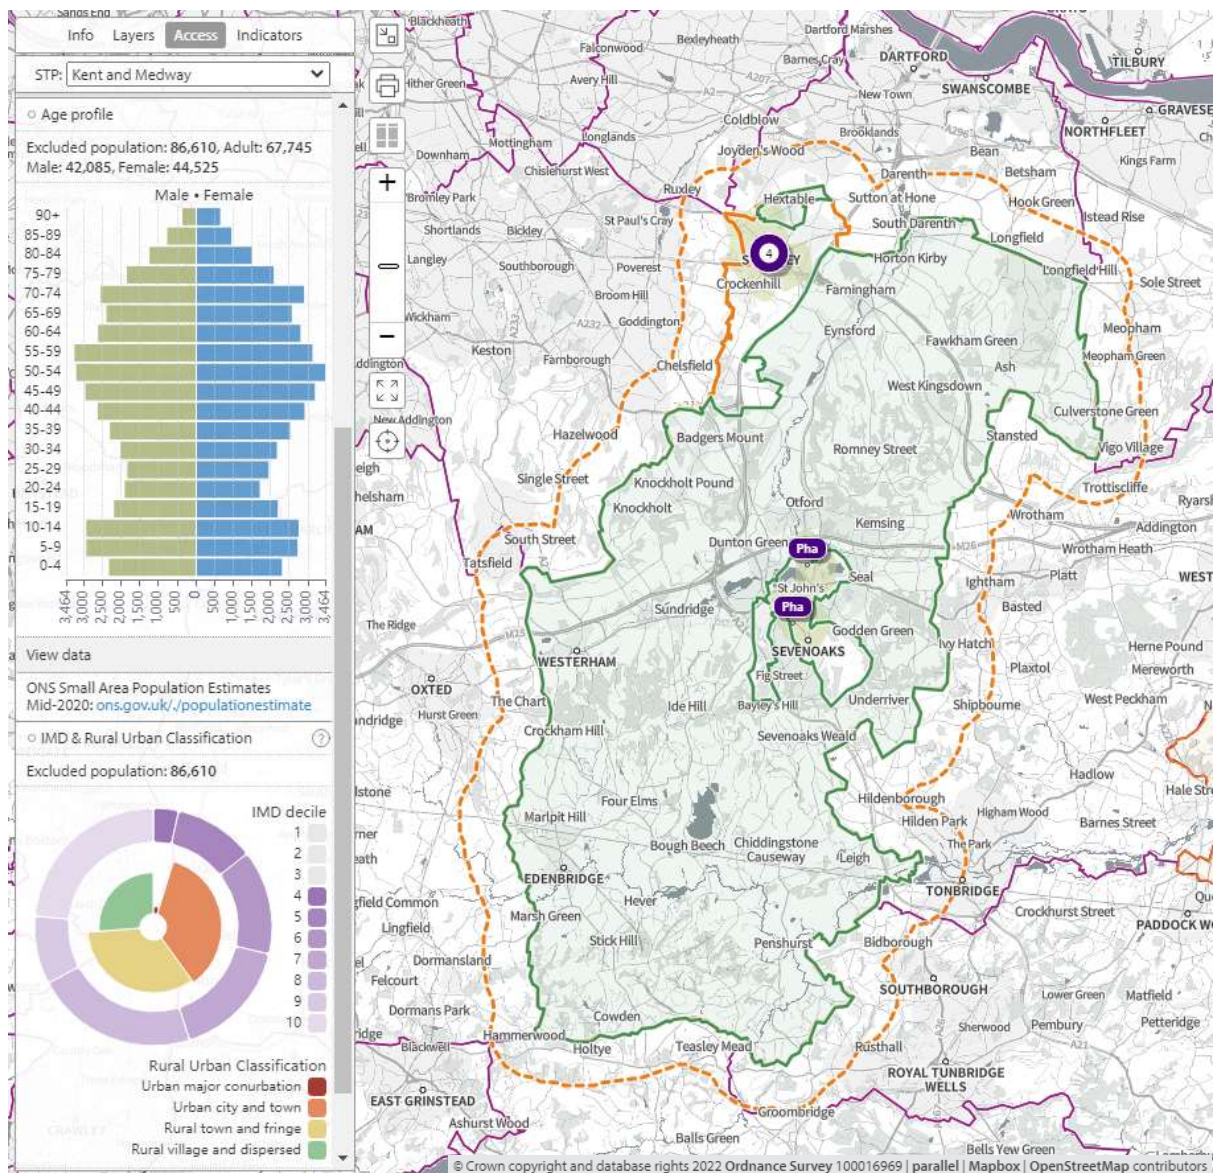

In **map 144**, below, the olive-green shaded areas are within a **20-minute walk** of a community pharmacy that opens until **at least 7pm on weekdays**.

86,610 (71.4%) people are not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays.

75.8% (19,788) of 65+ population is not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays.

Map 144. Locations of community pharmacies open until at least 7pm and lower super output areas not within a 20-minute walk

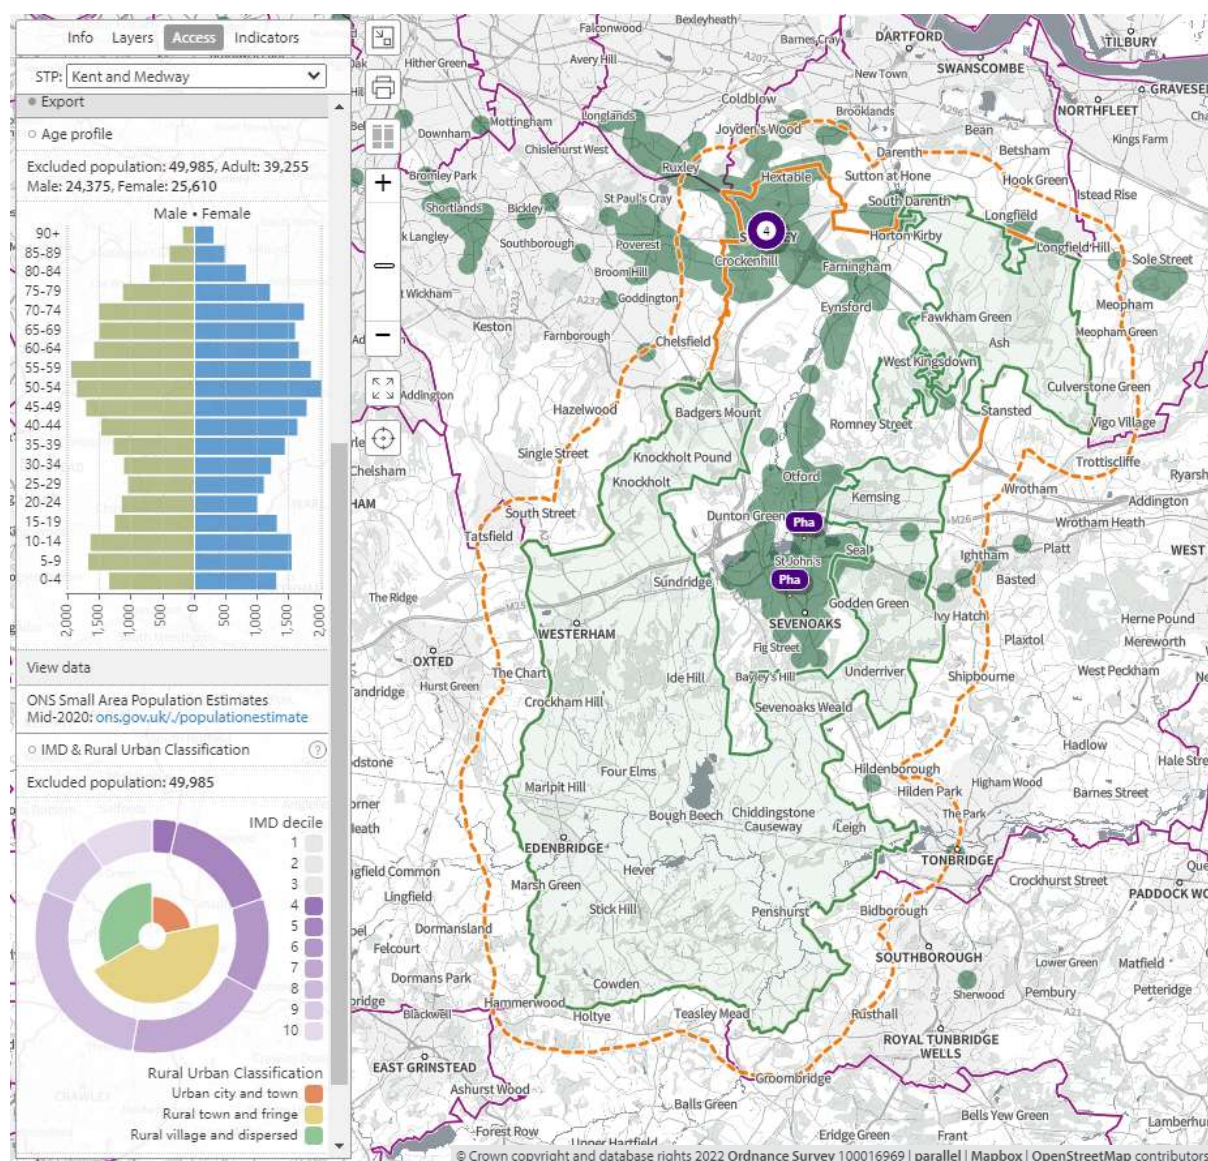

In **map 145**, below, the green shaded areas are within **20-minutes by public transport** of a community pharmacy that **opens past 7pm on weekdays**.

49,985 (41.2%) people are not within 20-minutes by public transport that opens past 7pm on weekdays.

44.2% (11,544) of 65+ population is not within 20 minutes by public transport of a community pharmacy that opens past 7pm on weekdays.

Map 145. Locations of community pharmacies open until at least 7pm and lower super output areas not within 20-minutes by public transport on weekday evenings

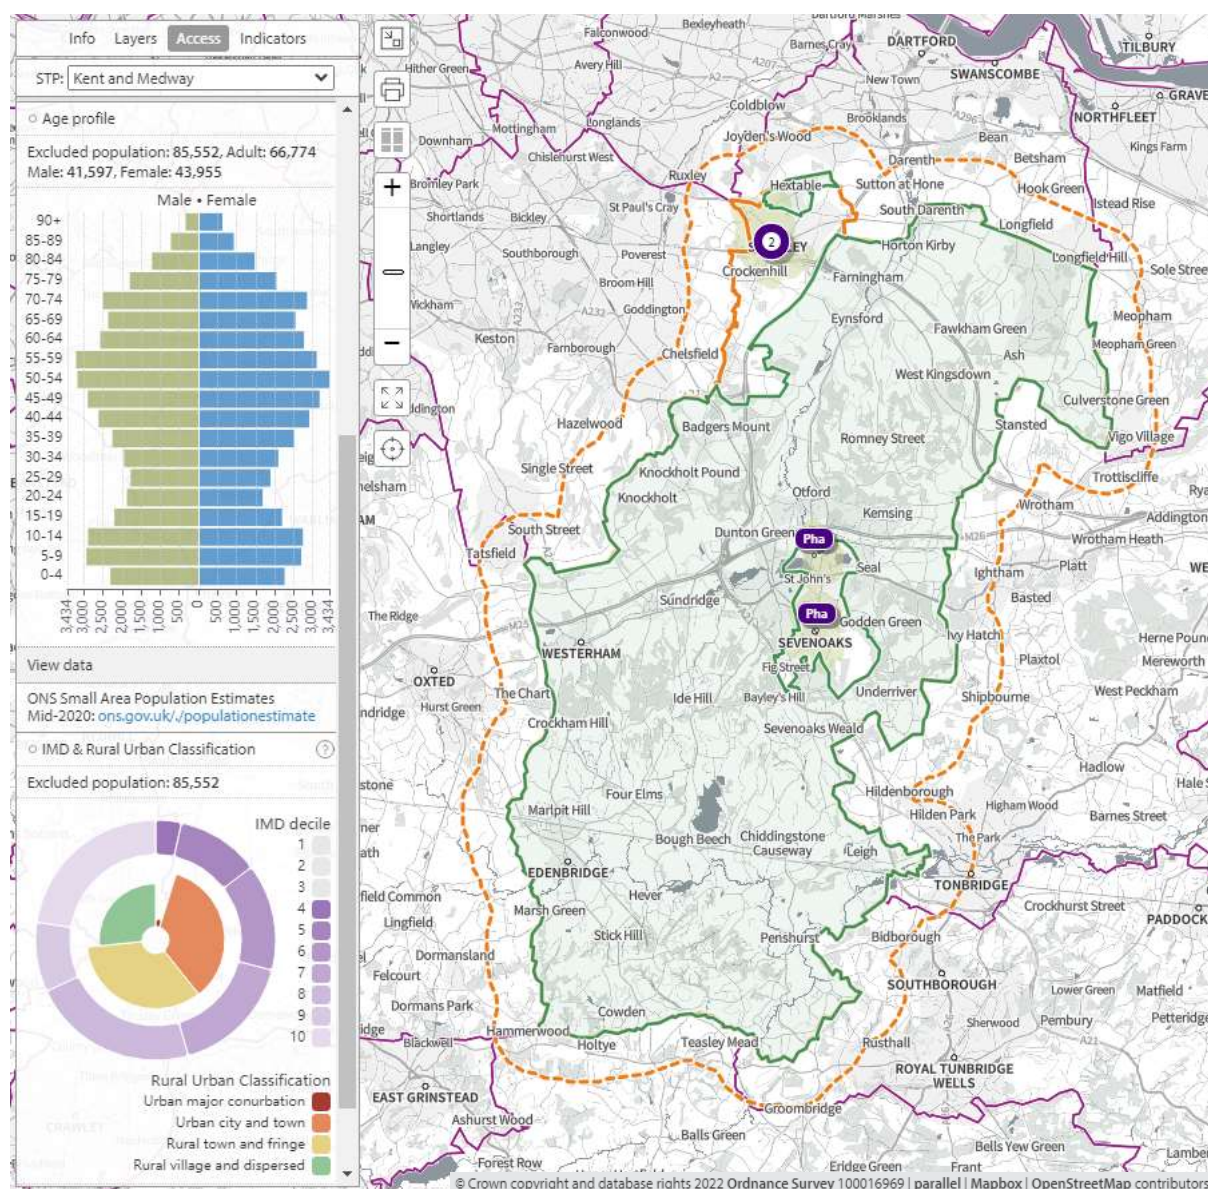

Access on Sundays

In map 146, below, the olive-green shaded areas are within a **20-minute walk** of a community pharmacy that **opens on Sundays**

70.5% (85,552) of the population is not within a 20-minute walk of a community pharmacy that opens on Sundays

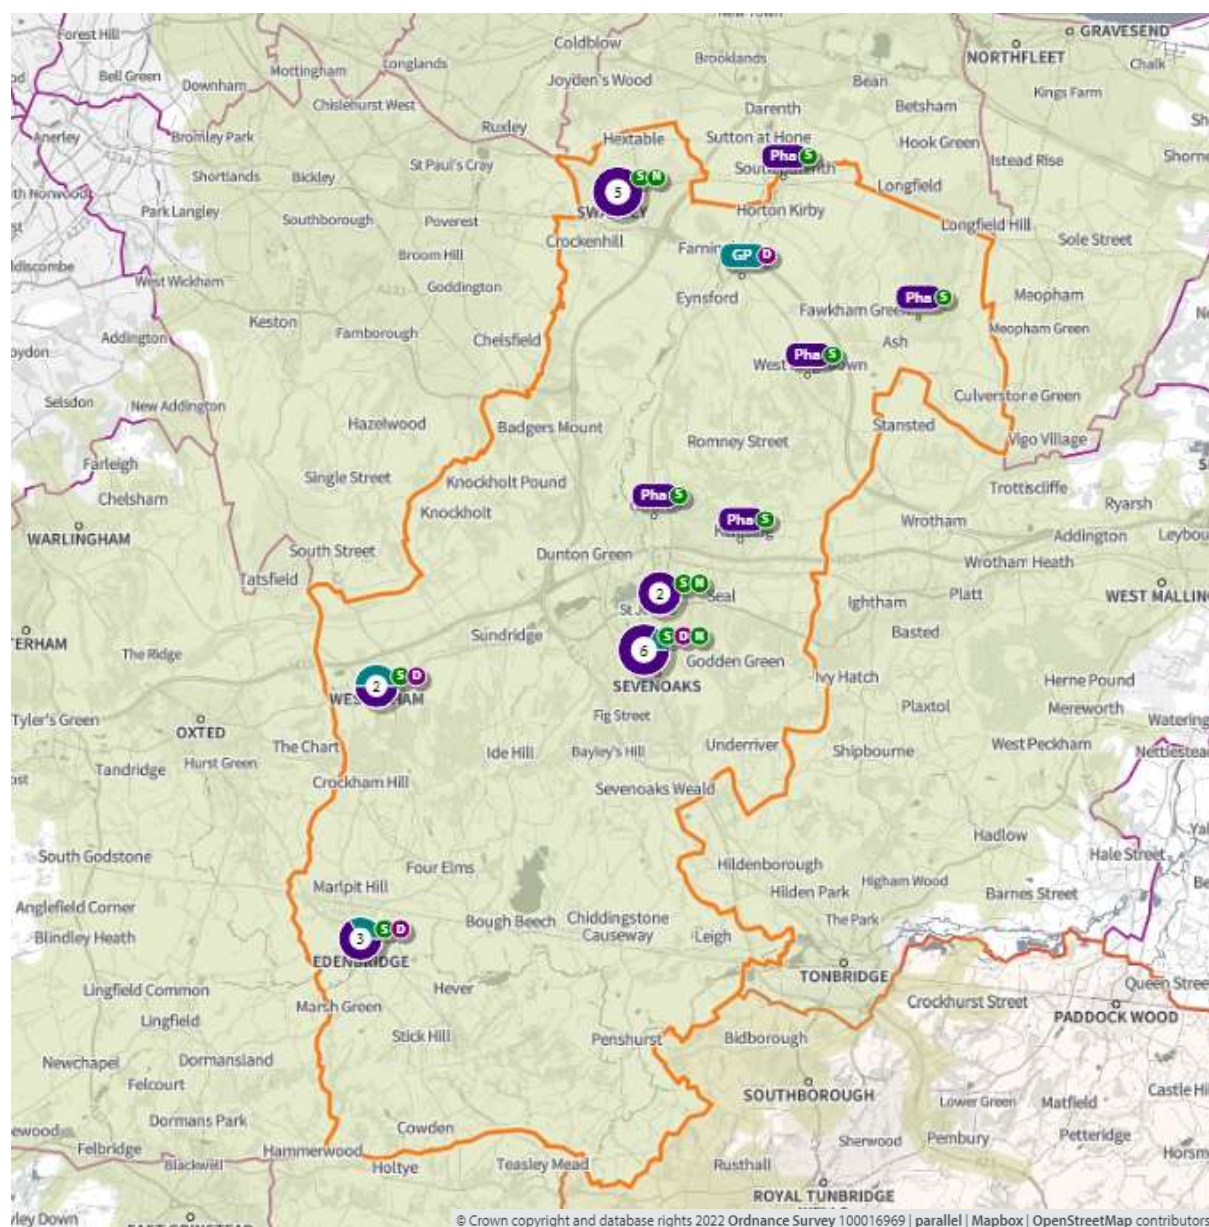

74.4% (19,412) of 65+ population is not within a 20-minute walk of a community pharmacy that opens on Sundays

Map 146. Locations of community pharmacies open on Sundays and lower super output areas not within a 20-minute walk

In **map 147**, below, access during **core opening hours, Saturdays and Sundays** is shown. The olive-green shaded areas are within a **20-minute drive** of a community pharmacy/dispensing GP practice. The entire population is within a 20-minute drive.

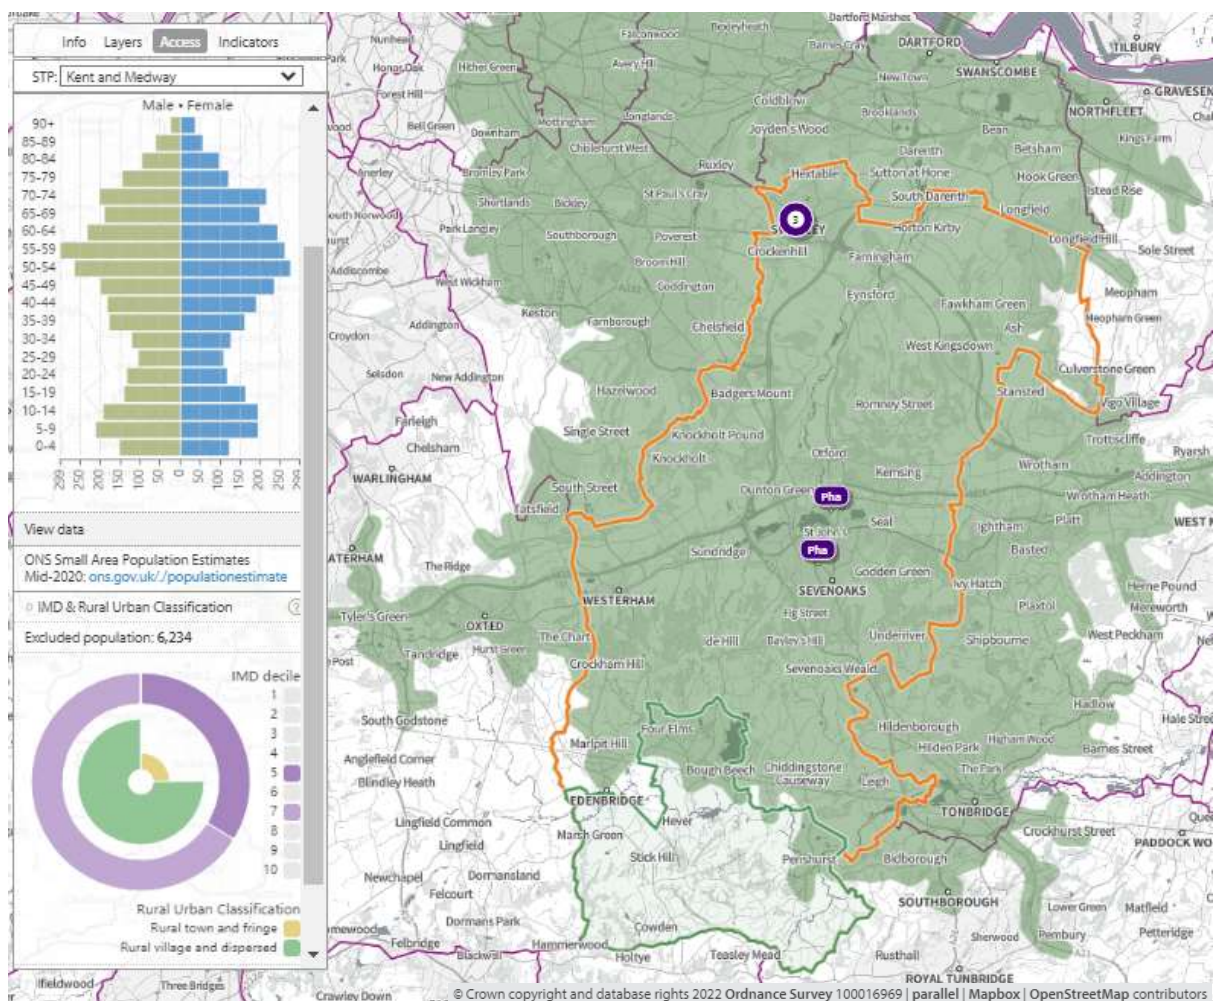

Map 147. Locations of community pharmacies, dispensing GPs and areas within 20-minutes by car

S = open Saturday N = open Sunday

In **map 148**, below, the green shaded areas are within 20-minutes by car of a community pharmacy that opens until at least 7pm on weekdays. 5.1% of the population (5.5% of 65+) is not within a 20-minute drive.

Map 148. Locations of community pharmacies open until at least 7pm and lower super output areas not within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The information below indicates the number of prescriptions dispensed in and outside of the locality.

- 1.6 million items prescribed in Sevenoaks
 - 1.45 million items dispensed in Sevenoaks
 - 1.2 million (68%) via Electronic Prescription Service
 - 152,981 dispensed outside of the district
 - 57,000 distance selling
 - 22,568 Tunbridge Wells
 - 19,976 Dartford
- 1.76 million items dispensed in Sevenoaks
 - 1.57 million items dispensed by community pharmacies in Sevenoaks
 - 190,528 dispensed by 10 GP practices:
 - 67,468 Braeside Surgery
 - 50,708 Edenbridge Medical Practice
 - 33,595 Amherst Medical Practice
 - 74,820* items prescribed outside borough i.e. more coming in than going out

* Branch surgeries mean that this figure is not entirely accurate

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling premises
- Which are located near to where they work, shop or visit for leisure or other purposes.

Taking into account this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy and do access pharmacy services within the locality.

4. Other relevant services: current provision

The following advanced services were delivered by pharmacies in the Sevenoaks locality in 2020/21.

Table 55. Number of pharmacies providing advanced services

Advanced service name	No. of pharmacies
New Medicine Service	16
Appliance Use Review	0
Hypertension Service [‡]	19
Stoma Appliance Customisation	2
Community Pharmacist Consultation Service (CPCS) [‡]	19
Hepatitis C Antibody Testing Service	0
Seasonal Influenza Vaccination Advances Service	19
Covid Vaccination Service*	1
Covid Home Delivery Service*	17
Covid lateral flow device distribution*	21

*Specific to the Covid-19 pandemic

[‡]Services introduced during the year of study

Please note that three services (Covid Vaccination, Home Delivery and lateral flow devices) were specific to the Covid-19 pandemic and that others were new services (CPCS and hypertension service) introduced within the year. There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- Amherst Medical Practice is open until 8pm on Mondays and Fridays and until 7.30pm on Wednesdays, and open from 7.15am on Tuesdays and 7am on Thursdays
- Braeside Surgery is open until 8pm on Mondays and Wednesdays
- Edenbridge Medical Practice is open until 8pm on Mondays, Tuesdays and Thursdays
- St Johns Medical Practice is open until 8.30pm on Tuesdays and until 8pm on Wednesdays
- West Kingsdown Medical Centre is open from 7.30am on Tuesdays
- Temple Hill Surgery is open from 7.30am on Tuesdays
- The Cedars Surgery is open until 8pm on Mondays and Thursdays and from 7am on Wednesdays

There is a minor injuries unit situated at Sevenoaks Hospital which is open daily 8am-8pm.

There is a second minor injuries unit situated at the War Memorial Hospital, Edenbridge which is open daily 8.30am-6.30pm.

There are also drug and alcohol services, Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality.

The number of prescriptions from these services is shown below:

- 17 pharmacies dispensed a total of 1,250 (mean = 74, range = 1-252) items from drug and alcohol services
- All 21 pharmacies dispensed a total of 810 (mean = 39, range = 9-84) items from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- 20 pharmacies dispensed a total of 94 items (mean = 5, range = 1-18) from KCHFT
- 21 pharmacies and 3 GP practices dispensed a total of 2,730 items (mean = 114, range = 1-289) from Kent and Medway hospitals

6. Choice with regard to obtaining pharmaceutical; services

As can be seen from section 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

Figure 41 below shows the predicted increase in the population of the Sevenoaks locality continuing to grow over the lifetime of this PNA.

Figure 41 Sevenoaks population forecast

 **1 pharmacy per 6,091 people in 2025**

The population of Sevenoaks district is projected to increase by 5% to 127,900 in 2025. This is an increase of 300 people per pharmacy from 2020. As stated in the community pharmacy contracts survey 10 responding pharmacies in the Sevenoaks locality do have capacity to increase dispensing services and 9 have capacity to increase other services.

Map 149 below shows where there are major housing developments planned in the coming years and the table indicates the number of dwellings planned for each site. The blue shaded areas are locations of major housing developments. The table below shows number of proposed dwellings at each site by year. With an average of 2.4 people per proposed dwelling, by 2025 these sites will provide accommodation for approximately 6,700 people.

Map 149. Location of housing developments

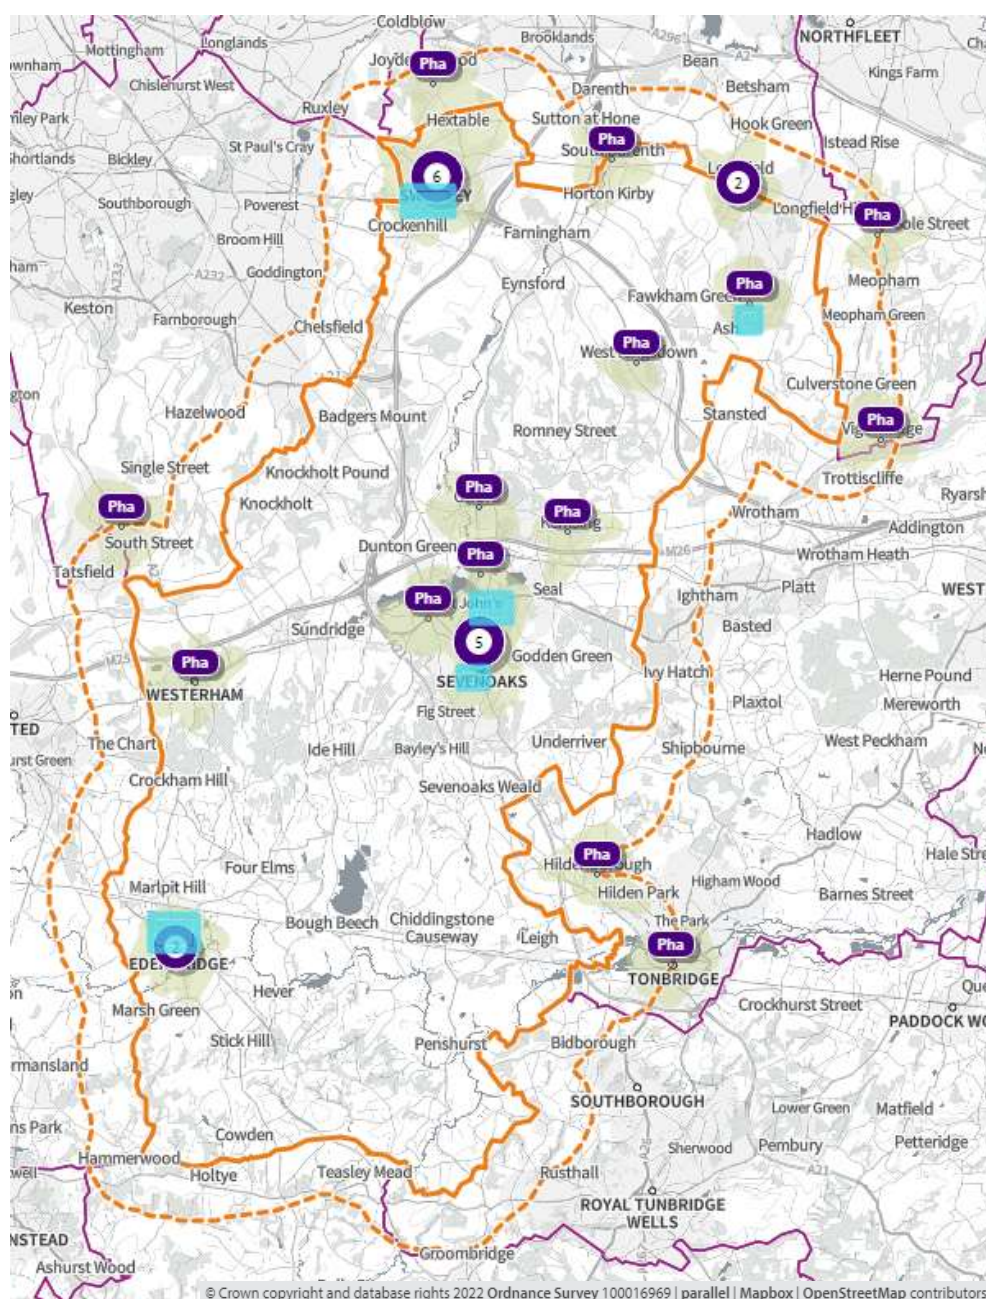

Table 56. Proposed housing developments – number of dwellings per year at each development

Site Name	2025
1. Land West of Enterprise Way, Edenbridge	276

Map 152. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open until at least 7pm on weekdays

In **map 153**, below, the green shaded areas are within **20-minutes by public transport** of a community pharmacy that is open until **at least 7pm Monday to Friday** and the blue shaded areas are locations of major housing developments

Map 153. Locations of community pharmacies open until at least 7pm on weekdays, proposed housing developments, and areas within 20 minutes of a community pharmacy by public transport on weekday evenings

In **map 154**, below, the green shaded areas are within **20-minutes' walk** of a community pharmacy that is open on **Sundays** and the blue shaded areas are locations of major housing developments

Map 154. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open on Sundays

8. Necessary services: - Gaps in provision

The population of the Sevenoaks locality is well served by pharmacies with good access at all times. The access is assisted by the presences of three 100-hour pharmacies. No gaps in provision have been identified.

9. Improvements or better access: Gaps in provision

No gaps in provision have been identified.

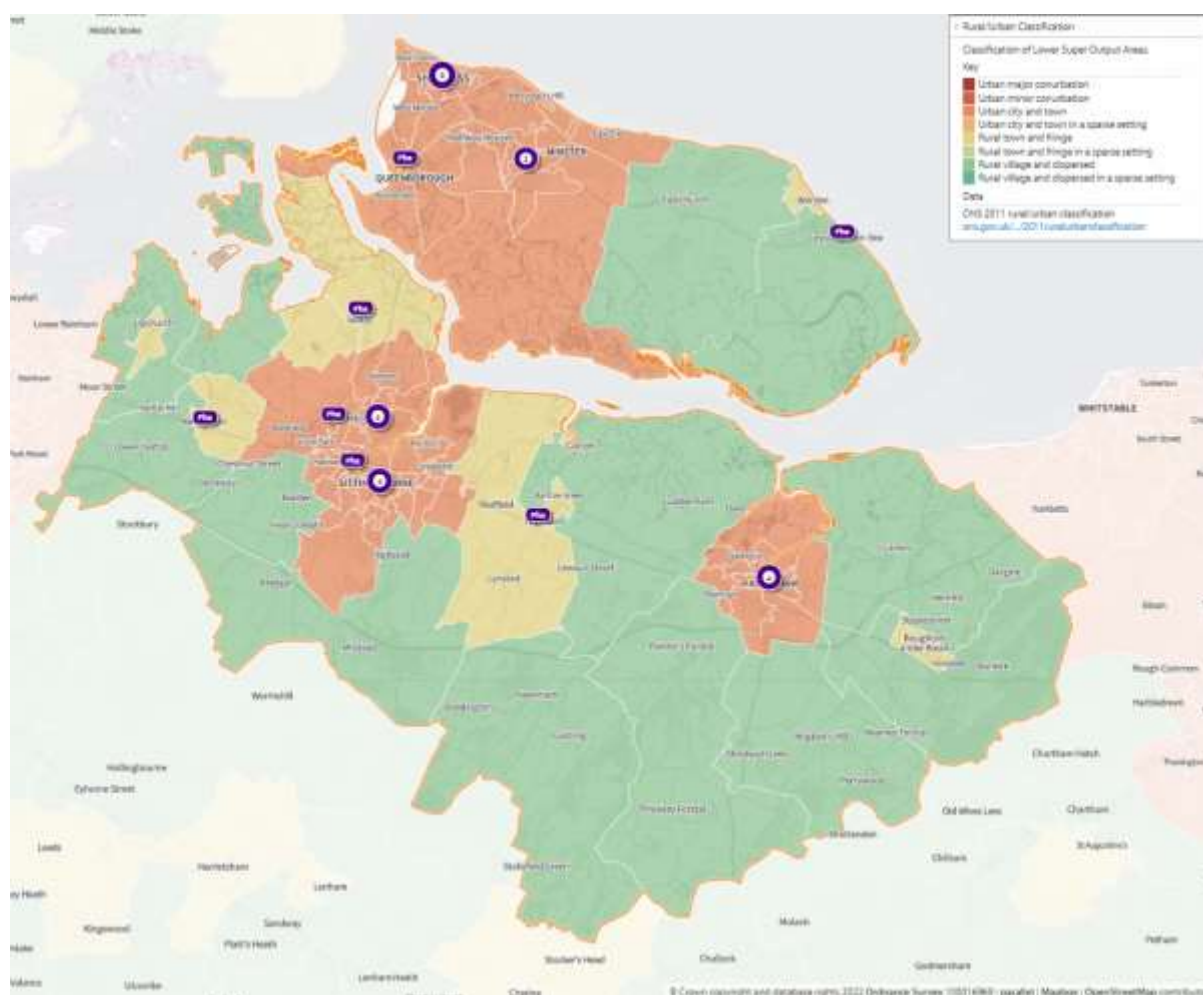

16 Swale Council Locality

1. Key Facts

Swale is a local government district in the north of the county. It covers an area of 400 square km. The population is concentrated in and around the three main towns of Sittingbourne, Sheerness and Faversham. Beyond these towns the district is rural and sparsely populated. The district contains the Isle of Sheppey, which is separated from the mainland by The Swale waterway, and a significant prison population at HMPs Elmley, Stanford Hill and Swaleside.

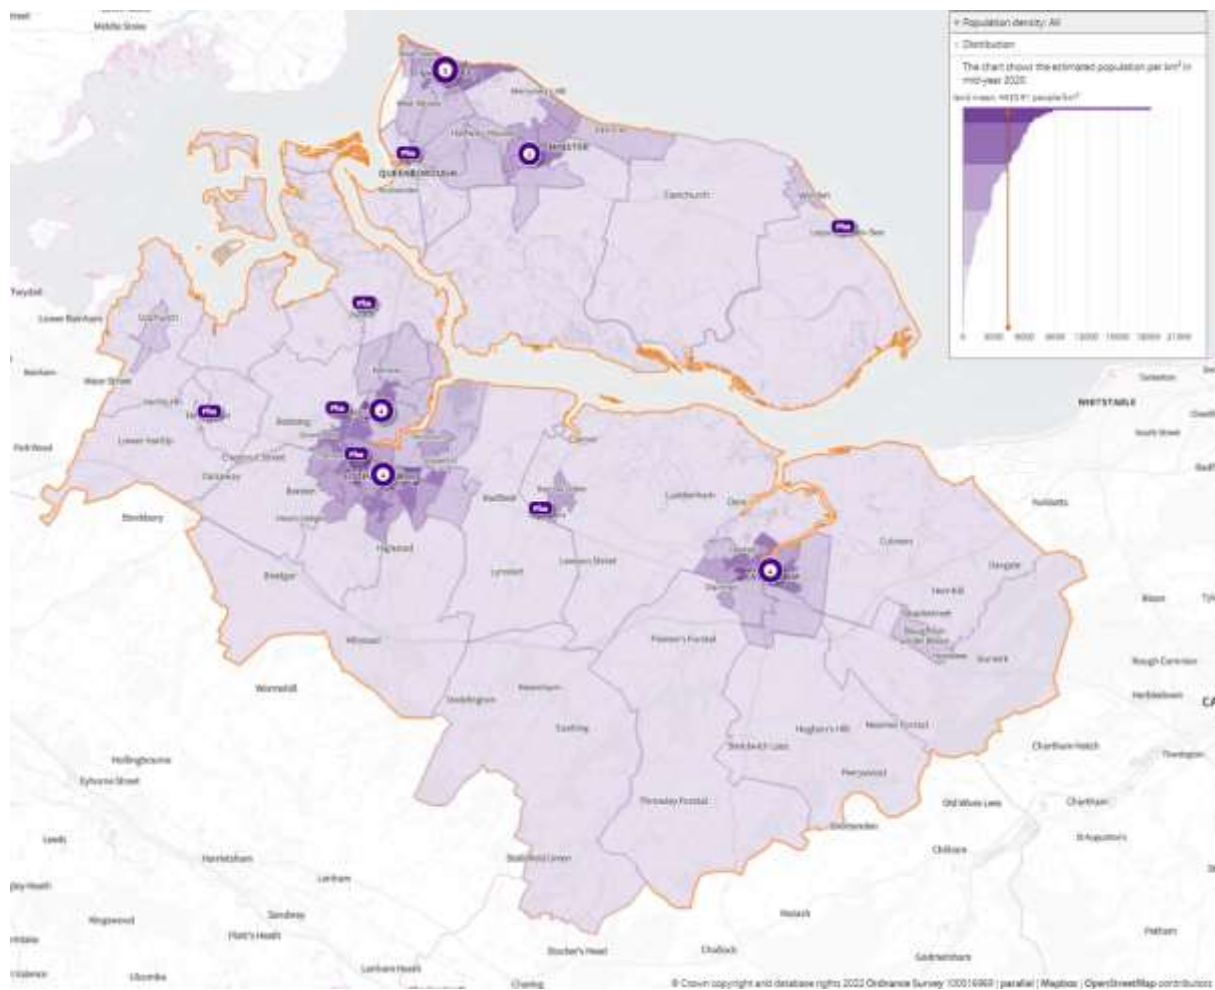

Urban/Rural Classification

Map 155. Rural/urban classification of lower super output areas

Population

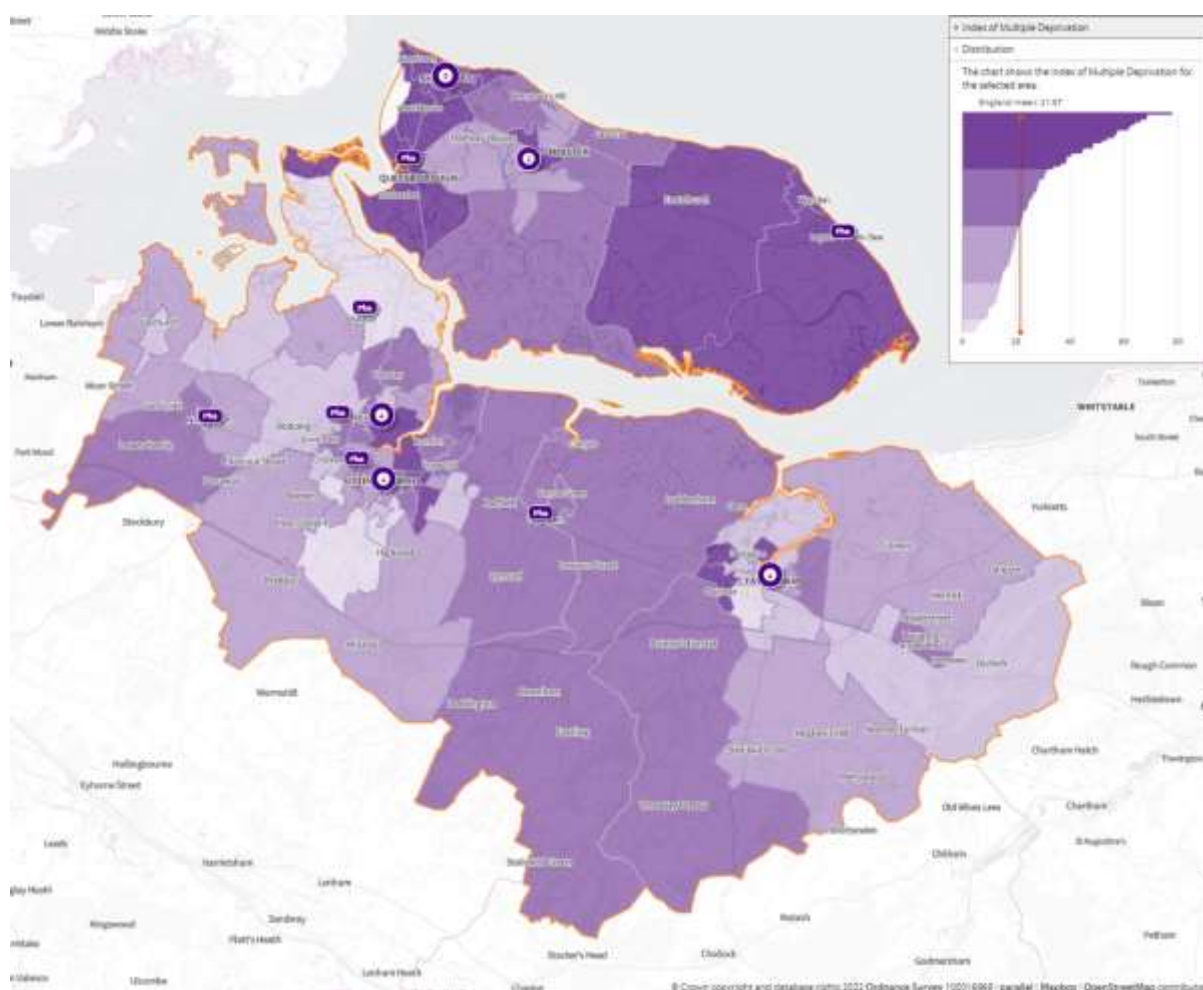

Map 156. Population density of lower super output areas overlaid with locations of pharmacies

Deprivation

Map 157 below shows the areas of deprivation in the Swale District locality. Swale is the second most deprived district in Kent with a significant number of the population in England's most deprived 10%. Employment rates are similar to the Kent average ⁽⁶³⁾ and educational attainment is significantly lower ⁽⁶⁴⁾.

Map 157. Deprivation of lower super output areas overlayed with locations of pharmacies

Language

English is the main language for all people aged 16 or over in 97% of households in the district. 1.4% of households have no people with English as the main language ⁽²⁾.

Home Ownership

68% of houses are owned either outright (31%) or with a mortgage (37%). The average number of occupants per household is 2.4, the same as the Kent average ⁽²⁾.

Age Distribution

The average age of Swale district residents is 40.6, slightly lower than the Kent average of 41.4. 19.3% of the population is over 65 and 20.5% 0-15 ⁽²⁾. Life expectancy at birth is 78 for males and 82 for females ⁽⁴⁶⁾.

Economy

By industry, the top three employers in the Swale district are wholesale and retail trade (14.9%), manufacturing (11.9%), transport and storage, and education (9.4%) ⁽¹⁵⁾. In comparison to Kent as a whole, the district has a much higher proportion of transportation/storage, manufacturing, and agriculture, forestry and fishing jobs, reflecting the districts topography ⁽¹⁵⁾.

Car Ownership

20% of households in Swale district do not have a car or van in the household, this is similar to the Kent average ⁽¹³⁾.

Care Homes

There are a considerable number of care homes in the Swale area. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services.

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are 27 Community pharmacies providing dispensing services in the Swale locality and no dispensing GP surgeries. There are two distance selling pharmacies in the locality.

Each pharmacy provides on average services for 5,593 of the area’s population. Figure 42 below shows how this compares with the other localities of Kent.

Figure 42 Number of people per pharmacy in each locality

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There is a small percentage of prescriptions generated in the area that are dispensed in neighbouring areas and a slightly higher percentage that are generated outside the locality and dispensed by Swale community pharmacies ⁽¹⁾.

- 3,266 outside prescribers dispense in Swale
 - 8.3% of all items dispensed in Swale
- 26 prescribers in Swale
 - 91.7% of all items dispensed in Swale
- 46 dispensers in Swale
 - 92.1% of all items prescribed in Swale
- 1,551 dispensers outside of Swale
 - 7.9% of all items prescribed in Swale

Pharmacy locality: Maps 1 and 2 above show the locality of the community pharmacies.

Opening times: All are open Monday to Friday, with 24 opening on Saturdays and 5 opening on Saturdays and Sundays. This gives a weekly opening hours range of 40 to 102 hours and an average of 58 hours of opening each week. 22 of these pharmacies open for at least one hour after 5pm on weekdays.

Table 57 below show the core and supplementary hours of each pharmacy ⁽⁶⁵⁾.

Table 57. Opening times for all pharmacies

Pharmacy	Total core weekly hours	Total supplementary weekly hours	Total weekly hours	Max. hours open after 5pm at least 1 day/week	Saturday hours	Sunday Hours

Access to Community Pharmacies

Travel times

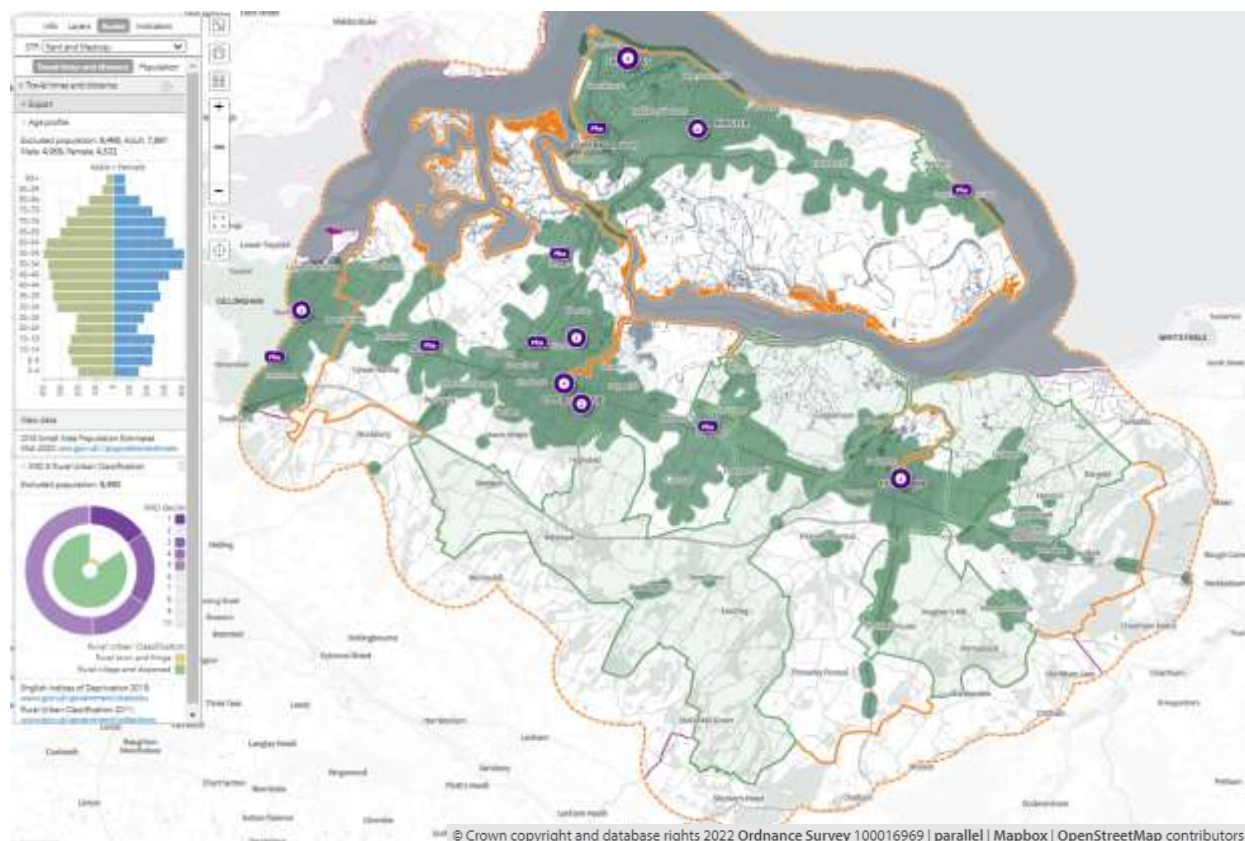

In **map 158**, below, access during **core opening hours** is shown in olive green shaded areas are **within a 20-minute walk** of a community pharmacy. 30,055 (19.9%) people are not within a 20-minute walk. 24.5% (7,071) of 65+ population is not within a 20-minute walk of a community pharmacy.

Map 158. Locations of community pharmacies and lower super output areas not within a 20-minute walk

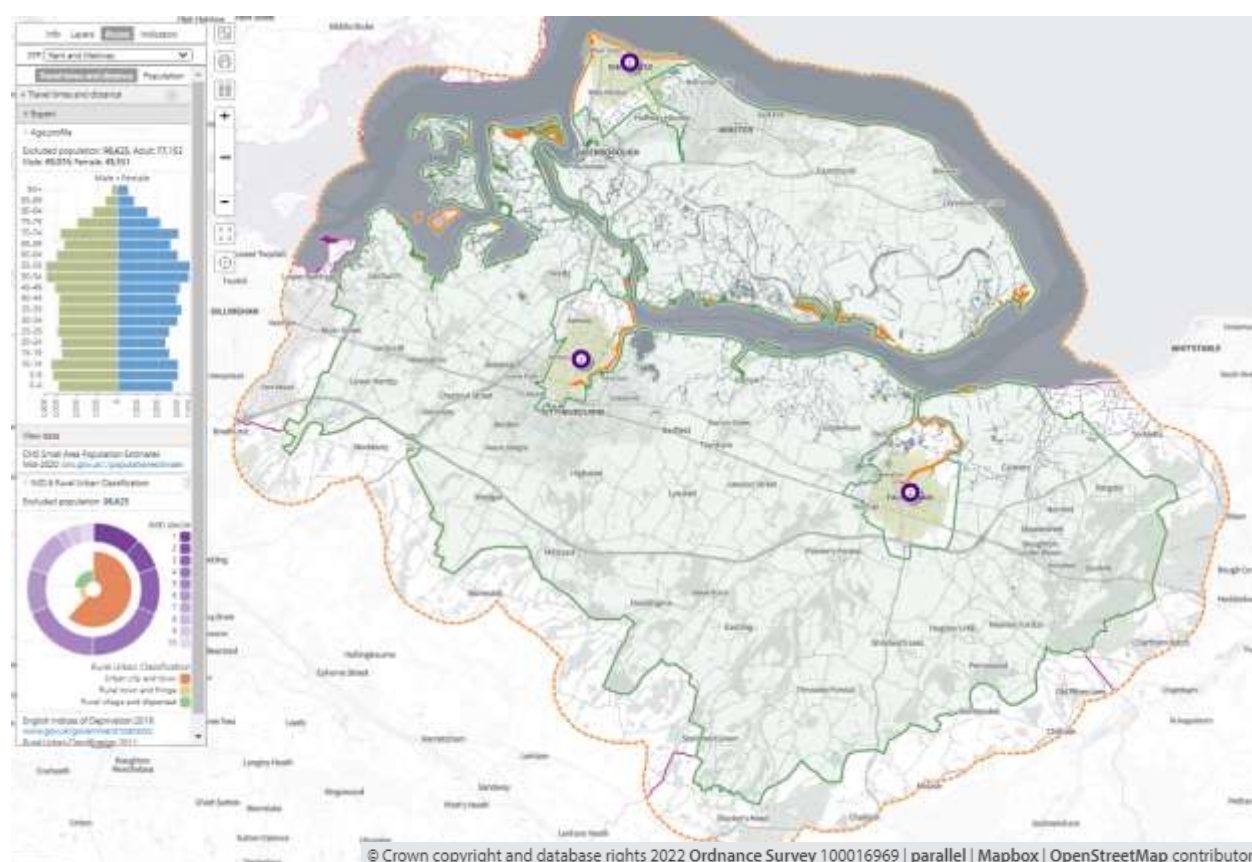

In **map 159**, below, the green shaded areas are **within 20-minutes by public transport** of a community pharmacy on **weekdays**. 9,490 (6.3%) people are not within 20-minutes by public transport of a community pharmacy. 7.4% (2,146) of 65+ population is not within a 20-minute walk of a community pharmacy.

Map 159. Locations of community pharmacies and lower super output areas not within 20-minutes by public transport on weekday mornings

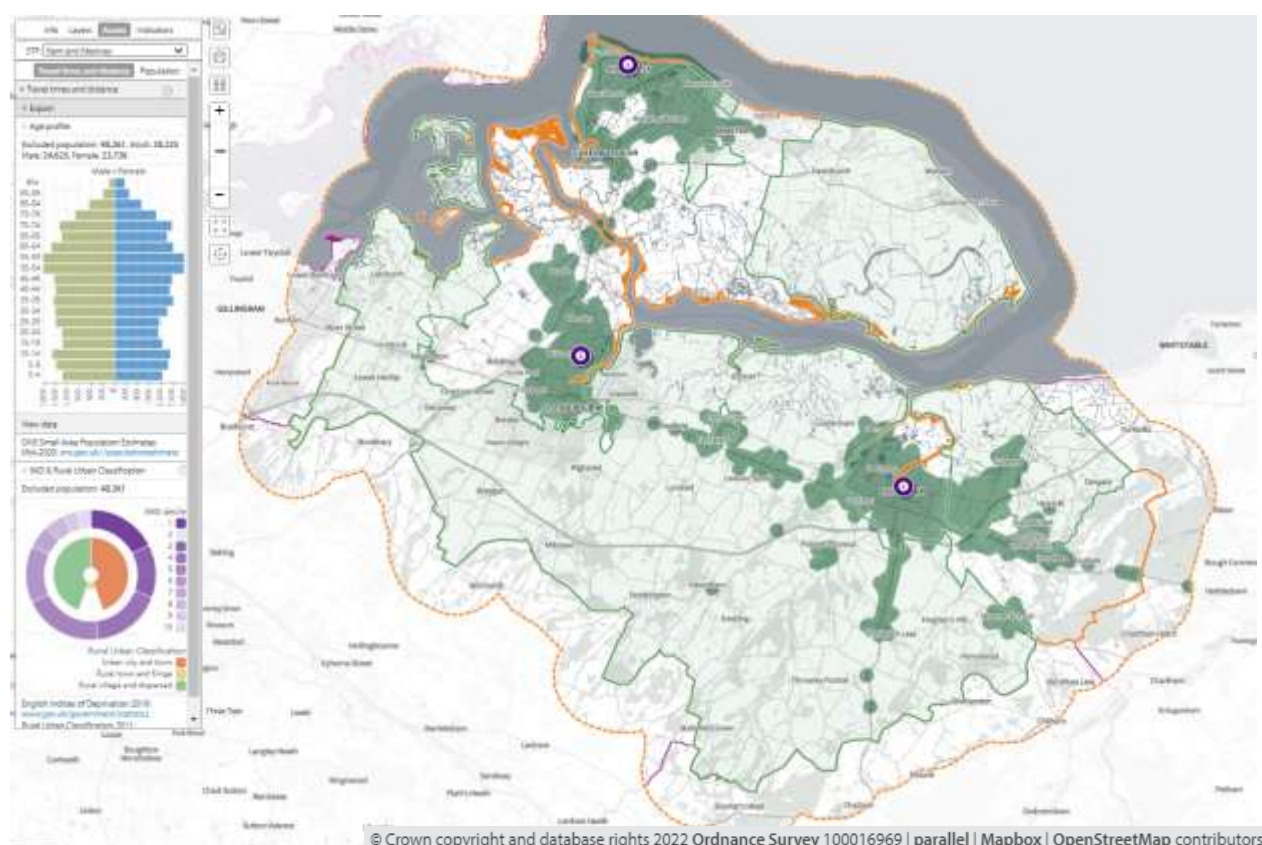

In **map 160**, below, the olive-green shaded areas are **within a 20-minute walk** of a community pharmacy that opens until at least **7pm on weekdays**. 98,625 (65.3%) people are not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays. 69.9% (20,173) of 65+ population is not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays

Map 160. Locations of community pharmacies open until at least 7pm on weekdays and lower super output areas not within a 20-minute walk

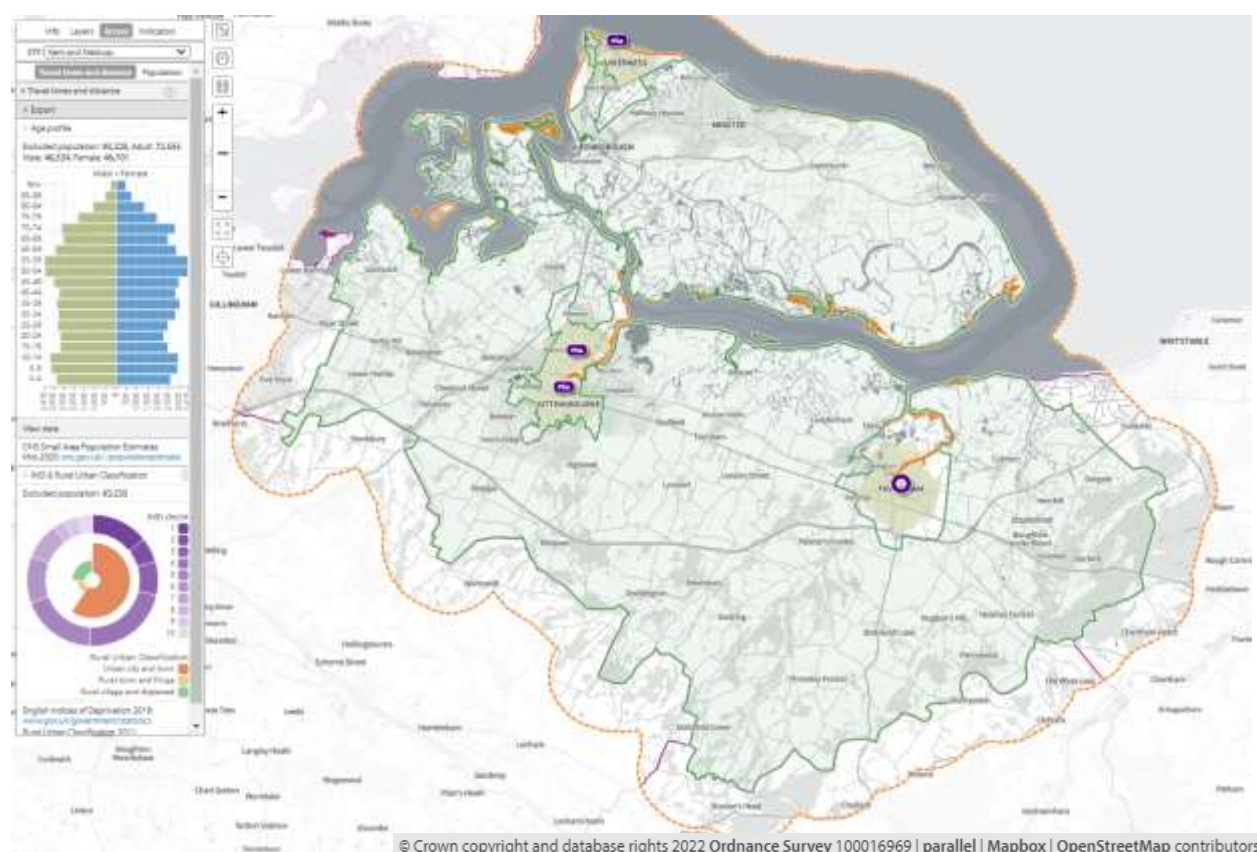

In **map 161**, below, the green shaded areas are within **20-minutes by public transport** of a community pharmacy that opens past 7pm on weekdays. 48,361 (32%) people are not within 20-minutes by public transport that opens past 7pm on weekdays. 34.8% (10,024) of 65+ population is not within 20 minutes by public transport of a community pharmacy that opens past 7pm on weekdays

Map 161. Locations of community pharmacies open until at least 7pm and lower super output areas not within 20-minutes by public transport on weekday evenings

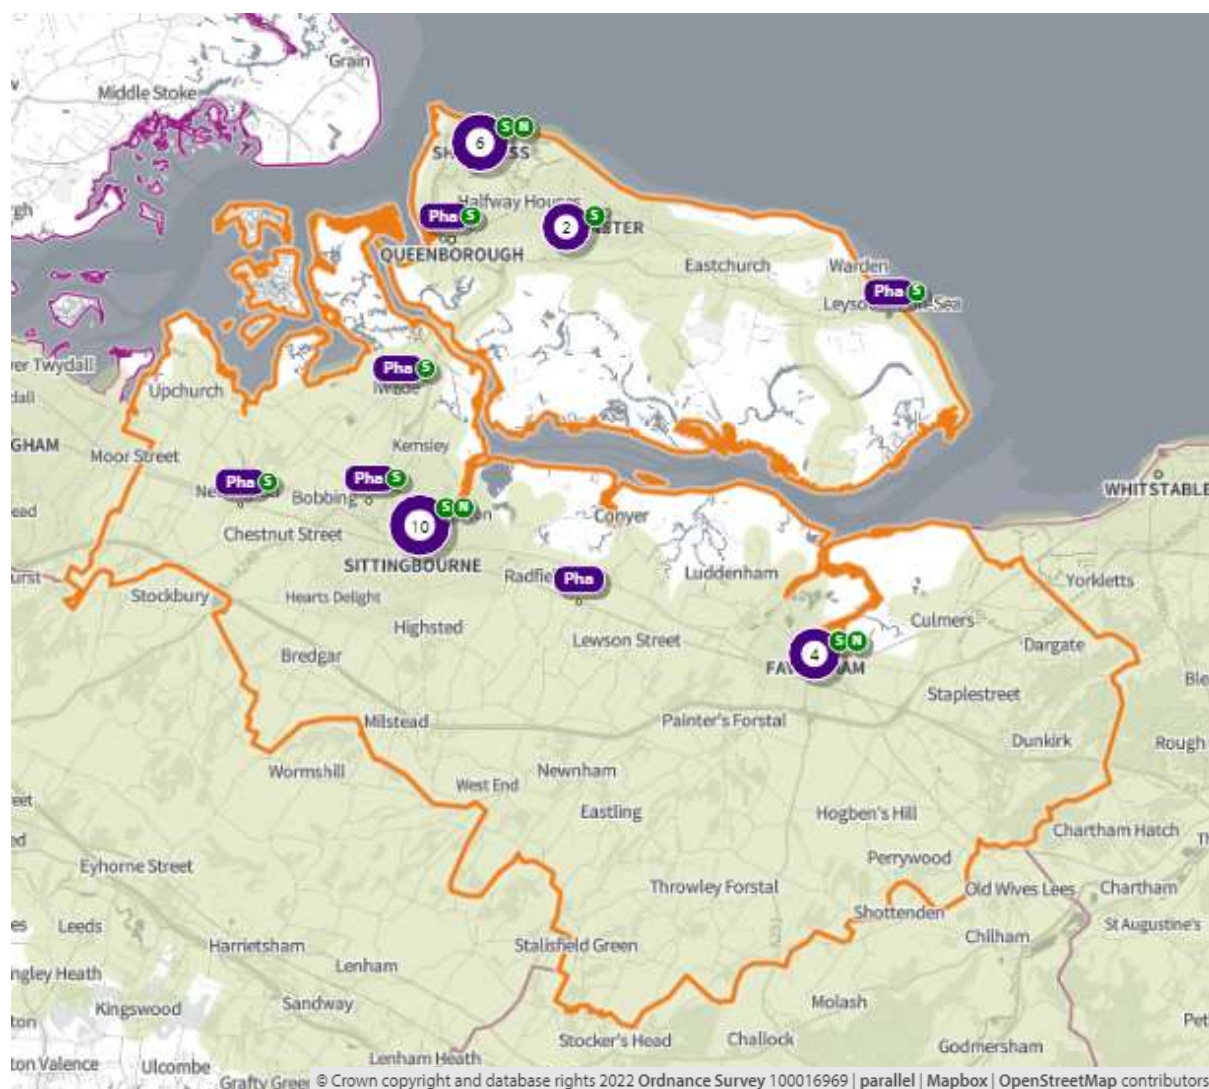

In **map 162**, below, the olive-green shaded areas are **within a 20-minute walk** of a community pharmacy that **opens on Sundays** 61.7% (93,235) of the population is not within a 20 minute walk of a community pharmacy that opens on Sundays. 63.7% (18,375) of 65+ population is not within a 20-minute walk of a community pharmacy that opens on Sundays

Map 162. Locations of community pharmacies open on Sundays and lower super output areas not within a 20-minute walk

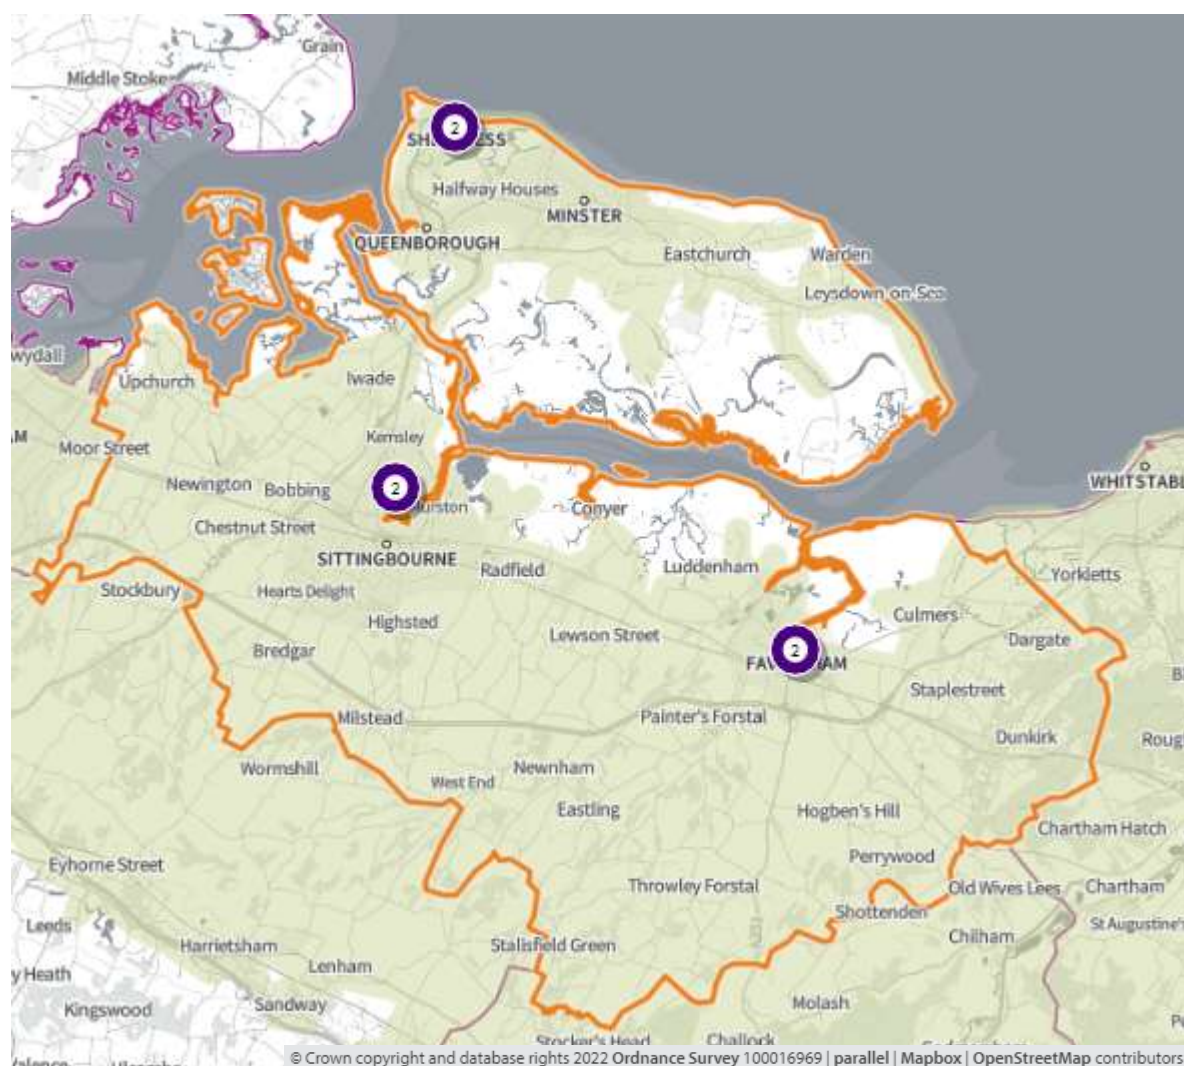

In **map 163**, below, access during **core opening hours, Saturdays and Sundays** is shown. The olive-green shaded areas are within a **20-minute drive** of a community pharmacy. The entire population is within a 20-minute drive.

Map 163. Locations of community pharmacies and areas within 20-minutes by car

In **map 164**, below, the green shaded areas are within **20-minutes by car** of a community pharmacy that opens **until at least 7pm on weekdays**. The entire population is within a 20-minute drive.

Map 164. Locations of community pharmacies open until at least 7pm on weekdays and areas within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The charts below indicate the numbers of prescriptions dispensed in and out of the locality

- 2.53 million items prescribed in Swale
 - 2.33 million items dispensed in Swale
 - 2.15 million (92.6%) via Electronic Prescription Service
 - 198,896 dispensed outside of the district
 - 90,000 distance selling
 - 35,984 Dartford
 - 28,775 Canterbury
- 2.54 million items dispensed in Swale
 - 2.44 million items dispensed by community pharmacies in Swale
 - 102,352 dispensed by 15 GP practices:
 - St George's Medical Centre – 60,766
 - Memorial Medical Centre – 6,310
 - 210,268 items prescribed outside borough i.e. more coming in than going out

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling premises
- Which are located near to where they work, shop or visit for leisure or other purposes.

Taking into account this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy and do access pharmacy services within the locality.

4. Other relevant services: current provision

The following advanced services were delivered by pharmacies in the Swale locality in 2020/21.

Table 58. Number of pharmacies providing advanced services

Advanced service name	No. of pharmacies
New Medicine Service	22
Appliance Use Review	0
Hypertension Service [‡]	24
Stoma Appliance Customisation	0
Community Pharmacist Consultation Service (CPCS) [‡]	22
Hepatitis C Antibody Testing Service	0
Seasonal Influenza Vaccination Advances Service	24
Covid Vaccination Service*	0
Covid Home Delivery Service*	21
Covid lateral flow device distribution*	30

*Specific to the Covid-19 pandemic

[‡]Services introduced during the year of study

Please note that three services were specific to the Covid-19 pandemic (Covid vaccination, homedelivery and lateral flow device distribution services) and that others were new services (CPCS, Hypertension service) introduced within the year. There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- Dr Witts Practice, Sheerness provides evening surgery 6.30pm-7.50pm on Tuesdays
- Faversham Medical Practice is open 8am-1pm on Saturdays
- Iwade Health Centre provides an evening surgery 6pm-8pm on Mondays
- Upchurch Surgery provides an evening surgery 6.30pm-7.30pm on Wednesdays
- Memorial Medical Centre is open 8pm on Mondays
- Newton Place Surgery is open 7.30am-8pm Monday-Friday
- The Chestnuts Surgery is open from 7am Monday-Friday
- The Meads Medical Practice is open until 8pm Monday-Wednesday

There is a minor injuries unit situated at Faversham Health Centre run by Faversham Medical Practice which is open daily 8am-8pm. There are two further minor injuries units situated at Sittingbourne Memorial Hospital and Sheppey Community Hospital, both open daily 9am-9pm.

There is a walk-in centre situated at Sheppey NHS Healthcare Centre which is open daily 8am-7pm.

There are also drug and alcohol services, Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality.

The number of prescriptions from these services is shown below:

- 24 pharmacies dispensed a total of 8,537 (mean = 356, range = 1-2,684) items from drug and alcohol services
- All 30 pharmacies dispensed a total of 2,191 (mean = 73, range = 21-240) items from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- 23 pharmacies dispensed a total of 92 items (mean = 4, range = 1-15) from KCHFT
- All 30 pharmacies dispensed a total of 22,228 items (mean = 741, range = 1-1,575) from Kent and Medway hospitals

6. Choice with regard to obtaining pharmaceutical; services

As can be seen from section 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

Figure 43 below shows the predicted increase in the population of the Swale locality continuing to grow over the lifetime of this PNA.

Figure 43 Swale population forecast

 **1 pharmacy per 5,881 people in 2025**

The population of Swale district is projected to increase by 5% to 158,800 in 2025. This is an increase of 400 people per pharmacy from 2020. As stated in the community pharmacy contracts survey the pharmacies in the Swale locality do have capacity to increase their dispensing and other services.

Map 165 below shows where there are major housing developments planned in the coming years and the table indicates the number of dwellings planned for each site. With an average of 2.4 people per proposed dwelling, by 2025 these sites will provide accommodation for approximately 8,870 people.

Map 165. Location of housing developments

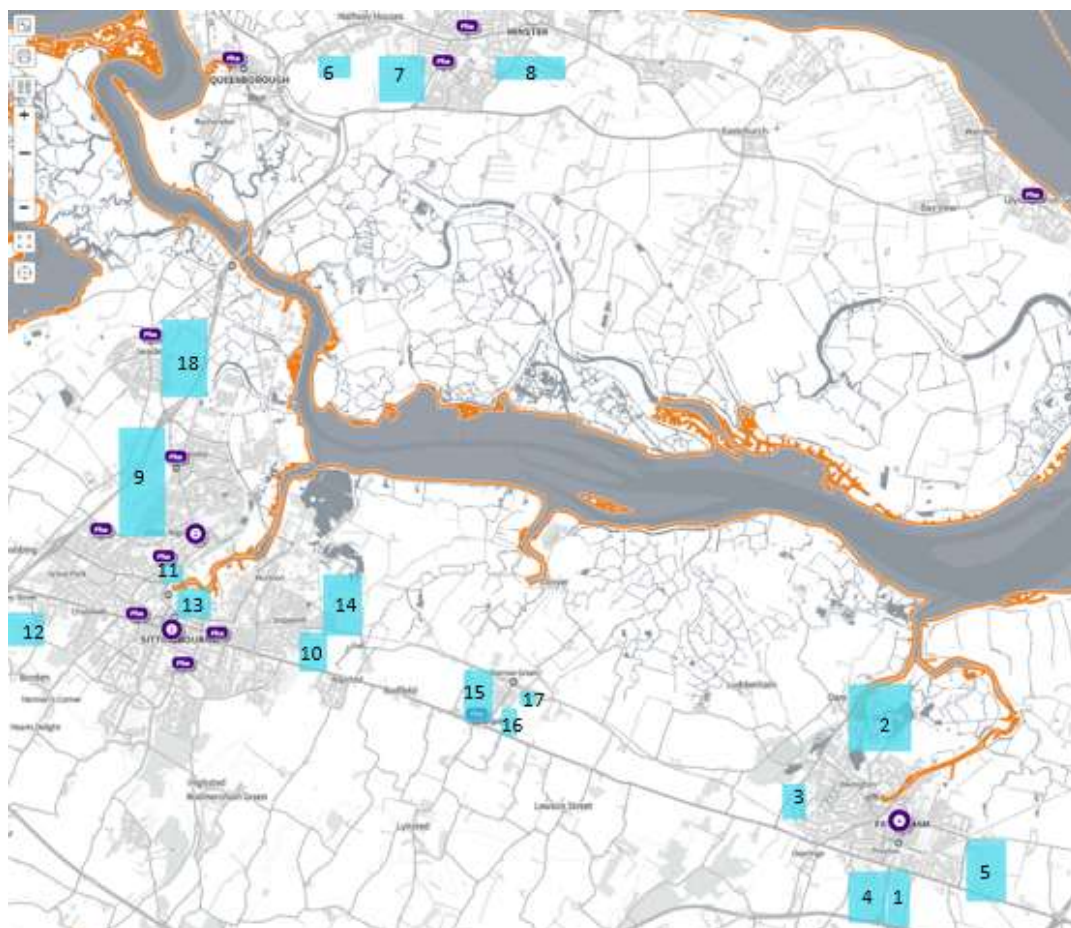

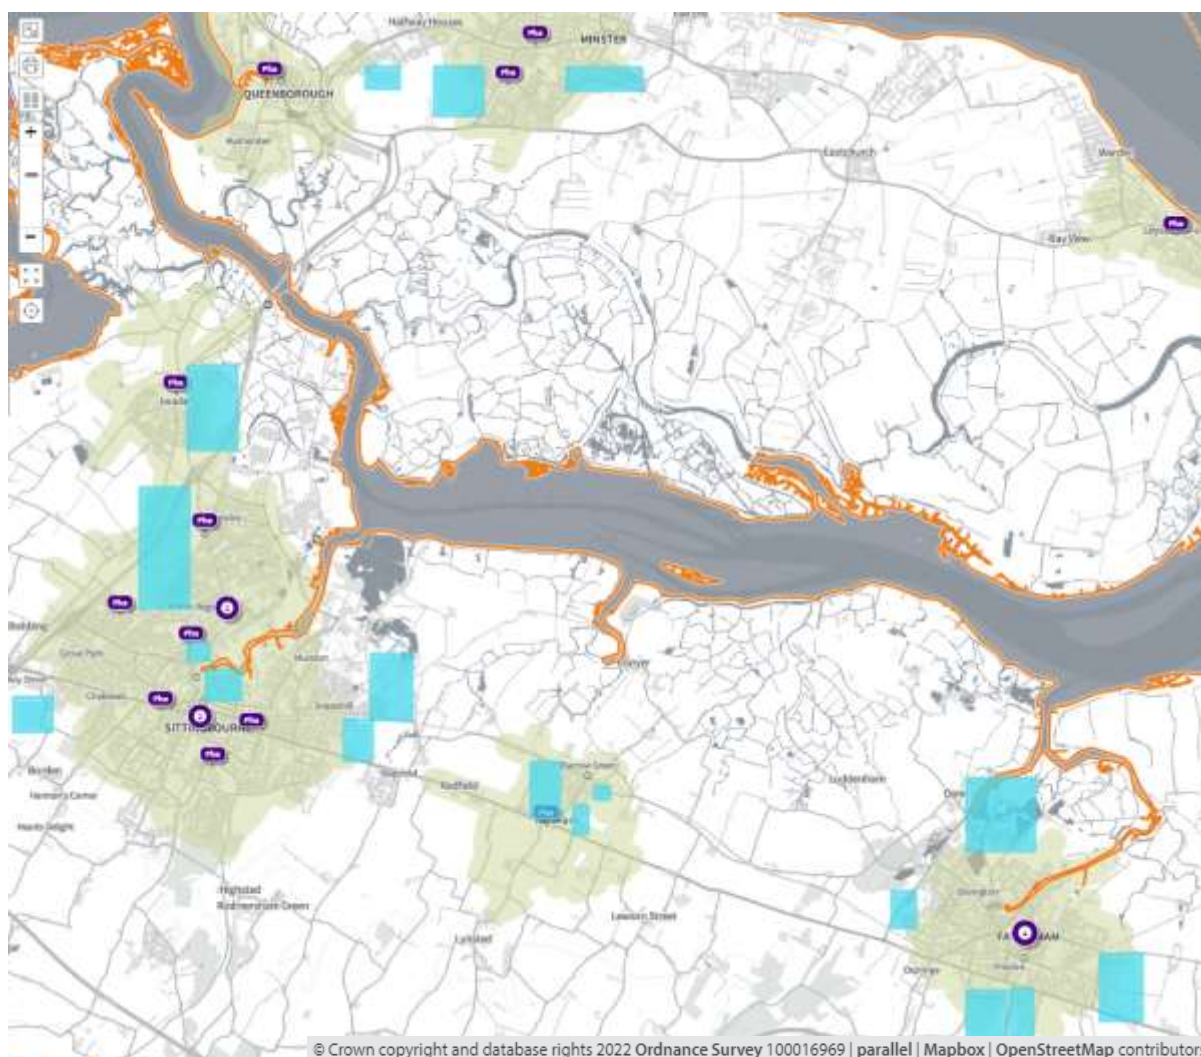

Table 59. Proposed housing developments – number of dwellings per year at each development

Site Name	2026 Site Name	2026
1. Preston Fields, Faversham	200 10. Stones Farm, Sittingbourne	390
2. Oare gravel workings, Faversham	200 11. Milton Pipes, Sittingbourne	242
3. Western Link, Faversham	197 12. South-west, Sittingbourne	200
4. Perry Court Farm, Faversham	100 13. Crown Quay Lane, Sittingbourne	180
5. Lady Dane Farm, Faversham	80 14. North-east, Sittingbourne	100
6. Belgrave Road, Halfway	153 15. Frognal Lane, Teynham	300
7. Barton Hill Drive, Minster	200 16. Station Road, Teynham	46
8. Thistle Hill, Minster	328 17. Barrow Green Farm, Teynham	30
9. North-west, Sittingbourne	450 18. Iwade expansion	300

In the following maps access, with 20 minutes by walking, public transport and driving from these new developments to community pharmacies is shown in the following maps. The maps shown access on different days and times of the week.

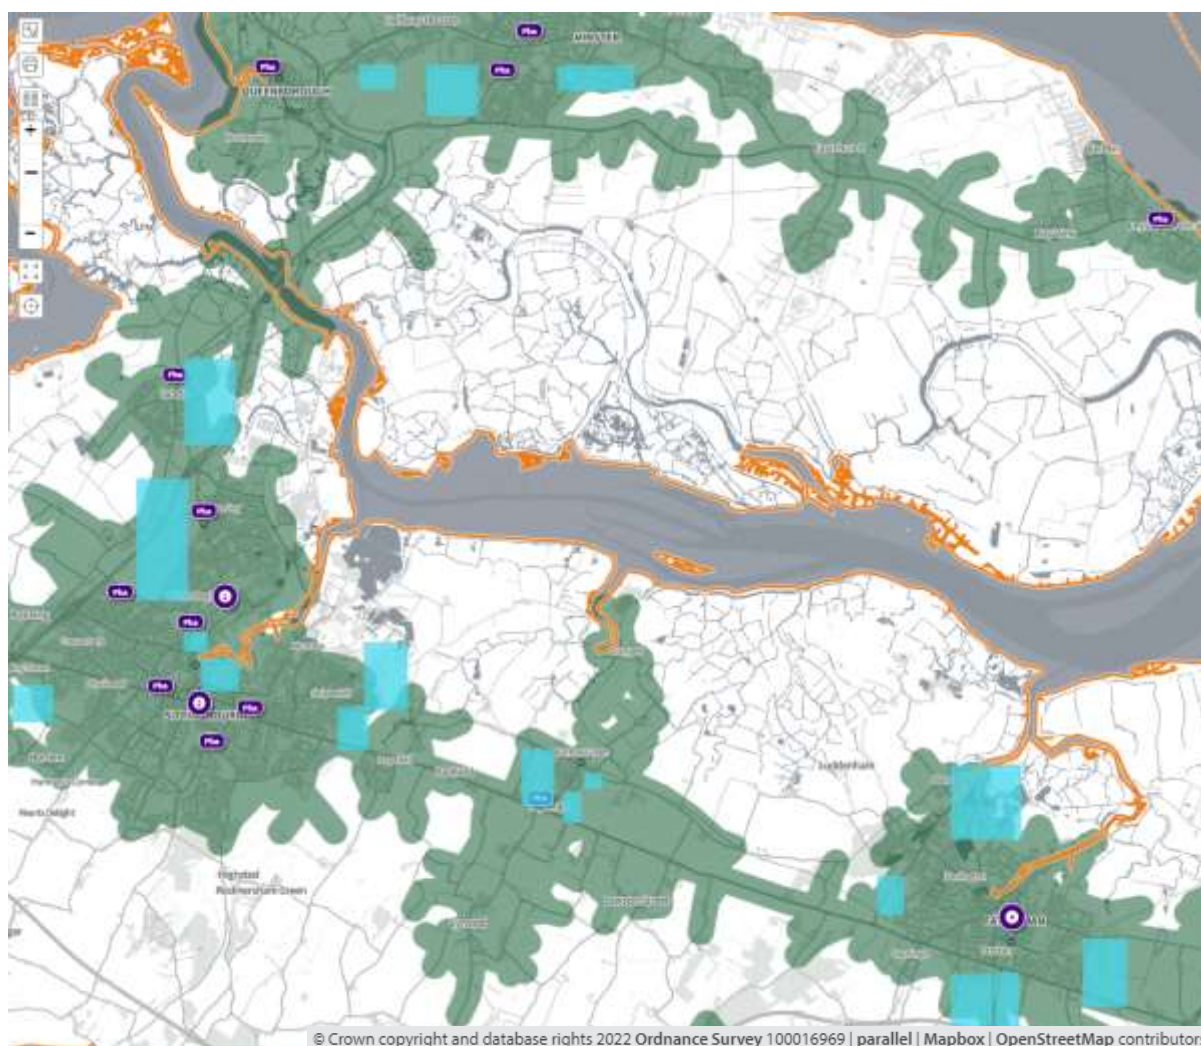

In **map 166**, below, the green shaded areas are within a **20-minute walk of a community pharmacy** and the blue shaded areas are locations of major housing developments.

Map 166. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy

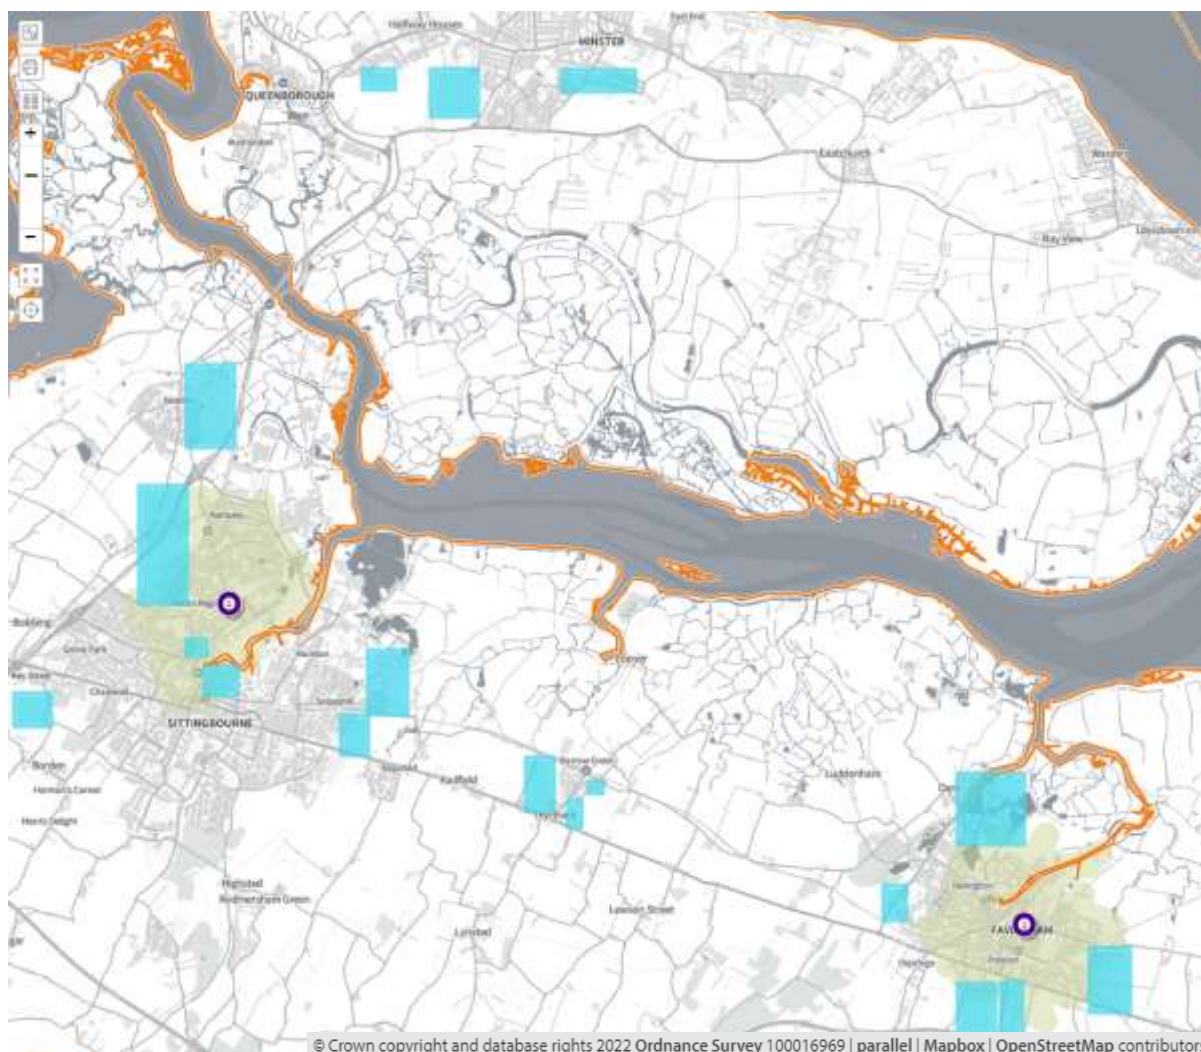

In **map 167**, below, the green shaded areas are within **20-minutes by public transport** of a community pharmacy and the blue shaded areas are locations of major housing developments.

Map 167. Location of community pharmacies, proposed housing developments, and areas within 20 minutes of a community pharmacy by public transport on weekday mornings

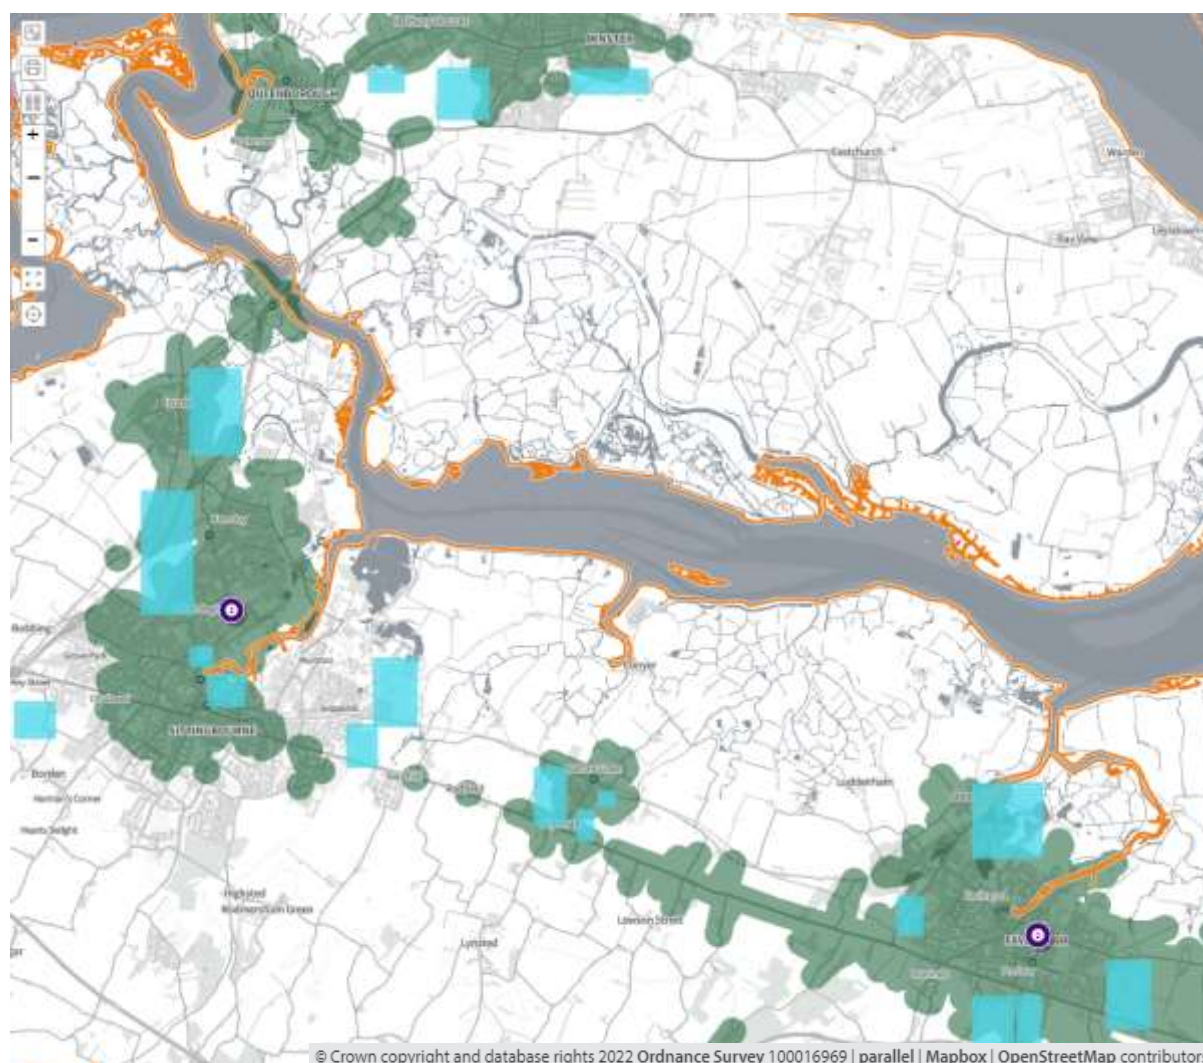

In **map 168**, below, the green shaded areas are within a **20-minute walk** of a community pharmacy that is **open until at least 7pm** and the blue shaded areas are locations of major housing developments

Map 168. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open until at least 7pm on weekdays

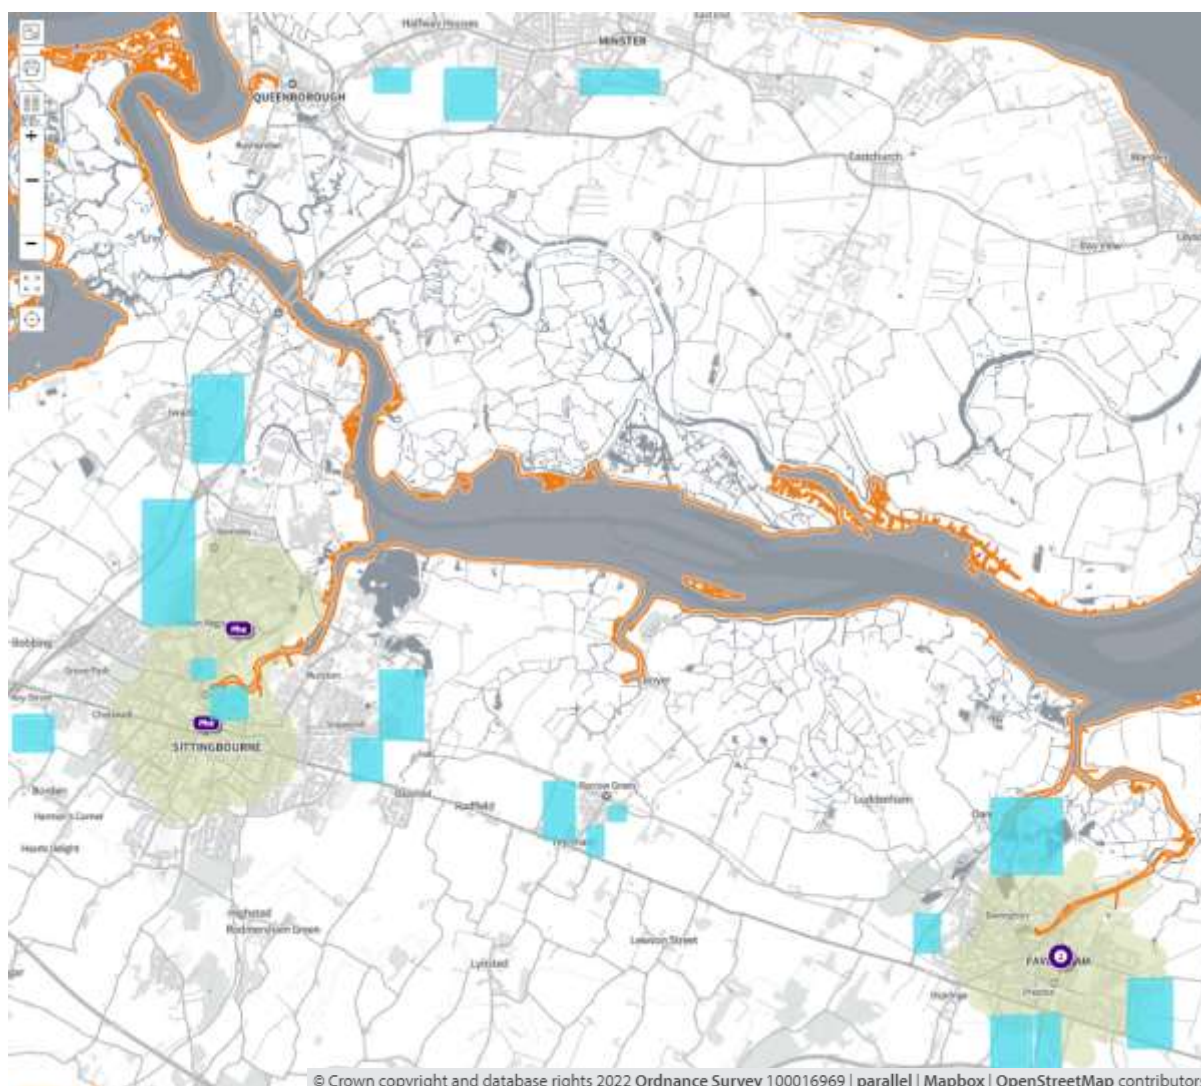

In **map 169** the green shaded areas are within **20-minutes by public transport** of a community pharmacy that is **open until at least 7pm Monday to Friday** and the blue shaded areas are locations of major housing developments.

Map 169. Locations of community pharmacies open until at least 7pm on weekdays, proposed housing developments, and areas within 20 minutes of a community pharmacy by public transport on weekday evenings

In **map 170**, below, the green shaded areas are **within 20-minutes' walk** of a community pharmacy that is open on **Sundays** and the blue shaded areas are locations of major housing developments

Map 170. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open on Sundays

8. Necessary services: - Gaps in provision

There is currently good access to pharmacy services by foot, public transport, and car across the locality. The population is set to increase over the next three years, but the information shows that good access will still be present. All 14 pharmacies that responded to the contractor survey indicated that they had capacity to increase both dispensing and other services. No gaps were identified.

9. Improvements or better access: Gaps in provision

No gaps were identified.

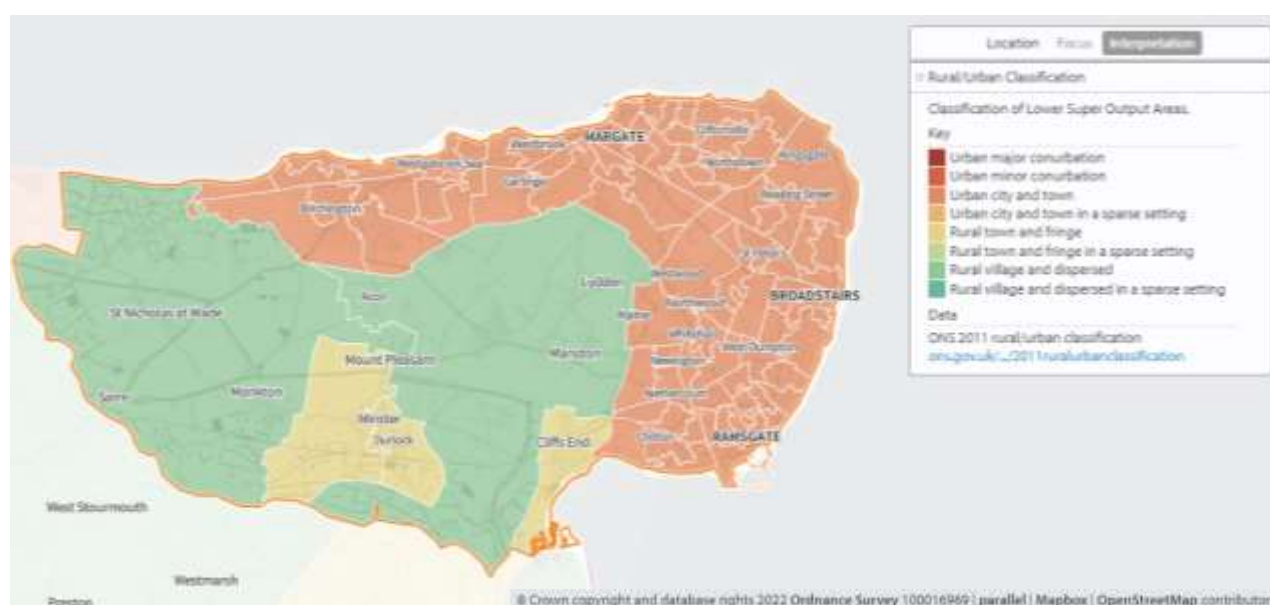

17 Thanet Council Locality

1. Key Facts

The Thanet locality used in this PNA is co-terminus with Thanet district council. It is situated on the north-eastern tip of Kent, it is predominantly coastal, with north, east and southeast facing coastlines, and is bordered by the Canterbury locality to the west and the Dover locality to the south. The main towns are Margate, Ramsgate and Broadstairs situated on the coast.

Urban/Rural classification

Map 171. Rural/urban classification of lower super output areas

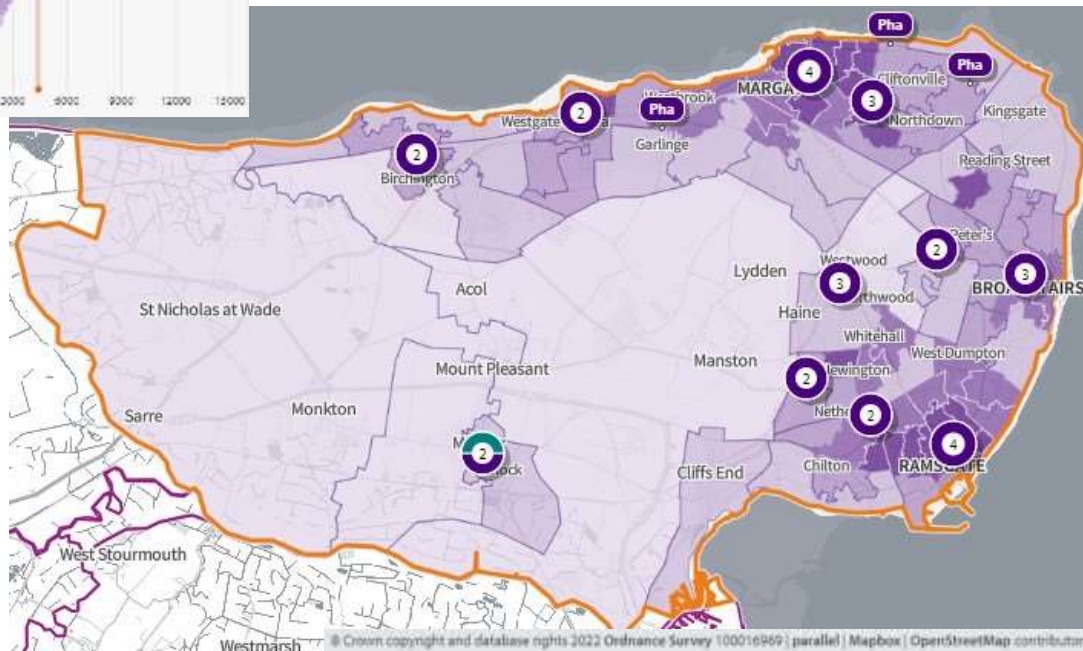

Population

Map 172. Population density of lower super output areas overlayed with locations of pharmacies and dispensing doctors

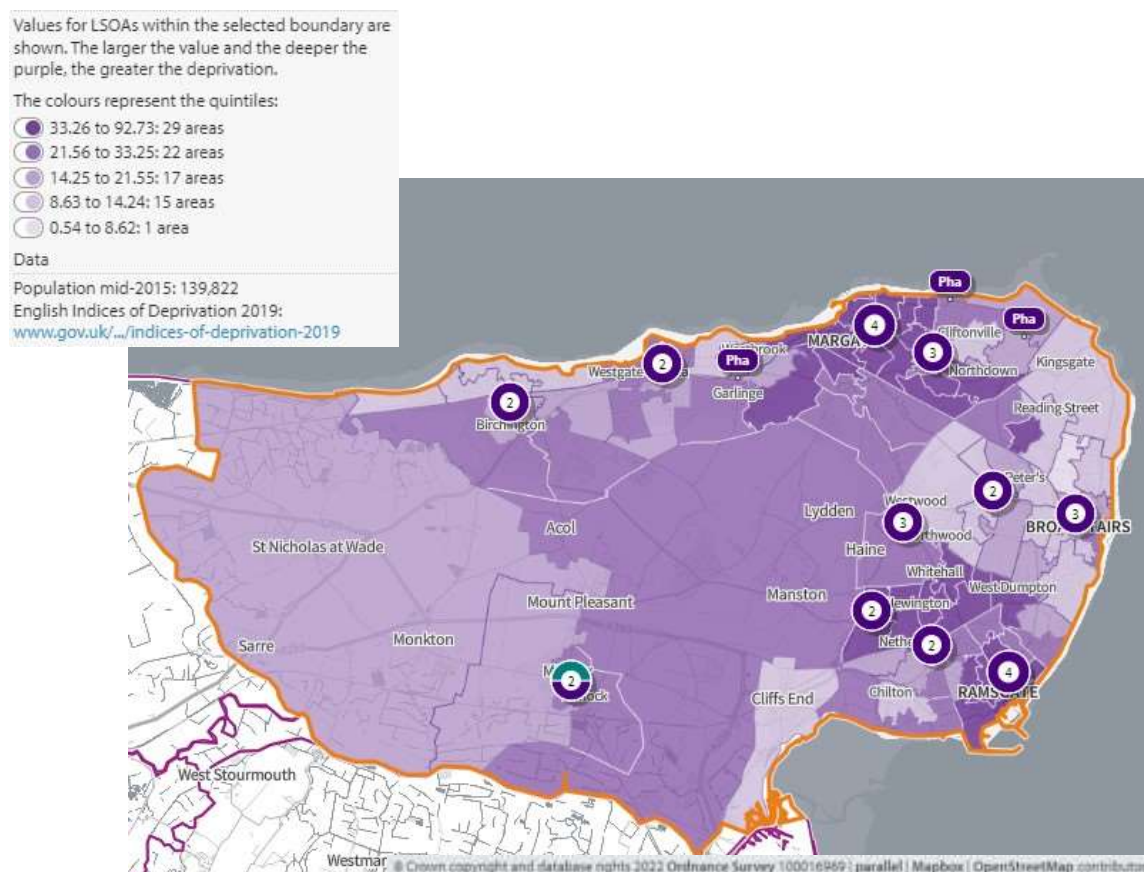

Total population = 141,458

Deprivation

Map 173, below, shows the areas of deprivation in the Thanet locality. Thanet is ranked 1st out of Kent's 12 districts for deprivation. Deprivation is relatively high across the district with a few small pockets of low deprivation, mostly around Broadstairs. There is a relatively large cluster of highly deprived areas in and around Margate. 18 LSOAs are within the top 10% most deprived areas in England. Employment and educational attainment rates are the lowest in Kent, significantly lower than the Kent average ⁽⁶³⁾ ⁽⁶⁴⁾.

Map 173. Deprivation of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Language

English is the main language for all people aged 16 or over in 95% of households in the district. 2.8% of households have no people with English as the main language ⁽²⁾.

House ownership

62% of houses are owned either outright (33%) or with a mortgage (29%). The average number of occupants per household is 2.2, slightly lower than the Kent average of 2.4 ⁽²⁾.

Age

The average age of Thanet district residents is 43.2, higher than the Kent average of 41.4. 24.1% of the population is over 65 and 18.9% 0-15 ⁽²⁾. Life expectancy at birth is the lowest of all Kent districts - 76.5 for males and 81.5 for females ⁽⁴⁶⁾.

Economy

By industry, the top three employers in the Thanet district are human health and social work activities (20.2%), wholesale and retail trade (16.7%), and education (13.1%) ⁽¹⁵⁾. Thanet has a much higher proportion of employees working in human health and social work activities compared to the Kent average (20.2% vs 13.3%) ⁽¹⁵⁾. The proportion of jobs in human health and social work activities (20.2%) is the highest for this industry in Kent and only Ashford matches Thanet for the highest proportion of jobs in a single industry ⁽¹⁵⁾.

Car ownership

30% of households in Thanet district do not have a car or van in the household. This is the highest proportion of all Kent districts ⁽¹³⁾.

Care Homes

There are a considerable number of care homes in the Thanet area. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services.

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are 30 Community pharmacies providing dispensing services in the Thanet locality. That is one pharmacy per 4,715 head of population. Figure 44 below shows how this compares with the other localities of Kent.

Figure 44 Number of people per pharmacy in each locality

22 of the pharmacies open at least one hour after 17:00 on weekdays. 26 are open on Saturdays and 9 open Saturday and Sunday. The weekly opening hours range from 40 to 102, with the average opening hours being 60.65 each week.

In addition, there is one dispensing GP practice in the locality.

There are no distance selling pharmacies in the locality.

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There are 4.3% of prescriptions generated in the area that are dispensed in neighbouring areas and a tiny percentage that are generated outside the locality and dispensed by Thanet locality community pharmacies ⁽¹⁾.

- 1,458 outside prescribers dispense in Thanet
 - 2.2% of all items dispensed in Thanet
- 19 prescribers in Thanet
 - 97.8% of all items dispensed in Thanet
- 46 dispensers in Thanet
 - 95.7% of all items prescribed in Thanet
- 1,029 dispensers outside of Thanet
 - 4.3% of all items prescribed in Thanet

Pharmacy locality: Maps 1 and 2 above show the locality of the community pharmacies and GP dispensing practices.

Opening times

Table 60 below show the core and supplementary hours of each pharmacy ⁽⁶⁵⁾

The Thanet locality has one GP dispensing practice, Minster Surgery CT12 4AB

Access to Pharmacy Services

Travel times

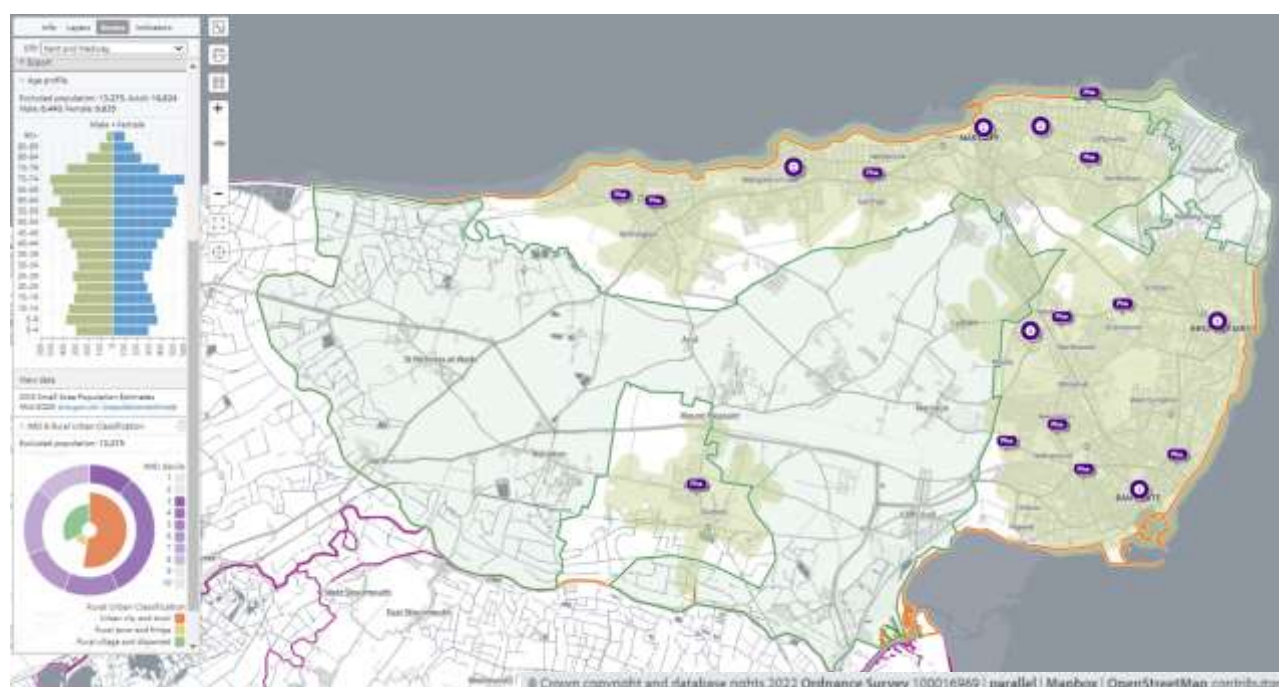

In **map 174**, below, the green shaded areas are within a **20-minute walk** of a community pharmacy/dispensing GP practice. The data indicates that 10,192 (7.2%) of people are not within a 20-minute walk and for those aged over 65 years this figure increases to 2,922 (8.6%) people.

Map 174. Locations of community pharmacies and lower super output areas not within a 20-minute walk

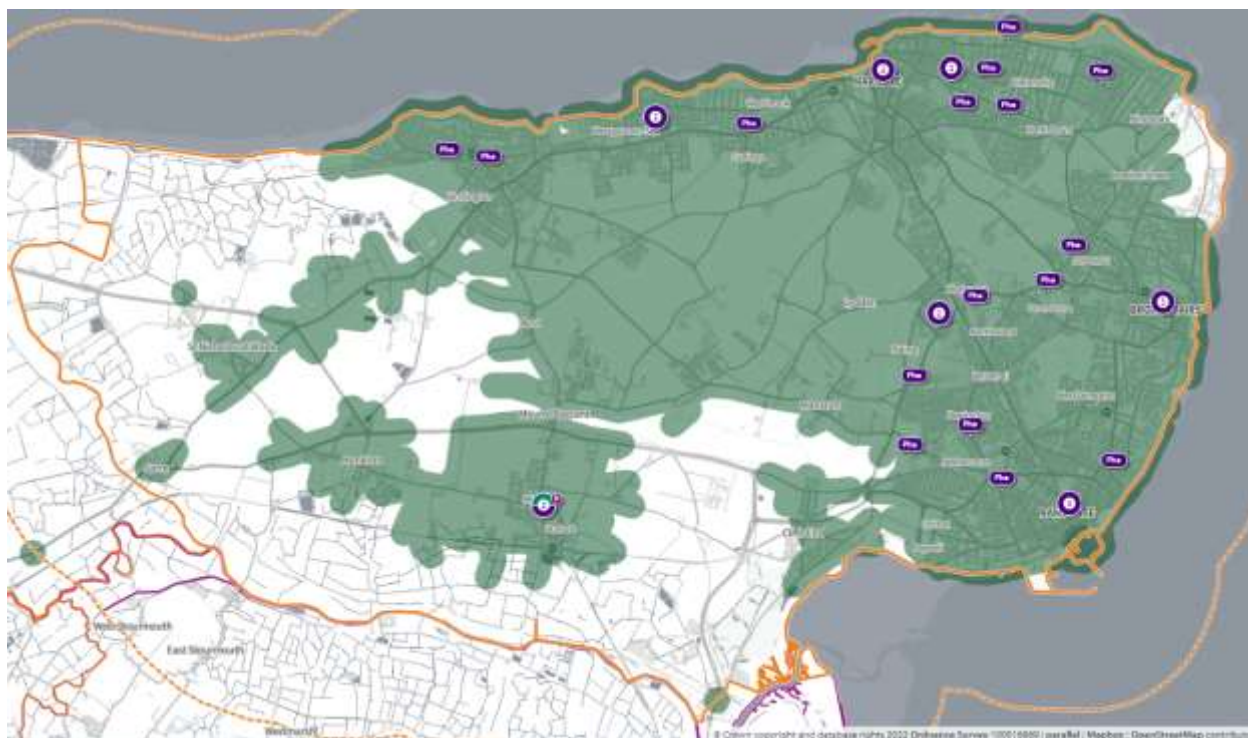

In **map 175**, below, the olive-green shaded areas are within a 20-minute walk of a community pharmacy on a Saturday. 13,275 (9.3%) of people are not within a 20-minute walk on a Saturday and 65+ population 11% (3,724) is not within a 20-minute walk of a community pharmacy on a Saturday.

Map 175. Locations of community pharmacies open on Saturdays and lower super output areas not within a 20-minute walk

Map 176, below, shows **20 minutes public transport** access, as green shaded areas to community pharmacies. The entire population is within 20-minutes by public transport.

Map 176. Locations of community pharmacies and areas within 20-minutes by public transport on weekday mornings

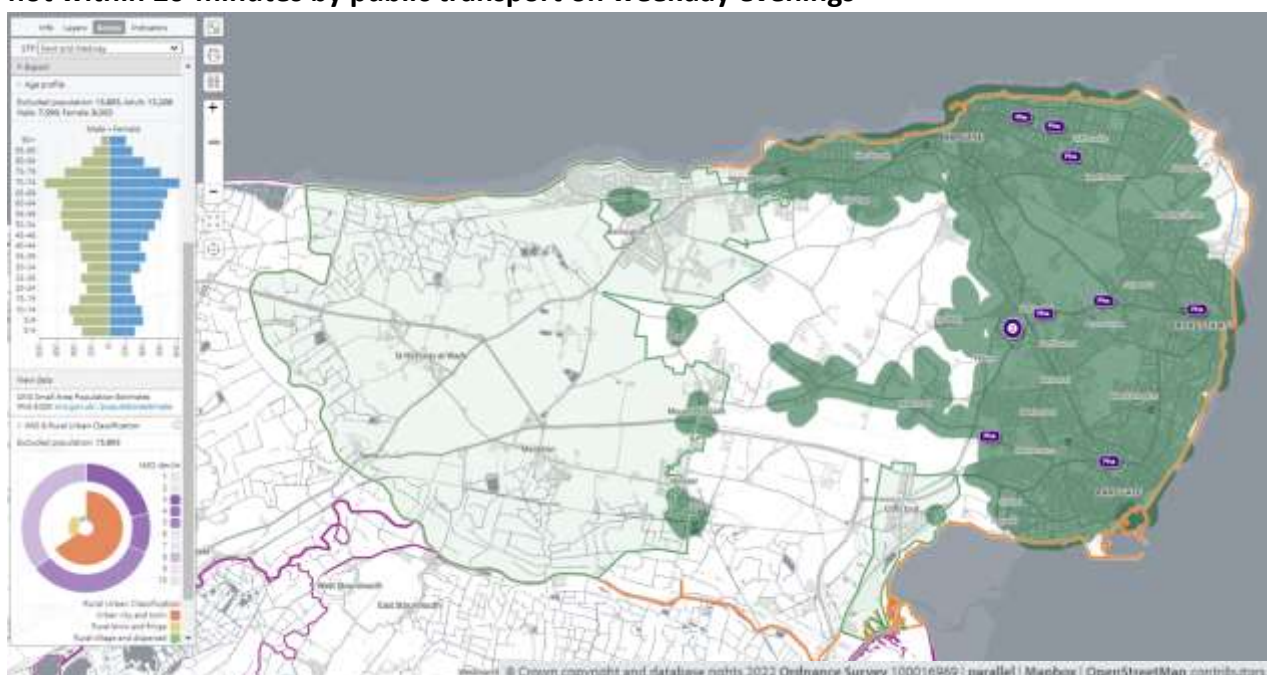

In **map 177** the olive-green shaded areas are within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays. 53,107 (37.5%) people are not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays. 44.5% (15,063) of 65+ population is not within a 20-minute walk of a community pharmacy that opens until at least 7pm on weekdays.

Map 177. Locations of community pharmacies open until at least 7pm and lower super output areas not within a 20-minute walk

In **map 178**, below, the green shaded areas are within 20-minutes by public transport of a community pharmacy that opens past 7pm on weekdays. 15,893 (11.2%) people are not within 20-minutes by public transport that opens past 7pm on weekdays. 16.1% (5,445) of 65+ population is not within 20 minutes by public transport of a community pharmacy that opens past 7pm on weekdays

Map 178. Locations of community pharmacies open until at least 7pm and lower super output areas not within 20-minutes by public transport on weekday evenings

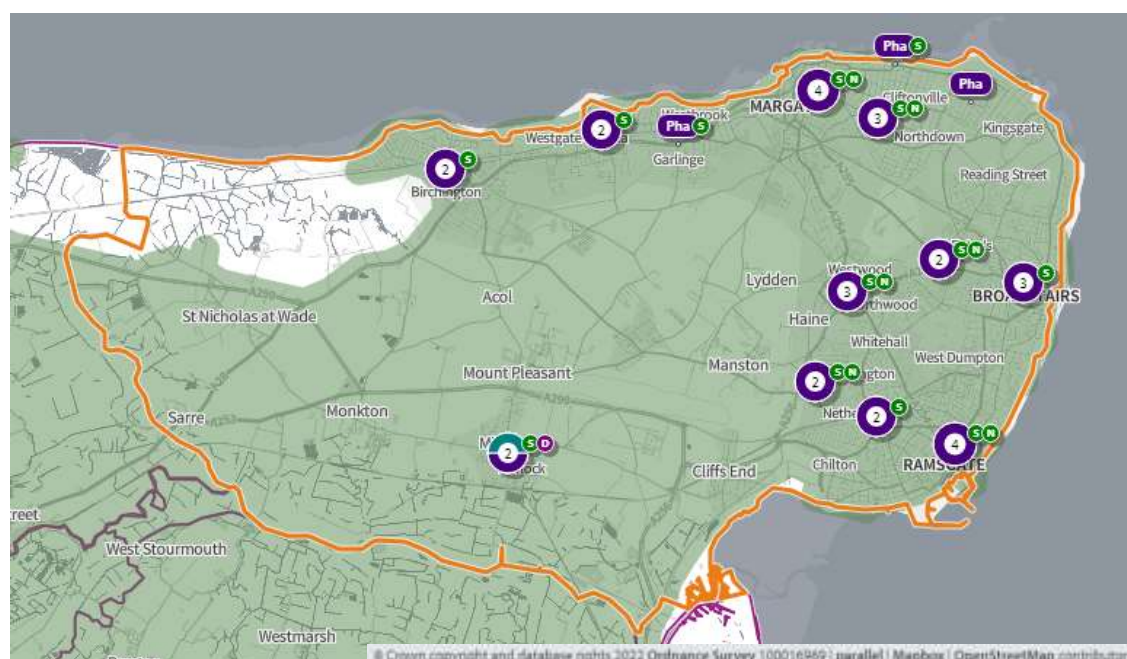

In **map 179**, below, the olive-green shaded areas are within a 20-minute walk of a community pharmacy that opens on Sundays. 37.1% (52,541) of the population is not within a 20-minute walk of a community pharmacy that opens on Sundays. 44.1% (14,916) of 65+ population is not within a 20-minute walk of a community pharmacy that opens on Sundays

Map 179. Locations of community pharmacies open on Sundays and lower super output areas not within a 20-minute walk

In **map 180** below, access during **core opening hours, Saturdays and Sundays** is shown. The green shaded areas are within a **20-minute drive** of a community pharmacy/dispensing GP practice. The entire population is within a 20-minute drive.

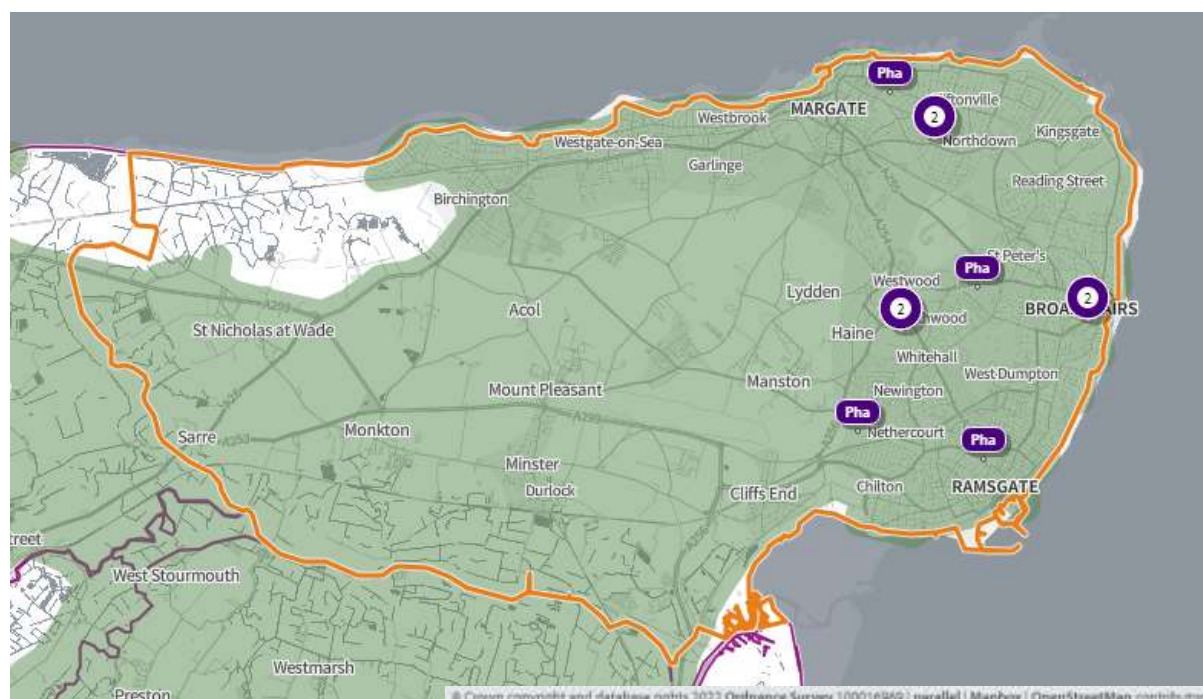

Map 180. Locations of community pharmacies and areas within 20-minutes by car

S = open Saturday N = open Sunday

In **map 181** below, the green shaded areas are within **20-minutes by car** of a community pharmacy that opens **until at least 7pm on weekdays**. The entire population is within a 20-minute drive.

Map 181. Locations of community pharmacies open until at least 7pm and areas within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The information below indicates the number of prescriptions dispensed in and outside the locality.

- 3.1 million items prescribed in Thanet
 - 3 million items dispensed in Thanet
 - 2.76 million (89.2%) via Electronic Prescription Service
 - 133,966 dispensed outside of the district
 - 74,779 distance selling
 - 43,929 – Canterbury
 - 4,071 – Dover
- 3 million items dispensed in Thanet
 - 2.94 million items dispensed by community pharmacies in Thanet
 - 92,404 dispensed by 12 GP practices:
 - Minster Surgery– 49,960
 - 67,585 items prescribed outside borough i.e. more going out than coming in

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There is a small percentage of prescriptions generated in the area that are dispensed in neighbouring areas and an even smaller percentage that are generated outside the locality and dispensed by Thanet community pharmacies ⁽¹⁾.

- 1,458 outside prescribers dispense in Thanet
 - 2.2% of all items dispensed in Thanet
- 19 prescribers in Thanet
 - 97.8% of all items dispensed in Thanet
- 46 dispensers in Thanet
 - 95.7% of all items prescribed in Thanet
- 1,029 dispensers outside of Thanet
 - 4.3% of all items prescribed in Thanet

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling premises
- Which are located near to where they work, shop or visit for leisure or other purposes.

Taking into account this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy and do access pharmacy services within the locality.

4. Other relevant services: current provision

The following advanced services are delivered in the Thanet locality.

Table 61. Number of pharmacies providing advanced services

Advanced service name	No. of pharmacies
New Medicine Service	29
Appliance Use Review	0
Hypertension Service [‡]	30
Stoma Appliance Customisation	2
Community Pharmacist Consultation Service (CPCS) [‡]	30
Hepatitis C Antibody Testing Service	1
Seasonal Influenza Vaccination Advances Service	29
Covid Vaccination Service*	0
Covid Home Delivery Service*	28
Covid lateral flow device distribution*	31

*Specific to the Covid-19 pandemic

[‡]Services introduced during the year of study

Please note that three of these services were specific to the Covid-19 pandemic and that others were new services introduced within the year. There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- Bethesda Medical Centre is open until 8pm on Tuesdays and Wednesdays and 7am-8pm on Fridays
- Broadstairs Medical Practice is open from 7am on Mondays and Tuesdays and until 8pm on Wednesdays
- Dashwood Medical Centre is open until 8pm on Wednesdays and Thursdays
- East Cliff Medical Centre is open until 8pm on Tuesdays and 8am-10.30am on Saturdays
- Minster Surgery is open until 8.15pm on Mondays
- Newington Road Surgery is open until 8pm on Mondays and Fridays
- St Peters Surgery is open until 8.30pm on Mondays
- The Limes Medical Centre is open from 6.55am daily and until 8pm on Mondays and Thursdays

- Westgate Surgery is open from 7am on Wednesdays and Thursdays and until 8pm on Thursdays

There is a 24-hour urgent care service at Queen Elizabeth the Queen Mother Hospital in Margate.

There are also drug and alcohol services, Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality.

The number of prescriptions from these services is shown below:

- 24 pharmacies dispensed a total of 8,537 (mean = 356, range = 1-2,684) items from drug and alcohol services
- All 30 pharmacies dispensed a total of 2,191 (mean = 73, range = 21-240) items from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- 23 pharmacies dispensed a total of 92 items (mean = 4, range = 1-15) from KCHFT
- All 30 pharmacies dispensed a total of 22,228 items (mean = 741, range = 1-1,575) from Kent and Medway hospitals

6. Choice with regard to obtaining pharmaceutical; services

As can be seen from sections 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

Figure 45 below shows the predicted increase in the population of the Thanet locality continuing to grow over the lifetime of this PNA. By 2025 it is estimated that each pharmacy will serve a population of 5,050.

Figure 45 Thanet population forecast

 **1 pharmacy per 5,050 people in 2025**

This is an increase of 875 people per pharmacy from 2022 to 2025. As stated in the community pharmacy contracts survey 19 pharmacy in the Thanet locality do have capacity to increase their services and 1 stated it did not. A total of 20 out of 30 pharmacies responded to the survey.

Map 182 below shows where there are major housing developments planned in the coming years and the table indicates the number of dwellings planned for each site.

Map 182. Location of housing developments

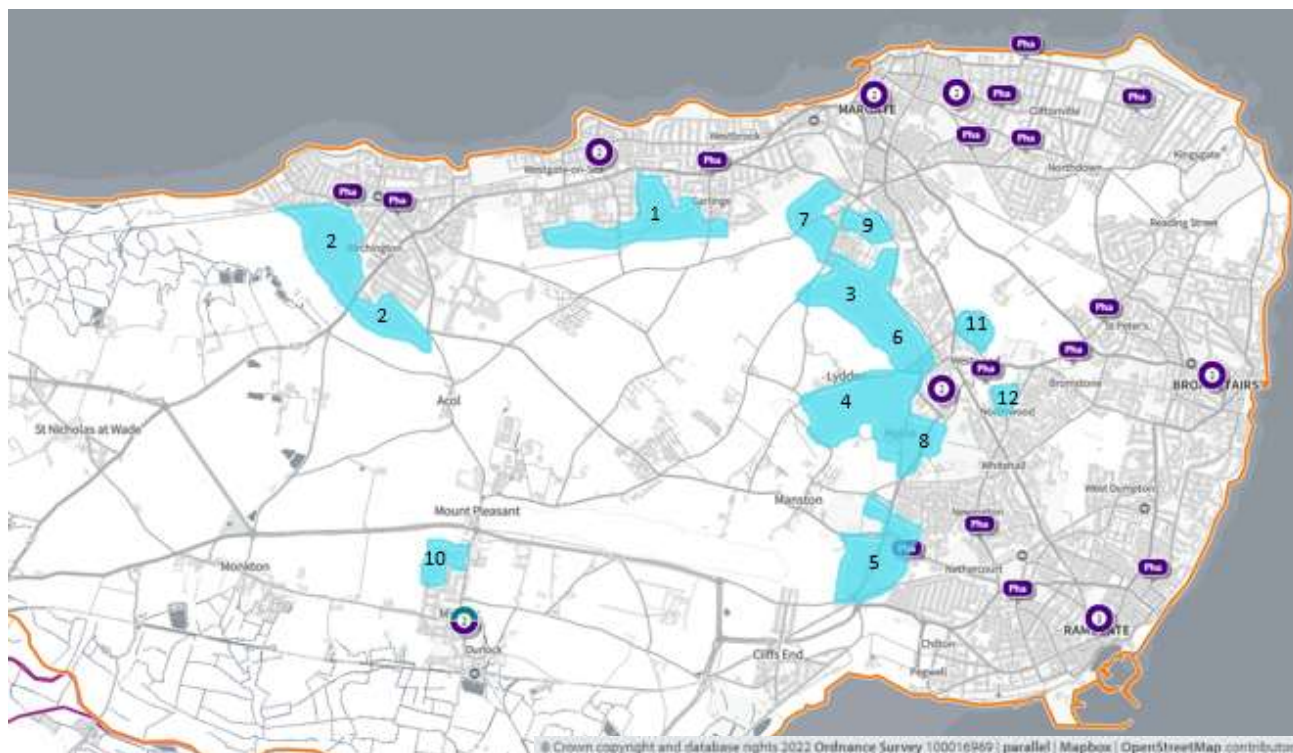

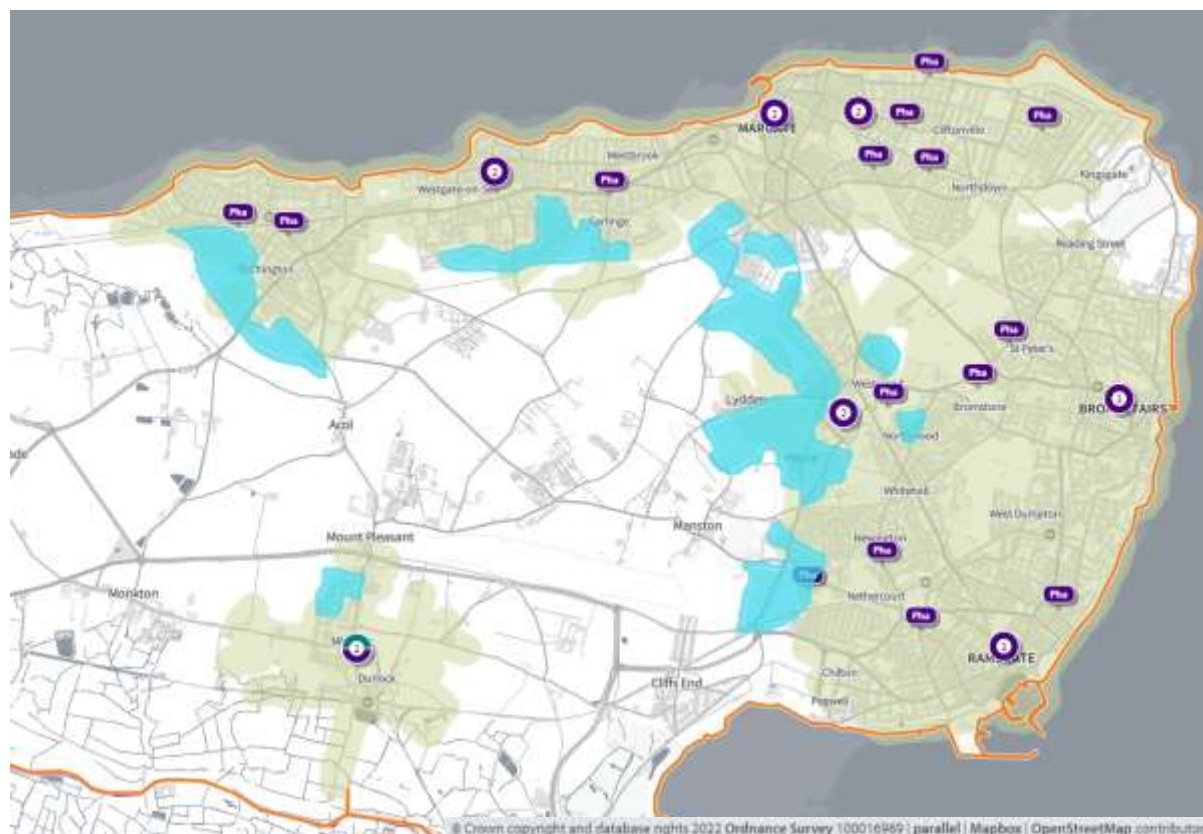

Table 62. Proposed housing developments – number of dwellings per year at each development

In **map 187**, below, the green shaded areas are within **20 minutes walk** of a community pharmacy that is open on **Sundays** and blue shaded areas are locations of major housing developments.

Map 187. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open on Sundays

8. Necessary services: - Gaps in provision

The access to pharmacies is good across the Thanet locality at present. The hours of access are excellent with six 100- hour pharmacies providing significant contribution to the access. The pharmacies on average currently have below the English average head of population per pharmacy. In the contractor survey only one pharmacy stated that they did not have capacity to increase dispensing or other service capacity.

There are developments planned around existing conurbations encroaching into rural area. The data indicated that the existing pharmacies will be able to provide pharmacy services. No gaps have been identified.

9. Improvements or better access: Gaps in provision

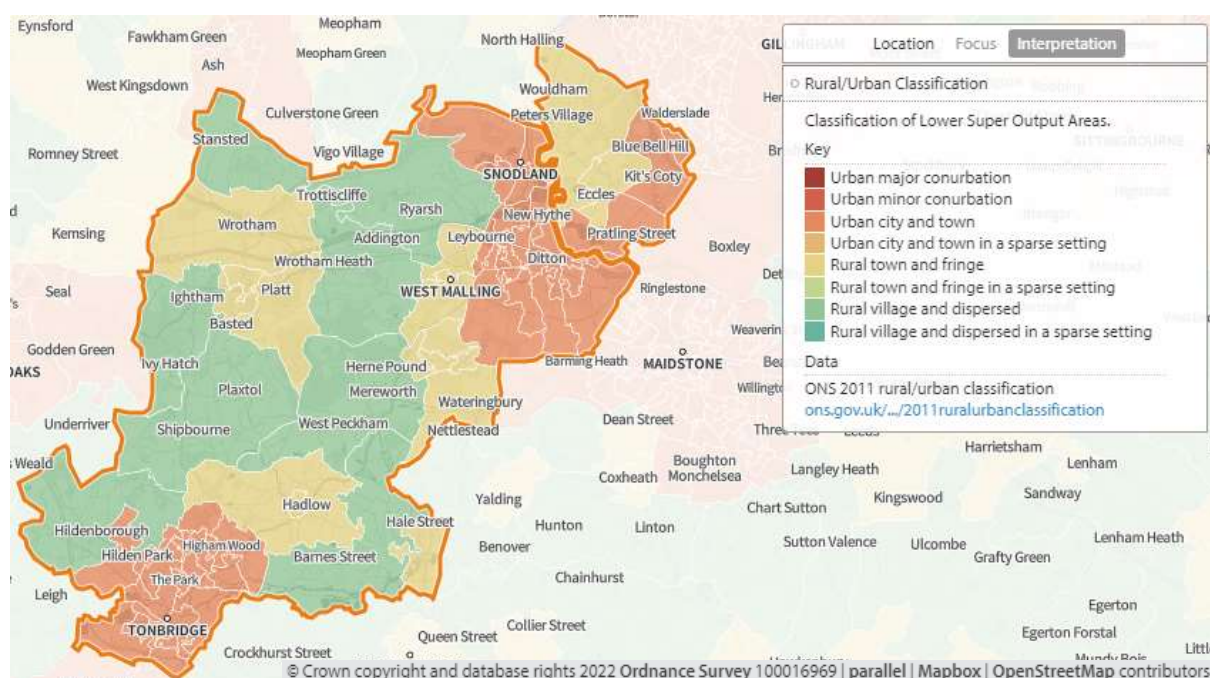

No gaps were identified

18 Tonbridge and Malling Borough Council Locality

1. Key Facts

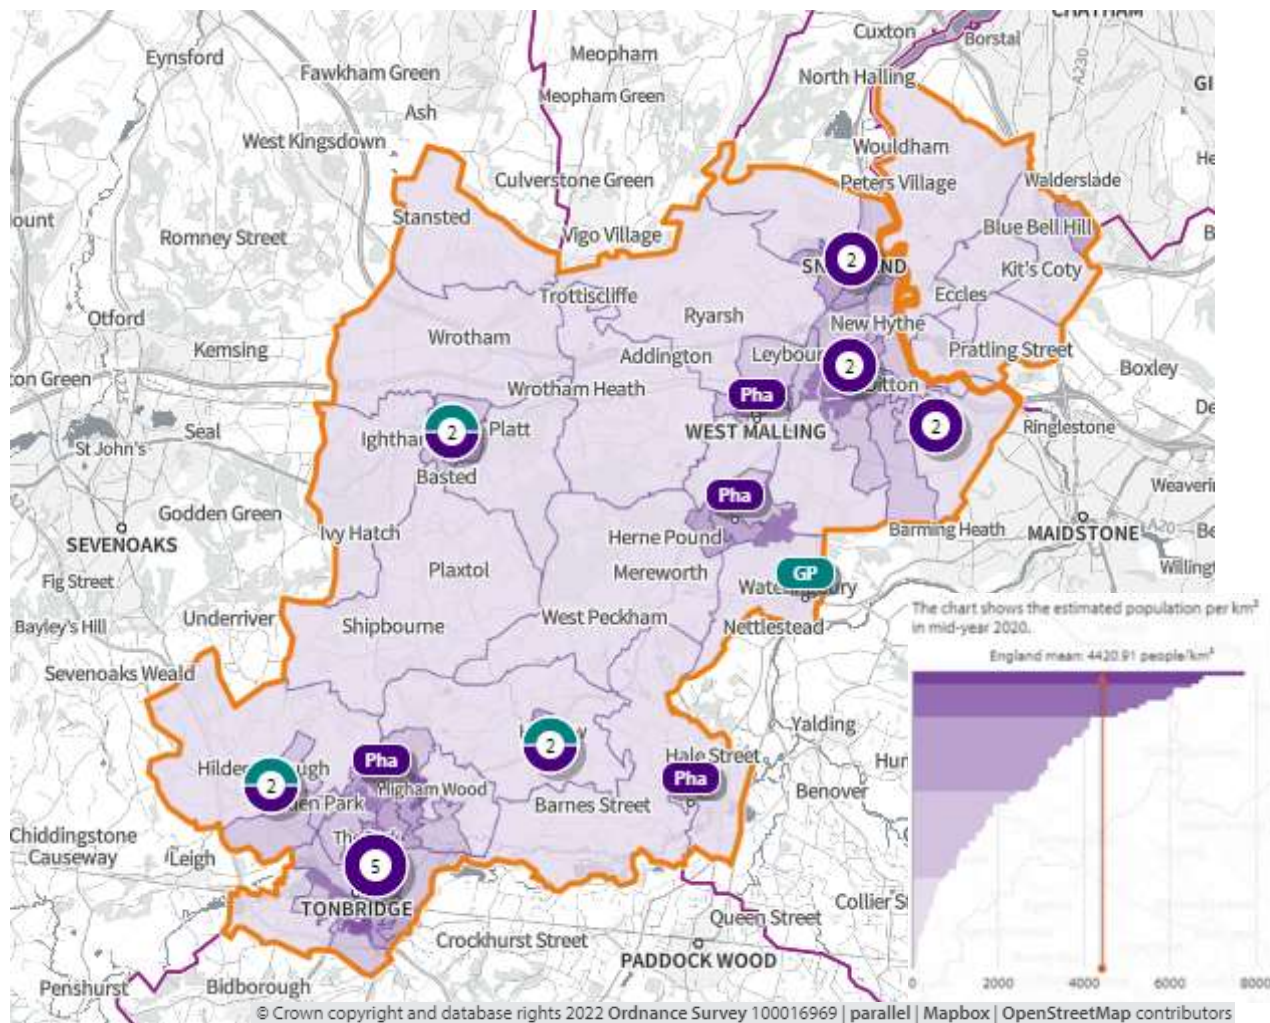

Tonbridge & Malling is a local government district in the west of the county. It covers an area of 240.1 square km. The population is concentrated in the north and south of the district but there are large villages throughout the district with significant concentrations of the population and associated facilities.

Map 188. Rural/urban classification of lower super output areas

Population

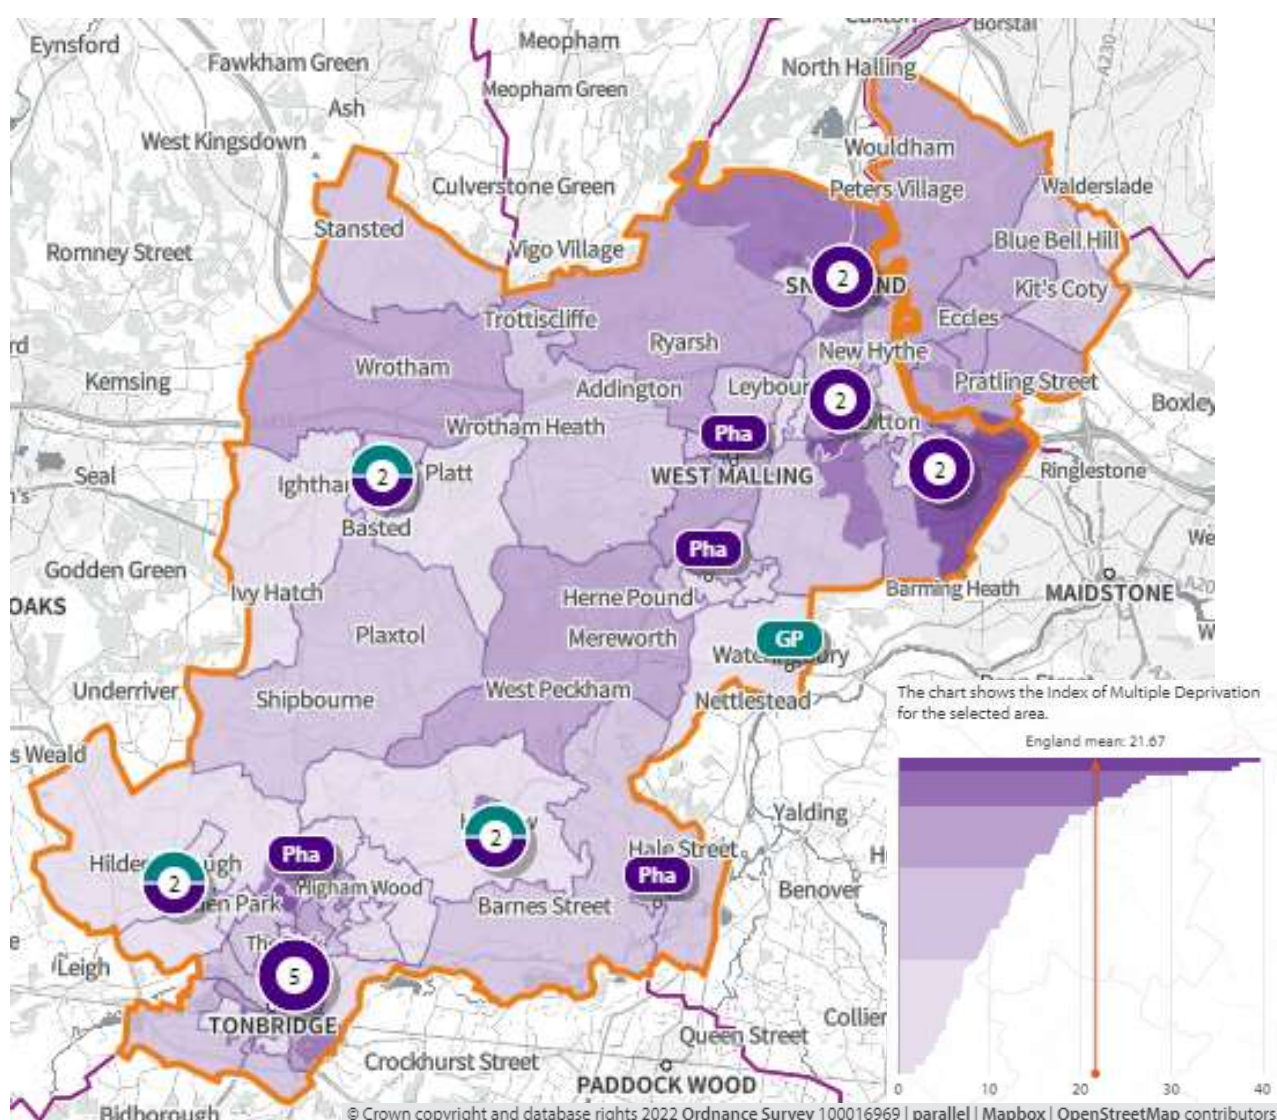

Map 189. Population density of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Deprivation

Map 190 below shows the areas of deprivation in the Tonbridge and Malling District locality. Deprivation is low across the district and average deprivation is the third lowest in Kent. Employment rates are the third highest in Kent ⁽⁶³⁾ and educational attainment is slightly higher than the Kent average ⁽⁶⁴⁾.

Map 190. Deprivation of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Language

English is the main language for all people aged 16 or over in 96.7% of households in the district. 1.2% of households have no people with English as the main language ⁽²⁾.

Home ownership

72% of houses are owned either outright (33%) or with a mortgage (39%). The average number of occupants per household is 2.5, marginally higher than the Kent average ⁽²⁾.

Age Distribution

The average age of Tonbridge and Malling district residents is 40.9, slightly lower than the Kent average of 41.4 ⁽²⁾. 19% of the population is over 65 and 20.4% 0-15. Life expectancy at birth is 80 for males and 84.5 for females, the highest in Kent ⁽⁴⁶⁾.

Economy

By industry, the top three employers in the Tonbridge and Malling district are wholesale and retail trade (18.5%), education (9.7%), and administrative and support service activities (9.7%) ⁽¹⁵⁾.

Car ownership

14% of households in Tonbridge and Malling district do not have a car or van in the household, this is the second lowest in Kent ⁽¹³⁾.

Care Homes

There are a considerable number of care homes in the Tonbridge and Malling locality. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services.

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are eighteen Community pharmacies providing dispensing services in the Tonbridge and Malling locality.

In addition, there are five dispensing GP practices in the locality.

Each pharmacy provides on average services for 7,365 of the area’s population. Figure 46 below shows how this compares with the other localities of Kent.

Figure 46 Number of people per pharmacy in each locality

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There is a small percentage of prescriptions generated in the area that are dispensed in neighbouring areas and a slightly lower percentage that are generated outside the locality and dispensed by Tonbridge and Malling community pharmacies ⁽¹⁾.

- 1,127 outside prescribers dispense in Tonbridge and Malling
 - 7.2% of all items dispensed in Tonbridge and Malling
- 24 prescribers in Tonbridge and Malling
 - 92.8% of all items dispensed in Tonbridge and Malling
- 29 dispensers in Tonbridge and Malling
 - 91.2% of all items prescribed in Tonbridge and Malling
- 1,255 dispensers outside of Tonbridge and Malling
 - 8.8% of all items prescribed in Tonbridge and Malling

Pharmacy locality: Maps 1 and 2 above show the locality of the community pharmacies and GP dispensing practices.

Opening times: All are open Monday to Friday, with seventeen opening on Saturdays and 4 opening on Saturdays and Sundays. This gives a weekly opening hours range of 41.5 to 102 hours and an average of 58.6 hours of opening each week. Sixteen of these pharmacies open for at least one hour after 5pm on weekdays.

Table 63 below show the core and supplementary hours of each pharmacy ⁽⁶⁵⁾.

Table 63. Opening times for all pharmacies

Pharmacy	Total core weekly hours	Total supplementary weekly hours	Total weekly hours	Max. hours open after 5pm at least 1 day/week	Saturday hours	Sunday Hours
Clarke & Coleman Pharmacy	40.00	13.50	53.50	1.00	8.5	0.00

Map 197. Locations of community pharmacies open until at least 7pm and areas within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The information below indicates the number of prescriptions dispensed in and outside the locality.

- 2.59 million items prescribed in Tonbridge and Malling
 - 2.36 million items dispensed in Tonbridge and Malling
 - 1.77 million (68.61%) via Electronic Prescription Service
 - 227,603 dispensed outside of the district
 - 112,947 distance selling
 - Maidstone – 27730
 - Gravesham – 20518
- 2.54 million items dispensed in Tonbridge and Malling
 - 2.17 million items dispensed by community pharmacies in Tonbridge and Malling
 - 373,300 dispensed by 11 GP practices:
 - 92,396 – Phoenix Medical Practice
 - 91,096 - Borough Green Medical Practice
 - 181,617 items prescribed outside borough i.e. more going out than coming in

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling premises
- Which are located near to where they work, shop or visit for leisure or other purposes.

Taking into account this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy and do access pharmacy services within the locality.

4. Other relevant services: current provision

The following advanced services were delivered by pharmacies in the Tonbridge and Malling locality in 2020/21.

Table 64. Number of pharmacies providing advanced services

Advanced service name	No. of pharmacies
New Medicine Service	17
Appliance Use Review	0
Hypertension Service [‡]	17
Stoma Appliance Customisation	1
Community Pharmacist Consultation Service (CPCS) [‡]	17
Hepatitis C Antibody Testing Service	0
Seasonal Influenza Vaccination Advances Service	18
Covid Vaccination Service*	1
Covid Home Delivery Service*	13
Covid lateral flow device distribution*	19

*Specific to the Covid-19 pandemic

[‡]Services introduced during the year of study

Please note that three services were specific to the Covid-19 pandemic (Covid vaccination, homedelivery and lateral flow device distribution services) and that others were new services (CPCS, Hypertension service) introduced within the year. There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- Hildenborough GP open Saturday 8am-12pm
- Tonbridge Medical Group (3 River Lawn Road) open until 8pm Tuesdays and Wednesdays
- Warders Medical Centre open until 8pm on Mondays, Tuesdays and Thursdays
- Watlingbury Surgery open until 8pm Tuesdays

There are also drug and alcohol services, Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality.

- 17 pharmacies dispensed a total of 1,457 (mean = 86, range = 1-380) items from drug and alcohol services

- 18 pharmacies and 3 GPs dispensed a total of 728 (mean = 35, range = 2-96) items from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- 16 pharmacies and 1 GP dispensed a total of 124 items (mean = 7, range = 1-20) from KCHFT
- 18 pharmacies and 3 GPs dispensed a total of 4,424 items (mean = 211, range = 20-591) from Kent and Medway hospitals

6. Choice with regard to obtaining pharmaceutical; services

As can be seen from sections 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

Figure 47 below shows the predicted increase in the population of the Tonbridge and Malling locality continuing to grow over the lifetime of this PNA. By 2025 it is estimated that each pharmacy will serve a population of 7,838.

Figure 47 Tonbridge & Malling population forecast

1 pharmacy per 7,838 people in 2025

The population of Tonbridge and Malling district is projected to increase by 5% to 141,100 in 2025. This is an increase of 500 people per pharmacy from 2020. As stated in the community pharmacy contracts survey one pharmacy in the Tonbridge and Malling locality does not have the capacity to meet an increased demand for services. However, no major developments are planned in the catchment area of this pharmacy.

Map 198 below shows where there are major housing developments planned in the coming years and the table indicates the number of dwellings planned for each site. With an average of 2.4 people per proposed dwelling, by 2025 these sites will provide accommodation for approximately 4,000 people.

Map 198. Location of housing developments

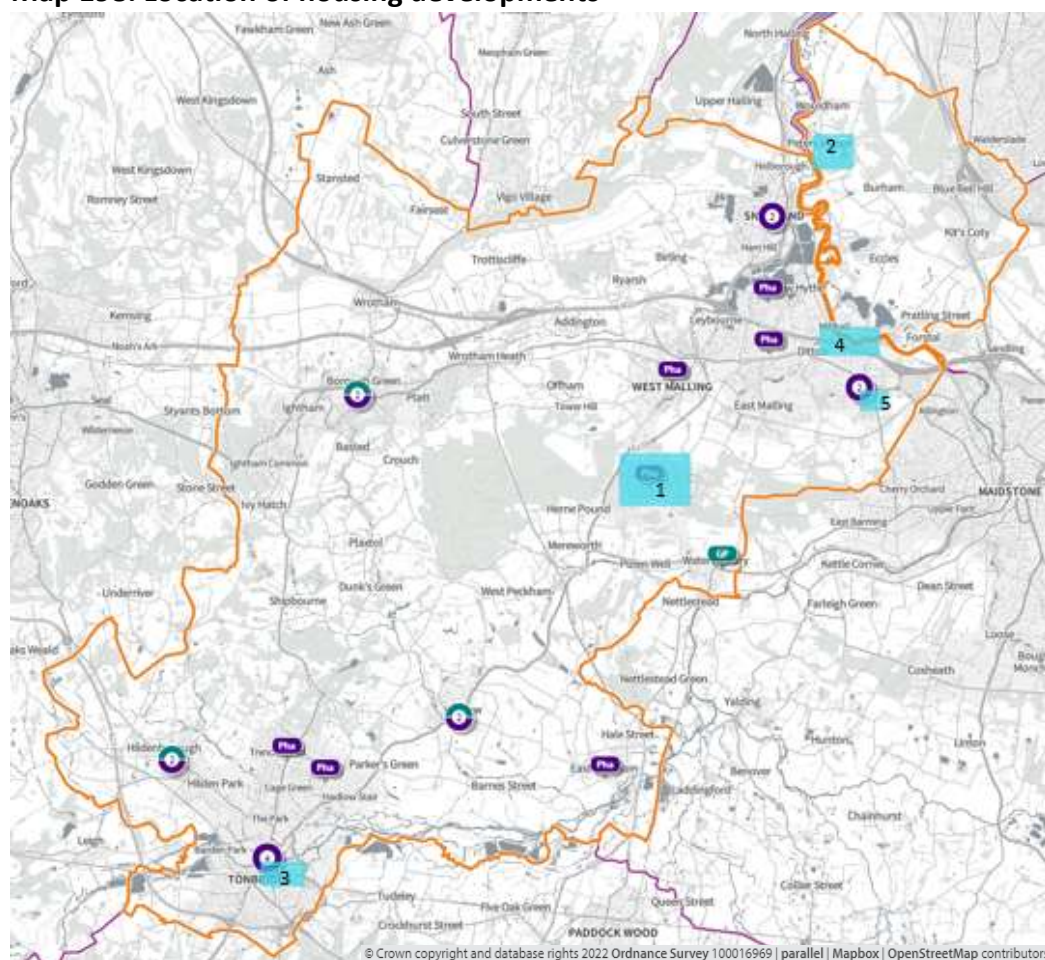

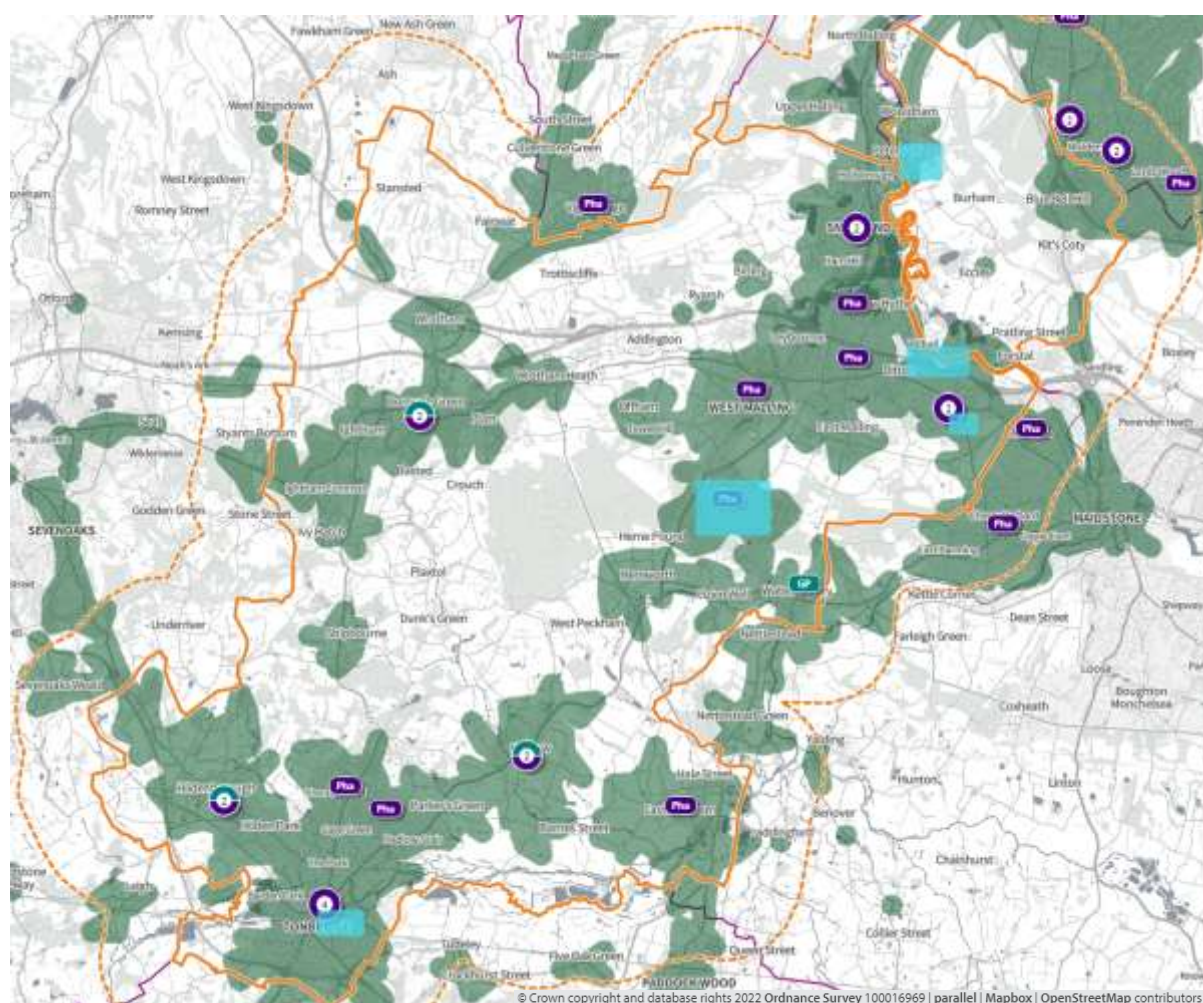

Table 65. Proposed housing developments – number of dwellings per year at each development

Site Name	21/22	22/23	23/24	24/25	2026

Map 203. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open on Sundays

8. Necessary services: - Gaps in provision

There are no gaps in necessary services as defined by the Kent HWB.

9. Improvements or better access: Gaps in provision

There are no Hep C providers in locality.

Borough Green pharmacy does not provide CPCS. This pharmacy is central to the eastern, more sparsely populated area of the locality. Provision of the CPCS at this pharmacy would allow access by public transport within 20 minutes for an LSOA population of around 10,000.

Evening opening for Kings Hill pharmacy would improve access for a densely populated area of the locality that has a further 856 homes planned by 2026.

19 Tunbridge Wells Council Locality

1. Key Facts

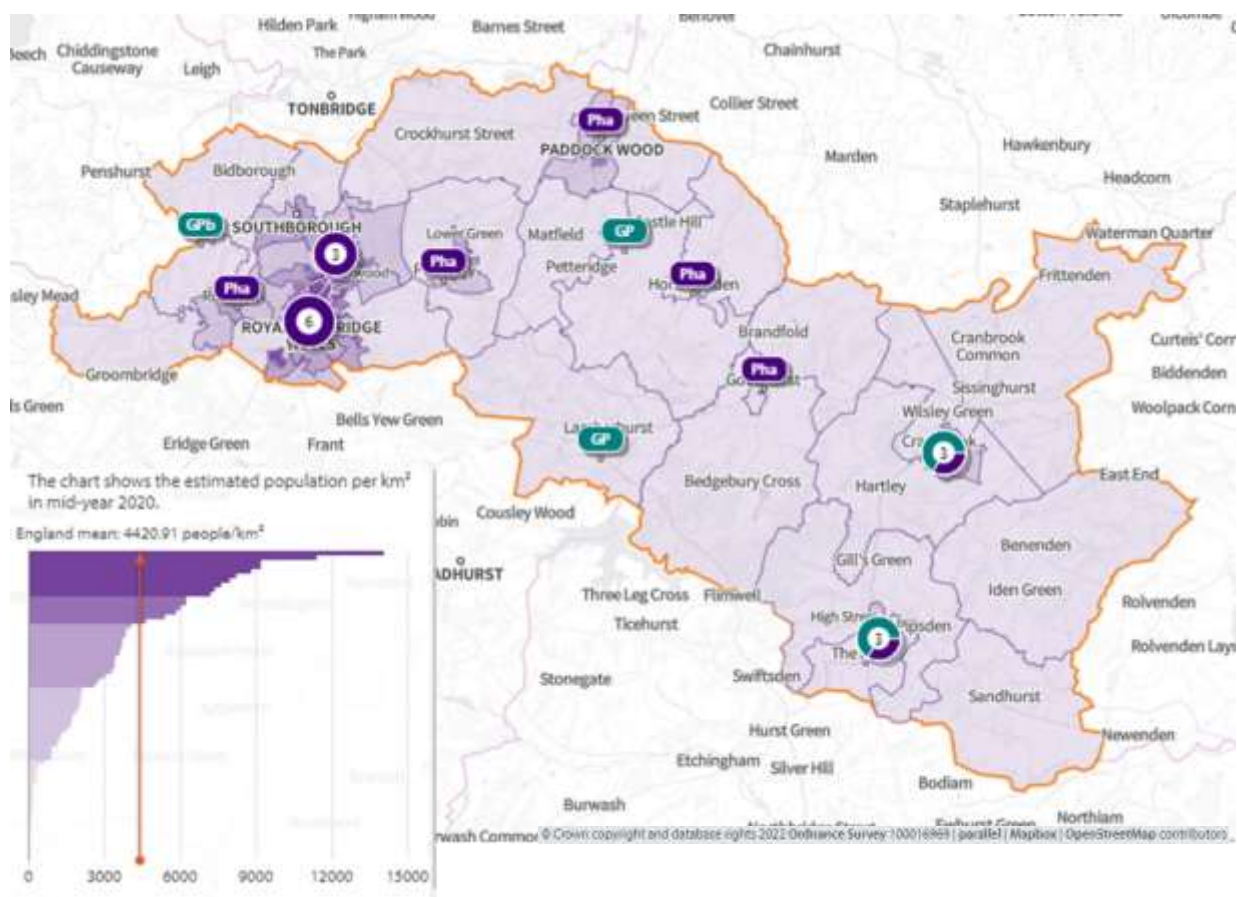

Tunbridge Wells is a local government district in the west of the county. It covers an area of 331.3 square km. Maps 221 and 222 show that the population is concentrated in and around the urban area of Royal Tunbridge Wells, located in the west of the district. Beyond this, the district is largely rural and sparsely populated although there are two large villages in the east and a small town in the north.

Map 204. Rural/urban classification of lower super output areas

Population

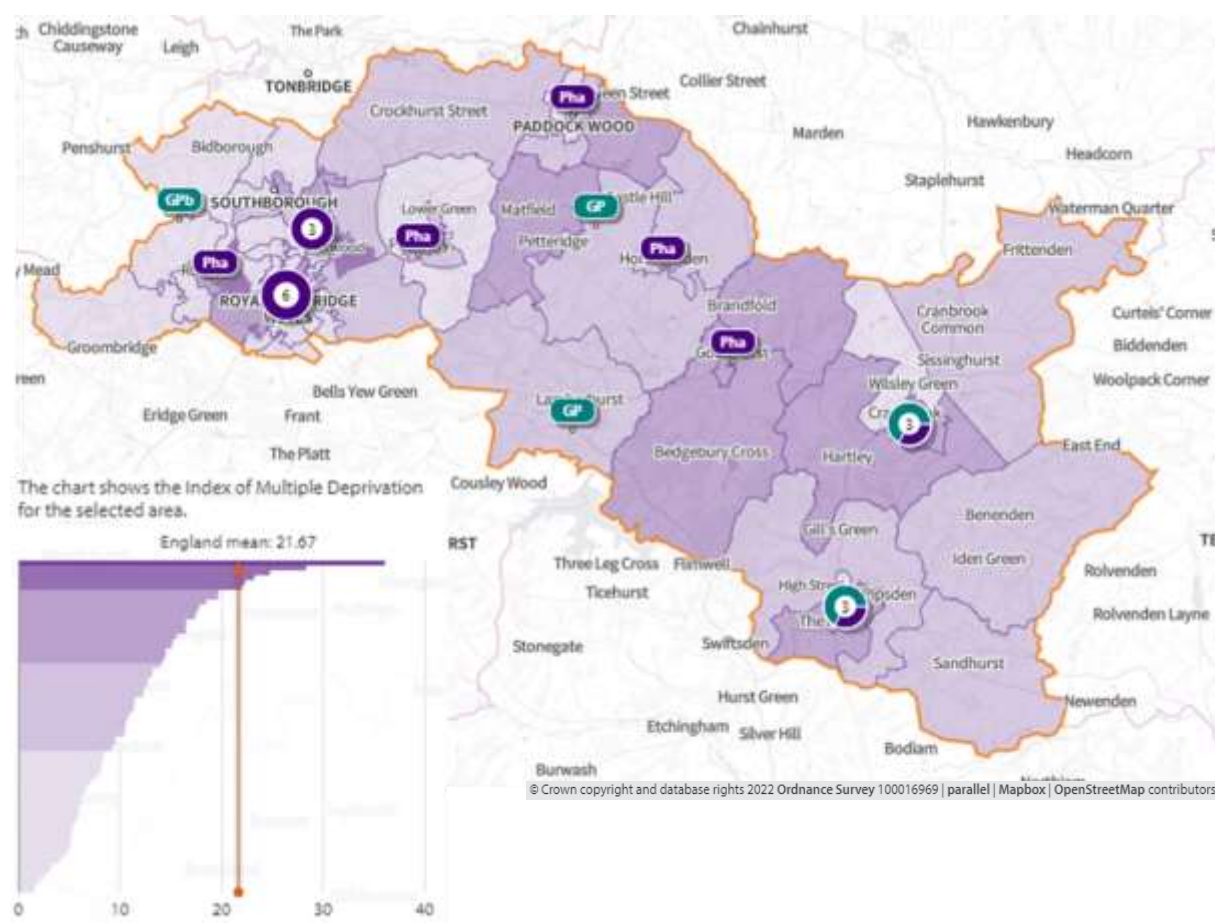

Map 205. Population density of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Deprivation

Map 206 below shows the areas of deprivation in the Tunbridge Wells District locality. Deprivation is low across the district and average deprivation is the lowest in Kent. Employment rates are the second highest in Kent ⁽⁶³⁾ and educational attainment is the highest in Kent ⁽⁶⁴⁾.

Map 206. Deprivation of lower super output areas overlayed with locations of pharmacies and dispensing doctors

Language

English is the main language for all people aged 16 or over in 94.4% of households in the district. 2.4% of households have no people with English as the main language ⁽²⁾.

Home ownership

66% of houses are owned either outright (32%) or with a mortgage (34%). The average number of occupants per household is 2.4, the same as the Kent average ⁽²⁾.

Age Distribution

The average age of Tunbridge Wells district residents is 41.7, similar to the Kent average of 41.4. 19.7% of the population is over 65 and 20.1% 0-15 ⁽²⁾. Life expectancy at birth is 81.6 for males, the highest in Kent and 84.2 for females, the second highest in Kent ⁽⁴⁶⁾.

Economy

By industry, the top three employers in the Tunbridge Wells district are wholesale and retail trade (18.8%), human health and social work activities (14.9%), and education (9.9%) ⁽¹⁵⁾. Tunbridge Wells has a much higher proportion of employees working in financial and insurance activities compared to the Kent average ⁽¹⁵⁾.

Car ownership

17% of households in Tunbridge Wells district do not have a car or van in the household ⁽¹³⁾.

Care Homes

There are a considerable number of care homes in the Tunbridge Wells locality. Patients who are looked after in a care home setting are often high users of medicines. However, because of the nature of their care, they rarely access pharmaceutical services individually, leaving this to be carried out by the care home staff. More recently care home organisations do not use local pharmacies for this service, favouring the large “hub” or “internet” pharmacies which specialise in this type of one-stop service. Therefore, there is not considered to be any relationship between the number of care homes and the need for local pharmaceutical services.

2. Necessary services: current provision within the locality

(All data presented in this section is for the financial year 2020/21 with the exception of lateral flow devices data which covers the 4 months from April 2021 to July 2021)

There are sixteen Community pharmacies providing dispensing services in the Tunbridge Wells locality.

In addition, there are seven dispensing GP practices in the locality.

Each pharmacy provides on average services for 7,434 of the area's population. Figure 48 below shows how this compares with the other localities of Kent.

Figure 48 Number of people per pharmacy in each locality

The facts below indicate that the majority of prescriptions generated in the locality are dispensed in the locality. There is a small percentage of prescriptions generated in the area that are dispensed in neighbouring areas but a slightly higher percentage that are generated outside the locality and dispensed by Tunbridge Wells community pharmacies ⁽¹⁾.

- 1,194 outside prescribers dispense in Tunbridge Wells
 - 8.3% of all items dispensed in Tunbridge Wells
- 19 prescribers in Tunbridge Wells
 - 91.7% of all items dispensed in Tunbridge Wells
- 34 dispensers in Tunbridge Wells
 - 92.1% of all items prescribed in Tunbridge Wells
- 1,419 dispensers outside of Tunbridge Wells
 - 7.9% of all items prescribed in Tunbridge Wells

Pharmacy locality: Maps 1 and 2 above show the locality of the community pharmacies and GP dispensing practices.

Opening times: All are open Monday to Saturday, with 2 opening on Saturdays and Sundays. This gives a weekly opening hours range of 40 to 101 hours and an average of 54 hours of opening each week. Fourteen of these pharmacies open for at least one hour after 5pm on weekdays.

Table 66 below show the core and supplementary hours of each pharmacy⁽⁶⁵⁾.

Table 66. Opening times for all pharmacies

Pharmacy	Total core weekly hours	Total supplementary weekly hours	Total weekly hours	Max. hours open after 5pm at least 1 day/week	Saturday hours	Sunday Hours
Rusthall Pharmacy	40.00	4.00	44.00	0.50	4	0.00
Heath Pharmacy	40.00	7.00	47.00	1.50	4.5	0.00
Hawkhurst Pharmacy	40.00	18.50	58.50	2.00	8.5	0.00

After 7pm weekdays public transport

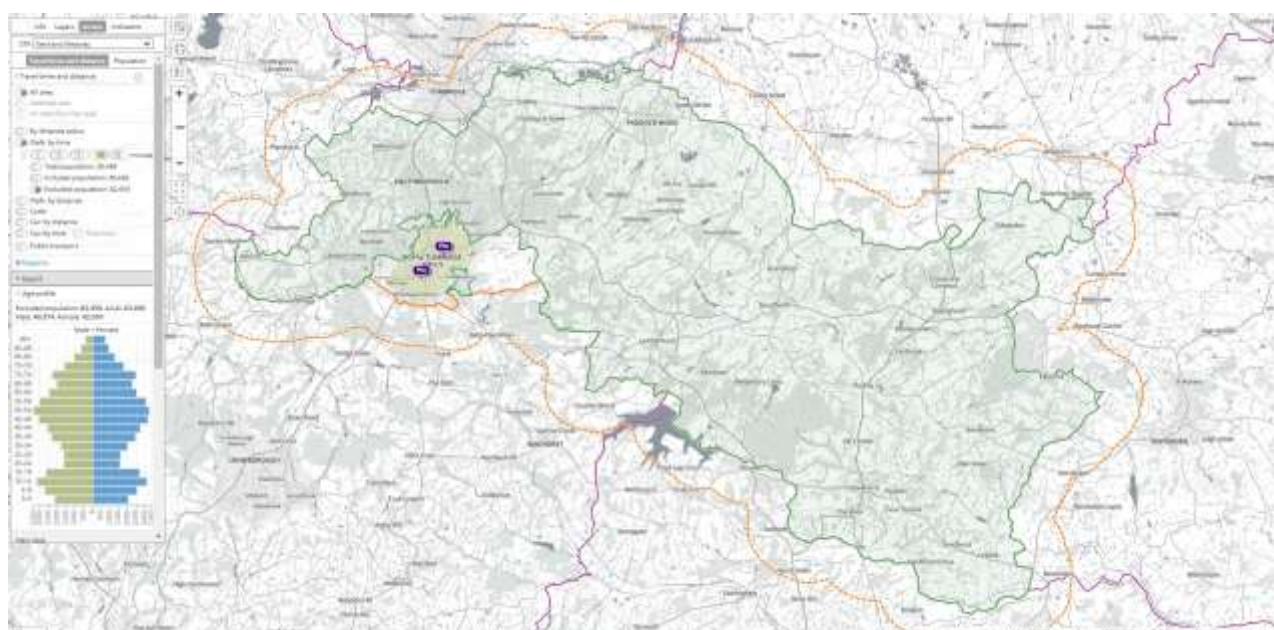

In **map 210**, below, the green shaded areas are within 20-minutes by public transport of a community pharmacy that opens past 7pm on weekdays. Green shaded areas area within 20-minutes by public transport of a community pharmacy that opens past 7pm on weekdays. 35,434 (25.9%) people are not within 20-minutes by public transport that opens past 7pm on weekdays. 29.6% (6,819) of 65+ population is not within 20 minutes by public transport of a community pharmacy that opens past 7pm on weekdays.

Map 210. Locations of community pharmacies open until at least 7pm and lower super output areas not within 20-minutes by public transport on weekday evenings

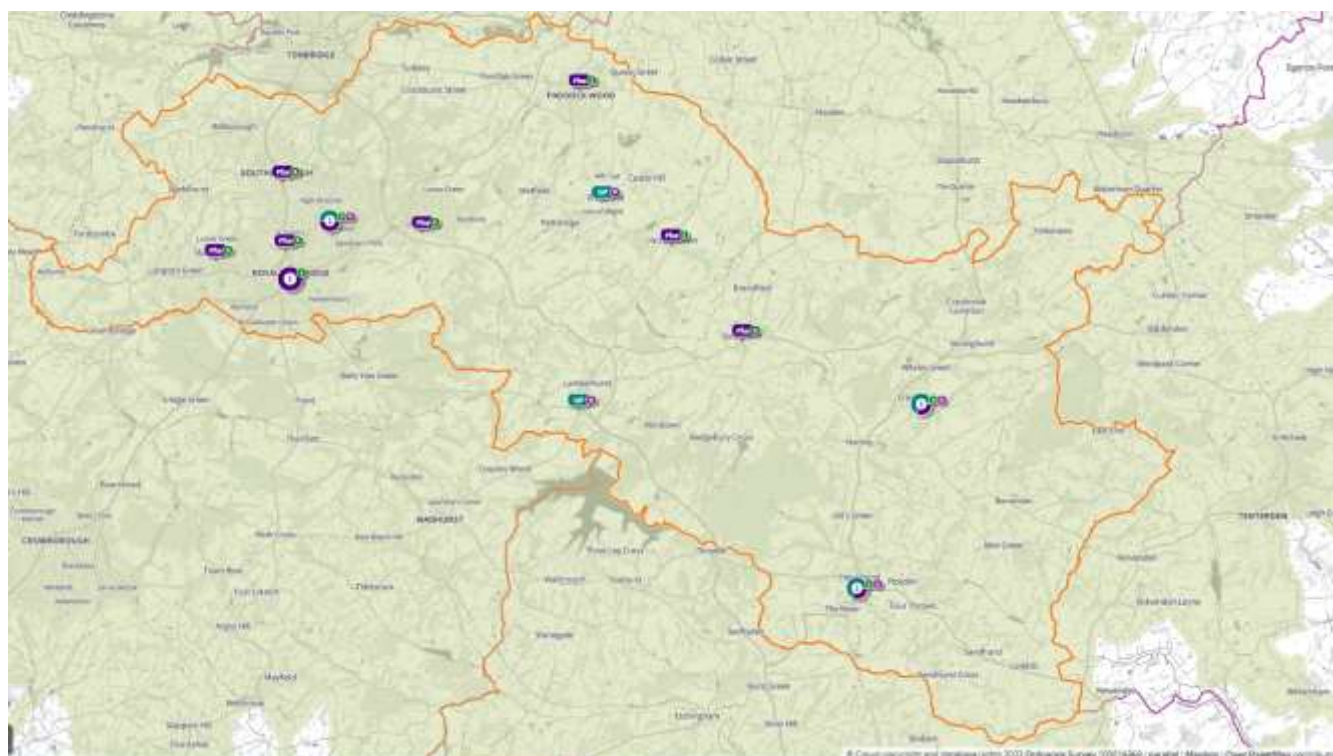

In **map 211**, below, the olive-green shaded areas are within a 20-minute walk of a community pharmacy that opens on Sundays. Olive green shaded areas are within a 20-minute walk of a community pharmacy that opens on Sundays. 69.3% (82,450) of the population is not within a 20-minute walk of a community pharmacy that opens on Sundays. 75.2% (17,342) of 65+ population is not within a 20-minute walk of a community pharmacy that opens on Sundays

Map 211. Locations of community pharmacies open on Sundays and lower super output areas not within a 20-minute walk

In **map 212** below, access during **core opening hours and Saturdays** is shown. The olive-green shaded areas are within a **20-minute drive** of a community pharmacy/dispensing GP practice. The entire population is within a 20-minute drive.

Map 212. Locations of community pharmacies, dispensing GPs and areas within 20-minutes by car

S = open Saturday N = open Sunday

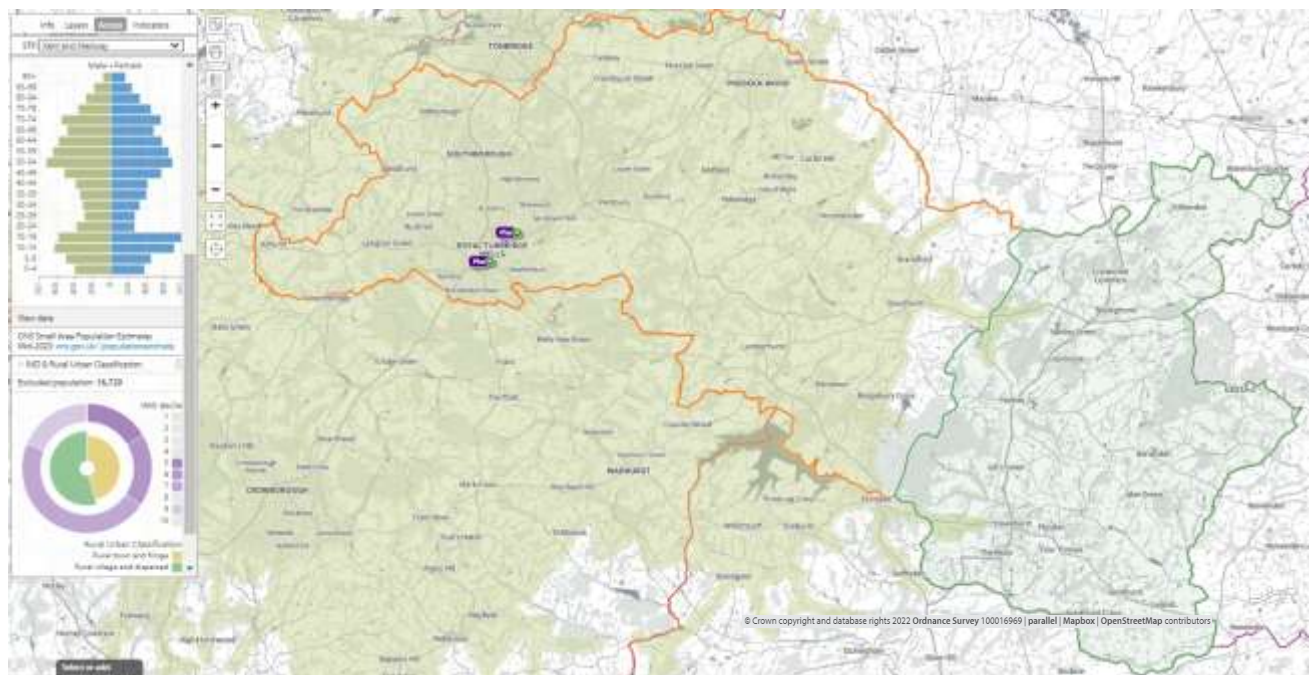

In **map 213** below, the green shaded areas are within **20-minutes by car** of a community pharmacy that opens **until at least 7pm on weekdays**. The entire population is within a 20-minute drive.

Map 213. Locations of community pharmacies open until at least 7pm and areas within 20-minutes by car

In **map 214** below, the green shaded areas are within **20-minutes by car** of a community pharmacy that opens **on Sundays**. 14.1% of the population (17.8% of 65+) is not within 20-minutes by car.

Map 214. Locations of community pharmacies open on Sundays and areas within 20-minutes by car

3. Necessary services: current provision outside the localities area ⁽¹⁾

The information below indicates the number of prescriptions dispensed in and outside the locality.

- 2.24 million items prescribed in Tunbridge Wells
 - 2.03 million items dispensed in Tunbridge Wells
 - 1.51 million (74.7%) via Electronic Prescription Service
 - 210,727 dispensed outside of the district
 - 87,830 distance selling
 - 69,436 - Tonbridge and Malling
- 2.14 million items dispensed in Tunbridge Wells
 - 1.85 million items dispensed by community pharmacies in Tunbridge Wells
 - 294,137 dispensed by 18 GP practices:
 - 62,558 – North Ridge Medical Practice
 - 41,819 – Howell Surgery
 - 118,543 items prescribed outside borough i.e. more going out than coming in

Some residents choose to access contractors outside both the locality and the Health and Wellbeing Board's area in order to access services:

- Offered by dispensing appliance contractors
- Offered by distance selling pharmacies

- Which are located near to where they work, shop or visit for leisure or other purposes.

Taking into account this choice of pharmacy outside of the locality, the majority of residents can access a pharmacy and do access pharmacy services within the locality.

4. Other relevant services: current provision

The following advanced services were delivered by pharmacies in the Tunbridge Wells locality in 2020/21.

Table 67. Number of pharmacies providing advanced services

Advanced service name	No. of pharmacies
New Medicine Service	14
Appliance Use Review	0
Hypertension Service [‡]	13
Stoma Appliance Customisation	1
Community Pharmacist Consultation Service (CPCS) [‡]	14
Hepatitis C Antibody Testing Service	0
Seasonal Influenza Vaccination Advances Service	14
Covid Vaccination Service*	0
Covid Home Delivery Service*	14
Covid lateral flow device distribution*	17

*Specific to the Covid-19 pandemic

[‡]Services introduced during the year of study

Please note that three services were specific to the Covid-19 pandemic (Covid vaccination, homedelivery and lateral flow device distribution services) and that others were new services (CPCS, Hypertension service) introduced within the year. There is, however, good participation and early adoption of new services from pharmacies in this locality.

5. Other NHS services

The Strategic Health Asset Planning and Evaluation (SHAPE) web application provides the following information:

- Brenchley and Horsmonden Surgery: Horsmonden Surgery opens 6.30pm-7.30pm on Mondays
- Lamberhurst Surgery opens 4pm-7.45pm on Mondays
- Orchard End Surgery opens until 8pm on Tuesdays
- The Wells Medical Practice opens at 6.15am on Tuesdays, Wednesdays and Thursdays, and opens until 7.30pm on Wednesdays

- Waterfield House opens until 7.30pm on Mondays

There is an urgent treatment centre situated in the Tunbridge Wells Hospital at Pembury. It is open 8am to 8pm every day of the year.

There is an Accident and Emergency department situated in the Tunbridge Wells Hospital at Pembury. It is open 24 hours a day every day of the year.

There are also drug and alcohol services, Kent and Medway NHS Hospital Trusts and Kent and Medway NHS and Social Care Partnership Trust and Kent Community Health NHS Foundation Trust with services that generate prescriptions that are dispensed by community pharmacies in this locality.

The number of prescriptions from these services is shown below:

- 10 pharmacies dispensed a total of 1,859 (mean = 186, range = 22-572) items from drug and alcohol services
- All 16 pharmacies and 3 GPs dispensed a total of 611 (mean = 32, range = 1-81) items from Kent and Medway NHS and Social Care Partnership Trust (secondary mental health services)
- 10 pharmacies dispensed a total of 95 items (mean = 10, range = 4-17) from KCHFT
- 16 pharmacies and 5 GPs dispensed a total of 3,315 items (mean = 158, range = 375) from Kent and Medway hospitals

6. Choice with regard to obtaining pharmaceutical; services

As can be seen from sections 2 and 3, those living within the locality and registered with one of the GP practices generally choose to access one of the pharmacies in the locality in order to have their prescriptions dispensed or, if eligible, to be dispensed to by their practice. Those that look outside the locality usually do so either to access a neighbouring pharmacy, or a dispensing appliance contractor or distance selling premises outside of the Health and Wellbeing Board's area.

7. Developments

The population of Tunbridge Wells district is projected to increase by 5% to 125,300 in 2025 as can be seen in Figure 49 below. This is an increase of 400 people per pharmacy from 2020. As stated in the community pharmacy contractor survey one pharmacy in the Tunbridge Wells locality does not have the capacity to meet an increased demand for services. There are 1,150 new houses proposed in the catchment of this pharmacy, however, there are another 5 pharmacies within a one-mile radius.

Figure 49 Tunbridge Wells population forecast

 **1 pharmacy per 7,831 people in 2025**

Map 215 below shows where there are major housing developments planned in the coming years and the table indicates the number of dwellings planned for each site. With an average of 2.4 people per proposed dwelling, by 2025 these sites will provide accommodation for approximately 7,560 people.

Map 215. Location of housing developments

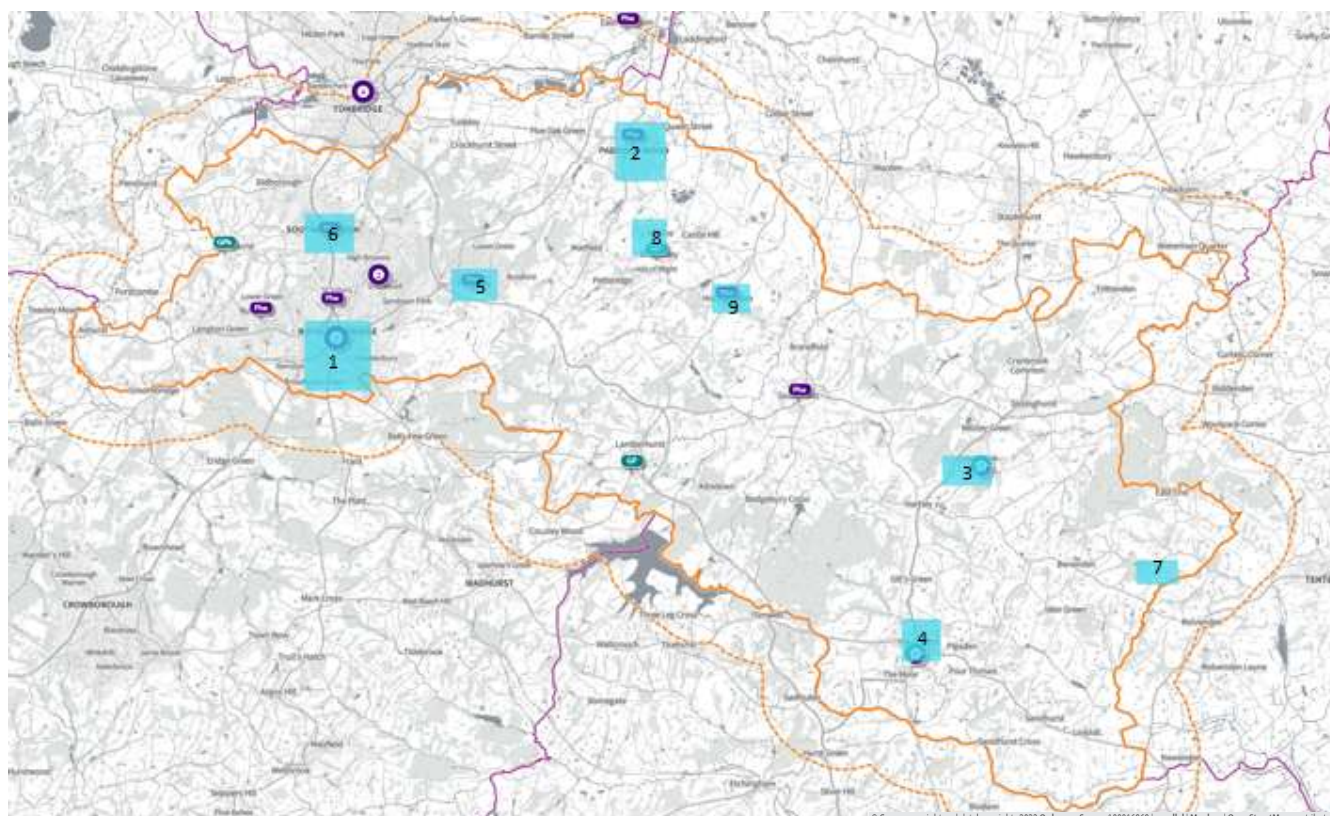

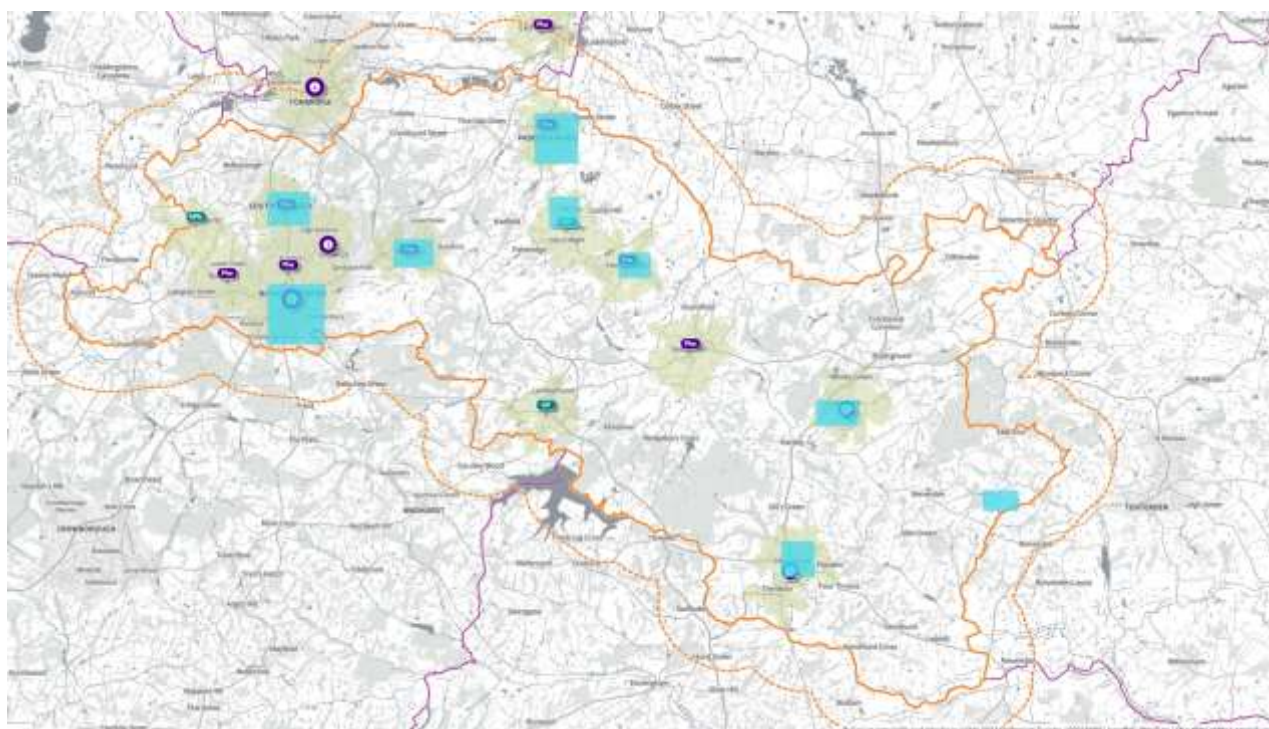

Table 68. Proposed housing developments – number of dwellings per year at each development

Site Name	21/22	22/23	23/24	24/25	25/26	26/27	27/28	28/29	29/30	2025	2030

Walking 20 minutes 7pm opening Monday to Friday

In **map 218**, below, the green shaded areas are within a 20-minute walk of a community pharmacy that is open until at least 7pm and the blue shaded areas are locations of major housing developments.

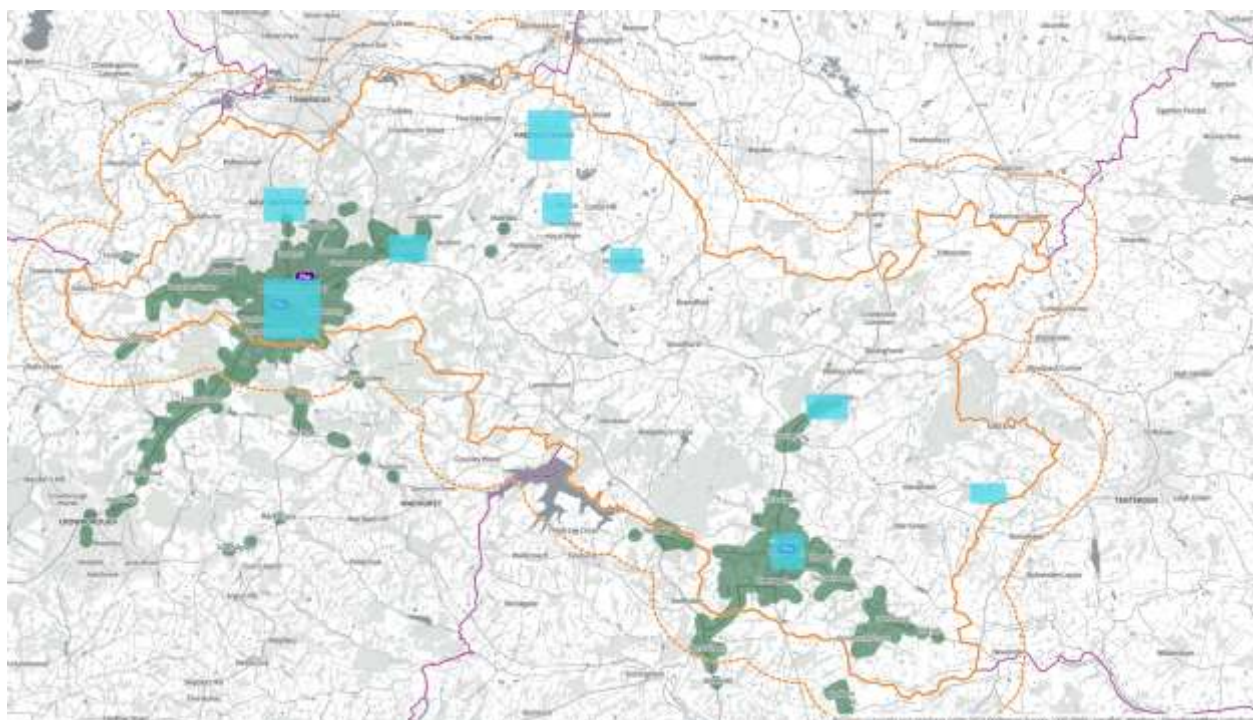

Map 218. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open until at least 7pm on weekdays

Public transport 7pm opening Monday to Friday

In **map 219**, below, the green shaded areas are within 20-minutes by public transport of a community pharmacy that is open until at least 7pm and the blue shaded areas are locations of major housing developments.

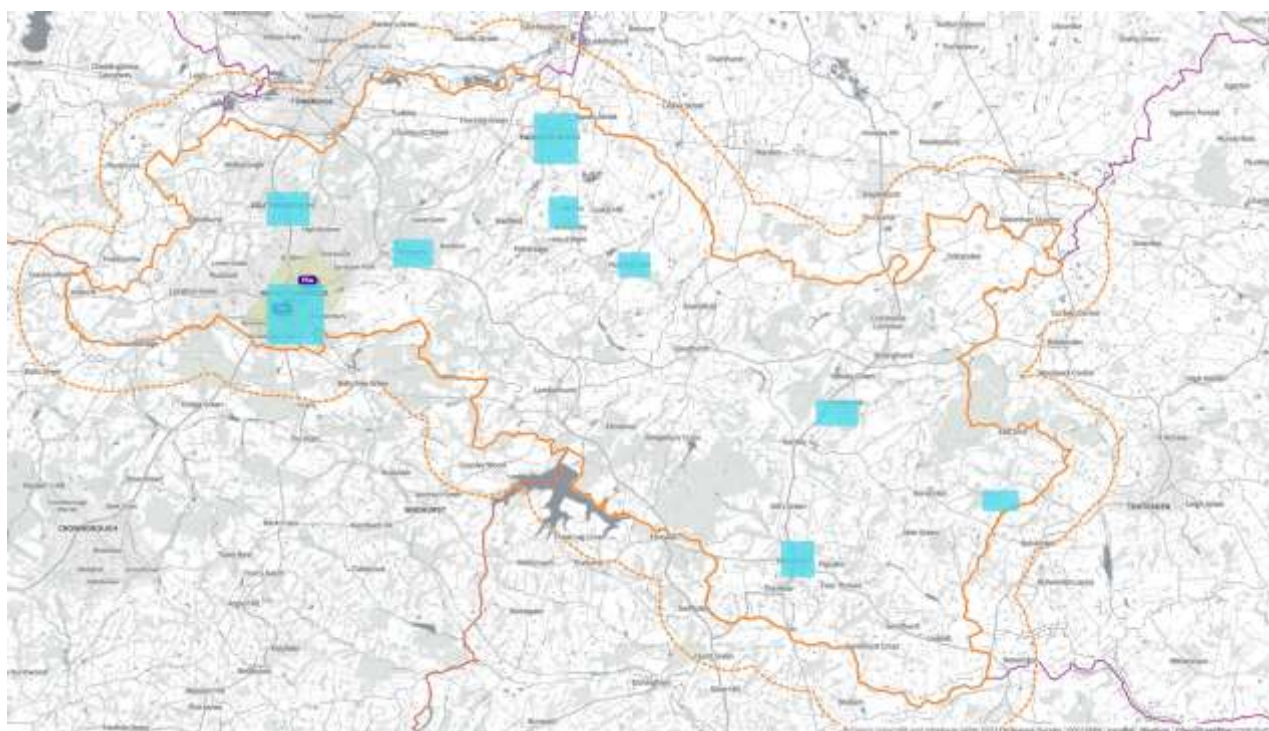

Map 219. Locations of community pharmacies open until at least 7pm on weekdays, proposed housing developments, and areas within 20 minutes of a community pharmacy by public transport on weekday evenings

Walking 20 minutes Sunday

In **map 220**, below, the green shaded areas are within 20-minutes' walk of a community pharmacy that is open on Sundays. Blue shaded areas are locations of major housing developments.

Map 220. Location of community pharmacies, proposed housing developments, and areas within a 20-minute walk of a community pharmacy that is open on Sundays

8. Necessary services: - Gaps in provision

There are no gaps in the provision of services identified as necessary by the Kent HWB.

9. Improvements or better access: Gaps in provision

Sunday opening of at least one pharmacy in the east of the locality would improve access by car within 20 minutes for almost 17,000 people.

There is no Hepatitis C service in this locality. Provision of a service would improve services to the population.

20 Conclusions for the purpose of schedule 1 to The NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended

The pharmaceutical needs assessment has considered the current provision of pharmaceutical services across the county and specifically the demography and health needs of the population. It has analysed whether current provision meets the needs of the population of Kent and whether there are any potential gaps in pharmaceutical service provision either now or within the lifetime of the document. Kent has 271 pharmacies (three of which are distance selling premises) and two dispensing appliance contractors, all providing the full range of essential services. Many provide advanced services as commissioned by NHS England, and some provide services commissioned by Kent County Council via KCC commissioned providers. There are no Local Pharmaceutical Services contractors within the county. 47 of the GP practices dispense to eligible patients across the county. Overall, access to pharmaceutical services in Kent is good due to the spread of premises across the county and the times at which they are open. Redistribution of premises, for example the clustering of pharmacies around GP practices, may impact negatively on the arrangements that are currently in place which in turn may lead to access being worsened, however this will very much depend on the local situation. The Health and Wellbeing Board notes that when considering relocation applications from pharmacies NHS England is required to have regard to, amongst other factors:

- Whether “the location of the new premises is not significantly less accessible” for the patient groups that use the existing premises, and
- Whether the relocation would “result in a significant change to the arrangements that are in place for the provision of” pharmaceutical services. If NHS England is satisfied that the location of new premises is significantly less accessible, or the relocation would result in significant change, then it can refuse the application.

Kent has a population of approximately 1.6 million. The projected population changes and housing developments identified may consequently impact on the type of services required and the number of people accessing pharmaceutical services within the county. However, given the current population demographics, housing projections, the distribution of pharmacies across Kent and their capacity to meet increases in demand, it is anticipated that the current pharmaceutical services providers will be sufficient to meet local needs in the majority of localities. With the current predicted housing developments there will be a future need to increase the provision of pharmaceutical services to the residents of the new development of Otterpool, those southwest of Ashford town and particular areas in the Maidstone locality. The details of these areas and their pharmaceutical needs are set out in the locality sections.

A number of large multiple community pharmacy companies are currently being sold and it is expected that the new owner will review the number of premises. This will affect the provision of pharmaceutical services across Kent and causing the need for an interim review of this PNA document.

20.1 Current Provision – Necessary Services

Kent Health and Wellbeing Board has defined necessary services as:

- Essential services provided at all premises included in the pharmaceutical lists
- The advanced services of Community Pharmacy Consultation Service, New Medicine Service, and flu vaccination, and
- The dispensing service provided by some GP practices.

20.2 Necessary Services – Gaps in Provision

20.2.1 Access to Essential Services

In order to assess the provision of essential services against the needs of the population the Health and Wellbeing Board considered access (travelling times and opening hours) as the most important factor in determining the extent to which the current provision of essential services meets the needs of the population.

20.2.1.1 Access to Essential Services during Normal Working Hours

The Health and Wellbeing Board has identified that the overwhelming majority of the population is able to access a pharmacy during normal working hours within 20 minutes by car. For the small percentage that cannot the Health and Wellbeing Board is satisfied that there is not a current need for more pharmacies in those areas due to:

- The areas are mainly fields and woods
- In general, the small villages in the areas do meet the travel time
- There are some isolated houses and farms, but in general the population is insufficient to make a pharmacy in the areas financially viable
- Residents will leave the areas for the majority, if not all, of their day-to-day needs, and
- Residents in the areas are likely to be dispensed to by their GP practice

Based on the information available at the time of developing this pharmaceutical needs assessment no current gaps in the provision of essential services during normal working hours have been identified in any of the twelve localities.

Based on the information available at the time of developing this pharmaceutical needs assessment no current gaps in the provision of essential services during normal working hours have been identified in any of the twelve localities.

20.2.1.2 Access to Essential Services Outside Normal Working Hours

There is good access to essential services outside normal working hours through provision by thirty 100-hour pharmacies and extended evening and weekend opening hours offered by other pharmacies:

- 59 pharmacies open seven days a week (includes the thirty 100-hour pharmacies)
- 185 pharmacies open Monday to Saturday
- 104 pharmacies open Monday to Friday, and part of Saturday
- 244 pharmacies that open Monday to Friday.

Outside normal working hours the GP out of hours service will provide courses of treatment where appropriate. Although there may be limited access to the other pharmaceutical services, for example medicines support, signposting or self-care. The patient and public questionnaire showed that 76.4% of respondents preferred to visit a pharmacy between 9.00am and 5.00pm, with only a further 23.6% preferring 5.00 to 10.00pm.

It is not expected that any of the current pharmacies will reduce the number of core opening hours, indeed 100-hour pharmacies are unable to, and NHS England foresees no reason to agree a reduction of core opening hours for any service provider except on an ad hoc basis to cover extenuating circumstances as permitted within the terms of service where this based upon a change in patient need.

Based on the information available at the time of developing this pharmaceutical needs assessment no current gaps in the provision of essential services outside normal working hours have been identified in any of the twelve localities.

20.2.2 Access to advanced services

The Health and Wellbeing Board deemed the following advanced services to be necessary

- Community Pharmacy Consultation Service
- New Medicine Service
- Flu vaccination

Based on the data available the Health and Wellbeing Board is satisfied that there is sufficient capacity to meet the demand for advanced services.

Based on the information available at the time of developing this pharmaceutical needs assessment no current gaps in the provision of the New Medicine Service, Community Consultation service and flu vaccination advanced services have been identified in any of the twelve localities.

20.2.3 Future provision of necessary services

The Health and Wellbeing Board has taken into account the following known future developments:

- Forecasted population growth
- Housing and commercial developments

It has identified future needs for necessary pharmaceutical services in two localities, if development occurs according to plan by 2025/26, namely

- Folkestone and Hythe locality- if the developments of Otterpool Park, Main Road, Sellinge and Sellinge phase 2 site B are built
- Ashford locality- in the area to the southwest of the Ashford town centre namely the Chilmington and Kingsnorth area.
- Maidstone locality-if the developments in Downswood, Otham, Parkwood, Allington and Barming areas are built.

Details of the specific areas in each locality can be found in the locality sections of this PNA.

The Health and Wellbeing Board has not identified any future needs in the other ten localities of Kent.

Based on the information available at the time of developing this pharmaceutical needs assessment future gaps in provision of necessary pharmaceutical services in specific areas of three localities have been identified, namely Folkestone & Hythe, Ashford, and Maidstone localities. No future needs for pharmaceutical services have been identified in any of the other nine localities.

20.3 Other Relevant Services: Current Provision

Kent Health and Wellbeing Board identified that two advanced services (Hepatitis C testing and Stop Smoking Service (referral from Hospital)) whilst not necessary to meet the need for pharmaceutical services in its area, have secured improvements or better access in its area.

20.4 Improvements and Better Access – Gaps in Provision

20.4.1 Current and Future Access to Essential Services – Present and Future Circumstances

Kent Health and Wellbeing Board considered the conclusion in respect of current provision as set out at in this document and has not identified services that would, if provided now will secure improvements to or better access to essential services. The Kent Health and Wellbeing Board considered the conclusion in respect of future provision as set out at in this document and has identified the need for additional essential services in specific areas of two localities when the proposed developments and predicted increase in population is realised. The two localities are Folkestone & Hythe and Ashford. Details of the two specific areas in each locality are detailed in the relevant locality sections of this document.

Based on the information available at the time of developing this pharmaceutical needs assessment future gaps in provision of essential pharmaceutical services in specific areas of three localities have been identified, namely Folkestone & Hythe, Ashford, and Maidstone. No future needs for pharmaceutical services have been identified in any of the other nine localities. No present gaps have been identified in any localities.

20.4.2 Current and Future Access to Advanced Services

From the data available not all pharmacies are providing all the advanced services. As shown in this document activity levels for the advanced services at pharmacy level vary across the country. It is noted that three advanced services that were specific to the Covid 19 Pandemic are no longer commissioned. The Hypertension advanced service and Stop Smoking advanced service commenced recently, in October 2021 and April 2022 whilst Pandemic advanced services were still in place. The number of pharmacies providing these two advanced services is predicted to increase over the coming year. The provision of the Hepatitis C Testing service is low and there are localities with no provision. There is the opportunity to improve provision based on the specific needs of localities. The people in the rural areas are required to travel further to access to the Community Pharmacy Consultation Service than the majority of the population and there is an opportunity to improve this. Demand for the appliance advanced services will be lower than for the other advanced services due to the much smaller proportion of the population that may require these services and no gaps in provision have been identified.

Based on the information available at the time of developing this pharmaceutical needs assessment future gaps in provision of advanced pharmaceutical services in specific areas of three localities have been identified, namely Folkestone & Hythe, Ashford, and Maidstone and for greater coverage of newer advanced services in Kent's rural areas.

No future needs for pharmaceutical services have been identified, that if provided either now or in the future would secure improvements, or better access, to advanced services in any of the other nine localities.

20.4.3 Current and Future Access to Enhanced Services

There are currently no enhanced services commissioned by NHS England. No need has been identified to commission enhanced services.

There are, however, a wide range of services commissioned by Kent County Council via commissioned providers and Kent and Medway Clinical Commissioning Group.

Based on the information available at the time of developing this pharmaceutical needs assessment no gaps in respect of securing improvements, or better access, to enhanced service in specified future circumstances have been identified in any of the twelve localities.

20.4.4 Future Access to Advanced and Enhanced Services

Kent Health and Wellbeing Board has not identified any enhanced services that will be required in specified future circumstances, in order to secure improvements or better access to pharmaceutical services.

Kent Health and Wellbeing Board has identified a requirement for advanced services that are not currently provided but that will, in specified future circumstances, need to be provided in order to secure improvements or better access to pharmaceutical services in specific areas of two localities; Folkestone & Hythe and Ashford.

Based on the information available at the time of developing this pharmaceutical needs assessment no gaps in respect of securing improvements, or better access, to **enhanced services** in specified future circumstances have been identified in any of the twelve localities.

Based on the information available at the time of developing this pharmaceutical needs assessment in respect of securing improvements, or better access, to **advanced services** in specified future circumstances have been identified in specific areas of three localities: Folkestone and Hythe, Ashford and Maidstone.

21 Appendix A – policy context and background papers

Between the 1980s and 2012 the ability for a new pharmacy or dispensing appliance contractor premises to open was largely determined by the regulatory system that became known as ‘control of entry’. Broadly speaking an application to open new premises was only successful if a Primary Care Trust or a preceding organisation considered it was either necessary or expedient to grant the application in order to ensure that people could access pharmaceutical services

The control of entry system was reviewed and amended over the years, and in 2005 exemptions to the ‘necessary or expedient’ test were introduced – namely 100 hour pharmacies, wholly mail order or internet pharmacies, out of town retail area pharmacies and one-stop primary care centre pharmacies.

In January 2007 a review of the system was published by the government and found that although the exemptions had had an impact, this had not been even across the country. At the time access to pharmaceutical services was very good (99% of the population could get to a pharmacy within 20 minutes, including in deprived areas), however the system was complex to administer and was largely driven by providers who decided where they wished to open premises rather than by a robust commissioning process. Primary Care Trusts believed that they did not have sufficient influence to commission pharmaceutical services that reflected the health needs of their population. This was at odds with the thrust of the then NHS reforms which aimed to give Primary Care Trusts more responsibility to secure effective commissioning of adequate services to address local priorities.

When the government published the outcomes of this review, it also launched a review of the contractual arrangements underpinning the provision of pharmaceutical services. One of the recommendations of this second review was that Primary Care Trusts should undertake a more rigorous assessment of local pharmaceutical needs to provide an objective framework for future contractual arrangements and control of entry, setting out the requirements for all potential providers to meet, but flexible enough to allow Primary Care Trusts to contract for a minimum service to ensure prompt access to medicines and to the supply of appliances.

The government responded to the outcomes of both reviews, as well as a report by the All-Party Pharmacy Group following an inquiry into pharmacy services, in its pharmacy White Paper “Pharmacy in England. Building on strengths – delivering the future” published in April 2008. The White Paper proposed that commissioning of pharmaceutical services should meet local needs and link to practice-based commissioning. However, it was recognised that at the time there was considerable variation in the scope, depth and breadth of pharmaceutical needs assessments. Some Primary Care Trusts had begun to revise their pharmaceutical needs assessments (first produced in 2004) in light of the 2006 reorganisations, whereas others had yet to start the process. The White Paper confirmed that the government considered that the structure of and data requirements for Primary Care Trust pharmaceutical needs assessments required further review and strengthening to ensure they were an effective and robust commissioning tool which supported Primary Care Trust decisions.

Following consultation on the proposals contained within the White Paper, the Department of Health and Social Care established an advisory group with representation from the main stakeholders. The terms of reference for the group were:

“Subject to Parliamentary approval of proposals in the Health Bill 2009, to consider and advise on, and to help the Department devise, regulations to implement a duty on NHS primary care trusts to develop and to publish pharmaceutical needs assessments and on subsequent regulations required to use such assessments as the basis for determining the provision of NHS pharmaceutical services”.

As a result of the work of this group, regulations setting out the minimum requirements for pharmaceutical needs assessments were laid in Parliament and took effect from 1 April 2010. They placed an obligation on all Primary Care Trusts to produce their first pharmaceutical needs assessment which complied with the

requirement of the regulations on or before 1 February 2011, with an ongoing requirement to produce a second pharmaceutical needs assessment no later than three years after the publication of the first pharmaceutical needs assessment. The group also drafted regulations on how pharmaceutical needs assessments would be used to determine applications for new pharmacy and dispensing appliance contractor premises (referred to as the 'market entry' system) and these regulations took effect from 1 September 2012. The re-organisation of the NHS from 1 April 2013 came about as the result of the Health and Social Care Act 2012. This Act established Health and Wellbeing Boards and transferred responsibility to develop and update pharmaceutical needs assessments from Primary Care Trusts to Health and Wellbeing Boards. Responsibility for using pharmaceutical needs assessments as the basis for determining market entry to a pharmaceutical list transferred from Primary Care Trusts to NHS England from 1 April 2013.

Section 128A of the NHS Act 2006, as amended by the Health and Social Care Act 2012, sets out the requirements for Health and Wellbeing Boards to develop and update pharmaceutical needs assessments and gives the Department of Health and Social Care powers to make regulations.

Section 128A Pharmaceutical needs assessments

- (1) Each Health and Wellbeing Board must in accordance with regulations –
 - a. Assess needs for pharmaceutical services in its area, and
 - b. Publish a statement of its first assessment and of any revised assessment.
- (2) The regulations must make provision –
 - a. As to information which must be contained in a statement;
 - b. As to the extent to which an assessment must take account of likely future needs;
 - c. Specifying the date by which a Health and Wellbeing Board must publish the statement of its first assessment;
 - d. As to the circumstances in which a Health and Wellbeing Board must make a new assessment.
- (3) The regulations may in particular make provision –
 - a. As to the pharmaceutical services to which an assessment must relate;
 - b. Requiring a Health and Wellbeing Board to consult specified persons about specified matters when making an assessment;
 - c. As to the manner in which an assessment be made;
 - d. As to matters to which a Health and Wellbeing Board must have regard when making an assessment.

Pharmaceutical Services) Regulations 2013/103, as amended, in particular Part 2 and Schedule 1.

In summary the regulations set out the:

- Services that are to be covered by the pharmaceutical needs assessment
- Information that must be included in the pharmaceutical needs assessment (it should be noted that Health and Wellbeing Boards are free to include any other information that they feel is relevant)
- Date by which Health and Wellbeing Boards must publish their first pharmaceutical needs assessment
- Requirement on Health and Wellbeing Boards to publish further pharmaceutical needs assessments on a three yearly basis
- Requirement to publish a revised assessment sooner than on a three yearly basis in certain circumstances
- Requirement to publish supplementary statements in certain circumstances
- Requirement to consult with certain people and organisations at least once during the production of the pharmaceutical needs assessment, for at least 60 days; and
- Matters the Health and Wellbeing Board is to have regard to when producing its pharmaceutical needs assessment.

Each Health and Wellbeing Board was under a duty to publish its first pharmaceutical needs assessment by 1 April 2015. In the meantime, the pharmaceutical needs assessment produced by the preceding Primary Care Trust remained in existence and was used by NHS England to determine whether or not to grant applications for new pharmacy or dispensing appliance contractor premises.

Once a Health and Wellbeing Board has published its first pharmaceutical needs assessment it is required to produce a revised pharmaceutical needs assessment within three years or sooner if it identifies changes to the need for pharmaceutical services which are of a significant extent. The only exception to this is where the Health and Wellbeing Board is satisfied that producing a revised pharmaceutical needs assessment would be a disproportionate response to those changes.

In addition a Health and Wellbeing Board may publish a supplementary statement. The regulations set out three situations where the publication of a supplementary statement would be appropriate:

1. The Health and Wellbeing Board identifies changes to the availability of pharmaceutical services which are relevant to the granting of applications for new pharmacy or dispensing appliance contractor premises, and it is satisfied that producing a revised assessment would be a disproportionate response to those changes
1. The Health and Wellbeing Board identifies changes to the availability of pharmaceutical services which are relevant to the granting of applications for new pharmacy or dispensing appliance contractor premises, and is in the course of making a revised assessment and is satisfied that it needs to immediately modify its current pharmaceutical needs assessment in order to prevent significant detriment to the provision of pharmaceutical services in its area; and
1. Where a pharmacy is removed from a pharmaceutical list as a result of the grant of a consolidation application, if the Health and Wellbeing Board is of the opinion that the removal does not create a gap in pharmaceutical services that could be met by a routine application offer to meet a current or future need, or secure improvements or better access to pharmaceutical services, then the Health and Wellbeing Board must publish a supplementary statement explaining that the removal does not create such a gap.

The NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, as amended was subject to a post implementation review by the Department of Health and Social Care in 2017/18. It resulted in The NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2020 (the 2020 regulations) introduced regulatory changes effective from 9 November 2020, 1 January 2021, 15 February 2021 and 1 April 2021.

The regulatory changes effective from 9 November 2020 were:

- Entering administration, new requirements for pharmacy entering this legal state
- Pandemic treatment protocols (PTPs).
- Dispensing services- changes to activities to be carried out in connection with the provision of dispensing services relating to the Electronic Prescription Service (EPS).
- Referrals, communication, information and remote access- new requirements for contractors to ensure:
 1. their staff have access to the premises-specific NHSmail account, patient's summary care record and the EPS;
 2. Directory of Services and NHS website profiles are comprehensive and accurate for their pharmacy;
 3. They are registered with the Medicines and Healthcare products Regulatory Agency to receive Central Alerting System notifications.
- Health campaigns. changes to the type and timing of health campaigns and informing NHS England and NHS Improvement on their delivery.
- Notices of commencement -the submission of notices of commencement for new entrants to the pharmaceutical list.

The regulatory changes on 1 January 2021 were:

- Promotion of healthy living.
- the contractual requirements for pharmacies to have an area for confidential consultations, with certain exceptions until 1 April 2023.

The regulatory changes on 15 February 2021 were:

- NHS Discharge Medicines Service. new essential service. Community pharmacy will receive referrals from NHS trusts to support patients post discharge, along with information about medication changes made in hospital to improve outcomes, prevent harm and reduce readmissions.

The regulatory changes on 1 April 2021 are:

- the requirement for distance selling contractors to have a website with an interactive page that promotes healthy lifestyles.

22 Appendix B – Essential Services

The Essential Services listed below are offered by all pharmacy contractors as part of the NHS Community Pharmacy Contractual Framework (the 'pharmacy contract').

- Dispensing Medicines and Appliances
- Repeat Dispensing
- Discharge medicines service
- Clinical governance
- Public Health
- (Promotion of Healthy Living)
- Sign posting
- Support for selfcare
- Disposal of unwanted medicines

1. Dispensing of Prescriptions

Service Description

The supply of medicines and appliances ordered on NHS prescriptions, together with information and advice, to enable safe and effective use by patients and carers, and maintenance of appropriate records. The Electronic Prescription Service (EPS) is also being implemented as part of the dispensing service.

Aims and Intended Outcomes

To ensure patients receive ordered medicines and appliances safely by:

- Performing appropriate legal, clinical and accuracy checks;
- Having safe systems of operation, in line with clinical governance requirements;
- Having systems in place to guarantee the integrity of products supplied;
- Maintaining a record of all medicines and appliances supplied which can be used to assist future patient care;
- Maintaining a record of advice given, and interventions and referrals made, where the pharmacist judges it to be clinically appropriate.

To ensure patients are able to use their medicines and appliances effectively by:

- Providing information and advice to the patient² on the safe use of their medicine or appliance;
- Providing when appropriate broader advice to the patient on the medicine, for example its possible side effects and significant interactions with other substances.

2. Dispensing of Repeatable Prescriptions

Service Description

The management and dispensing of repeatable NHS prescriptions for medicines and appliances in partnership with the patient and the prescriber.

This service specification covers the requirements additional to those for dispensing, such that the pharmacist ascertains the patient's need for a repeat supply and communicates any clinically significant issues to the prescriber.

Aims and Intended Outcomes:

- To increase patient choice and convenience, by allowing them to obtain their regular prescribed medicines and appliances directly from a community pharmacy for a period agreed by the prescriber
- To minimise wastage by reducing the number of medicines and appliances dispensed which are not required by the patient
- To reduce the workload of general medical practices, by lowering the burden of managing repeat prescriptions.

3. Discharge Medicines Service (DMS) *(This is a new service that commenced February 2021)*

Service Description

Patients are digitally referred to their pharmacy after discharge from hospital, using IT systems such as PharmOutcomes, Refer to Pharmacy or **NHSmail**. Using the information in the referral, pharmacists are able to compare the patient's medicines at discharge to those they were taking before admission to hospital. A check is also made when the first new prescription for the patient is issued in primary care and a consultation with the patient and/or their carer will help to ensure that they understand which medicines the patient should now be using.

Aims and Intended Outcomes

The NHS Discharge Medicines Service toolkit is intended to support delivery of the NHS Discharge Medicines Service and ensure that:

- An integrated approach to supporting patients with medicines reconciliation and optimisation following discharge is taken across healthcare sectors, ensuring clear and identifiable links between community pharmacy, NHS trusts and PCN member practices.
- A consistent approach to handling a referral for post-discharge medicines reconciliation is adopted. This is to reduce harm to patients caused by medication changes, give patients an improved understanding of their 5 medicines post discharge, ensure medicines are stopped as intended, and reduce hospital readmissions because of medication issues.
- NHS trusts develop local processes for patients to be referred to community pharmacy post discharge and these referrals are linked to a consistent service in community pharmacy.
- Community pharmacy contractors and PCNs collaborate to support patients with medicines optimisation following discharge. This includes community pharmacy contractors referring

patients to PCN practices (eg PCN pharmacy team for any additional medicines support such as a Structured Medication Review).

4. Clinical Governance

Service Description

The clinical governance requirements of the community pharmacy contractual framework (CPCF) cover a range of quality related issues detailed below:

- Patient and public involvement programme
- Clinical audit programme
- Risk management programme
- Clinical effectiveness programme
- Staffing and staff management programme
- Premises standards

Aims and Intended Outcomes

The aim is to have a Clinical governance is a system in place through which healthcare providers are accountable for continuously improving the quality of their services and safeguarding high standards of care, by creating an environment in which excellence in clinical care will flourish.

5. Public Health (Promotion of Healthy Living)

Service Description

The provision of opportunistic healthy lifestyle and public health advice to patients receiving prescriptions who appear to:

- Have diabetes; or
- Be at risk of coronary heart disease, especially those with high blood pressure; or
- Who smoke; or
- Are overweight, and pro-active participation in national/local campaigns, to promote public health messages to general pharmacy visitors during specific targeted campaign periods

Aims and Intended Outcomes

- To increase patient and public knowledge and understanding of key healthy lifestyle and public health messages so they are empowered to take actions which will improve their health.
- To target the 'hard to reach' sectors of the population who are not frequently exposed to health promotion activities in other parts of the health or social care sector.

6. Sign posting

Service Description

The provision of information to people visiting the pharmacy, who require further support, advice or treatment which cannot be provided by the pharmacy but is available from other health and social care providers or support organisations who may be able to assist the person. Where appropriate, this may take the form of a referral.

Aims and Intended Outcomes

- To inform or advise people who require assistance, which cannot be provided by the pharmacy, of other appropriate health and social care providers or support organisations
- To enable people to contact and/or access further care and support appropriate to their needs
- To minimise inappropriate use of health and social care services.

7. Support for selfcare

Service Description

The provision of advice and support by pharmacy staff to enable people to derive maximum benefit from caring for themselves or their families.

Aims and Intended Outcomes

- To enhance access and choice for people who wish to care for themselves or their families
- People, including carers, are provided with appropriate advice to help them self-manage a self-limiting or long-term condition, including advice on the selection and use of any appropriate medicines
- People, including carers, are opportunistically provided with health promotion advice when appropriate, in line with the advice provided in essential service – promotion of healthy lifestyles service
- People, including carers, are better able to care for themselves or manage a condition both immediately and in the future, by being more knowledgeable about the treatment options they have, including non-pharmacological ones
- To minimise inappropriate use of health and social care services.

8. Disposal of Unwanted Medicines

Service Description

Acceptance by community pharmacies, of unwanted medicines which require safe disposal from households and individuals. NHS England is required to arrange for the collection and disposal of waste medicines from pharmacies.

Aims and Intended Outcomes

To ensure the public has an easy method of safely disposing of unwanted medicines

- To reduce the volume of stored unwanted medicines in people's homes by providing a route for disposal thus reducing the risk of accidental poisonings in the home and diversion of medicines to other people not authorised to possess them
- To reduce the risk of exposing the public to unwanted medicines which have been disposed of by non-secure methods
- To reduce environmental damage caused by the inappropriate disposal methods for unwanted medicines.

23 Appendix C – Advanced Services

Advanced services – pharmacies may choose whether to provide these services or not. If they choose to provide one or more of the advanced services, they must meet certain They must be fully compliant with the essential services and clinical governance requirements. The advanced services as of March 2022 are:

- Appliance Use Review
- Community Pharmacy Consultation Service (CPCS)
- C19 Lateral flow device distribution service
- Flu vaccination
- Hepatitis C testing Service
- Hypertension Case Finding Service
- New Medicines Service (NMS)
- Pandemic Delivery Service
- Stoma Appliance Customisation Service
- Stop Smoking Advanced Service (referral from hospital)

Note: C19 Lateral flow device distribution service and Pandemic Delivery Service are services specific to the Covid pandemic and are not intended to be long term. These have both been discontinued in March 2022.

Note: The medicines use review and prescription intervention services (more commonly referred to as the Medicines Use Review service) is no longer an advanced service.

1. Appliance Use Review

Service description

An Appliance Use Review is about helping patients use their appliances more effectively. Recommendations made to prescribers may also relate to the clinical or cost effectiveness of treatment.

Aims and Intended Outcome

The purpose of the service is, with the patient's agreement, to improve the patient's knowledge and use of any specified appliance by:

- Establishing the way, the patient uses the specified appliance and the patient's experience of such use
- Identifying, discussing, and assisting in the resolution of poor or ineffective use of the specified appliance by the patient

- Advising the patient on the safe and appropriate storage of the specified appliance
- Advising the patient on the safe and proper disposal of the specified appliances that are used or unwanted.

2. Community Pharmacy Consultation Service (CPCS)

Service description

This service replaces NUMAs and DMiRs pilots, connects patients who have a minor illness or urgent supply of medicine with a community pharmacy. Patients are referred from general practice, NHS 111, Integrated urgent care clinical assessment services and in some cases from 999 services.

Aims and Intended Outcome

The CPCS aims to relieve pressure on the wider NHS by connecting patients with community pharmacy, which should be their first port of call and can deliver a swift, convenient, and effective service to meet their needs. Since the CPCS was launched, an average of 10,500 patients per week being referred for a consultation with a pharmacist following a call to NHS 111; these are patients who might otherwise have gone to see a GP

3. Flu vaccination

Service description

Pharmacy staff will identify people eligible for flu vaccination and encourage them to be vaccinated. This service covers eligible patients aged 18 years and older who fall in one of the national a risk group. The vaccination is to be administered to eligible patients, who do not have any contraindications to vaccination, under the NHS England patient group direction.

Aims and Intended Outcome

The aims of this service are to:

- Sustain uptake of flu vaccination by building the capacity of community pharmacies as an alternative to general practice
- Provide more opportunities and improve convenience for eligible patients to access flu vaccinations; and
- Reduce variation and provide consistent levels of population coverage of community pharmacy flu vaccination across England by providing a national framework.

4. Hepatitis C testing Service

Service description

- The Community Pharmacy Hepatitis C Antibody Testing Service ('the service') is an Advanced service commissioned under the NHS Community Pharmacy Contractual Framework.

- PWIDS who are **not** engaged in community drug and alcohol treatment services, will be offered the opportunity to receive an HCV test from a community pharmacy of their choice (subject to the pharmacy being registered to provide the service).
- Where the test produces a positive result, the PWID will be referred for appropriate further testing and treatment via the relevant ODN

Aims and Intended Outcome

The aim of this service is to increase levels of testing for HCV amongst PWIDS who are not engaged in community drug and alcohol treatment services to:

- Increase the number of diagnoses of HCV infection
- Permit effective interventions to lessen the burden of illness to the individual
- Decrease long-term costs of treatment; and
- Decrease onward transmission of HCV.

5. Hypertension Case Finding Service

Service description

This is an advanced services for adults over 40 years of age or over, who do not currently have a diagnosis of hypertension. This is a screen service and all patients identified as hypertensive are referred to their GP for treatment. The pharmacist will provide information on healthy living to all patients.

Aims and Intended Outcome

The aims and objectives of this service are to:

- Identify people aged 40 years or older, or at the discretion of the pharmacist people under the age of 40, with high blood pressure (who have previously not had a confirmed diagnosis of hypertension), and to refer them to general practice to confirm diagnosis and for appropriate management
- At the request of a general practice, undertake ad hoc clinic and ambulatory blood pressure measurements
- Promote healthy behaviours to patients

6. New Medicines Service (NMS)

Service description

The New Medicine Service is provided to patients who have been prescribed for the first time, a medicine for a specified long-term condition, to improve adherence. The New Medicine Service involves three stages, recruitment into the service, an intervention about one or two weeks later, and a follow up after two or three weeks.

Aims and Intended Outcome

The purpose of the service is to promote the health and wellbeing of patients who are prescribed a new medicine or medicines for certain long-term conditions, in order:

- As regards the long-term condition:
 - To help reduce symptoms and long-term complications, and
 - In particular by intervention post dispensing, to help identification of problems with management of the condition and the need for further information or support; and
- To help the patients:
 - Make informed choices about their care,
 - Self-manage their long-term conditions,
 - Adhere to agreed treatment programmes, and
 - Make appropriate lifestyle changes.

7. Stoma Appliance Customisation Service

Service description

Stoma appliance customisation is the customisation of a quantity of more than one stoma appliance, where:

- The stoma appliance to be customised is listed in Part IXC of the Drug Tariff
- The customisation involves modification to the same specification of multiple identical parts for use with an appliance; and
- Modification is based on the patient's measurement or record of those measurements and if applicable, a template.

Aims and Intended Outcome

The purpose of the service is to:

- Ensure the proper use and comfortable fitting of the stoma appliance by a patient; and
- Improve the duration of usage of the appliance, thereby reducing wastage of such appliances.

8. Stop Smoking Advanced Service (*referral from hospital*)

Service description

This service has been designed to enable NHS trusts to undertake a transfer of care on patient discharge, referring patients (where they consent) to a community pharmacy of their choice to continue their smoking NHS Smoking Cessation Service (SCS) cessation treatment, including providing medication and support as required. The ambition is for referral from NHS trusts to community pharmacy to create additional capacity in the smoking cessation pathway

Aims and Intended Outcome

The aim of the service is to:

- Reduce morbidity and mortality from smoking, and to reduce health inequalities associated with higher rates of smoking
- To ensure that any patients referred by NHS trusts to community pharmacy for the SCS receive a consistent and effective offer, in line with NICE guidelines and the OMSC.

24 Appendix D – Enhanced Services

Enhanced services – Service specifications for this type of service are developed by NHS England and then commissioned to meet specific health needs.

NHS England has no Local Pharmaceutical Services contracts within the Kent Health and Wellbeing Board's area, and NHS England does not have plans to commission such contracts within the lifetime of this pharmaceutical needs assessment.

25 Appendix E – Terms of Service for Dispensing Appliance Contractors

1. Dispensing of prescriptions

Service description

The supply of appliances ordered on NHS prescriptions, together with information and advice and appropriate referral arrangements in the event of a supply being unable to be made, to enable safe and effective use by patients and carers, and maintenance of appropriate records.

Aims and Intended

To ensure patients receive ordered appliances safely and appropriately by the dispensing appliance contractor:

- Performing appropriate legal, clinical and accuracy checks
- Having safe systems of operation, in line with clinical governance requirements
- Having systems in place to guarantee the integrity of products supplied
- Maintaining a record of all appliances supplied which can be used to assist future patient care
- Maintaining a record of advice given, and interventions and referrals made, where the dispensing appliance contractor judges it to be clinically appropriate
- Providing the appropriate additional items such as disposable bags and wipes
- Delivering the appropriate items if required to do so in a timely manner and in suitable packaging that is discreet.

To ensure patients can use their appliances effectively by staff providing information and advice to the patient or carer on the safe use of their appliance(s).

2. Dispensing of repeatable prescriptions

Service description

The management and dispensing of repeatable NHS prescriptions appliances in partnership with the patient and the prescriber. This service specification covers the requirements additional to those for dispensing, such that the dispensing appliance contractor ascertains the patient's need for a repeat supply and communicates any clinically significant issues to the prescriber.

Aims and Intended

- To increase patient choice and convenience, by allowing them to obtain their regular prescribed appliances directly from a dispensing appliance contractor for a period agreed by the prescriber
- To minimise wastage by reducing the number of appliances dispensed which are not required by the patient
- To reduce the workload of GP practices, by lowering the burden of managing repeat prescriptions.

3. Home Delivery Service

Service description

The delivery of certain appliances to the patient's home.

Aims and Intended

To preserve the dignity of patients by ensuring that certain appliances are delivered:

- With reasonable promptness, at a time agree with the patient
- In a package that displays no writing or other markings which could indicate its content; and
- In such a way that it is not possible to identify the type of appliance that is being delivered.

4. Supply of appropriate supplementary items

Service description

The provision of additional items such as disposable wipes and disposal bags in connection with certain appliances. vice description

Aims and Intended

To ensure that patients have a sufficient supply of wipes for use with their appliance and can dispose of them in a safe and hygienic way.

5. Provide expert clinical advice regarding appliances

Service description

The provision of expert clinical advice from a suitably trained person who has relevant experience in respect of certain appliances

Aims and Intended

To ensure that patients can seek appropriate advice on their appliance to increase their confidence in choosing an appliance that suits their needs as well as gaining confidence to adjust to the changes in their life and learning to manage an appliance.

6. Where a telephone care line is provided, during the period when the dispensing appliance contractor is closed advice is either to be provided via the care line or callers are directed to other providers who can provide advice

Service description

Provision of advice on certain appliances via a telephone care line outside of the dispensing appliance contractor's contracted opening hours. The dispensing appliance contractor is not required to staff the care line all day, every day, but when it is not callers must be given a telephone number or website contact details for other providers of NHS services who may be consulted for advice.

Aims and Intended

Callers to the telephone care line can access advice 24 hours a day, seven days a week on certain appliances in order to manage their appliance.

7. Signposting

Service description

Where a patient presents a prescription for an appliance which the dispensing appliance contractor does not supply the prescription is either:

- With the consent of the patient, passed to another provider of appliances, or
- If the patient does not consent, they are given contact details for at least two other contractors who are able to dispense it.

Aims and Intended

To ensure that patients can have their prescription dispensed.

26 Appendix F – PNA Steering group membership

Name	Role	Organisation
Anjan Ghosh	Public Health director	Kent County Council
Sarah Leaver	Pharmacist	Kent County Council
Cheryl Clennett	Patient Representative	Health watch

Paul Clarke	Public Health Specialist	Kent County Council

27 Appendix G – Kent Patient and Public Engagement Questionnaire

Pharmaceutical Needs Assessment Survey

We have a statutory responsibility to publish and keep up to date a statement of the needs for pharmaceutical services (community pharmacies, dispensing doctors and appliance contractor) for the population of Kent, referred to as a 'pharmaceutical needs assessment'.

We would like to hear how you use pharmacies to assist us in the production of the second version of the Kent Pharmaceutical Needs Assessment.

This questionnaire can be completed online at www.kent.gov.uk/pharmacyneeds.

Alternatively, fill in this Word version of the survey and return to:

Email: pna@kent.gov.uk

Address: PNA Review, Public Health, Sessions House, Kent County Council, County Road, Maidstone, Kent, ME14 1XQ

Please ensure your response reaches us by 19 December 2021.

Privacy: Kent County Council (KCC) collects and processes personal information in order to provide a range of public services. KCC respects the privacy of individuals and endeavours to ensure personal information is collected fairly, lawfully, and in compliance with the United Kingdom General Data Protection Regulation and Data Protection Act 2018. Read the full Privacy Notice at the end of this document.

Alternative formats: If you require any of the consultation material in an alternative format or language, please email: alternativeformats@kent.gov.uk or call: 03000 42 15 53 (text relay service number: 18001 03000 42 15 53). This number goes to an answering machine, which is monitored during office hours.

Section 1 – About you

Q1. Please tell us which district/borough you live in

*Please select **one** option.*

<input type="checkbox"/>	Ashford
<input type="checkbox"/>	Canterbury
<input type="checkbox"/>	Dartford
<input type="checkbox"/>	Dover

<input type="checkbox"/>	Tunbridge Wells

Q2. Please tell us the first five characters of your postcode:

Please do not reveal your whole postcode. We use this to help us to analyse our data. It will not be used to identify who you are.

Section 2 – About your use of pharmacies

Q3. Do you have your medicines dispensed at a pharmacy?

*Please select **one** option.*

<input type="checkbox"/>	Yes
<input type="checkbox"/>	No
<input type="checkbox"/>	Don't know

Q4. Do you have your medicines dispensed at a dispensing doctors' practice?

This is a surgery where the doctor can supply the medication as well as prescribe it. This only applies where the surgery holds a contract to dispense and the patient lives in a very rural location making access to normal pharmaceutical services difficult.

*Please select **one** option.*

<input type="checkbox"/>	Yes
<input type="checkbox"/>	No
<input type="checkbox"/>	Don't know

Q5. Do you use a distance selling / internet pharmacy?

An online pharmacy, internet pharmacy, or mail-order pharmacy is a pharmacy that operates over the internet and sends orders to customers through mail, shipping companies, or online pharmacy web portal.

*Please select **one** option.*

<input type="checkbox"/>	Yes
<input type="checkbox"/>	No
<input type="checkbox"/>	Don't know

If you use a pharmacy, please answer questions 6 to 16. Otherwise, please go to question 16.

Q6. How often do you visit a pharmacy?

Please select **one** option.

- ☐ One or more times per week
- ☐ Once every couple of weeks
- ☐ Once a month
- ☐ Once every couple of months
- ☐ Less often
- ☐ Don't know

Q7. What do you use a pharmacy for?

Please select **all** that apply.

- ☐ To collect a prescription for myself
- ☐ To collect a prescription for someone else
- ☐ To buy over the counter medicines
- ☐ Healthcare advice (e.g. medication, your condition/illness, healthy living advice etc)
- ☐ Healthcare service (e.g. stop smoking or emergency contraception, blood pressure checks etc)
- ☐ Other - please tell us in the box below

Q8. What time of the day is most convenient for you to visit a pharmacy?

Please select **all** that apply.

- | | |
|--------------------------|--------------------------------|
| <input type="checkbox"/> | Morning – before 12pm midday |
| <input type="checkbox"/> | Afternoon – 12pm midday to 5pm |
| <input type="checkbox"/> | Early evening – 5pm to 7pm |
| <input type="checkbox"/> | Late evening – 7pm to 10pm |

Q9. What day(s) of the week are most convenient for you to visit a pharmacy?

*Please select **all** that apply.*

- | | |
|--------------------------|-----------|
| <input type="checkbox"/> | Monday |
| <input type="checkbox"/> | Tuesday |
| <input type="checkbox"/> | Wednesday |
| <input type="checkbox"/> | Thursday |
| <input type="checkbox"/> | Friday |
| <input type="checkbox"/> | Saturday |
| <input type="checkbox"/> | Sunday |

Q10. Do you always use the same pharmacy?

*Please select **one** option.*

- | | |
|--------------------------|------------------|
| <input type="checkbox"/> | Yes |
| <input type="checkbox"/> | Most of the time |
| <input type="checkbox"/> | No |
| <input type="checkbox"/> | Don't know |

Q11. What is the most important thing when deciding which pharmacy to use?

Please select **one** option.

The pharmacy is...

- ☐ Near to work
- ☐ Near to home
- ☐ Near to my doctors
- ☐ In town/shopping area
- ☐ In the supermarket
- ☐ Other - please tell us in the box below:

Q12. How do you usually travel to a pharmacy?

Please select **one** option.

- ☐ Walk
- ☐ Car (driver)
- ☐ Car (passenger)
- ☐ Bus
- ☐ Bicycle
- ☐ Taxi
- ☐ Other, please specify in the box below:

Q13. How long does your journey to a pharmacy usually take?

*Please select **one** option.*

- | | |
|--------------------------|----------------------|
| <input type="checkbox"/> | Less than 10 minutes |
| <input type="checkbox"/> | 11 to 30 minutes |
| <input type="checkbox"/> | 31 to 60 minutes |
| <input type="checkbox"/> | More than 60 minutes |

Q14. If you have a regular pharmacy but it was not open, would you...

*Please select **one** option.*

- | | |
|--------------------------|-----------------------|
| <input type="checkbox"/> | Wait for it to open |
| <input type="checkbox"/> | Find another pharmacy |
| <input type="checkbox"/> | Don't know |
| <input type="checkbox"/> | Not applicable |

Q15. If you use a regular pharmacy and it didn't have the things you need, would you...

*Please select **one** option.*

- | | |
|--------------------------|--|
| <input type="checkbox"/> | Wait for it to order the things you need |
| <input type="checkbox"/> | Find another pharmacy |
| <input type="checkbox"/> | Don't know |
| <input type="checkbox"/> | Not applicable |

Section 3 – More about you

We want to make sure that everyone is treated fairly and equally, and that no one gets left out. That's why we are asking you these questions. We'll use it only to help us make decisions and improve our services.

If you would rather not answer any of these questions, you don't have to.

It is not necessary to answer these questions if you are responding on behalf of an organisation.

Q16. Are you...? Please select *one* option.

<input type="checkbox"/>	Male
<input type="checkbox"/>	Female
<input type="checkbox"/>	I prefer not to say

Q17. Is your gender the same as your birth? Please select *one* option.

<input type="checkbox"/>	Yes
<input type="checkbox"/>	No
<input type="checkbox"/>	I prefer not to say

Q18. Which of these age groups applies to you? Please select *one* option.

0-15	<input type="checkbox"/>	16-24	<input type="checkbox"/>	25-34	<input type="checkbox"/>	35-49	<input type="checkbox"/>	50-59	<input type="checkbox"/>
60-64	<input type="checkbox"/>	65-74	<input type="checkbox"/>	75-84	<input type="checkbox"/>	85+ over	<input type="checkbox"/>	I prefer not to say	<input type="checkbox"/>

Q19. Do you regard yourself as belonging to a particular religion or holding a belief?
Please select *one* option.

<input type="checkbox"/>	Yes
--------------------------	-----

<input type="checkbox"/>	No
<input type="checkbox"/>	I prefer not to say

Q19a. If you answered 'Yes' to Q19, which of the following applies to you? *Please select one option.*

<input type="checkbox"/>	Christian
<input type="checkbox"/>	Buddhist
<input type="checkbox"/>	Hindu
<input type="checkbox"/>	Jewish
<input type="checkbox"/>	Muslim
<input type="checkbox"/>	Sikh
<input type="checkbox"/>	Other
<input type="checkbox"/>	I prefer not to say

If you selected Other, please specify:

The Equality Act 2010 describes a person as disabled if they have a long standing physical or mental condition that has lasted, or is likely to last, at least 12 months; and this condition has a substantial adverse effect on their ability to carry out normal day-to-day activities. People with some conditions (cancer, multiple sclerosis and HIV/AIDS, for example) are considered to be disabled from the point that they are diagnosed.

Q20. Do you consider yourself to be disabled as set out in the Equality Act 2010? *Please select one option.*

- ☐ Yes
- ☐ No
- ☐ I prefer not to say

Q20a. If you answered 'Yes' to Q20, please tell us the type of impairment that applies to you.

You may have more than one type of impairment, so please select all that apply. If none of these applies to you, please select 'Other' and give brief details of the impairment you have.

- ☐ Physical impairment
- ☐ Sensory impairment (hearing, sight or both)
- ☐ Longstanding illness or health condition, such as cancer, HIV/AIDS, heart disease, diabetes or epilepsy
- ☐ Mental health condition
- ☐ Learning disability
- ☐ I prefer not to say
- ☐ Other

Other, please specify:

A Carer is anyone who cares, unpaid, for a friend or family member who due to illness, disability, a mental health problem or an addiction cannot cope without their support. Both children and adults can be carers.

Q21. Are you a Carer? Please select *one* option.

- ☐ Yes
- ☐ No

☐ I prefer not to say

Q22. Are you ...? Please select *one* option.

- | | |
|--------------------------|-----------------------|
| <input type="checkbox"/> | Heterosexual/Straight |
| <input type="checkbox"/> | Bi/Bisexual |
| <input type="checkbox"/> | Gay man |
| <input type="checkbox"/> | Gay woman/Lesbian |
| <input type="checkbox"/> | Other |
| <input type="checkbox"/> | I prefer not to say |

Q23. To which of these ethnic groups do you feel you belong? Please select *one* option.
(Source 2011 Census)

- | | | | |
|----------------------------------|--------------------------|----------------------------------|--------------------------|
| White English | <input type="checkbox"/> | Mixed White & Black Caribbean | <input type="checkbox"/> |
| White Scottish | <input type="checkbox"/> | Mixed White & Black African | <input type="checkbox"/> |
| White Welsh | <input type="checkbox"/> | Mixed White & Asian | <input type="checkbox"/> |
| White Northern Irish | <input type="checkbox"/> | Mixed Other* | <input type="checkbox"/> |
| White Irish | <input type="checkbox"/> | Black or Black British Caribbean | <input type="checkbox"/> |
| White Gypsy/Roma | <input type="checkbox"/> | Black or Black British African | <input type="checkbox"/> |
| White Irish Traveller | <input type="checkbox"/> | Black or Black British Other* | <input type="checkbox"/> |
| White Other* | <input type="checkbox"/> | Arab | <input type="checkbox"/> |
| Asian or Asian British Indian | <input type="checkbox"/> | Chinese | <input type="checkbox"/> |
| Asian or Asian British Pakistani | <input type="checkbox"/> | I prefer not to say | <input type="checkbox"/> |

Asian or Asian British Bangladeshi

☐

Asian or Asian British Other*

☐

*Other - If your ethnic group is not specified on the list, please describe it here:

Thank you for taking the time to complete this survey. The **closing date for responses: 19 December 2021**

28 Appendix H – Full results of the patient and public questionnaire

Please tell us which district/ borough you live in?

Do you have your medicines dispensed at a pharmacy?

Do you have your medicines dispensed at a dispensing doctors' practice?

This is a surgery where the doctor can supply the medication as well as prescribe it. This only applies where the surgery holds a contract to dispense and the patient lives in a very rural location making access to normal pharmaceutical services difficult.

Do you use a distance selling / internet pharmacy?

An online pharmacy, internet pharmacy, or mail-order pharmacy is a pharmacy that operates over the internet and sends orders to customers through mail, shipping companies, or online pharmacy web portal.

How often do you visit a pharmacy?

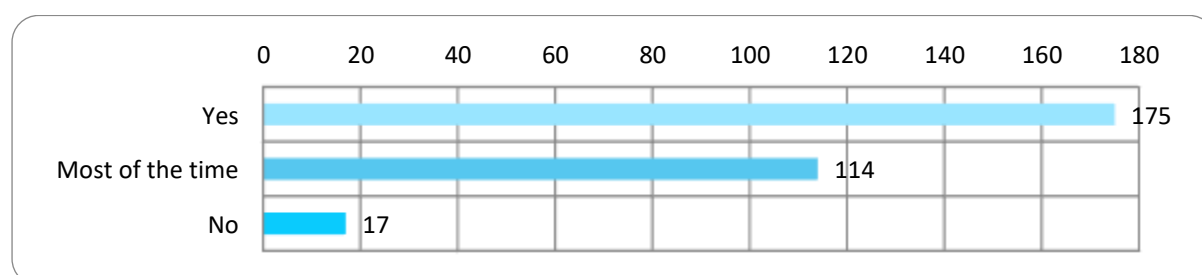

What do you use a pharmacy for?

What time of the day is most convenient for you to visit a pharmacy?

Do you always use the same pharmacy?

What day(s) of the week are most convenient for you to visit a pharmacy?

Do you always use the same pharmacy?

What is the most important thing when deciding which pharmacy to use? The pharmacy is...

How do you usually travel to a pharmacy?

How long does your journey to a pharmacy usually take?

If you have a regular pharmacy but it was not open, would you...

If you use a regular pharmacy and it didn't have the things you need, would you...

Are you willing to provide more information about yourself?

Are you male or female?

Is your gender the same as your birth?

Which of these age groups applies to you?

Do you regard yourself as belonging to a particular religion or holding a belief?

Which of the following applies to you?

The Equality Act 2010 describes a person as disabled if they have a long standing physical or mental condition that has lasted, or is likely to last, at least 12 months; and this condition has a substantial

adverse effect on their ability to carry out normal day-to-day activities. People with some conditions (cancer, multiple sclerosis and HIV/AIDS, for example) are considered to be disabled from the point that they are diagnosed.

Do you consider yourself to be disabled as set out in the Equality Act 2010?

Please tell us the type of impairment that applies to you. You may have more than one type of impairment, so please select all that apply. If none of these applies to you, please select 'Other' and give brief details of the impairment you have.

A Carer is anyone who cares, unpaid, for a friend or family member who due to illness, disability, a mental health problem or an addiction cannot cope without their support. Both children and adults can be carers. **Are you a Carer?**

Are you?

To which of these ethnic groups do you feel you belong?

29 Appendix I – Contractor Questionnaire

The Pharmaceutical Needs Assessment (PNA) is a statutory obligation of The Kent Health and Wellbeing Board (HWB). The PNA is used to identify need for and improvement in or better access to pharmaceutical services for the Kent HWB population. The PNA is also used by NHS England as the basis for market entry applications to open new premises and may inform relocations of existing premises, applications to change core opening hours or to provide additional pharmaceutical services.

It is essential that the PNA is an accurate record of current pharmaceutical services and completion of this questionnaire will help to ensure that the PNA is as accurate as possible.

By completing this questionnaire you agree to your responses being collated, and processed by Kent County Council, which is producing the PNA on behalf of the Kent HWB. The information you provide will only be used for the purposes stated above.

Thank you for your participation.

Contractor code (ODS Code)	
Is this pharmacy one which is entitled to Pharmacy Access Scheme payments?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Possibly

30 Appendix J – Dispensing Practice Questionnaire

PNA Dispensing Practice Questionnaire 2021 - The Pharmaceutical Needs Assessment for Kent Health and Wellbeing Board Version 1 November 2021

The Pharmaceutical Needs Assessment (PNA) is a statutory obligation of The Kent Health and Wellbeing Board (HWB). The PNA is used to identify need for and improvement in or better access to pharmaceutical services for the Kent HWB population. The PNA is also used by NHS England as the basis for market entry applications to open new premises and may inform relocations of existing premises, applications to change core opening hours or to provide additional pharmaceutical services. It is essential that the PNA is an accurate record of current pharmaceutical services and completion of this questionnaire will help to ensure that the PNA is as accurate as possible. By completing this questionnaire, you agree to your responses being collated, and processed by Kent County Council, which is producing the PNA on behalf of the Kent HWB. The information you provide will only be used for the purposes stated above.

For queries relating to the information requested or the answers required please email PNA@kent.gov.uk

Please insert the name of the practice you are completing the questionnaire on behalf of:

Please insert the address or addresses of the premises for which the practice has premises approve to dispense from:

1. Are appliances dispensed from the premises?

	Please tick one box
Yes All types, or	
Yes excluding stoma appliances, or	
Yes excluding incontinence appliances, or	
Yes excluding stoma and incontinence appliances, or	
Yes just dressings, or	
No - appliances are not dispensed	

2. Delivery of dispensed items

Do you offer a delivery service?	Yes	No
----------------------------------	-----	----

If yes is the service available to all?	Yes	No
---	-----	----

If the service is restricted, please confirm the patient groups who may use the service.

--

3. Apart from English which other languages, if any, are available to patients from staff at the premises every day- please list main languages spoken

List languages spoken

4. Housing developments

There are currently a number of housing and other developments taking place across Kent with more planned and the PNA will need to identify whether the needs of those moving into new houses can be met by the existing spread of pharmacies, dispensing appliance contractor and dispensing doctor premises. Thinking about your dispensing service only please select the option that best reflects your practice's situation at the moment:

	Please tick one of the boxes
We have sufficient capacity within our existing premises and staffing levels to manage the increase in demand in our area.	
We don't have sufficient premises and staffing capacity at present but could make adjustments to manage the increase in demand in our area.	
We don't have sufficient premises and staffing capacity and would have difficulty in managing an increase in demand.	

5. Provision of services post Covid-19

We recognise that you will have made a number of changes to how your dispensing service is provided as a result of Covid-19. Please can you give us information on those changes that you will be taking into the 'new normal'?

--

6. Please provide us with your contact details.

Telephone number:	

31 Appendix K – Consultation Report

1. Introduction

As part of the pharmaceutical needs assessment process the Health and Wellbeing Board is required to undertake a consultation of at least 60 days with certain organisations. The purpose of the consultation is to establish if the pharmaceutical providers and services supporting the population of the Health and Wellbeing Board's area are accurately reflected in the final pharmaceutical needs assessment document. This report outlines the considerations and responses to the consultation and describes the overall process of how the consultation was undertaken.

2. Consultation process

In order to complete this process, the Health and Wellbeing Board has consulted with those parties identified under regulation 8 of the NHS (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013 as amended, to establish if the draft pharmaceutical needs assessment addresses issues that they considered relevant to the provision of pharmaceutical services. Examples of consulted parties include:

- The Local Pharmaceutical Committee covering the county
- The Local Medical Committees covering the county • Healthwatch Northamptonshire
- The Clinical Commissioning Groups
- NHS Trusts
- NHS England
- Neighbouring Health and Wellbeing Boards, and
- Contractors on the pharmaceutical lists for the area of the Health and Wellbeing Board.

In addition, the consultation documents were made available via Kent County Council's consultation portal and those who have registered to receive emails regarding new consultations were alerted to the consultation. The statutory consultees were contacted via email explaining the purpose of the pharmaceutical needs assessment and that, as a statutory party, the Health and Wellbeing Board welcomed their opinion on whether they agreed with the content of the proposed draft. They were directed to the Kent County Council website to access the document and consultation questionnaire. Consultees were given the opportunity to respond by completing a set of questions and/or submitting additional comments. This was undertaken by completing the questions online. The questions derived were to assess the current provision of pharmaceutical services, have regard to any specified future circumstance where the current position may materially change and identify any current and future gaps in pharmaceutical services. The consultation ran from 7 June 2022 until 7 August 2022. This report outlines the considerations and responses to the consultation. It should be noted that participants in the consultation were not required to complete every question.

The online consultation received xx responses, which identified themselves as the following:

Table here

3. Summary of online questions, responses and Health and Wellbeing Board considerations

Appendix L – Opening Hours
